15. Eulogy

People desperately wish
To survive after death.

Yet, they pass away without understanding
The spirit of human wellbeing
Is still very much alive.

The next generation is inspired.
The spirit is transmitted again to the next
And to the next.

This is the objective of all moral lessons.

You are made of
Analytical, spiritual,
And emotional capacities.
Your experience, your zeal,
Your will for change.
Your will to be strong.

It is worth this battle to attain our legacy.

Is this a true afterlife?
Many would say “yes.”

Contents

1. A Cosmic Being	5
2. Listen to everything you can hear	5
3. Meditation on Awareness	6
4. Meditation Psychedelic	7
5. Evensong	8
6. Waving of the Banner	9
7. Hymn To The Gray Skies	10
8. Fortune	10
9. Check and Denounce	11
10. Life Force	12
11. Without Music	12
12. With Music	12
13. Music	13
14. Inherent collective aid	13
15. Eulogy	14

Trigger intervention rather than effects
Or it's just a song about the effects.

Elevation.

13. Music

When one listens intently,
They don't have any questions.

As communities, economies, media , and social networks develop,
We try to look for significance that has already been there.

Life may be a difficult sleepwalk.
Fill this life with song.

The room is full of song
When all matter is music.

Truth.

14. Inherent collective aid

For eons, within the human psyche,
Mutual aid is an inherent quality.

Our very existence has maintained this,
Regardless of the neo-liberal propaganda.

This does not mean that there should be no progress
Or that adaptation is not desirable.

It is to say that we can create a better life
through cooperation and mutual aid.

10. Life Force

From a celestial viewpoint,
Each of us is essential.

It is much more than seeking to delude
But to consider the world
With a greater view of the essence,
And advantages of the cosmos,
As it really is.

11. Without Music

Without song, the world can not change.
A pattern, a certain tone,
And a little note moving the world.

If the world will crumble,
The music will end.

It is time to do what is impossible.
Save the world.

Protection.

12. With Music

Everybody has to teach.
Knowledge cleanses poverty.

Is the source of knowledge always traveled?

The trouble with this earth's people
Is they appear to believe all
Except what they don't recognize.

1. A Cosmic Being

You are a Being of Nature.

You come from dimensions
Of powerful strength and light.
Return to those worlds
By discovering yourself within.

You are an explorer
In service to our planet.
Explore new concepts
For our world is endangered
By the absence of new ideas.

Our world is in turmoil because
Of the lack of conscience.

Within the body
Every atom was born
Of an exploding star.

We are made of stardust.

2. Listen to everything you can hear

Regardless of what you believe.
In every case. In any case.
Listen with purpose. Speak with intention.

We're developed from our first findings
Discovered as children.

The sounds of ordinary living,
And one's own thoughts ...

Perhaps the hidden sound of music
Create an elevated consciousness state.
Everything that occurs leads to something.

We've been protecting ourselves.

By increasing awareness,
New neural pathways can replace the old.

The answer to the question is profound,
However,
It needs time.

3. Meditation on Awareness

This should be a simple session
In a simple space.
Sitting upright in a dimly lit space
With eyes closed, and mouth shut.

Breathe deeply and naturally through the nose
Bringing awareness to the sensations of the nostrils.
There is no need for counting, mental image, or
mantra.
Simply breathe deeply and naturally.

The moment you become aware
That you have drifted in your mind,
That you are lost in thought,
That you are daydreaming,
Simply return to the breath.

Breathe deeply and naturally
With eyes closed, and mouth shut
Bringing awareness to the sensations
on the area of the nostrils.

But pursue revolutionary thoughts.

Prosperity is one view of the world.
Yet, one can not move over
And embrace obligations
Unless you learn deeply of the
Potential.

If you assume there is no path,
Then you know that there is no route.
You will move for a prosperous world
If you find you want to change.

You have the capacity for everything.

9. Check and Denounce

The discovery and denunciation
Of the rule of
Power, dominance or inequality
In all fields of existence
Is only logical and a must.

If an argument could be created,
To expand the rights of all humanity,
Those in power
Would declare it to be unconstitutional
And eliminated.

You either recite the same traditional lectures
Or you say something new from the ether.

However you put it,
You are discovering something newer and deeper.

7. Hymn To The Gray Skies

The supposition
Who's going right now?
This will be there.
Is the toxin of the corrosion
Every amazing experience.
With the system moving on,
Humanity organizes before occupation
With a system of Excellence
The Environment Control
Will it have to move on?
So it occurs eventually.

Lead our planet
The death of the animals.

prior to society reconstruction
Through an undivided society
Using his experience of culture,
Performance of society,
Technology advances,
technical experience technical experience,
Creation for its own good
Across the developed nation
Any environmental issue has its roots
About the subjects of culture.
It is not gradually degenerating.
Our search is Utopia
Spirit is our truth.
It is a transition that our vision is.

8. Fortune

We need not to pursue warriors,

One begins the journey
By taking the first step of the way.

Sensations come and go
Like waves in the stormy sea.
Conscious breathing is our anchor.
The source of our life is breathing.

4. Meditation Psychedelic

This should be a simple session
In a simple space.
Lay back in an atmosphere of a natural setting
That was not substantially affected
By human behavior.
It's best to be alone, still
In the wilderness.
You note the echo
Of the thousand harps
If tomorrow is at rest
You have been extracted.

Surround yourself with:

Air, fire, soil, water,
wood and textiles
Ancient sounds or silence
Greenness, fruit, scent
Connect to Spirit's seeds
Beautiful latent flowers
Taking a lane
Regarding your reflections
Only to get the feelings
Choose the guide

And discover.
Where is the limit?
Choose your own story!
Adoration and friendship
Let it go! Let it fly!
Let it float!
Sounds of the drops
A number of consciousnesses
In tomorrow's prosperity
You do. You will.
Rising steadily
Concerning
expectations broken
Clear Views
Deceived and naive
Ultimately, the nature
And instead.
Now. Then. Too.

5. Evensong

Revolutionary art will promote
A spirit of rebellion.

Revolutionary art will promote
Class and universal identity
In order to combat injustice
And outdated philosophies.

Revolutionary art will promote
Humanity, morality and safety,
Not secrecy or deception.

Art creates love.

Art creates hope.
Art creates perspectives.

The artist assumes
A significant position in society
And can contribute
To transcendent conditions
For the proletariat.

A culture that is in harmony
With its citizens capabilities and needs
B
Wellness for every being is not a fantasy,
but a necessity.

6. Waving of the Banner

Ignorance is society's
Most destructive component.

Patriotism believes that
Our planet is split into tiny spaces.
A closed barrier to everyone else.

Citizens are brought up to feel nobler,
More prosperous, more intelligent,
More valuable than those
Residents of other places.

All residents in this chosen position therefore
Will battle, destroy, and die
To rule over other people.

This is a greedy arrogance
And the most harmful ignorance.

There is never a winner.
