Forum of German Speaking Anarchists

Forum of German Speaking Anarchists

2006

At the moment there is not an anarchist federation in the german speaking countries. It's just a forum, or meeting space of german speaking anarchists (FdA) which is composed of some groups and individuals. The FdA was born out of the Initiative for an Anarchist Federation in Germany (I-AFD), created in 1989 and which joined IFA. In order to keep its international contacts the I-AFD became FdA in 2000, following the important crisis which its joining IFA had brought about. But inspired by an IFA meeting held at Mannheim in 2003 the comrades of the Rhin-Neckar region and from the Palatinate went on to create the Anarchist Federation of the Rhin-Neckar-Palatinate (AFRNP) which did then join the FdA.

The FdA, as well as focusing on the international contacts struggles for the building of a german speaking federation. In the meanwhile, an active network of local anarchist groups, organised in regional federations as building blocks of such an anarchist federation, is still lacking. Regretfully, there are not that many groups defining themselves as anarchists, and there is only a regional federation in the german speaking areas. It is therefore necessary that

the german speaking anarchists start forming these structures. Until now, they have been involved in movements confronting a single enemy at a time: fascism, racism, patriarchy, atomic energy, war, repression, etc.

In July 2005, the FdA met at Cologne, and some new members were accepted in its ranks. In august 2005 the FdA members took part in different activities in anarchist camps in Germany and Switzerland, and have presented the FdA to those taking part in this camps. In these occasions we have got in touch with other anarchists from germany, Austria and Switzerland, who are interested in joining the FdA.

We are confident on being able to progress towards the organization of the anarchist movement in the german speaking areas in the following years.
