The sad fact is that nobody knows very much about the police use of force, much less about the use of excessive force. Its prevalence, frequency, and distribution remain, for the most part, unmeasured; and there is only limited information available concerning its perpetrators, victims, forms, and causes. Nevertheless, some information is available through the sources mentioned above. And, imperfect though they are, the statistics they produce may point to a reliable baseline, an estimated minimum to which we can refer with a fair amount of certainty. With that aim in mind, and with more than a little trepidation, we should turn our attention to the data that is available, and consider what it indicates.

A Look at the Numbers

According to a Justice Department survey, 19 percent of American adults (43.5 million people) had direct face-to-face contact with the police in 2005. Of those surveyed, 1.6 percent reported the use of force or its threat. In other words, out of every hundred people the police come into contact with, they will threaten or hurt one or two of them. The rate is much higher for Blacks (4.4 percent) and Hispanics (2.3 percent) than for...
For example, attempts to assess the prevalence of force based on arrest reports leave out those cases where force was used but no arrest was made.\textsuperscript{50} Like the victims (though for very different reasons), the perpetrators of police violence are also likely to under-report its occurrence. And they are likely to understate the level of force used and the seriousness of resultant injuries when they do report it.\textsuperscript{51} Individual medical records, meanwhile, are not generally available for examination, except when presented as evidence in a complaint hearing or civil trial. And even if emergency rooms were to maintain statistics on police-related injuries, many victims of violence, especially the uninsured, do not seek treatment except for the most serious of injuries.

Other indicators, such as media reports and direct observation, are similarly flawed. The media, of course, can only report on events if they know about them. Furthermore, they are unlikely to report on routine uses of force because it is routine.\textsuperscript{52} Direct observation is limited by the obvious fact that no one can observe everything, everywhere, all the time. And observation can lead a subject (either the officer or the suspect) to change his behavior while he is being observed. In humanitarian terms, such deterrence is all for the good, but it doesn’t do much for the systematic study of police activity or the measurement of police violence.

\textsuperscript{51} McEwan, National Data Collection, 67.

\textsuperscript{52} Sociologist (and former reporter) Rodney Stark explains that the American news media are not well suited for covering chronic social problems and face additional hurdles when reporting on police abuse because they rely on police for information concerning other stories. Rodney Stark, \textit{Police Riots: Collective Violence and Law Enforcement} (Belmont, CA: Focus Books, 1972), 217–18.
Many people fail to make a complaint of any kind, either because they would like to put the unpleasant experience behind them, because they fear retaliation, because they suspect that nothing can be done, or because they feel they will not be believed.\textsuperscript{47} One survey from the Bureau of Justice Statistics found that "less than 5% of persons who believed the police had not behaved properly filed a complaint."\textsuperscript{48} Hence, measures that depend on victim reporting are likely to represent only a small fraction of the overall incidence of brutality.

Naturally, the victim is not always the best judge as to whether force was excessive, but in some cases, he or she may be the only source willing to admit that force was used at all. This fact provides another reason to separate questions concerning the legitimacy of violence from those concerning its prevalence. One report notes:

The difficulties in measuring excessive and illegal force with complaint and lawsuit records have led academics and practitioners to redirect their attention to all use-of-force incidents. The focus then becomes one of minimizing all instances of police use of force, without undue concern as to whether force was excessive. From this perspective, other records, such as use-of-force reports, arrest records, injury reports, and medical records, become relevant to measuring the incidence of the problem.\textsuperscript{49}

Of course, these indicators also have their shortcomings. Arrest records, medical records, and the like will surely reveal uses of violence that have not resulted in lawsuits or formal complaints. But they will still underestimate the overall incidence of force, since not every case will be accurately recorded.

\textsuperscript{47} Charles J. Ogletree, Jr. et al., \textit{Beyond the Rodney King Story: An Investigation of Police Misconduct in Minority Communities} (Boston: Northeastern University Press, 1995), 52–53.

\textsuperscript{48} Lynn Langton and Matthew Durose, \textit{Police Behavior During Traffic and Street Stops, 2011} (Bureau of Justice Statistics, Summer 2013), 1.

\textsuperscript{49} Adams, "Police Use of Force," 10.
In 1994, Congress decided to require the Justice Department to collect and publish annual statistics on the police use of force. But this effort has been fraught with difficulty. Unlike the Justice Department’s other major data-collection projects—the Uniform Crime Reports provide a useful contrast—the examination of police violence has never received adequate funding, and the reports appear at irregular intervals. Furthermore, the data on which the studies are based are surely incomplete. Many of the reports rely on local police agencies to supply their numbers, and reporting is voluntary.\footnote{Amnesty International discusses these problems in greater detail. \cite{Amnesty International, Race, Rights, and Police Brutality, 31.}} Worse, the information, once collected and analyzed, is often put to propagandistic uses; its presentation is sometimes heavily skewed to support a law enforcement perspective. But despite their many flaws, the Justice Department reports remain one of the most comprehensive sources of information about the police use of force.

These reports represent various approaches to the issue. They measure the use of force as it occurs in different circumstances, such as arrests and traffic stops. They examine both the level of force used and the frequency with which it is employed. And some studies collect data from victims as well as police.

Unfortunately, under-reporting handicaps every means of compiling the data. One report states frankly: “The incidence of wrongful use of force by police is unknown… Current indicators of excessive force are all critically flawed.”\footnote{Adams, “Police Use of Force,” 10. Emphasis in original.} The most commonly cited indicators are civilian complaints and lawsuits. But few victims of police abuse feel comfortable complaining to the same department under which they suffered the abuse, and lawyers usually only want cases that will win—in other words, cases where the evidence is clear and the harm substantial.\footnote{McEwan, National Data Collection, 63–64.}
the application of legal force often feels quite a lot like abuse. But there is no paradox here, not really. The state, claiming a monopoly on the legitimate use of force, needs to distinguish its own violence from other, allegedly less legitimate, uses of force. In non-totalitarian societies, authority exists within carefully prescribed, if vague (one might suggest, intentionally vague), boundaries. Action within these limits is “legitimate,” similar action outside of such limits is “abuse.” But in the case of police violence, legitimate and excessive force exist as part of the same continuum, rather than as distinct species of action. (Even the term “excessive force” implies this.) Hence, where you or I see brutality, the cop sees only a day’s work. The authorities—the other authorities—more often than not side with the policeman, even where he has violated some law or policy. That is, in a sense, only fair, since the police officer—unless he engages in mutiny—nearly always sides with them. The main difference, then, between policing and police abuse is a rule or law that usually goes unenforced. The difference is the words.

**Why We Know So Little about Police Brutality**

The preceding observations provide a framework for understanding police brutality, but tell us almost nothing about its prevalence, its forms, its perpetrators, or its victims. Solid facts and hard numbers are very difficult to come by. This dearth of information may say something about how seriously the authorities take the problem. Until very recently, nobody even bothered to keep track of how often the police use force—at least not as part of any systematic, national ef-

---

While the former is more likely to grab headlines, it is the latter that makes the largest contribution to the community’s reservoir of grievances against the police. But, since the force in question is within the bounds of policy, the excessive use of force is more difficult to address from the perspective of discipline and administration.

All of this controversy and confusion points to a very simple fact: police brutality is a normative construction. It involves an evaluation, a judgment, and not simply a collection of facts. David Bayley and Harold Mendelsohn explain:

[P]olice brutality is not just a descriptive category. Rather it is a judgment made about the propriety of police behavior.... Since the use of the phrase implies a judgment, people may disagree profoundly about whether a particular incident, even though it involves the obvious use of force, is a case of brutality.

In short, the technical distinctions between, say, excessive force and illegal force, while bringing some measure of precision to the discussion, lead us no nearer to a resolution of these disputes. That’s because, at root, the disagreement is not about whether a rule was broken, or a law violated. The question—the real question—is one of legitimacy. The larger conflict is a conflict of values.

Let’s consider this problem anew: the trouble, or part of it, comes in discerning the legitimate and illegitimate uses of violence. Abuses of authority may look very much like their less corrupt counterparts. Or, stated from a different perspective,

41 Tom McEwan, National Data Collection on Police Use of Force (U.S. Department of Justice, Bureau of Justice Statistics and National Institute of Justice, April 1996), 46. Emphasis in original.
This case highlights the disparate judgments possible, even given the same facts. A great many people feel about police brutality as Justice Potter Stewart felt about pornography: they can’t define it, but they know it when they see it. Unfortunately, they might not know it when they see it. Many police tactics—the use of pressure points, the fastening of handcuffs too tightly, and the direct application of pepper spray, for example—really don’t look anything like they feel. More to the point, in most cases, nobody sees the brutality at all, except for the cops and their victims. The rest of us have to rely on secondary information, usually taking one side or the other at their word.

Things get even stickier when general patterns of violence are scrutinized, even where no particular encounter rises to the level of official misconduct. As one Justice Department study explains: “Use of excessive force means that police applied too much force in a given incident, while excessive use of force means that police apply force legally in too many inci-

of the relevant standards may not be perfect. Bobby Lee Cheatham, a Black cop in Miami, noted the different standards among the police: “To [White officers], police brutality is going up and just hitting on someone with no reason.... To me, it’s when a policeman gets in a situation where he’s too aggressive or uses force when it isn’t needed. Most of the time the policeman creates the situation himself.”

Even where the facts of a case are agreed upon (which is rare enough), there may yet be intense disagreement about the relevant standards of conduct and their application to the particular circumstances. For example, in October 1997, sheriff’s deputies in Humboldt County, California, swabbed pepper-spray fluid directly into the eyes of non-violent anti-logging demonstrators locked together in an act of civil disobedience. Amnesty International called the tactic “deliberately cruel and tantamount to torture.” A federal judge refused to issue an injunction against the practice, however, claiming that it only caused “transient pain.”

The United Nations Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment defines torture as “any act by which severe pain or suffering, whether physical or mental, is intentionally inflicted on a person for such purposes as obtaining from him or a third person information or a confession, punishing him for an act he or a third person has committed or is suspected of having committed, or intimidating or coercing him or a third person, or for any reason based on discrimination of any kind, when such pain or suffering is inflicted by or at the instigation of or with the consent or acquiescence of a public official or other person acting in an official capacity.” U.N. General Assembly, “Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment” [General Assembly Resolution 39/46: December 1984] Basic Human Rights Instruments (Geneva: United Nations Centre for Human Rights; and Turin: International Centre of the International Labour Organization, 1998), 116.
tional grounds. Different definitions of force and different definitions of police-public interactions will yield different rates.... In particular, broad definitions of use of force, such as those that include grabbing or handcuffing a suspect, will produce higher rates than more conservative definitions.... Broad definitions of police-public "interactions," such as calls for assistance, which capture variegated requests for assistance, lead to low rates of use of force. Conversely, narrow definitions of police-public interactions, such as arrests, which concentrate squarely on suspects, lead to higher rates of use of force. Adams himself outlines multiple definitions for use-of-force violations, focusing on different aspects of the misconduct.

For example, "deadly force" refers to situations in which force is likely to have lethal consequences for the victim. [The victim need not necessarily die.] ... [T]he term "excessive force" is used to describe situations in which more force is used than allowable when judged in terms of administrative or professional guidelines or legal standards.... "Illegal" use of force refers to situations in which use of force by police violated a law or statute.... "Improper," "abusive," "illegitimate," and "unnecessary" use of force are terms that describe situations in which an officer's authority to use force has been mishandled in some general way, the suggestion being that administrative procedure, societal expectations, ordinary concepts of lawfulness, and the principle of last resort have been violated, respectively.38

Adding to the difficulty of comparing one set of figures with another, each of these concepts refers to standards that vary according to the agency, jurisdiction, and community involved. Even within a single agency, agreement on the interpretation

Foreword: Police and Power in America

What are police for?

Everybody thinks they know. But to assume that the police exist to enforce the law or fight crime is akin to beginning an analysis of military policy with the premise that armies exist to repel invasions. The ends an institution pursues are not always the same as those it claims to pursue.

I begin, then, with a call for skepticism, especially about official slogans and publicly traded justifications. Let us focus less on what the police say they are doing and instead assess the institution based on what it actually does. We should ask, always, who benefits and who suffers? Whose interests are advanced, and who pays the costs? Who is protected and served? Who is bullied and brutalized? The answers will tell us something of the forces directing the police, both in specific circumstances and in the larger historical sense. They will also reveal the interests the institution serves and the ends it promotes.

This book discusses much of what is worst about the police. It describes their actions largely in terms of intolerance, corruption, political repression, and violence. The first chapter, "Police Brutality in Theory and Practice," offers an overview of police violence, its prevalence, causes, and consequences. It is followed by a history of the modern police institution, beginning with "The Origins of American Policing" in Chapter 2. That section traces the lineage of our modern police back to the slave patrols and other earlier forms, while Chapter 3, "The Genesis of a Policed Society," weighs the significance of
the new institution and the changing role of the state. Chapters 4 and 5—“Cops and Klan, Hand in Hand” and “The Natural Enemy of the Working Class”—continue this examination with a look at the use of police to stifle the social ambitions of racial minorities (especially African Americans) and workers. The sixth chapter, “Police Autonomy and Blue Power,” discusses efforts to reform policing, especially during the twentieth century, and analyzes the relationship between reform movements and the emergence of the police as a political force. Then, “Secret Police, Red Squads, and the Strategy of Permanent Repression” and “Riot Police or Police Riots?” (Chapters 7 and 8) detail intelligence operations and crowd control strategies. Chapter 9, “Your Friendly Neighborhood Police State,” brings the discussion up to the present, focusing on current trends such as militarization and community policing. And the afterword, “Making Police Obsolete,” considers community-based alternatives to policing, especially those connected to resistance movements here and abroad.

Throughout, the focus is on police in their modern form, particularly in urban departments in the United States. Some discussion of earlier models will be featured as background, and conditions in other countries are sometimes described by way of comparison. Likewise, the mention of other law enforcement authorities—federal agencies, county sheriffs, private guards, and the like—will be unavoidable to the degree that they influence, resemble, or take on the duties of the municipal police.

---

1 For example, large, bureaucratic, and paramilitary sheriffs departments—like those in Los Angeles County and Cook County—are almost indistinguishable from municipal police. In contrast, police in very small communities often have more general duties and personal ties to the people they encounter; these officers will be more “sheriff-like.” David N. Falcone and L. Edward Wells, “The County Sheriff as a Distinctive Policing Modality,” in Policing Perspectives, eds. Larry K. Gaines and Gary W. Cordner (Los Angeles: Roxbury Publishing, 1999), 48–49, 52.

---

In relation to that community, and the history and pattern of similar abuses.

If we are to understand the phenomenon of police brutality, we must get beyond particular cases. We can better understand the actions of individual police officers if we understand the institution of which they are a part. That institution, in turn, can best be examined if we have an understanding of its origins, its social function, and its relation to larger systems like capitalism and White supremacy.

Let’s begin with the basics: violence is an inherent part of policing. The police represent the most direct means by which the state imposes its will on the citizenry. When persuasion, indoctrination, moral pressure, and incentive measures all fail—there are the police. In the field of social control, police are specialists in violence. They are armed, trained, and authorized to use force. With varying degrees of subtlety, this colors their every action. Like the possibility of arrest, the threat of violence is implicit in every police encounter. Violence, as well as the law, is what they represent.

**Defining Brutality**

The study of police brutality faces any number of methodological barriers, not the least of which is the problem of defining it. There is no standard definition, nor is there one way of measuring force and excessive force. As a consequence, different studies produce very different results, and these results are difficult to compare. Kenneth Adams, writing for the National Institute of Justice, notes:

Because there is no standard methodology for measuring use of force, estimates can vary considerably on strictly computa-
employ it, and all the while adroitly ignore their own complicity in the institutions of White supremacy.

James Baldwin, again in his “Letter from Harlem,” imagines the predicament of a White policeman patrolling the ghetto: “He too believes in good intentions and is astounded and offended when they are not taken for the deed. He has never, himself, done anything for which to be hated.... But,” Baldwin asks, “which of us has?” 35

The Basics

We are encouraged to think of acts of police violence more or less in isolation, to consider them as unique, unrelated occurrences. We ask ourselves always, “What went wrong?” and for answers we look to the seconds, minutes, or hours before the incident. Perhaps this leads us to fault the individual officer, perhaps it leads us to excuse him. Such thinking, derived as it is from legal reasoning, does not take us far beyond the case in question. And thus, such inquiries are rarely very illuminating.

The shooting of Oscar Grant, the beating of Rodney King, the arrest of Marquette Frye, the killing of Arthur McDuffie, and any of the less noted atrocities I’ve mentioned here in passing—any of these may be explained in terms of the actions and attitudes of the particular officers at the scene, the events preceding the violence (including the actions of the victims), and the circumstances in which the officers found themselves. Indeed, juries and police administrators have frequently found it possible to excuse police violence with such explanations.

The unrest that followed these incidents, however, cannot be explained in such narrow terms. To understand the rioting, one must consider a whole range of related issues, including the conditions of life in the Black community, the role of the police

As the narrative progresses, several related trends become discernible. The first is the expansion of police autonomy and the subsequent growth of their political influence. The second is the continual effort to make policing more proactive, with the aim of preventing offenses. Related to each of these is the increased penetration of police authority into the community and into the lives of individuals. These trends are related to larger social conditions—slavery and segregation, the rise and fall of political machines, the creation of municipal bureaucracies, the development of capitalism, and so on. It is argued, in short, that the police exist to control troublesome populations, especially those that are likely to rebel. This task has little to do with crime, as most people think of it, and much to do with politics—especially the preservation of existing inequalities. To the degree that a social order works to the advantage of some and the disadvantage of others, its preservation will largely consist of protecting the interests of the first group from the demands of the second. And that, as we shall see, is what the police do.

Robert Reiner claims that “[to] a large extent, a society gets the policemen it deserves.” 2 It is hard to know whether Mr. Reiner is extremely optimistic about the police or extremely cynical about society. But undeniably, the history of our society is reflected in the history of its police. Much of that history clashes with our nation’s patriotic self-image. The history of America’s police is not the story of democracy so much as it is the story of the prevention of democracy. Yet there is another story, an ever-present subtext—the story of resistance. It, too, drives this narrative, and if there is a reason for hope anywhere in this book, we may find it here—amidst the slave revolts, strikes, sit-ins, protest marches, and riots.

---

35 Baldwin, “Fifth Avenue, Uptown,” 66.

Author’s Preface
Preface, 2014

In the summer of 2014, as I was working on the revisions for this new edition, rioting erupted in a Midwestern suburb. The incident that sparked the unrest was, in most respects, sadly typical. A white cop confronted a black teenager over a trivial violation of the law—literally, an everyday occurrence. And, as has happened many times before, at the end of the encounter, the young man was dead.

Michael Brown had been walking in the street with a friend when police confronted them. Police say that Brown attacked Officer Darren Wilson and tried to take his gun, but witnesses insist that he had his hands in the air when he was fatally shot. Police also note that Brown had stolen some cigars from a convenience store a few minutes earlier, though Officer Wilson did not know that at the time. What is indisputable is that Wilson shot and killed Brown, and that Brown was not armed.1

This story was painful, and familiar. In fact the only reason we know these details—the reason it is a story and not simply a statistic—is because of what happened next: The people of Ferguson, Missouri fought back.

Among those injured in the riots was an elderly White man named Martin Weinstock. Weinstock was hit in the head with a piece of concrete and suffered a fractured skull. He was hospitalized for six days. Still, he told an interviewer:

They should only know that I agree with their anger. If the people who threw the concrete were brought before me in handcuffs, I would insist that the handcuffs be removed, and I’d try to talk to them. I would say that I understand and that I’m on their side. I have no anger at all. But they’ll never solve their problems by sending people like me to the hospital.33

Weinstock is right: violence directed against random representatives of some dominant group is hardly strategic, much less morally justifiable. But if such attacks are (as Porter and Dunn insist) “shocking,” it can only be because Black anger has so rarely taken this form.

White violence against Black people has never been limited to the destruction of their property. Even in Miami, Black people got the worst of the violence. Of the seventeen dead, nine were Black people killed by the police, the National Guard, or White vigilantes.34 Are these deaths somehow less shocking than those of White people?

Yet—how loudly White people denounce prejudice when it is directed against them, and how quietly they accept it as it continually bears down on people of color. They indignantly point out the contradiction when those who object to prejudice

32 Ibid., xiii.
33 Ibid., 55–56.
34 These vigilantes acted not from panic, or in self-defense, but in planned drive-by attacks. Ibid., 71.
man named Arthur McDuffie. McDuffie, who was riding his cousin’s motorcycle, allegedly popped a wheelie and made an obscene gesture at Police Sergeant Ira Diggs, before leading police on an eight-minute high-speed chase. Twelve other cars joined in the pursuit, and when they caught McDuffie, between six and eight officers beat him with heavy flashlights as he lay handcuffed, face down on the pavement. Four days later, he died.30

Three officers were charged with second-degree murder, and three others agreed to testify in exchange for immunity. Judge Lenore Nesbitt called the case “a time bomb” and moved it to Tampa, where an all-White jury had recently acquitted another officer accused of beating a Black motorist. The defense then used its peremptory challenges to remove all Black candidates from the jury. The outcome was predictable: the cops were acquitted; crowds then looted stores, burned buildings, and attacked White passers-by. Crowds also laid siege to the police station, breaking its windows and setting fire to the lobby. When calm returned, seventeen people were dead, 1,100 had been arrested, and $80 million in property had been damaged. Four hundred seventeen people were treated in area hospitals, the majority of them White.31

Here was a key difference: in Miami, the typical looting and burning of White-owned property were matched with attacks against White people. In the disorders of the 1960s, attacks against persons had been relatively rare. In three of the sixties’ largest riots—those of Watts, Newark, and Detroit—the crowd intentionally killed only two or three White people. Bruce Porter and Marvin Dunn comment:

What was shocking about Miami was the intensity of the rage directed against white people: men, women and children

Suburban Warfare

Officer Darren Wilson shot and killed Michael Brown on August 9, 2014. The next night, August 10, marked the beginning of a cycle of antagonism and escalation, with police in riot gear and crowds looting stores. By August 11, cops were firing rubber bullets and tear gas. Soon the crowds were battling them with rocks, bricks, bottles, firebombs, and occasional gunfire.3 Soon the crowds were battling them with rocks, bricks, bottles, firebombs, and occasional gunfire.3 “The effect,” as USA Today described it, “was a city turned war zone.”4

The police response surely helped to inflame the situation. One resident told a reporter: “When I ... see a cop in riot gear, first thing I think is, 'Riot.' When I see someone that looks like they’re ready to fight me, I’m going to put up my fists.”5

The cops wore camouflage fatigues and body armor; some carried assault rifles, even aiming them at protestors. They blocked off streets with armored cars, set up sniper’s nests, and filled middle-class neighborhoods with tear gas. In an effort to de-escalate, the Missouri State Highway Patrol took over crowd control. Captain Ron Johnson, a Black man from the area, expressed sympathy with the demonstrators and promised not to use tear gas; but faced with ongoing rioting, his officers did so regardless. Soon the governor imposed a curfew and deployed the National Guard. Amnesty International sent observers and called for an investigation into

the police action. Navi Pillay, the UN High Commissioner for Human Rights issued a statement “condemning” the excessive use of force by police, “calling” for the right of protest to be respected, and accusing the United States of practicing “apartheid.”

Clearly worried, the White House began calling civil rights leaders around the country—1,050 of them—to enlist these participants to help keep the situation calm and focused. Mediators from the Justice Department’s Community Relations Service facilitated town hall meetings, inviting in Ferguson residents, police, and city officials—but excluding the media. Some members of the clergy took to the streets to urge peace, a few even calling for an end to protests altogether. Meanwhile, the right-leaning militia-style Oath Keepers

---

10 One activist, seventy-nine-year-old Percy Green, was critical of such efforts: “Nothing has changed in terms of the establishment.... You’ll get ministers to say, ‘Oh Lord, you shouldn’t do none of that.’ You get some people to say that violence will get you nowhere.... But yet, still the establishment will perpetuate violence against you.... What they want to do is make the demonstration [as] ineffective as possible.” Quoted in Raven Rakia, “Between the Peacekeepers and the Protestors in Ferguson,” Truthout, September 9, 2014, accessed December 28, 2014, www.truth-out.org.

---

Specific events or incidents exemplified and reinforced the shared sense of grievance.... With each such incident, frustration and tension grew until at some point a final incident, often similar to the incidents preceding it, occurred and was followed almost immediately by violence.

As we see it, the prior incidents and the reservoir of underlying grievances contributed to a cumulative process of mounting tension that spilled over into violence when the final incident occurred. In this sense the entire chain—the grievances, the series of prior tension-heightening incidents, and the final incident—was the "precipitant" of disorder.25

The Kerner report goes on to note, “Almost invariably the incident that ignites disorder arises from police action. Harlem, Watts, Newark, and Detroit—all the major outbursts of recent years—were precipitated by routine arrests of Negroes for minor offenses by white officers.”26

A few years earlier, in his essay “Fifth Avenue, Uptown: A Letter from Harlem,” James Baldwin had offered a very similar analysis:

[T]he only way to police a ghetto is to be oppressive. None of the Police Commissioner’s men, even with the best will in the world, have any way of understanding the lives led by the people they swagger about in twos and threes controlling. Their very presence is an insult, and it would be, even if they spent their entire day feeding gumdrops to children. They represent the force of the white world, and that world’s real intentions are, simply, for that world’s criminal profit and ease, to keep the black man corralled up here, in his place.... One day, to everyone’s astonishment, someone drops a match in the powder keg and everything blows up. Before the dust has settled or the blood congeals, editorials, speeches, and civil-

26 Kerner Commission, Report, 206.

Twice in Two Weeks

On November 24, the Ferguson grand jury announced its decision: no indictment. A few days later, on December 3, in New York City, another grand jury reached the same unsatisfying

conclusion in a separate case of police violence, declining to indict officer Daniel Pantaleo for the killing of Eric Garner.

Earlier in the year, on July 17, 2014, New York City police confronted Garner, another unarmed Black man, allegedly for selling single untaxed cigarettes called “loosies.” Video shows four officers pulling Garner to the ground, one with an arm around his neck. Garner gasps repeatedly, “I can’t breathe.” He died on the way to the hospital.¹⁵

“In the span of two weeks,” U.S. Representative Marcia Fudge, chair of the Congressional Black Caucus, observed, “this nation seems to have heard one message loud and clear: there will be no accountability for taking Black lives.”¹⁶ Phrased this way, she invited a comparison, deliberately or not, between the recent grand jury decisions and the nineteenth-century legal principle, solidified in the Supreme Court’s *Dred Scott* ruling, that African Americans represent a subordinate and inferior class of beings who had been subjugated by the dominant race, and, whether emancipated or not, yet remained subject to their authority, and had no rights or privileges but such as those who held the power and the Government might choose to grant them.

Or, more simply: “they had no rights which the white man was bound to respect.”¹⁷

For *Dred Scott*, the issue was slavery; for Brown and Garner, it was murder. Connecting the cases was the failure—or rather, the refusal—of the judicial system to extend its protec-

cause of a police beating. That incident also began with a traffic violation, followed by a brief chase. Murrales crashed his car into a police cruiser and tried to flee on foot. The police caught him, clubbed him, and kicked him when he fell. They resumed the beating at the Rampart station; the attack involved a total of twenty-eight officers. One commander described his subordinates as behaving like a “lynch mob.” Though the city paid $177,500 in a settlement with Murrales, none of the officers were disciplined.²³

Such incidents, as well as the depressed economic conditions of the inner city, supplied the fuel for a major conflagration. The King beating, the video, and the verdict offered just the spark to set it off.²⁴

### A Lesson To Learn and Learn Again

Rodney King’s beating was unusual only because it was videotaped. The community that revolted following the acquittal seemed to grasp this fact, even if the learned commentators and pious pundits condemning them did not. By the same token, the revolt itself also fit an established pattern.

In 1968, the National Advisory Commission on Civil Disorders (commonly called the Kerner Commission) examined twenty-four riots and reached some remarkable conclusions:

Our examination of the background of the surveyed disorders revealed a typical pattern of deeply-held grievances which were widely shared by many members of the Negro community. The specific content of the expressed grievances varied somewhat from city to city. But in general, grievances among Negroes in all cities related to prejudice, discrimination, severely disadvantaged living conditions and a general sense of frustration about their inability to change those conditions.

²⁴ Oliver, “Anatomy of a Rebellion,” 120.
Francisco, Atlanta, Las Vegas, New York, Seattle, Tampa, and Washington, D.C.\textsuperscript{18}

Despite the media’s portrayal of the riot as an expression of Black rage, arrest statistics show it to have been a multicultural affair: 3,492 Latinos, 2,832 Black people, and 640 White people were arrested, as were 2,492 other people of unidentified races.\textsuperscript{19} Likewise, despite the media focus on violence (especially attacks on White people and Korean merchants), the data tell a different story. Only 10 percent of arrests were for violent crime. The most common charge was curfew violation (42 percent), closely followed by property crimes (35 percent).\textsuperscript{20} Likewise, the actual death toll definitely attributable to the rioters was under twenty. The police killed at least half that many, and probably many more.... Moreover, although some whites and Korean Americans were killed, the vast majority of fatalities were African Americans and Hispanic Americans who died as bystanders or as rioters opposing civil authorities.\textsuperscript{21}

Depending on whom you ask, you will hear that the riots constituted “a Black protest,” a “bread riot,” the “breakdown of civilized society,” or “interethnic conflict.”\textsuperscript{22} None of these accounts is sufficient on its own, but one thing is certain: the riots speak to conditions beyond any single incident.

In the five years preceding the Rodney King beating, 2,500 claims relating to the use of force were filed against the LAPD. To describe just one: In April 1988, Luis Milton Murrales, a twenty-four-year-old Latino man, lost the vision in one eye be-

\end{itemize}
bridges and sometimes skirmishing with police. In the first two days, 302 people were arrested, three for felonies.\textsuperscript{19}

Displays of solidarity started appearing in some unexpected places. Across the country, individual athletes and sometimes entire teams—professional and college, men’s and women’s—began wearing “I can’t breathe” T-shirts during their pre-game exercises.\textsuperscript{20} And, in the rush of one of the busiest weeks on the Congressional calendar, dozens of Capital Hill staffers walked out of their offices, gathered on the Capital steps, raised their hands in remembrance of Michael Brown, and prayed for forgiveness.\textsuperscript{21}

\textsuperscript{20} A partial list would include members of the St. Louis Rams, Chicago Bulls, Georgetown Hoyas, Notre Dame Fighting Irish (women’s), Brooklyn Nets, Cleveland Cavaliers, and Jacksonville Jaguars.

\textsuperscript{21} Chappell, “Staffers Walk Out.”

white police officers were truly judged by a jury of their peers. Viewed in this context, the verdict should not have been unanticipated.\textsuperscript{13}

Koon, Powell, Wind, and Brisenzo were acquitted. They were then almost immediately charged with federal civil rights violations, but that was clearly too little, too late. L.A. was in flames.

\section*{A Social Conflagration}

The people of Los Angeles offered a ready response to the acquittal. Between April 30 and May 5, 1992, 600 fires were set.\textsuperscript{14} Four thousand businesses were destroyed,\textsuperscript{15} and property damage neared $1 billion.\textsuperscript{16} Fifty-two people died, and 2,383 people were injured seriously enough to seek medical attention.\textsuperscript{17} Smaller disturbances also erupted around the country—in San

\textsuperscript{13} “The second development that made the outcome of the trial predictable, in retrospect, was the defense attorneys’ ability to put Mr. King, instead of the four white police officers, on trial.... It is our contention that the jury agreed with the defense attorneys’ portrayals of Mr. King as dangerous and uncontrollable, and thus rendered a verdict in favor of the four white police officers, notwithstanding the seemingly irrefutable videotaped evidence.” Melvin Oliver et al., “Anatomy of a Rebellion: A Political-Economic Analysis,” in \textit{Reading Rodney King: Reading Urban Uprising}, ed. Robert Gooding-Williams (New York: Routledge, 1993), 119–20.

\textsuperscript{15} Oliver, “Anatomy of a Rebellion,” 118.

\textsuperscript{17} Oliver, “Anatomy of a Rebellion,” 118.
Koon himself endorsed this assessment of the incident. In his 1992 book on the subject, he described the altercation: “Just another night on the LAPD. That’s what it had been.”

King was jailed for four days, but released without charges. He was treated at County-USC Hospital, where he received twenty stitches and treatment for a broken cheekbone and broken ankle. Nurses there reported hearing officers brag and joke about the beating. King later listed additional injuries, including broken bones and teeth, injured kidneys, multiple skull fractures, and permanent brain damage.

Twenty-three officers had responded to the chase, including two in a helicopter. Of these, ten Los Angeles Police Department officers were present on the ground during the beating, including four field training officers, who supervise rookies. Four cops—Stacey Koon, Laurence Powell, Timothy Wind, and Theodore Briseno—were indicted for their role in the beating. Wind was a new employee, still in his probationary period, and was fired. Two California Highway Patrol officers were disciplined for not reporting the use of force, and their supervisor was suspended for ten days. But none of the other officers present were disciplined in any way, though they had done nothing to prevent the beating or to report it afterward.

The four indicted cops were acquitted. Social scientists have argued that the verdict was “predictable,” given the location of the trial:

Simi Valley, the site of the trial, and Ventura County more generally, is a predominantly white community known for its strong stance on law and order, as evidenced by the fact that a significant number of LAPD officers live there. Thus, the four

Ramos, police made 66 percent fewer arrests and wrote 94 percent fewer tickets.\textsuperscript{23}

The rift between the cops and the mayor seems particularly deep: Lynch has complained repeatedly of a lack of support after Garner’s death, in part because Mayor de Blasio spoke publicly about a conversation in which he advised his bi-racial son to “take special care” when interacting with police. In re-tort, the PBA began offering a form for officers, instructing the mayor not to attend their funerals if they die in the line of duty. Then, when de Blasio spoke at Liu and Ramos’s funerals, hundreds of police turned their back to him.\textsuperscript{24}

“A Legitimacy Problem”

The death of Eric Garner, and that of Michael Brown, the grand jury decisions, and even the riots—all fit an established pattern, one we’ve seen repeatedly in just the past few years, beginning in Oakland in 2009, then Portland and Denver in 2010, Seattle and San Francisco in 2011, Atlanta and Anaheim in 2012, Santa Rosa, Flatbush, and Durham in 2013, and Salinas and Albuquerque earlier in 2014.\textsuperscript{25} But the scale of the crisis sparked by Brown’s shooting, and its duration, make it truly exceptional, and both political and cultural elites seem to have understood it as such. Police unions, and some commanders, as well as the reliable right-wing pundits, have obstinately defended their positions and cynically used the deaths of two hapless patrolmen to go back on the offensive. Other authorities, however, have been more careful and conciliatory, offering modest reforms

\textsuperscript{25} Some Oakland Antagonists, “From Ferguson to Oakland.”

\textbf{The Rodney King Beating: “Basic Stuff Really”}

On March 3, 1991, a Black motorist named Rodney King led the California Highway Patrol and the Los Angeles Police Department on a ten-minute chase. When he stopped and exited the car, the police ordered him to lie down; he got on all fours instead, and Sergeant Stacey Koon shot him twice with an electric taser. The other passengers in King’s car were cuffed and laid prone on the street. An officer kept his gun aimed at them, and when they heard screams he ordered them not to look. One did try to look, and was clubbed on the head.\textsuperscript{6}

Others were watching, however, and a few days later the entire world saw what had happened to Rodney King. A video recorded by a bystander shows three cops taking turns beating King, with several other officers looking on, and Sergeant Stacey Koon shouting orders. The video shows police clubbing King fifty-six times, and kicking him in the body and head.\textsuperscript{7} When the video was played on the local news, KCET enhanced the sound. Police can be heard ordering King to put his hands behind his back and calling him “nigger.”\textsuperscript{8}

The chase began at 12:40 A.M. and ended at 12:50 A.M. At 12:56, Sgt. Koon reported via his car’s computer, “You just had a big time use of force … tased and beat the suspect of CHP pursuit, Big Time.” At 12:57, the station responded, “Oh well … I’m sure the lizard didn’t deserve it … HAHA.” At 1:07, the watch commander summarized the incident (again via Mobile Data Terminal): “CHP chasing … failing to yield … passed [car] A 23 … they became primary … then tased, then beat … basic

\textsuperscript{7} Christopher Commission, \textit{Report}, 3.
\textsuperscript{8} Quoted in Ibid., 8.
after-hours attacks on the offices of law enforcement agencies. In August 2010, Seattle police shot and killed a Native American woodcarver named John T. Williams, seemingly without provocation. Weeks of protests followed. Then, in September 2010, after police killed Manuel Jamines, a Guatemalan day laborer, Los Angeles saw riots lasting three nights.5

It’s no surprise that the police come into conflict with members of the public. The police are tasked with controlling a population that does not always respect their authority and may resist their efforts to enforce the law. Hence, police are armed, trained, and authorized to use force in the course of executing their duty. At times, they use the ultimate in force, killing those they are charged with controlling.

Under such an arrangement, it is only too predictable that officers sometimes move beyond the bounds of their authority, and that the affected communities respond with anger—sometimes rage. The battles that ensue do not only concern particular injustices, but also represent deep disputes about the rights of the public and the limits of state power. On the one side, the police and the government try desperately to maintain control, to preserve their authority. And on the other, oppressed people struggle to assert their humanity. Such riots represent, among other things, the attempt of the community to define for itself what will count as police brutality and where the limit of authority falls. It is in these conflicts, not in the courts, that our rights are established.

and adjusting their rhetoric to match the nation’s overall mood. As journalist Matt Taibbi so succinctly put it, “the police suddenly have a legitimacy problem.”26

President Barack Obama did his best to equivocate, while calling for “peace and calm”: “There is never an excuse for violence against police or for those who would use this tragedy as a cover for vandalism or looting…. There’s also no excuse for police to use excessive force against peaceful protests or to throw protestors in jail for lawfully exercising their First Amendment rights.”27 Attorney General Eric Holder added, “At a time when we must seek to rebuild trust between law enforcement and the local community, I am deeply concerned that the deployment of military equipment and vehicles sends a conflicting message.”28 Soon thereafter, the president ordered a review of the police use of military weaponry.29

It’s too early to know whether any lasting structural changes will result from the current unrest, but if nothing else it has certainly changed the terms of the debate. Time magazine, for example, ran a surprising piece titled “In Defense of Rioting.” It cogently argues:

Riots are a necessary part of the evolution of society…. [Until human rights are respected] the legitimate frustration, sorrow and pain of the marginalized voices will boil over, spilling out into our streets…. Blacks in this country are more apt to riot...

because they are one of the populations here who still need to.\textsuperscript{30}

\textit{Rolling Stone}, likewise, published a short piece looking at historical—and, in retrospect, entirely justifiable—uses of property destruction, pointing to precedents like the Boston Tea Party, slave rebellions, the Suffragists, the anti-nuclear movement, and ongoing resistance to fracking.\textsuperscript{31} The magazine then went a step further, arguing that “It’s time to start imagining a society that isn’t dominated by police,” and offering suggestions to help build a “Cop-Free World.”\textsuperscript{32}

Even some conservatives—among them Senator Rob Portman, Senator Ted Cruz, Representative Paul Ryan, and the writer Erick Erickson—expressed concern about the crackdown on protests.\textsuperscript{33} “There is a systemic problem with today’s law enforcement,” Senator Rand Paul wrote in an op-ed, pointing to “militarization . . . [paired] with an erosion of civil liberties and due process” represented by “national security letters, no-knock searches, broad general warrants, [and] pre-conviction forfeiture.” Then, unexpectedly, he departed from the Tea Party script:

tried and convicted, but of manslaughter rather than murder. Rioting resumed. Damages were estimated at $750,000.\textsuperscript{2}

While clearly a limited victory, the Mehserle verdict remains remarkable. Looking back over the fifteen previous years, the \textit{San Francisco Chronicle} could find only six cases in which police were charged for on-duty shootings, and none of the thirteen officers involved were convicted.\textsuperscript{3} “If there’s one lesson to take from this,” a participant in the unrest was later to conclude, “it’s that the only reason Mehserle was arrested is because people tore up the city. It was the riot—and the threat of future riots.”\textsuperscript{4}

Grant’s killing marked the start of a cycle of unrest affecting west coast cities for the better part of two years, manifesting not only in militant protests and riots, but arson, sabotage, and ambush attacks. In October 2009, several unoccupied police cars were firebombed in Seattle; a few days later, on Halloween, two cops were shot in a drive-by attack, and one died. The following month Maurice Clemmons ambushed four cops in a Lakewood, Washington coffee shop, killing them all. On January 29, 2010, Portland police shot and killed an unarmed Black man named Aaron Campbell as he was trying to surrender; his family had called 911 because they feared he might be suicidal. In March, they shot and killed a homeless man, Jack Collins, as he approached holding an Exacto knife. Then in May, they shot and killed a young Black man named Keaton Otis, whom they had pulled over because (as one officer explained) they thought he “kind of look[ed] like he could be a gangster.” Each shooting was followed by protests of increasing militancy, as well as

\textsuperscript{4} George Ciccariello-Maher, “From Arizona to Oakland: The Intersections of Mass Work and Revolutionary Politics [Bring the Ruckus panel discussion]” (Portland, OR: October 23, 2010).
In the first hours of 2009, police boarded a Bay Area Rapid Transit train, responding to a call about a fight. They detained several young men, most of them Black, among them one named Oscar Grant. As Grant was lying face down on the platform being handcuffed, one officer, Johannes Mehserle, drew his gun, shot him in the back, and killed him.

The entire incident was recorded on video from multiple angles. Several witnesses were filming with their cell phone cameras when Grant was shot; afterward, they hid the cameras from police, and then posted the footage on the Internet. Within days, demonstrations were organized in Oakland, and quickly escalated into riots—beginning with an attack on a police car parked in front of the BART headquarters. More than 300 businesses and hundreds of cars were damaged in the unrest. Police responded with tear gas, rubber bullets, an armored personnel carrier, and more than a hundred arrests, but demonstrations continued for weeks. A year later, Mehserle was...
news that they started to worry. It was the riots that put these issues on the national agenda. No number of petitions, lawsuits, op-ed columns, or books on the subject could have had the same effect.

The riots of the previous few months pulled into focus some of the most troubling aspects of policing, and with them, some of the deepest injustices in our society. The unrest was not just about Mike Brown, Eric Garner, Officer Wilson, Officer Pantaleo, gunshots, and chokeholds. It was also about racial profiling and the standards of public order. But beyond that, too, it was about race, class, and violence—ultimately, about questions of freedom and equality.

Revisions

Our Enemies in Blue first appeared in 2004, ten years before the events described above. Yet so many of the themes central to the book have suddenly found themselves in the headlines—race, class, violence, standards of public order, rioting, crowd control, the militarization of local departments, the power of police unions, collaboration with racist paramilitaries, the co-optation of social movement leaders, the promise and perils of reform, and alternatives to policing. History, suddenly, seems very present.

I have, in this preface, only begun the story of Ferguson and the nationwide wave of resistance that followed Michael Brown’s murder. We do not yet know how that story ends, but

---

35 The New York Times pointed out that Holder’s Justice Department paid for the rubber bullets and tear gas used in Ferguson, as well as body armor and surveillance equipment. Homeland Security provided the $360,000 Bearcat armored truck. And the military supplied machine guns, armored vehicles, and aircraft, some of it retired after use in Iraq or Afghanistan. Bosman and Apuzzo, “In Wake of Clashes.”

Introduction: Broken Windows, Broken System, by Andrea Ritchie

Ritchie helped found and coordinate Streetwise & Safe (SAS), a leadership development initiative aimed at sharing “know your rights” information, strategies for safety and visions for change among LGBT youth of color who experience of gender, race, sexuality and poverty-based policing and criminalization, and now serves as the organization’s Senior Policy Counsel. Ritchie is co-author of Queer (In)Justice: The Criminalization of LGBT People in the United States (Beacon Press, 2011) and serves on the steering committee of Communities United for Police Reform (CPR).
I hope that it comes to represent, not merely a new chapter in the history of policing, but a decisive break from the past.

It is with the future, as well as the past, that this book is concerned. I began my research on policing, nearly twenty years ago now, not as an academic exercise, but because in my political organizing I was confronted with pressing questions that I did not then know how to answer. I turned to the past to help us understand the present, so that we might change the future.

Returning to the book, ten years later, my aims are largely the same. This new edition brings the history up to date and revises some of the earlier material, while keeping the same general structure, argument, and narrative as the original. As one might expect, the bulk of the revisions come toward the end of the volume. In addition to updating statistics, adding more recent examples, and correcting some mistakes or oversights, I have also substantively adjusted my analysis when new developments—or just new ideas—require it. For instance, the implications of the USA Patriot Act, shifts in crowd control strategies, and even the domestic effects of the wars in Iraq and Afghanistan, are all far clearer now than they were ten years ago. Fortunately, the decade’s changes are not all in the same direction. As policing intensifies, resistance also seems to be growing—not only in the recent riots, but in the immigrants’ rights movement, in the short-lived (but long-reverberating) Occupy encampments, and in a marked increase in experiments with community alternatives to the criminal legal system. I have tried to incorporate all of those developments into this new edition.

There is much, still, that I could have added. Historical accounts are by their very nature incomplete. There are other stories that could be told, other histories still to be uncovered—and, with each new day, more that could be said. So I begin, here, not at the end, but in the midst of a crisis. We can see in these moments of rebellion—and this is true, however they
turn out—not only anger and grief, but also an almost instinctual feeling for the demands of justice, an urgent recognition of the humanity of the oppressed, and a sense of possibility, however vague or distant, for a different kind of life, a new society.

The fires of rebellion burn with rage, but they shine with the light of hope.

—Kristian Williams
Portland, Oregon
December 31, 2014

Over the past decade, the National Coalition of Anti-Violence Programs (NCAVP) has found that law enforcement agents have consistently been among the top three categories of perpetrators of homophobic or transphobic violence against LGBTQ people reported to anti-violence organizations. In a recent national survey of LGBTQ people conducted by Lambda Legal, a quarter of respondents who had in-person contact with police reported at least one type of misconduct or harassment, including profiling, false arrests, verbal or physical assault, or sexual harassment or assault. LGBTQ people of color, LGBTQ youth, low-income LGBTQ people, and transgender people were much more likely to report an experience of at least one type of police misconduct or harassment.... Across the country, non-heterosexual youth are more likely to be stopped by the police and experience greater criminal justice sanctions not explained by greater involvement in violating the law.... Investigations of local police departments in New Orleans and Puerto Rico by the U.S. Department of Justice have documented patterns and practices of profiling and discriminatory policing of LGBTQ people, and a number of local organizations have documented department-specific patterns and practices.9

These more recent studies echo the patterns and practices of police misconduct identified by Amnesty International in its 2005 report Stonewalled: Police Misconduct and Abuse Against LGBT People in the United States—widespread homophobic, transphobic, and sexual harassment; name calling and verbal abuse by law enforcement officers; profiling and discriminatory enforcement, including citation of possession or presence of condoms as evidence of intent to engage in prostitution-related or lewd conduct offenses; failure to respect gender identity and expression when addressing members of the

9 The President’s Task Force on 21st Century Policing, Policy and Oversight.

place with alarming frequency in the context of responses to requests for assistance or investigation of domestic violence or sexual assault.

Sexual harassment and assault by law enforcement officers may take many forms, ranging from sexual comments, to unwarranted call backs to crime victims, to extorting sexual favors in exchange for leniency, to unlawful strip searches, including searches to assign gender, to forcible or coercive sexual conduct, including rape. It is by no means an isolated phenomenon, and while not an officially sanctioned law enforcement activity, is facilitated by the authority vested in law enforcement officers.

Similarly, separate testimony submitted to the Task Force on behalf of over 45 LGBT organizations pointed out that,

As noted by the NAACP’s recently released report, Born Suspect, LGBTQ people of color experience gender and sexuality-specific forms of racial profiling and police brutality. Additionally, LGBTQ people, particularly LGBTQ youth and people of color, also experience pervasive profiling and discriminatory treatment by local, state and federal law enforcement agents based on actual or perceived sexual orientation, gender, gender identity or expression, or HIV status.

Introduction by Andrea J. Ritchie: Broken Windows, Broken System

As the original edition of *Our Enemies in Blue* would predict, not much has changed in terms of how policing functions in the United States since it was first published. This reality, in and of itself, underscores the unique contribution and critical importance of this book, and of its timely update.

*Our Enemies in Blue* offers a systematic, well-researched, readable, and engaging examination of the evolution of police forces as tools of political control as well as political entities of their own. Tracing the roots of policing from imposition of colonial order in England, Ireland, and the Americas to slave patrols and urban watches allows us to see the skeleton underlying the present shape of policing, illuminates the social forces that drive policing paradigms, and charts the complicity of community members, from the Klan through George Zimmerman, in the project of controlling Black, immigrant, and working class people.

There are new names—Oscar Grant, Ramarley Graham, Mike Brown, Eric Garner, Tamir Rice, Akai Gurley—and with each of them, new moments of resistance. Yet the history of modern-day policing outlined in careful and compelling detail in the first edition of *Our Enemies in Blue*, now updated and applied to the events of the past ten years, continues to play out, not only in single incidents of deadly force against Black and Brown bodies, but also in the everyday violence
of policing—be it racially discriminatory “stop and frisk” practices in New York City, continuing racial disparities in traffic stops on the nation’s streets and freeways, or through daily stops, searches, beatings, sexual assaults, and police occupation of communities of people of color that are not just reminiscent of slavery and the Jim Crow era, but its direct descendants. Exposing the core of policing, as well as the social forces that drive it, enables us to see that, even as its outward form shifts over time, the underlying structure and purpose ultimately remains the same, decade after decade.

This is not to say that resistance has had no impact: it has forced police departments to shift strategies and has at times reduced some harms of policing. It is simply to say that the history of policing, the underlying forces of punishment, and responses to calls for reform laid out in the following pages is essential to understanding how we arrived at the present moment, and to envisioning what lies ahead. By placing the string of individual cases of police violence that have captured headlines over the past two decades into a larger context, we are pushed beyond an understanding of them as individual acts of racist police officers to an examination of their root causes and sinister systemic underpinnings. Our demands for change are thus necessarily expanded beyond prosecutions in individual cases and advocacy for policy reform, while simultaneously acknowledging the pain and outrage generated by each individual act of police violence, and the limited respite changes to policing policies can bring.

Particularly relevant to the present moment and the “broken windows” policing practices that ultimately killed Mike Brown and Eric Garner, Our Enemies in Blue chronicles the emergence of “order maintenance policing” as the modern-day manifestation of Black Codes, vagrancy laws, and common nightwalker ordinances. Pursuant to this theory, through what has become known as “quality of life” policing, officers are given explicit permission and discretion to target populations inextricably

As Our Enemies in Blue points out early on, what is defined as police brutality is normatively constructed. The common construction excludes not only women and LGBT people of color’s experiences of what is normatively defined as police brutality—physical violence up to and including murder of Black and Brown men—but also gender- and sexuality-specific forms of racialized and poverty-based police violence. For instance, since the time of colonial armies to the present day, sexual violence has been an unacknowledged but essential weapon of institutionalized policing so clearly described in these pages. The submission to the Task Force goes on to note:

In 2010 the CATO Institute’s National Police Misconduct Statistics and Reporting Project ... [found] Sexual assault and misconduct was the second most frequently reported form of police misconduct after excessive force, representing 9.3% of complaints analyzed. Over half of the officers involved in reported misconduct were alleged to have engaged in forcible nonconsensual sexual conduct while on-duty. Over half of incidents analyzed alleged police sexual misconduct with minors. Rates of sexual assault rising to the level of FBI index crimes were found to be significantly higher among law enforcement officers than the general population....

Other studies found that up to 2 in 5 young women reported sexual harassment by law enforcement, and that young women of color, low income women, lesbian and transgender women, and otherwise marginalized women—as well as men and transgender people—are particularly vulnerable to sexual misconduct by law enforcement. Sexual harassment and assault have been reported to be particularly pervasive during traffic stops and in the context of police cadet programs intended to engage youth from the community. It is also reported to take

---

6 Ibid.
forcement practices associated with the “war on drugs” and the policing of prostitution-related offenses.\(^5\)

Black women and women of color, who have played a leadership role in struggles against state-sponsored violence since colonial times and slavery, have increasingly insisted on recognition that we too are direct, and not collateral or occasional, targets of police shootings and violence. As pointed out to the Task Force:

Black women and women of color also experience excessive force up to and including police shootings, including most recently Jessie Hernandez, a 16 year old queer Latina killed by Denver police as this submission was being prepared, Aura Rosser, a forty-year-old Black woman killed by Ann Arbor police, and Tanisha Anderson, a 37 year old Black woman killed by Cleveland police, all of whom were killed in the short period of time since this Task Force was established. In the weeks following Eric Garner’s killing in New York City, an NYPD officer put Rosan Miller, a Black 27 year-old 5 month pregnant woman in a chokehold as they attempted to arrest her for grilling on the sidewalk, Denise Stewart, a Black grandmother who also had asthma was dragged naked into a hallway by officers who falsely assumed she was abusing her children, a woman perceived by NYPD officers to be queer was thrown to the ground and beaten after being accused of jaywalking in the West Village, and another pregnant mother was thrown to the ground in Sunset park by NYPD officers who then used a TASER on her stomach. These are but a few examples of the excessive force to which women of color are submitted on a routine basis, and which must also be at the center of national debates surround-

intertwined with notions of the “dangerous classes” described in *Our Enemies in Blue*. Police extortion schemes of old are replaced with a more elaborate shakedown of poor people through assessment of exorbitant fees and fines for minor, vague, and discriminatorily enforced “quality of life” offenses such as littering, sleeping, eating, or appearing disorderly or lewd in public. Indeed, it is telling that the biggest impact of the slowdown by NYPD officers in early 2015 was loss of revenue, not increased crime, and that first olive branch offered by the Ferguson police department in the wake of the uprising following Mike Brown’s murder by Darren Wilson was a reduction in fees associated with failing to appear in court to answer to minor charges which were the bread and butter of city coffers.\(^1\)

Perhaps the most critical intervention *Our Enemies in Blue* makes to the current moment comes in the final chapter, which traces the roots of militarization of police departments displayed in such stark and brutal relief during the days and months following Mike Brown’s killing in Ferguson to the advent of SWAT teams and the declaration of a “war” on drugs. Here, Williams reveals “community policing,” the kinder, friendlier face of law enforcement being advanced as its alternative, to simply be another side of the same coin. Like early police forces, “community policing” works to conscript civilians and “helping” institutions into the project of social control, while serving as the stick that continues to enforce the “order” that serves existing power relations.

One thing that has changed since the first edition is the way we understand how policing operates along the axes of gender and sexuality, within and alongside those of race and class.

Over the past decade a body of work has emerged, which, like *Conquest: Sexual Violence and American Indian Genocide* by Andrea Smith, traces its lineage back to Indigenous women’s resistance to the sexualized violence by state actors that has been an essential weapon of colonization, or, like “Law Enforcement Violence Against Women of Color,” an article I authored for *Color of Violence: The INCITE! Anthology* (South End Press 2006), to Black women’s resistance to slave patrols and lynching, and to the struggles of freedom fighters like Fannie Lou Hamer, Angela Davis, and Assata Shakur in response to police violence against themselves and their communities.²

Some of this work—like the book I co-authored with Joey Mogul and Kay Whitlock, *Queer (In)Justice: The Criminalization of LGBT People in the United States*—draws directly on the history of morals enforcement through vagrancy laws and on the critical analysis of “broken windows” policing offered by *Our Enemies in Blue* to highlight how policing operates to enforce racialized and classed norms of gender and sexuality in both public and private spheres.³ This process is mediated, as we discuss in *Queer (In)Justice*, through criminalizing narratives and archetypes that literally shape how the same conduct by different people is perceived differently within the context of maintaining “order” and ensuring community “safety.” Others, like Dean Spade’s *Normal Life: Administrative Violence, Critical Trans Politics, and the Limits of Law* and *Captive Genders: Trans Embodiment and the Prison Industrial Complex*, edited by Nat Smith and Eric Stanley, further elucidate the multiple ways in which law enforcement, prisons, and other systems of control explicitly police the lines of the gender binary.⁴

This literature, along with research conducted by grassroots organizations, policy advocacy groups, academics, and even law enforcement, as well as powerful interventions made by Black feminists in the post-Ferguson public discourse, has irrevocably expanded the frame of the conversation around policing to incorporate the voices and experiences of women of color and LGBTQ people of color targeted by gendered and sexuality-based forms of racial profiling and police violence, painting a more complete picture of the structures and dynamics of policing.

For instance, researchers have begun to dig deeper into the statistics illuminating patterns of racialized policing detailed in Chapter 4 to unearth the experiences of women of color. As noted in a submission endorsed by over seventy-five organizations and individuals to the President’s Task Force on 21st Century Policing (which was convened as a result of sustained national outcry in the wake of failure to hold officers who killed Mike Brown and Eric Garner accountable):

Although racial profiling data reported by federal and state governments is rarely, if ever, disaggregated by race and sex, racial profiling studies which do analyze the experiences of women of color separately from those of men of color conclude that “for both men and women there is an identical pattern of stops by race/ethnicity.” For instance, in New York City, one of the jurisdictions with the most extensive data collection on police stops, rates of racial disparities in stops and arrests are identical among men and women. Racial profiling of women of color has specifically been reported in the context of law en-

cannot give good account of his business, shall also be hereby empowered to carry such vagrant fellow to a magistrate.142

By 1734, this body was again removed from the militia, and was explicitly referred to as a slave police. By this time the patrollers were all armed and mounted, and were ordered to search the homes of all Black people, pursue and capture escaped slaves, and kill any slave who used a weapon against them. Until the end of the colonial period, the Parish of Saint Philip (which includes Charleston) had two separate patrols—the two largest in the state.143

By 1785, these patrols were incorporated into the Charleston Guard and Watch. This body was responsible for arresting vagrants and other suspicious persons, preventing felonies and disturbances, and warning of fires.144 But one guard described his job succinctly as “keeping down the niggers.”145 Indeed, slave control was the aspect of their work most emphasized by the public officials, and given highest priority by the guard itself. As Selden Bacon put it: “With very minor differences, their orders here were a summation of those given the rural patrols in the preceding hundred years, with the major and natural exception that they did not inspect plantations.”146

The organization of the Charleston Guard and Watch represented a significant advance in the development of policing.147 The force contained a developed hierarchy and chain of command, consisting of a captain, a lieutenant, three corporals, fifty-eight privates, and a drummer. Each was given a gun, bayonet, rattle (for use as a signal), and uniform coat. Some acted

Whites (1.2 percent). The vast majority of the victims (83 percent) characterized the force as excessive.54

“One and a half percent” is a polite way of saying “nearly a million.” An estimated 991,930 people experienced some level of force (including threats); more than half—55 percent, or 546,000 people—were subject to physical force.55 That latter group, if we got them all together, would make for a fair-sized city, larger than Portland, Oregon (population 537,081).56 And when you orient yourself to the fact that this city could be reproduced every year, you start to get some picture of how common police violence really is.

Also in 2005, there were 57,546 officers assaulted in the course of their work, the equivalent of 11.9 assaults per hundred officers. Most involved unarmed assailants (80 percent) and resulted in no injuries (77 percent).57 Comparing the numbers, we find that the police use violence (546,000 times in 2005) nine times as often as they face it (57,546 times that year).

There is a similar imbalance when it comes to fatalities. A study covering the years 2003–2005 found that 380 police died on duty during that time. Only 159 of these deaths were homicides, and 221 were the result of accidents. During the same period, 1,095 people were killed by police and other officials in the process of arrest. That averages 365 each year, or one a day.58 If we do the math, we see that the police kill almost

55 Ibid., 7, 10.
seven times as often as they are killed. The fact is, the police produce far more casualties than they suffer.

The available studies tell us very little about the prevalence of excessive force, but they do indicate that the police use violence more often, at higher levels, and with deadlier effects, than they encounter it. This disparity should not be surprising, considering the nature of policing—the imperative to maintain control at all times, in every situation (hardly a realistic goal), the training to use escalating levels of force to gain compliance, and authority unhindered by genuine oversight. Policing, as I said earlier, is inherently violent; this violence, generally speaking, seems to be of an offensive—rather than defensive—character.

Explaining Away the Abuse

In *Uprooting Racism*, Paul Kivel makes a useful comparison between the rhetoric abusive men employ to justify beating up their girlfriends, wives, or children and the publicly traded justifications for widespread racism. He writes:

During the first few years that I worked with men who are violent I was continually perplexed by their inability to see the effects of their actions and their ability to deny the violence they had done to their partners or children. I only slowly became aware of the complex set of tactics that men use to make violence against women invisible and to avoid taking responsibility for their actions. These tactics are listed below in the rough order that men employ them.:

1. Denial: “I didn’t hit her.”
2. Minimization: “It was only a slap.”
3. Blame: “She asked for it.”
4. Redefinition: “It was mutual combat.”
5. Unintentionality: “Things got out of hand.”
6. It’s over now: “I’ll never do it again.”

140 Ibid., 576.
141 Ibid., 576–78.
rebellions and sometimes endeavored to keep the slaves from even leaving the plantation.

The slave patrol, which began as an offshoot of the militia, and came to resemble modern police, thus provides a transitional model in the development of policing. As the militia adapted to the needs of a rural, agrarian, slave society, it evolved into a new form that surpassed the original. The slave patrols, when confronted with the conditions of a proto-industrialized city (where slavery itself was facing obsolescence) underwent a similar metamorphosis.

Charleston: “Keeping Down the Niggers”

In 1671, South Carolina’s Grand Council created a watch for Charles Town, consisting of the regular constables and a rotation of six citizens. They guarded the city against fire, Indians, slave gatherings, and other signs of trouble, and detained lawbreakers until the next day. The law creating the watch was renewed in 1698, with an addendum citing the increase in the Black population:

And whereas, negroes frequently absent themselves from their masters or owners [sic] houses, caballing, pilfering, steal-

---

Typically, comparative police histories discuss various cities in the order by which they came to attain modern police forces. So London would be first, if the volume considers English cities, and then New York, Boston, and so on. My approach breaks from this formula, presenting the cities instead in the order by which they reached progressively higher states of police development. Charleston appears first because its contribution to the modern type came very early. This approach preserves the sense of historical development leading to the appearance of modern policing; and it retains the sense that the modern police represent one stage in this sequence, not the inevitable end-point. In other words, I have tried to approach the matter of development prospectively rather than retrospectively, while still limiting the exploration of dead-ends and historical cul-de-sacs.

Ibid., 16–17.

60 This parallel was brought to my attention by the Portland Copwatch Women’s Caucus at a May 17, 2001 training.

63 The phrase is from LAPD sergeant Stacey Koon’s report of Rodney King’s arrest. Koon describes King’s injuries: “Several facial cuts due to contact with asphalt. Of a minor nature. A split inner lip. Suspect oblivious to pain.” Quoted in Christopher Commission, Report, 9.

64 Adams, “Police Use of Force,” 3.

“They died because they were criminals.”  
(4) Redefinition.
It was “mutual combat.”
“The use of force is necessary to protect yourself.”
(5) Unintentionality.
“[O]fficers have no choice but to use deadly force against an assailant who is deliberately trying to kill them....”
(6) It’s over now.
“We’re making changes.”

While the slave patrols did anticipate the creation of modern police, it must still be remembered that they were not themselves modern police. Of the two sets of criteria listed earlier, the slave patrols satisfy those of a police endeavor: they were public, authorized (indeed, instructed) to use force, and had general enforcement powers (if only over certain segments of the population). They do not, however, seem very modern, by the second set of criteria. They were certainly not the main law enforcement body, and they usually only operated at night. Arrangements for pay and continuity of service varied by location, but they were generally no more advanced than was typical of the watch. The patrols did have citywide (and sometimes broader) jurisdiction, and they were accountable to either the militias or the courts (or later, to special committees). And perhaps more than any police force before them, the patrols had a preventive orientation. Rather than respond to slave revolts (as the militia had done), or take off after runaways (like the professional slave catchers), the patrol aimed to prevent services, and worked over a very large area, sometimes leaving the state. In fact, patrollers more closely resembled overseers. Both had generalized responsibilities for keeping the slaves in line, searching for weapons, preventing gatherings, recapturing runaways, and so on. But overseers were private employees, hired by one slaveowner and responsible chiefly for one plantation. The overseer’s duty was continuous, and he was paid much more than a patroller. Furthermore, in addition to his more repressive functions, the overseer also performed managerial tasks, like assigning the slaves their duties for keeping the slaves in line, searching for weapons, preventing gatherings, recapturing runaways, and so on. But overseers were private employees, hired by one slaveowner and responsible chiefly for one plantation. The overseer’s duty was continuous, and he was paid much more than a patroller. Furthermore, in addition to his more repressive functions, the overseer also performed managerial tasks, like assigning the slaves their work and distributing food. Comparisons could also be made to the constable. Like patrollers, constables regulated the movement of slaves, recaptured runaways, dispersed slave gatherings, and administered beatings. However, slave control was only one aspect of the constable’s job, which also included summoning juries, transporting prisoners, process-serving, and otherwise acting as an agent of the courts. Most patrols were concerned only with the activities of slaves, and rarely had reason to appear in court at all. Moreover, the patrols were interested in more than just the gathering and travels of slaves; they also searched their homes. Hadden, Slave Patrols, 80–84.

66 Cincinnati Police sergeant Harry Roberts: “We didn’t kill fifteen black men. We killed fifteen criminals who resisted arrest. They didn’t die because they were black. They died because they were criminals.” Quoted in Jennifer Edwards, “Police Union Defends Deaths,” Cincinnati Post, April 14, 2001, accessed April 25, 2002, www.cincypost.com.
68 “Well, there are cases. For example, when you stop a fellow for routine questioning. Say a wise guy, and he starts talking back to you and telling you you are no good and that sort of thing. You know you can take a man in on a disorderly conduct charge but you can practically never make it stick. So what you do in a case like that is to egg the guy on until he makes a remark where you can justifiably slap him and then if he fights back you can call it resisting arrest.” Quoted in William A. Westley, Violence and the Police: A Sociological Study of Law, Custom, and Morality (Cambridge, MA: The MIT Press, 1970), 124.
69 “The use of force is necessary to protect yourself. You should always show that you are the boss. Make them respect the uniform and not the man. Suppose you are interrogating a guy who says to go f**k yourself. You are not supposed to take that.” Ibid., 126.
70 Portland Police Association Rap Sheet editor Loren Christensen. Quoted in Dan Handelman, “Police Shootings ...We’re Tired of Having To Write About This,” The People’s Police Report 13 (January 1998): 2.
72 Ibid., 48.
Families, without giving sufficient reason therefore.”

But while the watch was told to keep an eye on Black people along with numerous other potential sources for trouble, the slave patrols (and later, the City Guards) were more specialized, focusing almost exclusively on the Black population. In fact, it is this racist specialization that—more than anything else—distinguished the slave patrols from other police types and accelerated their rate of development. Hadden writes:

The reliance upon race as a defining feature of this new colonial creation reveals the singular difference that set slave patrols apart from their European antecedents. Although slave patrols also supervised the activities of free African Americans and suspicious whites who associated with slaves, the main focus of their attention fell upon slaves. Bondsmen could easily be distinguished by their race and thus became easy and immediate targets of racial brutality. As a result, the new American innovation in law enforcement during the eighteenth and early nineteenth centuries was the creation of racially focused law enforcement groups in the American south.

With this specialization came expanded powers—to search the homes of Black people, to mete out summary punishment, and to confiscate a broad range of valuables without need to demonstrate further suspicion. Moreover, their relationship to the militia meant that patrols generally carried firearms, whereas the watch did not.

“We will change our training; we will do everything in our power to make sure it never happens again.”

(7) It’s only a few men.

“A small proportion of officers are disproportionately involved in use-of-force incidents.”

“Even if we determine that the officers were out of line ... it is an aberration.”

(8) Counterattack.

“The only thing they understand is physical force and pain.”

(9) Competing victimization.

The police are “in constant danger.”

134 Hadden, Slave Patrols, 3–4. See also: Dulaney, Black Police, 6.

135 Patrollers might also be compared to professional slave catchers. Slave catchers, however, were private operators, not public agents. They were hired by slaveowners for a single job, did not perform regular patrols, were not generally concerned with searching cabins or breaking up church
“[L]iberals are prejudiced against police, much as many white police are biased against Negroes.”

The police are “the most downtrodden, oppressed, dislocated minority in America.”

Another commonly invoked rationale for justifying police violence is:

(10) The Hero Defense.

“These guys are heroes.”

“The police routinely do what the rest of us don’t: They risk their lives to keep the peace. For that selfless bravery, they deserve glory, laud and honor.”

“[W]ithout the police … anarchy would be rife in this country, and the civilization now existing on this hemisphere would perish.”

“[T]hey alone stand guard at the upstairs door of Hell.”

This list is by no means exhaustive, but it should convey something of the tone that these excuses can take. Many of these approaches overlap, and often several are used in con-

79 This grotesque overstatement originated with former LAPD chief William Parker. Quoted in Robert M. Fogelson, Big-City Police (Cambridge, MA: Harvard University Press, 1977), 239.

81 Duin, “Silver Medals.”

82 August Vollmer. The full quotation is: “Whatever else may be said of the American police, this fact should be more widely known; namely, that without the police and the police organizations, with all their many defects anarchy would be rife in this country, and the civilization now existing on this hemisphere would perish.” Quoted in Center for Research on Criminal Justice, The Iron Fist and the Velvet Glove: An Analysis of the U.S. Police (Berkeley, CA: Center for Research on Criminal Justice, 1975), 21.

86 In North Carolina, the patrols were under court authority from their beginnings. Ibid., 47.

patrol to “apprehend and correct all slaves and free persons of color” on the streets after nine at night, “whether such slave or free person of color have a pass or not.”

In Charleston the law requiring passes gradually gave way to a system of badges for slaves being hired out. This procedure allowed the state the opportunity to regulate the practice, and entitled it to a share of the master’s fee (that is, really, of the slave’s wages). Slowly, Charleston began to prefigure the segregated South of the twentieth century: in 1848, the city limited the right of Black people to use the public parks; in 1850, Black people were banned from bars.

Meanwhile, throughout South Carolina, town after town asked the state legislature to transfer control of the slave patrols from the county courts or state militia to the local government. Camden won that power in 1818. Columbia followed in 1823. Georgetown requested it in 1810, but was not allowed it until 1829. Ten years later, the legislature granted all incorporated South Carolina towns the power to regulate patrol duty.

**Patrols in Perspective**

The patrols’ work was not always popular. Soon after his appointment as the head of the Georgetown Guards, Peter Cuttung found his house burned to the ground. Around the same time “A Citizen” wrote in to the Charleston paper: “I think
The Dangers of the Job

The danger of the job is a constant theme in the defense of police violence. It is implicit (or sometimes explicit) in about half of the excuses listed above. By pointing to the dangers of the job, the excuse-makers don’t only defend police actions in particular circumstances (which might actually have been dangerous), but as often as not take the opportunity to mount a general defense of the police. This is a clever bit of sophistry, as cynical as a Memorial Day speech during wartime. It’s one thing to make a banner of the bloody uniform when discussing a case where the cops actually were in danger, but quite another to do so when they might have been in danger, or only thought that they were.

The fact that policing is risky, by this view, seems to justify in advance whatever measures the police feel necessary to employ. This point lies at the center of the Hero Defense. Its genius is that it is so hard to answer. Few people are indifferent to the death of a police officer, especially when they feel (though only in some vague, patriotic kind of way) that it occurred because the officer was selflessly working—as former Philadelphia city solicitor Sheldon Albert put it—“so that you and I and our families and our children can walk on the streets.”86 The flaw of the Hero Defense, however, is both simple and (if you’ll pardon the term) fatal: policing is not so dangerous as we are led to believe.

A total of 105 patrol officers died on the job in 2012. Less half of those (51) died as the result of violence, and another 48 died in traffic accidents.87 Between 1961 and 2012, 3,847 cops

---

many of them in great trepidation, uttering ejaculations of terror as they ran.”

Throughout the first part of the nineteenth century, similar urban patrols were created in Savannah, Mobile, and Richmond. The Savannah guard carried muskets and wore uniforms as early as 1796. It was later equipped with horses and pistols. Richmond’s Public Guard was formed in 1800, after the discovery of a planned rebellion. It was assigned to protect public buildings from insurrections, and was made responsible for punishing any slaves it found out after curfew.

The urban patrols, and the laws they enforced, were modeled on the system developed for the plantations. But cities with developing industries had different needs than did the surrounding rural areas, with their plantation economies. For one thing, the large numbers of Black people present in the city often lived in one part of town, away from their masters, making it impossible to maintain the sort of intimate knowledge of the slave’s comings and goings essential to the plantation system. Furthermore, rigid restrictions on daily travel were not even desirable, proving inconvenient for the budding industries. As manufacturers sought cheap sources of labor, the practice of “hiring out” slaves became increasingly common. Under this arrangement, slaves paid the master a stipulated fee, and were then free to take other jobs at wages. The regulations on travel, then, had to be more flexible for slaves to do their work.

As the masters “capitalize[d] their slaves,” the bondsmen became, literally, wage slaves. Given the White population’s preoccupation with controlling Black people, the practice of

116 Ibid., 97.
117 "The slavery system was based essentially on the agricultural regime and no other. Its system of control was fixed on the basis of the slave’s forever remaining a ‘field hand’ or at best remaining attached to the plantation.

were murdered and 2,946 died in accidents—averaging about 75 murders and 58 fatal accidents in a typical year.

Naturally it is not to be lost sight of that these numbers represent human lives, not widgets or sacks of potatoes. But let’s also remember that there were 4,383 fatal work injuries in 2012. As dangerous professions go, according to the Bureau of Labor Statistics, policing is not even in the top ten. In terms of total fatalities, more truck drivers are killed than any other kind of worker (741 in 2012). A better measure of occupational risk, however, is the rate of work-related deaths per 100,000 workers. In 2012, for example, it was 17.4 for truck drivers. At 15.0 deaths per 100,000, policing is slightly less dangerous than being a maintenance worker (15.7) and slightly more dangerous than supervising the gardener (14.7). The highest rate of fatalities is among loggers at 127.8 per 100,000, just ahead of fishers at 117.0. The rate for all occupations, taken together, is 3.2 per 100,000 workers.

Where are the headlines, the memorials, the honor guards, and the sorrowful renderings of Taps for these workers? Where are the mayoral speeches, the newspaper editorials, the sober reflections that these brave men and women died, and that others risk their lives daily, so that we might continue to enjoy the benefits of modern society?

Policing, it seems, is the only profession that both exaggerates and advertises its dangers. It has done so at a high cost, and to great advantage, though (as is so often the case) the costs

---

are not borne by the same people who reap the benefits. The overblown image of police heroism, and the “obsession” with officer safety (Rodney Stark’s term), do not only serve to justify police violence after the fact; by providing such justification, they legitimize violence, and thus make it more likely.

Institutionalized Brutality

Given the pervasive nature of police violence, it is astonishing that the public discourse so frequently focuses on the behavior of individual officers. Commonly called the “Rotten Apple” theory, the explanation of misconduct favored by police commanders and their ideological allies holds that abuse is exceptional, that the officers who misuse their power are a tiny minority, and that it is unfair to judge other cops (or the department as a whole) by the misbehavior of the few. This is a handy tool for diverting attention away from the institution, its structure, practices, and social role, pushing the blame, instead, onto some few of its agents. It is, in other words, a means of protecting the organization from scrutiny and of avoiding change.

Blacks as well—were singled out by the law, and specialized enforcement mechanisms arose to ensure compliance. According to Hadden, these agencies “went by a variety of names, including town guard, city patrol, or night police, although their duties were the same: to prevent slave gatherings and cut down on urban crime.” (For the sake of simplicity, I refer to the general type as “City Guards.”)

In the initial stage, enforcement would be entrusted to private individuals and the existing watch, but after some period the town might petition the legislature for the funds to form a permanent patrol, with the same group on duty each night. The urban patrols, then, did not evolve from the watch system; rather, adapted from the rural slave patrols, they came to supplant the watchmen. Charleston formed a City Guard in 1783. It wore uniforms, carried muskets and swords, and maintained a substantial mounted division. Unlike the watchmen, who walked their beats individually, the City Guard patrolled as a company.

Louis Tasistro, who traveled through Charleston in the 1840s, described the patrol: “the city suddenly assumes the appearance of a great military garrison, and all the principal streets become forthwith alive with patrolling parties of twenties and thirties, headed by fife and drum, conveying the idea of a general siege.” A few years later, in the early 1850s, J. Benwell, an English visitor to Charleston, described the reaction of the Black population to the mounting of the guard: “It was a stirring scene, when the drums beat at the Guard house in the public square ... to witness the negroes scouring the streets in all directions, to get to their places of abode,

---

92 “The problem is there are plenty of incentives for law enforcement leaders to play up the risks of the job. It moves the public debate over issues like militarization, police discretion, use of force, and police budgets more in their favor.” Radley Balko, Rise of the Warrior Cop: The Militarization of America’s Police Forces (New York: Public Affairs, 2013), 272.

93 Stark, Police Riots, 135.

94 An anonymous NYPD sergeant told New York Times Magazine: “Look, in any organization, you’ll find no-good people. There are rotten apples right in my own back yard; our precinct has some crazy cops who are ready to use machine guns on the ‘college kids and niggers,’ that’s how they are called. But for every cop like that I can find you two that you’d just have to admire.” Quoted in Coles, “A Policeman Complains,” 74.

95 “The effect of the rotten apple theory is to offer scapegoats to public indignation and to evade basic questions about the organization and character of police institutions.” Stark, Police Riots, 10.

108 Ibid., 54.
109 Ibid., 53–56.
110 Rousey, Policing the Southern City, 19–20.
111 Ibid., 20.
To summarize, the state control of slave behavior advanced through three stages. First, legislation was passed restricting the activities of slaves. Second, this legislation was supplemented with requirements that every White man enforce its demands. Third, over time this system of enforcement gradually came to be regulated, either by the militia or by the courts. The transition between these second and third steps was a slow one. Each colony tried to cope with the unreliable nature of private enforcement, first by applying rewards and penalties, and later by appointing particular individuals to take on the duty. Volunteerism was eventually replaced with community-sanctioned authority in the form of the slave patrols. Among the factors determining the rate of this transition, and the eventual shape of the patrols, were the date of settlement, the size of the slave population, the size of the White population, threats of revolt, geography, and population density. As this fact suggests, slave patrols developed differently in the cities than in the countryside.

City Guards

Slave control was no less a priority for White urbanites than for their country kin. The growing numbers of Black people in cities were of obvious concern to the White population, and their concentration in distinct neighborhoods presented an unnerving reminder of the possibility of revolt.

In many respects, the cities followed the lead of the plantations. There, too, Black people—slaves especially, but free...
Connor, Richard Daley, Frank Rizzo, Daryl Gates, Rudolph Giuliani, Joe Arpaio (to name just a few)—but it needn’t be so overt to have the same effect.

On the other hand, when police culture and occupational norms support the use of unnecessary violence, we can describe brutality as being supported “from below.” Such informal conditions are a bit harder to pin down, but they certainly have their consequences. We may count among their elements insularity, indifference to the problem of brutality, generalized suspicion, and the intense demand for personal re-

Fyfe’s research quantifies the results of Rizzo’s leadership: “Overall, the [Philadelphia Police Department’s] police homicide rates were 2.09 [civilians killed annually, per 1,000 officers] while Rizzo was police commissioner; 2.29 while he was mayor; and 1.05 after he was out of office (as compared to the annual PPD homicide rate of 0.61 over 1950–1960).” Fyfe concludes that “knowing what Frank Rizzo was doing was far more valuable for estimating the PPD homicide rate than were data on public homicides.” Fyfe, “Police Use of Deadly Force,” 417.

100 “To a considerable extent the police regard all citizens as ‘outsiders’—as unsympathetic and a threat to order—because the police are a distinctive and relatively socially isolated subculture.” Stark, Police Riots, 124. See also: Victor E. Kappeler et al., “Breeding Deviant Conformity: Police Ideology and Culture,” in The Police and Society, 251–52.

101 According to one study, police consider excessive force to be of “intermediate seriousness.” Asked to evaluate the severity of eleven misconduct cases, police ranked brutality seventh, just ahead of covering up an officer-involved traffic accident (number 8), and below management favoritism (number 6), accepting kickbacks (number 4), accepting bribes (number 2), and theft (number 1). Carl B. Klockars et al., The Measurement of Police Integrity (U.S. Department of Justice, National Institute of Justice, May 2000), 3.

102 Fogelson described the police as suffering from “a strong sense of alienation, a sharp feeling of persecution, and other severe anxieties which for want of a better term might be called occupational paranoia.” This disorder was characterized by complaints about the incompetence of the civil authorities, a “frenzied reaction to criticism from outside,” and advocacy of while one is flogging him, the others will look another way; so when he or his master makes complaint of his having been beaten without cause, and he points out the person who did it, the others will swear they saw no one beat him.

Other abuses were also common. Black women faced sexual abuse at the hands of patrollers, both when they were found on the road and during searches of their homes. Patrollers sometimes kidnapped free Black people and sold them as slaves. They also frequently threatened Black people with mutilation, sometimes with a basis in law: between 1712 and 1740, South Carolina law required escalating tortures for captured runaways, from slitting the nose to severing one foot.

Masters sometimes complained about the abuses directed against the slaves, but courts were generally reluctant to award damages or discipline the patrollers, for fear of undermining the patrol system. The main restraint on the actions of patrollers was the economic value of the slave’s life; slaves were rarely killed, since the local government would then have to compensate the owner. In general, however, the patrols were invested with vast authority and wide discretion, as a North Carolina court explained in 1845:

[Patrols] partake of a judicial or quasi-judicial and executive character. Judicial, so far as deciding upon each case of a slave taken up by them; whether the law has been violated by him or not, and adjudging the punishment to be inflicted. Is he off his master’s plantation without a proper permit or pass? Of
him to the plantation or hold him in the jail. For this, they carried guns, whips, and binding ropes.95

One patroller recalled that his company was instructed to “apprehend every negro whom we found from his home; & if he made any resistance, or ran from us, to fire on him immediately, unless he could be stopped by other means.” They were also ordered to search “the negro cabins, & take every thing we found in them, which bore a hostile aspect, such as powder, shot &c.”96

The patrols would break up any unsupervised gathering of slaves, especially meetings of religious groups the patrollers themselves disliked. Baptist and Methodist services were specifically targeted.97 One former slave, Ida Henry, recalled an assault against her mother:

De patrollers wouldn’t allow de slaves to hold night services, and one night dey caught me mother out praying. Dey stripped her naked and tied her hands together and wid a rope tied to de handcuffs and threw one end of de rope over a limb and tied de other end to de pummel of a saddle on a horse. As me mother weighed ’bout 200, dey pulled her up so dat her toes could barely touch de ground and whipped her.98

Patrollers couldn’t legally interfere with a slave carrying a pass, but they would often harass Black people whom they felt to be traveling too far or too often.99 Moses Grandy, a former slave, verified that the law did little to restrain the patrollers:

If a negro has given offense to the patrol, even by so innocent a matter as dressing tidily to go to a place of worship, he will be seized by one of them, and another will tear up his pass;

95 Ibid., 123.

98 Quoted in Reichel, “Southern Slave Patrols,” 86.
99 Hadden, Slave Patrols, 111–12, 116.

Police violence is very frequently over-determined—promoted from above and supported from below. But where it is not actually encouraged, sometimes even where individuals (officers or administrators) disapprove of it, excessive and illegal force are nevertheless nearly always condoned. Among police administrators there is the persistent and well-documented refusal to discipline violent officers; and among the cops themselves, there is the “code of silence.”

In its 1998 report, Human Rights Watch noted the inaction of police commanders:

reactionary and draconian measures. Fogelson, Big-City Police, 120. See also: Stark, Police Riots, 92–93.

103 In 1994, NYPD officer Bernard Cawley testified before the Mollen Commission: “We’d just beat people in general ... to show who was in charge.” Quoted in Human Rights Watch, Shielded from Justice, 268.

Cawley admitted to involvement in four hundred beatings, using nightsticks, flashlights, and lead-lined gloves. Only one citizen ever filed a complaint against him, and no officers did. Human Rights Watch, Shielded from Justice, 272.

Most high-ranking police officials, whether at the level of commissioner, chief, superintendent, or direct superiors, seem uninterested in vigorously pursuing high standards for treatment of persons in custody. When reasonably high standards are set, superior officers are often unwilling to require that their subordinates consistently meet them.\textsuperscript{105}

Even where officers are found guilty of misconduct, discipline rarely follows. For example, in 1998 New York’s Civilian Complaint Review Board issued 300 findings against officers; fewer than half of these resulted in disciplinary action.\textsuperscript{106}

LAPD assistant chief Jesse Brewer told the Christopher Commission:

We know who the bad guys are. Reputations become well known, especially to the sergeants and then of course to lieutenants and captains in the areas. But, I don’t see anyone bringing these people up and saying, “Look, you are not conforming, you are not measuring up. You need to take a look at yourself and your conduct and the way you’re treating people” and so forth. I don’t see that occurring…. The sergeants don’t, they’re not held accountable so why should they be that much concerned?\textsuperscript{107} ... I have a feeling that they don’t think that much is going to happen to them anyway if they tried to take action and perhaps not even be supported by the lieutenant or the captain all the way up the line when they do take action against some individual.\textsuperscript{107}

Rank-and-file cops, likewise, are extremely reluctant to report the abuses they witness. Some of this reluctance, surely, is a reflection of their superiors’ indifference. (After all, if nothing’s going to come of it, why report it?) But their peers also enforce this silence. A National Institute of Justice study on police integrity discovered:

\textsuperscript{105} Human Rights Watch, \textit{Shielded from Justice}, 62.
\textsuperscript{107} Quoted in Christopher Commission, \textit{Report}, 32.
disorderly White people, especially vagrants. In Tennessee, the law required slaveowners to provide patrols on the plantations themselves, in addition to those that rode between plantations. In Kentucky, after a series of revolts, some cities established round-the-clock patrols. And in Mississippi, the first patrols were federal troops; these were gradually replaced by the militia, and then by groups appointed by county boards. 

Until 1660, Virginia relied more on indentured European servants than on African slaves, though both groups sought to escape their bonds. Initially, the colonists used the hue and cry to mobilize the community and recapture runaways. In 1669, the colonial legislature began offering a reward (paid in tobacco) to anyone who returned a runaway. And in 1680, as the slave population grew, slaves were required to carry passes, as debtors and Native Americans already had been. Slaves were singled out for special enforcement measures beginning in 1691, when the legislature required sheriffs to raise posses for their recapture. In 1727, this responsibility was transferred to the militia, creating the colony’s first slave patrol. At first the militia only patrolled as needed, but after a failed rebellion in 1730, it began regular patrols two or three times each week. In 1754, county courts began paying patrollers and requiring reports from their

88 Reichel, “Southern Slave Patrols,” 83–85. The 1778 law instructed the Georgia patrols to “take up all white persons who cannot give a satisfactory account of themselves and carry them before a Justice of the Peace to be dealt with as is directed by the Vagrant Act.” Quoted in ibid., 84.

89 Wintersmith, Police and the Black Community, 17–19.
by police agencies. That is, I have discussed the ways police organizations produce and sanction violence, even outside the bounds of their own rules and the law. This examination has provided a brief sketch of the way the institution shapes violence, but has not thus far considered the implications of this violence for the institution. It seems paradoxical that an organization responsible for enforcing the law would frequently rely on illegal practices. The police resolve this tension between nominally lawful ends and illegal means by substituting their own occupational and organizational norms for the legal duties assigned to them. Westley suggests:

This process then results in a transfer in property from the state to the colleague group. The means of violence which were originally a property of the state, in loan to its law-enforcement agent, the police, are in a psychological sense confiscated by the police, to be conceived of as a personal property to be used at their discretion.110

From the officers’ perspective, the center of authority is shifted and the relationship between the state and its agents is reversed. The police become a law unto themselves.

This account reflects the attitudes of the officers, and explains many of the institutional features already discussed. It also identifies an important principle of police ideology, one that (as we shall see in later chapters) has guided the development of the institution, especially in the last half-century.

But Westley’s theory also raises some important questions. Chief among these: why would the state allow such a coup?

The Police, the State, and Social Conflict

We might also ask: To what degree is violence the “property” of the state to begin with? At what point does the police co-optation of violence challenge the state’s monopoly on it?

Across the South

While the South Carolina patrols, in the estimation of Philip Reichel, were “the oldest, most elaborate, and best documented,” other colonies followed suit. Georgia, Tennessee, Kentucky, and Mississippi all had similar arrangements, with variations. In Georgia, slave patrols were also responsible for disciplining...
that were formal, legalistic, and centered on the state, the South maintained a unique commitment to a system that was informal, personalistic (characterized by deference and paternalism), diffused, and in which the state was kept deliberately weak.

When compared to Northern cities of the nineteenth century, plantation life seems positively feudal. As H.M. Henry described it, “the plantation was a sort of governmental unit as to the police control of the slave, and to its head, the slaveowner, was given in large measure the sovereign management of its affairs under certain restrictions.”

The arrangement was, in the fullest, traditional sense of the word, patriarchal; not only slaves, but also White women and children were subject to the personal authority of male heads of households. Any intercession in these relationships was apt to be viewed negatively. Slaveowners felt that any outside intervention—especially that of the state—represented not only a usurpation of their authority but also a personal slight, implying that the master was not up to the task of controlling his slaves.

This sentiment, an important aspect of Southern “honor,” created a major impediment to the effective control of the Black population. It discouraged White elites from enhancing the means of social control. Hadden writes:

[O]nly the state (through the agency of the courts, councils, and militia) could force whites to act in concerted fashion to protect their own self-interest. And some state legislatures, like South Carolina’s, simply refused to reform patrol practices in order to coerce more public service from their constituents.

Slave patrols were both a product of White racism, vital to the survival of slavery, and a manifest contradiction of the ide-

80 Henry, “Police Control,” 78–79.
81 I am indebted to Shira Zucker for drawing my attention to this aspect of Southern culture.
82 Hadden, Slave Patrols, 130.
83 Ibid., 70.
social pyramid.\textsuperscript{111} And when the police violate the law, these same people are their most frequent victims. This is a coincidence too large to overlook. If we put aside, for the moment, all questions of legality, it must become quite clear that the object of police attention, and the target of police violence, is overwhelmingly that portion of the population that lacks real power. And this is precisely the point: police activities, legal or illegal, violent or nonviolent, tend to keep the people who currently stand at the bottom of the social hierarchy in their "place," where they "belong"—at the bottom. This is why James Baldwin said that policing was "oppressive" and "an insult."

Put differently, we might say that the police act to defend the interests and standing of those with power—those at the top. So long as they serve in this role, they are likely to be given a free hand in pursuing these ends and a great deal of leeway in pursuing other ends that they identify for themselves. The laws may say otherwise, but laws can be ignored.

In theory, police authority is restricted by state and federal law, as well as by the policies of individual departments. In reality, the police often exceed the bounds of their lawful authority and rarely pay any price for doing so. The rules are only as good as their enforcement, and they are seldom enforced. The real limits to police power are established not by statutes and regulations—since no rule is self-enforcing—but by their leadership and, indirectly, by the balance of power in society.

So long as the police defend the status quo, so long as their actions promote the stability of the existing system, their misbehavior is likely to be overlooked. It is when their excesses

\footnote{111 William Chambliss explains the institutional basis for this tendency: "The bureaucratic requirement that police action be designed to maximize rewards and minimize strain for the organization leads to looking for crime among the powerless and ignoring the crimes of the powerful." William J. Chambliss, \textit{Power, Politics, and Crime} (Boulder, CO: Westview Press, 1999), 100. This idea will be expanded in later chapters.}

**Racist Contradictions**

The patrol was essentially an institutionalized extension of the more informal system described by the 1686 law. The law’s intention was, foremost, to divide the means of protecting the city so that both internal and external threats could be met simultaneously. It did not represent an effort to specialize slave control, or to reduce the obligations of each White citizen, or to interfere with the personal authority of the slave owner. But whatever the intention behind it, the law did, or threatened to do, all three. Hadden explains:

- Reform required increasing the amount of time each man devoted to protecting the safety and property of others, which was repugnant to Southern White ideas of individual freedom and, indirectly, their sense of personal honor. No White man should have to cower before slaves, it was thought, and patrols were an unequivocal manifestation of White fear. Southern honor required the individual to protect his name and family without the assistance of courts or the community; patrols, by their very nature, were communal, intrusive in the master-slave relationship, and implied that the individual alone could not adequately control his bondsmen.\textsuperscript{78}
- The slave patrols represented a departure from the traditional values of Southern culture, and though the patrols were created to defend slavery, their efficacy was limited by the same ideology that justified the slave system. Rather than develop more formal means of control, Southern ideology encouraged a reliance on informal systems rooted in racism.\textsuperscript{79}

While the rest of the country developed systems of authority

\footnote{78 Hadden, \textit{Slave Patrols}, 70.}

\footnote{79 "As long as Charlestonians believed that blacks were the sole threat to order, White supremacy served in lieu of a police force. In such a racially stratified society, with few legal rights accorded to the black man, every White person, by virtue of his skin, had sufficient authority over blacks." Hindus, \textit{Prison and Plantation}, 37–38.}
without a proper pass."  

Those who captured runaways would receive a reward. In 1704, fears of a Spanish invasion, combined with the ever-present threat of a slave revolt, led South Carolina to form its first official slave patrols. The colony faced two types of danger and divided its military capacity accordingly. Henceforth, the militia would guard against outside attack, and the patrol would be left behind to protect against insurrection.

Patrollers would gather from time to time and, as instructed by the law, ride from plantation to plantation, and into any plantation, within the limits or precincts, as the General shall think fitt, and take up all slaves which they shall meet without their master’s plantation which have not a permit or ticket from their masters, and the same punish.

In 1721, the law was revised to shift its focus from runaways to revolts. The new law ordered the patrols to "prevent all caballings amongst negros [sic], by dispersing of them when drumming or playing, and to search all negro houses for arms or other offensive weapons." Books and paper were often confiscated as well, education itself being deemed subversive. The patrollers also seized other goods—especially linen, china, and horses—alleging them to be stolen, and were permitted to keep for their own whatever they took.

Police brutality is pervasive, systemic, and inherent to the institution. It is also anything but new.

74 Hadden, *Slave Patrols*, 17, 19–20. In 1770, South Carolina Lieutenant Governor William Bull wrote: "The defense of the province as far as our own power can avail, is provided for by our militia against foreign and Patrols against domestic enemies." Quoted in Ibid., 43.
75 Quoted in Reichel, "Southern Slave Patrols," 83.
2: The Origins of American Policing

In February 1826, Aziel Conklin, the captain of the watch in New York’s third district, was suspended—but later reinstated—after a conviction for assault and battery. This incident was not especially unusual at the time. Even now, it would only stand out because cops are so rarely convicted, regardless of the evidence against them. Yet if the licensed use of violence is not new, the system employing it today looks very different than that of the 1820s. And if the abuse of authority is itself a constant feature of government, the nature of that authority has undergone substantial changes.

Characteristics of Modern Police

Policing itself is not a distinctly modern activity. It has existed in some form, under numerous political systems, in disparate

---

2 In general terms, “Modernity is distinguished on economic, political, social and cultural grounds. For example, modern societies typically have industrial, capitalist economies, democratic political organization and a social structure founded on a division into social classes. There is less agreement on cultural features, which are said to include a tendency to the fragmentation of experience, a commodification and rationalization of all aspects of life, and a speeding up of the pace of daily life. Modernity has required new systems of individual surveillance, discipline and control. It has emphasized regularity and measurement in everyday life.” The Penguin Dictionary

---

responsible for maintaining order on the plantations. The weaknesses of this system led to the creation of slave codes, laws directed specifically to the governing of slaves. Beginning in 1661, the slave codes shifted the responsibilities of enforcement from the overseers to the entire White population. Shortly thereafter, in the 1680s, the militia began making regular patrols to catch runaways, prevent slave gatherings, search slave quarters, keep order at markets, funerals, and festivals, and generally intimidate the Black population. As Sally Hadden writes in her authoritative study, Slave Patrols:

The final move in policing Barbadian slaves in the seventeenth century came with the importation of two thousand professional English soldiers, who were installed on plantations as intimidating “militia tenants.” Arriving between 1696 and 1702, they did not perform manual labor but instead functioned exclusively as slave control forces. Their presence served the White colonists’ purposes well: throughout the eighteenth century only one slave rebellion attempt was reported in Barbados.

During the same period, South Carolina passed laws restricting the slaves’ ability to travel and trade, and created the Charleston Town Watch. Beginning in 1671, this watch consisted of the regular constables and a rotation of six citizens. It looked for any sign of trouble—fires, Indian attacks, or slave gatherings. The laws also established a militia system, with every White man between sixteen and sixty years old required to serve. In 1686, South Carolina passed a law enabling any White person to apprehend and punish runaway slaves. A few years later, the 1690 Act for the Better Ordering of Slaves required “all persons under penalty of forty shillings to arrest and chastise any slave out of his home plantation

ment, and 3) slavery. Of these three, slavery exerted the most powerful influence. It held a central place in Southern society, in the social and political as well as the economic life of the region. For many Southerners, a future without slavery was literally inconceivable. Thus the whole of Southern society was, at times, directed to the defense of the "peculiar institution." Where the demands of slavery conflicted with the region’s traditions and social development—and to a lesser extent when it interfered with economic development—the maintenance of the slave system was nearly always preferred.

Faced with the difficulties of keeping a major portion of the population enslaved to a small elite, Southern society borrowed from the practices of the Caribbean, especially Barbados. There, slave owners used professional slavecatchers and militias to capture runaways, while overseers were

“Slavery was not only an economic and industrial system, and as such felt to be a burden by the non-slaveholder; but more than that, it was a gigantic police system, which the poor man in the up-country as well as the wealthy planter in the lowlands did not know how to replace.” Henry, “Police Control,” 154–55.

The depth of this preference is astonishing, and its influence on Southern priorities proved self-defeating. “Many intransigent southerners never yielded the notion that the [Civil] war itself was of no importance if the slave system was not maintained. Even in 1865, with defeat almost imminent, and the conscription of slaves being seriously considered, still the preservation of the slave system remained a greater priority than the war effort. Some Confederate congressmen claimed that granting freedom to slaves who fought for the Confederacy would subvert their basic contention that slavery was the natural condition for blacks and make victory irrelevant. Rather than compromise in any way on the slavery issue, the South preferred to lose the war.” Mary Frances Berry, Black Resistance, White Law: A History of Constitutional Racism in America (New York: The Penguin Press, 1994), 67–68.

The earliest specialized police were watchmen… However, although their function was certainly specialized, it is not always clear that it was policing. Very often they acted only as sentinels, responsible for summoning others to apprehend criminals, repel attack, or put out fires.

It was not until the middle of the nineteenth century that most American cities had police organizations with roughly the same form and function as our contemporary departments. Though historians generally agree it was in the mid-1800s that police forces throughout the United States converged into a single type, it has been surprisingly difficult to enumerate the major features of a modern police operation. Bayley defines the modern police in terms of their public auspices, specialized function, and professionalism, though he does also mention their non-military character and their authority to use force.

Richard Lundman offers four criteria: full-time service, continuity in office, continuity in procedure, and control by a central governmental authority. Selden Bacon, meanwhile, suggests six characteristics:

67 “Slavery was not only an economic and industrial system, and as such felt to be a burden by the non-slaveholder; but more than that, it was a gigantic police system, which the poor man in the up-country as well as the wealthy planter in the lowlands did not know how to replace.” Henry, “Police Control,” 154–55.

68 The depth of this preference is astonishing, and its influence on Southern priorities proved self-defeating. “Many intransigent southerners never yielded the notion that the [Civil] war itself was of no importance if the slave system was not maintained. Even in 1865, with defeat almost imminent, and the conscription of slaves being seriously considered, still the preservation of the slave system remained a greater priority than the war effort. Some Confederate congressmen claimed that granting freedom to slaves who fought for the Confederacy would subvert their basic contention that slavery was the natural condition for blacks and make victory irrelevant. Rather than compromise in any way on the slavery issue, the South preferred to lose the war.” Mary Frances Berry, Black Resistance, White Law: A History of Constitutional Racism in America (New York: The Penguin Press, 1994), 67–68.

69 In policing, the defining task is the application of physical force within a community.” Ibid., 67.

70 “In policing, the defining task is the application of physical force within a community.” Ibid., 67.

(1) citywide jurisdiction,
(2) twenty-four-hour responsibility,
(3) a single organization responsible for the greater part of formal enforcement,
(4) paid personnel on a salary basis,
(5) a personnel occupied solely with police duties,
(6) general rather than specific functions.

Raymond Fosdick argues that the defining mark of modern police departments is their organization under a single commander.⁸ And Eric Monkkonen takes as his sole criterion the presence of uniforms.⁹

Three of these criteria are easily done away with. The use of uniforms is neither a necessary nor a unique feature of modern policing. Some police officers, especially detectives, do not wear uniforms, and are no less modern for that fact. Furthermore, even within the history of law enforcement, uniforms predate the modern institution. The London Watch, for example, was uniformed in 1791.¹⁰ Likewise, though most police agencies are headed by a single police chief, that is not always the case, and has not always been the case, even in departments that are distinctly modern. Police boards of various kinds have moved in and out of fashion throughout the modern period, especially at the cusp of the nineteenth and twentieth centuries.

The civilian character of the police is more problematic, and, precisely because it is problematic I will put it aside as a suggested criterion. The relationship between policing and the military has always been complex and controversial, and if cur-

Slave Codes, Slave Patrols

Relying on a slave economy, the American South faced unique problems of social control, especially in areas where White people were in the minority. Regardless of their own economic class or ethnic background, White people were haunted by the prospect of a slave revolt. They became utterly obsessed with controlling the lives of Black people, free and slave, and developed a deep and terrible fear of any unsupervised activity in which Black people might engage.⁶⁴ As a result, the South developed distinctive policing practices. Called “slave patrols,” “alarm men,” or “searchers,” by the authorities who appointed them, they were known as “paddyrollers,” “padaroles,” “padaroes,” and “patterolers” by the populations they policed.⁶⁵

Michael Hindus cites three related reasons why the criminal legal system in the South developed along different lines than it did in the North: 1) tradition, 2) social and economic develop-

---

The fear of insurrection may have reached the level of paranoia, but it was in no way baseless. Aptheker cites 250 documented rebellions or conspiracies involving ten or more slaves. Aptheker, American Negro Slave Revolts, 162. See also: Harvey Wish, “American Slave Insurrections Before 1961,” in Black Protest: 350 Years of History, Documents, and Analyses, ed. Joanne Grant (New York: Fawcett Columbine, 1968), 29–38; and William F. Cheek, Black Resistance Before the Civil War (Beverly Hills: Glencoe Press, 1970), especially chapter 4, “Slave Insurrections, North and South.”

specialized policing function. Except in times of emergency, the watch only patrolled at night. And for the most part, its personnel were not paid. In sum, by our criteria, the colonial watch may be counted as a policing effort, but in no way did it constitute a modern police agency.

The standard story in the history of policing, if we may speak of such a thing, presents the modern American police force as a direct adaptation of the night watch, following the English pattern. But this story leaves out significant stages in the development of American policing. Or, put differently, it omits an entire branch of the American police family tree. As Dennis Rousey recounts:

[The] first major reform of the traditional system did not occur in any of the big northwestern cities in the mid-1800s but in the cities of the Deep South in a much earlier period. As early as the 1780s Charleston introduced a paramilitary municipal police force primarily to control the city’s large population of slaves. In later years, Savannah, New Orleans, and Mobile did the same.

These police forces, which I will refer to as City Guards, were distinct from both the militia and the watch. They were armed, uniformed, and salaried; they patrolled at night but kept a reserve force for daytime emergencies. In most respects, they resembled modern American police departments to the same degree as did the London Metropolitan Police of 1829—even much earlier.

Of course, these City Guards did not arise out of nothing. To understand their origin, we should consider the peculiar insti-

62 Marvin Dulaney complains: “Most scholars have dutifully traced the origins of the American police back to England and ignored the influences of the slave patrol and racism on the American police heritage.” W. Marvin Dulaney, Black Police in America (Bloomington: Indiana University Press, 1996), 127.

rent trends are any indication, it will remain so for some time. Given the ambiguous and shifting character of the police, it seems unwise to generalize about its essentially civilian (or military) nature, and I do not wish to define away the problem at the expense of a more nuanced analysis. Those characteristics remaining may be divided into two groups. The first are the defining characteristics of police:

(1) the authority to use force,
(2) a public character and accountability (at least in principle) to some central governmental authority, and
(3) general law enforcement duties (as opposed to limited, specified duties such as parking enforcement or animal control).

These traits, I think, are essential to any organization that claims to be engaged in policing. The second set comprises those criteria distinguishing modern policing from earlier forms. These include:

(1) the investment of responsibility for law enforcement in a single organization,
(2) citywide jurisdiction and centralization,
(3) an intended continuity in office and procedure,
(4) a specialized policing function (meaning that the organization is only or mainly responsible for policing, not for keeping the streets clean, putting out fires, etc.),
(5) twenty-four-hour service, and
(6) personnel paid on a salary basis rather than by fee.

There is one final characteristic that deserves consideration. The development of policing has been guided in large part by an emerging orientation toward preventive rather than responsive activity. Though this idea was firmly established by the time modern departments took the stage, it was not until quite
some time later that specific techniques of prevention entered into use, and the degree to which the police do, or can, or should, act to prevent crime remains even now a matter of intense debate.

Figure A. Characteristics of Modern Police

Rather than use these factors to draw a sharp line demarcating the clearly identifiable modern police (a line most police departments will have crossed and re-crossed), I propose we use these criteria to place various organizations on a continuum as being more or less modern depending on the degree to which they display these characteristics.\(^{14}\) (I have listed the traits here in order of what I take to be their relative significance.) This approach may seem a bit impressionistic, but I think the picture it offers is helpful in understanding the evolution of police systems. For the most part, the creators of the new police did not see themselves as marching inexorably toward an

59 Quoted in Lane, Policing the City, 10.
60 Ibid., 11.
61 Quoted in Greenberg, Crime and Law Enforcement, 156.
ing. As difficulties arose concerning the behavior of slaves, the delivery of goods, sanitation, street use, gambling, and the like, the local government responded by instituting regulations, which were generally ignored. To remedy this deficiency, the civil authorities called on the family and church to use their influence to bring about compliance. Where that failed, they would institute a system of fines (for violators) and rewards (for informers). They might then direct the constable to enforce the laws, or else appoint special informers concerned only with that particular law. Eventually towns began consolidating these positions and appointing general officers called marshals.  

Citizens were further expected to participate in law enforcement through the night watch. As Douglas Greenberg explains:

The character of the night watch varied from time to time. Sometimes it was composed entirely of civilians forced to take their regular turn as watchmen or pay for a substitute to replace them. At other times, especially during the intercolonial wars, the militia took over the watch. At still other times, a paid constable’s watch was used, or citizens themselves were paid to guard the city.

As in England, the watch was charged with keeping order, reporting fires, sounding an alarm when crimes were discovered, detaining suspicious persons, and sometimes suppressing riots and lighting street lamps.

The Boston Watch was in many respects typical. All men over eighteen years old were required to serve in person or provide a substitute (though clergy and certain public officials were exempted from duty). The state legislature ordered the watchmen to “see that all disturbances and disorders in the

ideal of modern policing. Instead, they adapted preexisting institutions to the demands of new circumstances, evolving their systems slowly through a process of invention and imitation, improvisation and experimentation, promise and compromise, trial and error. The rate of progress was unsteady, its path wavering, its advances frequently reversed, and its direction determined by a variety of factors including political pressure, scandals, wars, riots, economics, immigration, budget constraints, the law, and sometimes crime.

There is a further advantage to this approach: it acknowledges the fact of continuing development and leaves open the possibility of further modernization. Hence, rather than a revolution of modernity, occurring between 1829 and about 1860, we are faced with a much more protracted process. We find police departments approaching their modern form quite a while earlier; and yet, we can recognize that these same departments may not be fully modernized, even now.  

In short, this view avoids the tendency to treat our contemporary institution as the final product of earlier progress, as an end-point marking completion, and instead situates it as one stage in an ongoing process.

58 Monkkonen, Police in Urban America, 34.

15 There are two sets of implications to this treatment of modernization. First, current trends like militarization may be viewed in terms of an ongoing process of modernization. Second, this view allows for the possibility that emerging characteristics might overtake the traditional policing characteristics, thus fundamentally altering the nature of the institution. For example, our contemporary public, government-controlled police agencies may someday be superseded by private corporate-controlled organizations fulfilling similar functions. Whether such organizations should be counted as “police,” “company guards,” or “private armies” is very much open for debate, and probably cannot be decided without knowledge of the particulars of the institution.
English Predecessors

Many people find it astonishing that the police have predecessors. They seem to imagine that the cop has always been there, in something like his present capacity, subject only to the periodic change of uniform or the occasional technological advance. Quite to the contrary, the police have a rich and complex history, if an ugly one. Our contemporary institution owes much of its character to those that came before it, including those offices imported or imposed during the colonial period. These in turn have their own stories, closely linked to the creation of modern states. It is worth considering this lineage and the forces that propelled change, from one form of control to another.

During the time between the fall of Rome and the rise of modern states, policing—like political authority—became quite decentralized. Policing initially took an informal mode, such as that of the frankpledge system in England. Under this system, families grouped themselves together in sets of ten (called “tythings”) and collections of ten tythings (called “hundreds”). The heads of these families pledged to one another to obey the law. Together they were responsible for enforcing that pledge, apprehending any of their own who violated it, and combining for mutual protection. If they failed in these duties, they were fined by the sovereign.

Under the frankpledge system, the responsibility for enforcing the law and maintaining order fell to everyone in the community. Bruce Smith writes:

16 “Gradually, new superordinate kingdoms were formed, delegating the power to create police but holding on to the power to make law.” Bayley, “Development of Modern Policing,” 62.

17 “Informal policing refers to a system where community members are jointly responsible for the maintenance of order. Absent are persons whose sole responsibility is policing.” Lundman, Police and Policing, 15.

18 Bruce Smith, Rural Crime Control (New York: Institute of Public Administration, 1933), 36.

popular jobs; many people refused to serve when elected, and the authority of each office was commonly challenged, sometimes by violence. In 1756, for example, Sheriff John Christie was killed when trying to make an arrest. James Wilkes was convicted, but was soon pardoned by Governor Sir Charles Hardy, who reasoned that Wilkes had imbibed and strongly believed a common Error generally prevailing among the Lower Class of Mankind in this part of the world that after warning the Officer to desist and bidding him to stand off at his Peril, it was lawful to oppose him by any means to prevent the arrest.

The fact that such a view would be respected, despite its legal inaccuracy, says a great deal about the weakness of the sheriff’s position.

Neither of these offices was designed for what we now consider police work, and neither ever fully adapted itself to that function. Constables survived into the twentieth century, though only as a kind of rural relic. Sheriffs, meanwhile, retained many of their original duties—especially those concerning jails—and in some places still patrol the unincorporated areas of counties, though even in this respect state police forces sometimes supersede them.

Rather than invest much authority in these offices, the colonial government relied primarily on informal means of polic-

52 Ibid., 160.
53 Likewise, the fact that this presumption has been exactly reversed may serve as some measure of the increase in police authority. Nowadays, resisting arrest is unlawful even if the arrest itself is unjustified. And once a person has been warned that he is under arrest the police may generally use whatever force is necessary to restrain him.
55 The 1931 Report of the (Virginia) Commission on County Government described the constable’s office as being “of ancient origin,” “employ[ing] ancient methods,” and “having outlived its usefulness.” The Commission concluded that “the proper administration of justice will be promoted by its abolition.” Quoted in Smith, Rural Crime Control, 87–88.
Colonial Forerunners

The American colonies mostly imported the British system of sheriffs, constables, and watches, though with some important differences.

Sheriffs at first were appointed by governors, and made responsible for apprehending suspects, guarding prisoners, executing civil processes, overseeing elections, collecting taxes, and performing various fiscal functions. Corruption in all of these duties was quite common, with sheriffs accepting bribes from suspects and prisoners, neglecting their civil duties, tampering with elections, and embezzling public funds.46 The sheriff was empowered to make arrests when issued a warrant, or without one in certain circumstances, and was given additional duties during emergencies, but during the colonial period the office was only tangentially concerned with criminal law.47

The constable’s duties were similarly varied. He was charged with summoning citizens to town meetings, collecting taxes, settling claims against the town, preparing elections, impressing workers for road repair, serving warrants, summoning juries, delivering fugitives to other jurisdictions, and overseeing the night watch. In addition, he was, in theory, expected to enforce all laws and maintain the Crown’s peace.48 In practice, however, constables were paid by a system of fees, and tended to concentrate on the better-paying tasks.49

In the seventeenth and eighteenth centuries, both the sheriff and the constable were elected positions.50 Still, they were not

Our extremely modern concept of a specialized police force did not then exist. Neither was there any public means for repressing or preventing crime, as distinguished from its detection and the apprehension of offenders. The members of each tything were simply bound to a mutual undertaking to apprehend, and present for trial, any of their number who might commit an offense.19

This arrangement relied on the social conditions present in small communities, especially the sense of interpersonal connection and interdependence. But we should be careful of romanticizing this idyllic scenario. The frankpledge system was imposed by the Norman conquerors as a means of maintaining colonial rule. Essentially, they forced the conquered communities to enforce the Norman law.20

Still, the system was rather limited in its authoritarian uses, as it depended on a common acceptance of the law. Hence, English sovereigns later found it necessary to supplement the frankpledge with the appointment of a shire reeve, or sheriff, to act in local affairs as a general representative of the crown. The sheriff was responsible for enforcing the monarch’s will in military, fiscal, and judicial matters, and for maintaining the domestic peace. Sheriffs were appointed by and directly accountable to the sovereign. They were responsible for organizing the tythings and the hundreds, inspecting their weapons, and, when necessary, calling together a group of men to serve as a posse comitatus, pursuing and apprehending fugitives. The sheriffs were paid a portion of the taxes they collected, which led to abuses and made them rather unpopular figures. Eventually, following a series of scandals and complaints, the sheriff’s powers were eroded and some of his responsibilities were as-

signed to new offices, including the coroner, the justice of the peace, and the constable.\textsuperscript{21}

According to the 1285 Statute of Winchester, the constable was responsible for acting as the sheriff’s agent. Two constables were appointed for every hundred, thus providing more immediate supervision of the tythings and hundreds.\textsuperscript{22} As Smith describes:

[The constable’s] early history is closely intertwined with military affairs and with martial law; for after the Conquest the Norman marshals, predecessors of the modern constable, held positions of great dignity and were drawn for the most part from the baronage. As leaders of the king’s army they seem to have exercised a certain jurisdiction over military offenders, particularly when the army was engaged on foreign soil, and therefore beyond the reach of the usual institutions of justice. The disturbed conditions attending the Wars of the Roses brought the constables further powers of summary justice, as in cases of treason and similar state crimes. They therefore came to be a convenient means by which the English kings from time to time overrode the ordinary safeguards of English law. These special powers, originating in the “law marshal,” were expanded until they came to represent what we know as “martial law.”\textsuperscript{23}

Beyond his original military function, and the additional job of serving the sheriff, the constable was also responsible for a host of other duties, including the collection of taxes, the inspection of highways, and serving as the local magistrate. Ironically, as the \textit{posse comitatus} came increasingly to act as a mili-

toward avoiding a military appearance, though critics of the police idea still drew such comparisons.\textsuperscript{42}

In 1829, citing a rise in crime (especially property crime), Parliament accepted Peel’s proposal with only a few adjustments.\textsuperscript{43} The most important of these compromises excluded the old City of London from the jurisdiction of the Metropolitan Police. The old City of London (about one square mile, geographically) retained its own police force, which in 1839 was reorganized on the Metropolitan model.\textsuperscript{44} Meanwhile, the watch and river police were preserved and proved for some time more effective than the new Metropolitans.\textsuperscript{45} Still, though they lacked citywide jurisdiction and sole policing authority, the London Metropolitan Police are generally credited as the first modern police department.

Some historians treat the modern American police as a straightforward application of Peel’s model. As we shall see, however, policing in the United States followed a separate course, motivated by different concerns and producing unique institutional arrangements. In fact, I shall argue that American policing systems, especially those designed for slave control, neared the modern type well before Peel’s reforms.

  \item \textsuperscript{22} Bayley, “Development of Modern Policing,” 62–63.
  \item \textsuperscript{23} Smith, \textit{Rural Crime Control}, 75.
  \item \textsuperscript{42} Emsley, \textit{English Police}, 26.
  \item \textsuperscript{43} Reynolds, \textit{Before the Bobbies}, 4, 164.
  \item \textsuperscript{44} Emsley, \textit{English Police}, 31.
  \item \textsuperscript{45} Shortly after the watch was disbanded, the vestry clerk of St. Thomas, Southwark reported to Lord Melbourne: “The generality of the Inhabitant Householders expresses much dissatisfaction at the policeman being so seldom seen and consider that they are not so well protected as they were under the old nightly watch. And the parish is much more frequently annoyed by disturbances in the night.” Quoted in Reynolds, \textit{Before the Bobbies}, 158.
\end{itemize}
Such was the state of policing when Robert Peel, the home secretary, proposed a plan for a citywide police force. This body, the Metropolitan Police Department—now nicknamed “Bobbies” after their creator, but commonly called “crushers” by the public of the time—adopted many of the innovations previously introduced in the local watch, adding to these a new element of centralization. It thus fulfilled most of the criteria defining modern policing.

Peel based this effort on his experiences in Ireland, where he had introduced the Royal Irish Constabulary in 1818. Hence both the traditional watch and the police system that came to replace it were informed by the experience of colonial rule. They were each created by foreign conquerors to control rebellious populations. Peel had seen the difficulties of military occupation and understood the need to establish some sort of legitimacy. He crafted his police accordingly—first in Ireland, and then, with revisions, in England. In London the police uniforms and equipment were selected with an eye

39 “Finally, when we combine our better understanding of the elements, process, personnel, and motivations that were involved in police reform in London during the whole period from 1735 to 1829, it becomes clear that Robert Peel’s reform in 1829 was not revolutionary. It rationalized and extended but did not alter existing practices…. The change was carried out with the input and cooperation of local authorities, although not all were confident as to its benefits. The new police took on the functions of the old and did them in much the same fashion, drawing on the experience and expertise of the parish watch system. Many of the people who staffed the new police had staffed the parochial system.” Reynolds, Before the Bobbies, 164.
40 “Peel’s previous experience as an under secretary in the War and Colonies Office had prepared him somewhat in the management of alien, poverty stricken, and rebellious populations. Moreover, his staunch Protestantism and unwillingness to grant political rights to Catholics made him ideologically perfect to run the affairs of Ireland, at least from the English point of view.” Monkkonen, Police in Urban America, 37.
41 Ibid., 38.

24 “The ancient custom of making ‘hue and cry’ after criminals, with the entire countryside up in arms and joining the hunt, lapsed into disuse. The civil police officer began to emerge.” Ibid., 76.
25 “Under this system, the constable became subordinated first to the lord of the manor and eventually to the justice of the peace (who was frequently also the lord of the manor). As feudalism ended, capitalism developed as an economic system, and the nation-state formed. Thus, in gross, the origin of the English police in its modern form and function can be said to be consistent and coincident with the origin of the English state.” Cyril D. Robinson and Richard Scaglion, “The Origin and Evolution of the Police Function in Society: Notes Toward a Theory,” Law and Society Review 21.1 (1987): 147.
26 Smith, Rural Crime Control, 76.
(save one who was so Drunk that he was not capable of giving any Answer) Present in, or near the said Watchhouse.” A few years later, in 1735, John Goland of Bond Street complained to the Burgesses that he had been robbed three times in five years, noting that he “generally finds the Watchmen drunk, and wandering about with lewd Women.”

The watch thus represented neither a significant bulwark against crime nor a major source of power for the state. Yet the watch continued in various forms for 600 years.

During the eighteenth century, the London Watch underwent a long series of reforms. While neglect of duty and drunkenness remained major complaints, most of the characteristics of modern police were introduced to the watch in this period, first in one locale and then in the others. “The goal,” as historian Elaine Reynolds notes, “was a system of street policing that was honest, accountable, and impartial in its administration and operation.” Toward this end, several West End parishes began paying watchmen in 1735; most other parishes adopted the practice within the next fifty years. During this same time, more men were hired, hours of operation were expanded, command hierarchies and plans of supervision were drafted, minimum qualifications established, record-keeping introduced, and pensions offered. Reynolds explains:

By 1775, Westminster and several neighboring parishes had a night watch system that was both professional and hierarchical in structure, charged with preventing crime and apprehending night walkers and vagabonds. While police authority did remain divided between several local bodies and officials, decentralization was not necessarily synonymous with defec-

tiveness. These parochial authorities put increasing numbers of constables, beadles [church officials], watchmen, and [military] patrols on the street, paid and equipped them. They spent increased amounts of time disciplining them when they were delinquent and increasing amounts of money on wages.

Thus, during the eighteenth century the London Watch came very nearly to resemble the modern police department that replaced it.

The watch was also supplemented by various private efforts, including a “river police” created by local merchants and taken over by the government in 1800. During the first three decades of the nineteenth century, London was what one historian describes as “a patchwork of public and private police forces,” dependent for their authority on a wide array of institutions and officials, including “vestries, church wardens, boards of trustees, commissioners, parishes, magistrates, and courts-leet.” Among this mix, we find one group worthy of special notice—the thieftakers, forerunners of the modern detective. Despite their name, thieftakers were less interested in catching thieves than in retrieving stolen property and collecting rewards. The easiest way to do that was to act as a fence for the thieves, returning the goods and splitting the fee. Until his execution in 1725, Jonathan Wild was England’s most prominent thieftaker, controlling an international operation that included warehouses in two countries and a ship for transport.
useful function also, as part of the system of compromise which made the law tolerable.\textsuperscript{117}

In other words, the much-decried inefficiency and inadequacy of the night watch in fact corresponded with the practical limitations on the power of the state.\textsuperscript{118} With these limits removed or overcome, the state at once cast itself in a more active role. Public safety was no longer in the hands of amateur watchmen, but had been transferred to a full-time professional body, directed by and accountable to the city authorities. The enforcement of the law no longer relied on the complaints of aggrieved citizens, but on the initiative of officers whose mission was to prevent offenses. Hence, crimes without victims need not be ignored, and potential offenders needn’t be given the opportunity to act. In both instances the new police were doing what would have been nearly inconceivable just a few years before.

It was in this way that the United States became what Allan Silver calls “a policed society.”

A policed society is unique in that central power exercises potentially violent supervision over the population by bureaucratic means widely diffused throughout civil society in small and discretionary operations that are capable of rapid concentration.\textsuperscript{119}

The police organization allowed the state to establish a constant presence in a wide geographic area and exercise routinized control by the use of patrols and other surveillance. Through the same organization, the state retained the ability to concentrate its power in the event of a riot or other

\textsuperscript{117} Lane, \textit{Policing the City}, 84.

\textsuperscript{118} “The enforcement of criminal law, in the early nineteenth century, was still the responsibility of aggrieved citizens, or of the sheriffs, courts, and constables created by the commonwealth. Much of it was in fact ignored, and an attempt to apply it could be politically disruptive as well as physically dangerous.” Ibid., 220–21.

\textsuperscript{119} Silver, “Demand for Order,” 8.

\textsuperscript{118} Ibid., 598–601; and Rousey, \textit{Policing the Southern City}, 19–20.

\textsuperscript{150} These reforms reordered the city government, consolidating power under a mayoral figure called the intendent. They also created a daytime police force, which combined with the Charleston Watch and Guard in 1856. Ibid., 616–19, 626–28, 634–35, 643.
During the intervening years, Charleston's advances were surpassed by those of another Southern city, facing similar but distinct social pressures.

### New Orleans: “Barbarism,” “Despotism,” and “A System of Violence”

Occupying a strategic position for both economic and military uses, the city of New Orleans has changed hands numerous times. But, until the Civil War, each subsequent regime agreed on one basic principle: the utter suppression of the Black race. In succession, the French, Spanish, and American governments enacted very nearly the same set of laws for this purpose, controlling the social, economic, and political life of the Black community and regulating the work, travel, education, and living arrangements of Black people in the city. Louis XIV instituted a “Code Noir” in 1685, which Sieur de Bienville, the founder of the French colony of Louisiana, copied; the Spanish retained it as their own while they controlled the city; and the Americans re-enacted it as the “Black Code.”

In 1804, as the Black population nearly equaled that of the White, New Orleans sought out special mechanisms for enforcing these laws. At the time, two separate night patrols were in effect—a militia guard to protect against outside at-

---

“...It is significant to note under what conditions it [the daytime police force] arose and with what problems it was chiefly concerned; as in the case of night policing it is the control of the slave population that dominates enforcement activity.” Ibid., 635.

151 Ibid., 660–61.

152 In 1803, New Orleans had a population of 8,056 people. Of these, 2,273 were slaves, and another 1,335 were free Black people. The White population at the time numbered 3,948, but this group was anything but unified. Differences of ethnicity, religion, language, and national origin all divided the White population, and sometimes produced fierce conflicts. Ibid., 657.

At the same time, the drift toward modern policing fit nicely with the larger movement toward modern municipal government—best understood in terms of the emerging political machines, and later tied to the rise of bureaucracies. The extensive interrelation between these various factors—industrialization, increasing demands for order, fear of the dangerous classes, pre-existing models of policing, and the development of citywide political machines—makes it obvious that no single item can be identified as the sole cause for the move toward policing. History is not propelled by a single engine, though historical accounts often are. Scholars have generally relied on one or one set of these factors in crafting their explanations, with most emphasizing those surrounding the sudden and rapid expansion of the urban population, especially immigrant communities.

Urbanization certainly had a role, but not the role it is usually assumed to have had. Rather than producing widespread criminality, cities actually produced civility; as the population rose, the rate of serious crimes dropped. The crisis of the time was not one of law, but of order—specifically the order required by the new industrial economy and the Protestant moralism that supplied, in large part, its ideological expression.

The police provided a mechanism by which the power of the state, and eventually that of the emerging ruling class, could be brought to bear on the lives and habits of individual members of society. Lane reflects:

The new organization of police made it possible for the first time in generations to attempt a wide enforcement of the criminal code, especially the vice laws. But while the earlier lack of execution was largely the result of weakness, it had served a

---

156 Roger Lane describes the idea that cities produce crime as an “anti-urban myth,” arguing instead that “the growth of cities had a literally ‘civilizing’ effect on the population.” Lane, “Crime and Criminal Statistics,” 156, 157.
sisted with violence, such as the creation of a national state, colonization, or the enslavement of a subject people. It is at the point where authority is met with resistance that the organized application of force becomes necessary. Each development detailed here has conformed to this general pattern—the creation of the offices of the sheriff and the constable, the establishment of the watch, the deployment of slave patrols, the transition to City Guards, and finally the rise of the modern police.

The aims and means of social control always approximately reflect the anxieties of elites. In times of crisis or pronounced social change, as the concerns of elites shift, the mechanisms of social control are adapted accordingly. In the South, the institution of the slave patrol developed in stages following real or rumored insurrections. Later, complex factors conspired to produce the modern police force. Industrialization changed the system of social stratification and added a new threat, or set of threats, subsumed under the title of the “dangerous classes.” Moreover, while serious crime was on the decline, the demand for order was on the rise owing to the needs of the new economic regime and the Protestant morality that supported it. In response to these conditions, American cities created a distinctive brand of police. They borrowed heavily from the English model already in place, but also took ideas from the existing night watch, the office of the constable, the militia, and the slave patrols.

115 This analysis should not be read to imply that all those who suffered from violence were actively resisting the authority that mobilized it. From the perspective of power, it makes little difference if the particular victims are engaged in resistance or not. The use or threat of force (especially at excess) sends a message to those who do oppose, or might come to oppose, the perpetrators. Violence demonstrates the power of the authorities and the danger of any potential opposition. In such cases, the use of violence is not only instrumental, but also communicative.

153 Ibid., 663–65; and Rousey, Policing the Southern City, 14–16.
155 Rousey, Policing the Southern City, 16.
New Orleans patrol closely resembled the Charleston Guard of the same period, but it survived only briefly. In February 1806 the city council abolished the Gendarmerie, citing the cost of horses and the poor quality of the men. That same year, the council created a City Guard, modeled after and performing the same functions as the Gendarmerie, though less militaristic in demeanor and lacking the horses. Aside from two years when there was no patrol, this body survived until 1836.

In the 1830s the City Guard came under attack in the newspapers, courtrooms, and among politicians. In 1834, the Louisiana Advertiser accused them of “barbarism” and “despotism.” It urged the city council to dispense with the sword and pistol, the musket and bayonet, in our civil administration of republican laws, and adopt or create a system more congenial to our feelings, to the opinions and interests of a free and prosperous people, and more in accordance with the spirit of the age we live in.

That same year a committee of the city council decried the Guard’s violent treatment of suspects, saying that “the moment they lay hands on a prisoner they at once commence a system of violence towards him.” It was the violence of the authorities, the committee argued, that caused the forceful re-

conflicts have molded police performance in a variety of ways. Most police administrators have responded to whichever group was making the most noise at the moment rather than following a consistent and thought-out line of policy.

These political conflicts helped to shape the institution, just as the practice of imitation and the process of constant revision did. But behind it all is the simple fact that institutions, like organism species, must adapt to their environment or die. Policing, as an institution, did a great deal better than just survive. As it adapted to the social conditions of the early- and mid-nineteenth century, it became not only the product, but also the producer of social change.

The Policed Society

As policing changed, it grew in importance, and in turn changed the society that had created it. The development of modern police facilitated further industrialization, it consolidated the influence of political machines, it led to the creation of new bureaucracies and advances in municipal government, and it made possible the imposition of Protestant moral values on the urban population. Also, and more basically, it allowed the state to impose on the lives of individuals in an unprecedented manner.

Sovereignty—and even states—are older than the police. “European kingdoms in the Middle Ages became ‘law states’ before they became ‘police states,’” David Bayley writes, meaning that they made laws and adjudicated claims before they established an independent mechanism for enforcing them. Organized police forces only emerged when traditional, informal, or community-maintained means of social control broke down. This breakdown was in each case prompted by a larger social change, often a change that some part of the community re-

113 Richardson, Urban Police, x.
It would be tedious to trace out every dead branch on this family tree, but to only consider the successes would run the risk of distorting the picture of development, presenting a circuitous route as a straight-away for the sake of preserving the neatness of our map. To make the point briefly, I will borrow Bacon’s taxonomy of the abandoned types:

Some of the variations in enforcement brought about by the failure of the primary groups, particularly the failure of the family, to maintain order and security may be noted: the use of religious officers, such as the tythingman and warden; the use of the military; the attempt to secure order by having legislators and justices act as police; the trial of policing by posse, by citizen watch, by citizen informer; the practice of employing special men paid by fee; the experiments with private police and substitutes ... for the most part, these all failed.112

Experimentation moved cities from one type of law enforcement to the next, but we should not exaggerate the empiricist nature of the process. Far from following a carefully controlled program and employing the scientific method, progress occurred on an improvisational basis in response to short-term political considerations. Many adaptations were accepted, or abandoned, not on their practical merits but for strictly partisan reasons.

Americans have rarely if ever agreed on the proper scope and function of the police and ... [Richardson notes] such
rized to use force, and assigned general law enforcement duties. This body would be the main agency of law enforcement, with citywide jurisdiction, organizational continuity, a specialized policing function, and twenty-four-hour operations. And, as its inheritance from the slave patrol, it would be oriented toward the prevention of various disorders. In short, it would have all the major features of a modern police department. As luck would have it, however, this organization never materialized.

As the city government was busy redesigning the police services, the state government was redesigning the entire municipal administration. In March 1836, the Louisiana state legislature divided New Orleans along the borders of its ethnic neighborhoods, creating three distinct municipalities and preventing the just-settled police reforms from taking effect. Motivated by ethnic and economic rivalries, the plan maintained a common mayor and Grand Council, but divided the administration of services—including the police. The city stayed so divided until 1852.

Each department adopted a new, non-military approach, and retained some features of the old City Guard—namely, its public character, its authority to use force, its general law-enforcement duties, twenty-four-hour patrols, the goal of organizational continuity, its specialized police function, and its preventive orientation. However, none of the three could be counted as the chief law enforcement agency in the city because none had citywide jurisdiction. Furthermore, while in theory each police force was accountable to the General

---

167 "New Orleans initiated its military-style police in 1805 but demilitarized the police force in 1836, dropping the uniforms and weapons. At the same time a daytime police force, organizationally integrated with the night police, was formed to provide twenty-four-hour active patrolling with a unified chain of command—nine years before New York’s similar reform.” Ibid., 6.

168 Ibid., 36–37.

deemed successful in one city survived to be reproduced elsewhere. In principle, this process could result in a diversity of policing mechanisms, and at times has done so (witness the contrast between the seventeenth-century plantation system and that of New York during the same period). But as cities faced similar pressures related to population growth, industrialization, increased stratification, and the like, they came to adopt shared measures of success. As a result, older models, which had survived in some places for a very long time, were suddenly outmoded and replaced.

When social changes caused the traditional means of control to fail, variations of enforcement were adopted. Generally these were aimed at particular populations (slaves, the poor, immigrants) or trouble spots (ghettos, plantations, saloons, etc.). Specialists in enforcement arose, and then unified into general enforcement bodies. The move from informal systems of racial dominance to slave patrol, to police, may be understood as following this pattern. In New York, policing developed along similar lines: the watch was expanded, the constable’s duties extended, the marshal’s office created, and eventually a modern police force replaced them all.

The new agencies drew heavily from their predecessors in matters related to organizational structure, methods, and purpose. By incorporating the best of the recent innovations, the new types out-competed the disparate organizations they first imitated and then replaced. But it would be wrong to think of such changes as only ever representing real progress. In fact the nature of experimentation practically guaranteed otherwise. Innumerable innovations were introduced, only to be abandoned a short time later. Reforms were implemented, and quickly reversed.111

111 Indeed, Fosdick suggests that the process of endless adaptation proved an impediment to progress. “The history of the development of Amer-
Richardson writes, “Political parties contested vigorously to control police patronage and power, which ... precluded American departments from following exactly their supposed model, the London Metropolitan Police.”  

American cities also looked to each other for ideas. When Boston resolved “to imitate, as far as may be, the system of London,” it also mentioned the reforms of New York and Philadelphia, and noted that Baltimore, Brooklyn, and other cities were moving in the same direction.  

And in 1843, the legislative committee investigating better means of policing riots in Philadelphia spent two months collecting ideas from other cities.  

While less well documented, innovations originating in particular districts, or in the countryside, came to be incorporated into the practices of city police. This certainly occurred in Charleston, where the police had a direct lineage from the rural slave patrols. A similar process took place in London, where the use of full-time officers, the system of beat patrols, the focus on crime prevention, and even a bureaucratic structure were all developed in the parishes under the watch system, and then consolidated in 1829.  

If the practice of imitation shows how cities came to create police departments that closely resembled one another’s, the process of experimentation helps to explain why they settled on the particular model they did. Because each city adjusted its organization in a number of ways, either in response to local pressures or based on innovations of its own, variations emerged that could then be tested by experience. Those judged to be successful were retained, and those that failed were abandoned. A kind of natural selection took place. Only the ideas

aided in the effort. Opposition parties likewise fought for control of the polls. In the election of June 1858, a Vigilance Committee seized the state arsenal and police headquarters, with the stated purpose of ensuring a fair election.\textsuperscript{174} Similar actions were taken in 1888 by the Young Men’s Democratic Club, who—armed with rifles—surrounded the polls to prevent Know-Nothings and police from interfering with Democratic party voters.\textsuperscript{175}

Corruption didn’t end at the polls. Less politically driven misconduct was also common. Naturally, vice laws created opportunities for corruption at all levels, and throughout the nineteenth century scandals were common. In 1854, a new chief, William James, began a vigorous campaign to enforce the laws against gambling, liquor, and other vice crimes. As his reward, the Board of Police fired him and eliminated his office.\textsuperscript{176}

Meanwhile, though state law forbade carrying concealed weapons and made no exception for police, many cops did begin carrying guns, especially revolvers, illicitly. This practice was condoned and sometimes advocated by supervisors, and eventually gained the mayor’s approval as well. Predictably, a lack of training led to numerous accidents, often with police casualties.\textsuperscript{177}

Brutality and violence were also common, and during the 1850s several New Orleans cops were tried for murder. Most of these cases involved personal disputes, and the victims were frequently cops themselves.\textsuperscript{178} “Less severe episodes of violence were legion,” Dennis Rousey notes:

In a sample of cases covering a twenty-one-month period during 1854–1856, the Board of Police adjudicated forty-three cases of assault, assault and battery, or brutality by policemen, of modern policing to develop, once they crystallized into a coherent form, the idea spread very quickly.\textsuperscript{100}

Of course, the practice of borrowing police models from elsewhere was not itself new. American cities borrowed their earliest law enforcement mechanisms from European cities, especially London and Paris.\textsuperscript{101} Georgia modeled its slave patrols on those already established in South Carolina, which were themselves copied from similar systems in Barbados; later it became common for towns to copy the patrolling techniques of others nearby.\textsuperscript{102} Thus it is not especially surprising that New York, Philadelphia, Baltimore, Boston, and Washington, D.C., all took inspiration from the Metropolitan Police of London.\textsuperscript{103}

But, the English influence on American policing should not be overstated. Imitation occurred, but it was not total. Instead, Richardson argues, “America’s borrowing from England was selective. The general form of innovation came from England, although Americans modified and transformed English patterns to fit their particular culture.”\textsuperscript{104} Hence, the two countries prescribed very different relationships between the officers and the communities they patrolled. In England, the Bobbies were recruited from the countryside and from the lower ranks of the army. They were housed in barracks, denied the vote, and made accountable to Parliament rather than to the local authorities. In the United States, the police were expected to be a part of the communities they served. They were to act not only as police, but as citizens and neighbors as well.\textsuperscript{105} A more telling difference lay in the extent—and nature—of local political influence in policing. In America,
This shift can only be understood against a backdrop of much broader social changes. Industrialization and urbanization produced a new class of workers and, with it, new challenges for social control; they also produced opportunities for social control at a level previously unknown. The police represented one aspect of this growing apparatus, as did the prison, and sometime later, the public school. Furthermore, the police, by forming a major source of power for emerging city governments (and for those who would control them), also contributed to the development of other bureaucracies and increased the possibilities for rational administration. The reasons for these developments have been made fairly clear, but the means by which the police idea evolved and spread deserves further explication.

Imitation, Experimentation, Evolution

Studies of police history that focus on the experience of a particular city often inadvertently imply that the police in New York, for example, (or Philadelphia, or Boston) developed independently based on the unique needs and specific circumstances of that city. This perspective obscures a very important aspect of police development, namely the degree to which city administrators consciously watched the innovations of other cities, drawing from them as suited their needs. This system of communication and imitation explains the sudden appearance of very similar police organizations in cities all across the country, in a relatively short period of time. For though it took a very long time for the characteristics

181 “The most distinctive features of early southern police forces were uniforms, formidable weapons, and wages (rather than fees or compulsory unpaid service); around-the-clock patrolling and unification of day and night.
was significant, but not absolute; as a result, New Orleans foreshadowed many of the qualities of the modern police—qualities that finally crystallized in New York.

**New York: “Almost Every Conceivable Crime”**

In New York, as in New Orleans, the move toward modern policing was closely tied to the reconstitution of city government. In 1830 the state legislature divided the city’s common council into a board of aldermen and a board of assistant aldermen, each elected annually by ward. Distinct executive departments were formed, and the mayor was assigned the responsibility to see that the laws were enforced. A year later, the council gave him some of the authority he needed to meet that demand, putting him at the head of the watch.182

In the spring of 1843, Mayor Richard H. Morris proposed another round of reforms designed to reorganize the city government and consolidate the police. The state legislature authorized the city to create and manage a single, centralized police department—specifically a “Day and Night Police” consisting of 800 officers. Under this plan, each ward would have its own patrol, and the officers had to live in the wards where they worked. The councilors would nominate officers from their

forces came later. In the 1840s and 1850s northern cities adopted the twenty-four-hour patrol, organizational unity, and wages for patrolmen; uniforms and fire-arms followed later (often northern policemen armed themselves with guns without official authorization or even against the law). New Orleans participated in both types of reform, adopting the southern model in the period 1805–1836 and shifting to the northern model in the years 1836–1854.” Ibid., 14.

the same crimes.94 Enforcement practices surrounding the demand for order thus weighed doubly on working-class women, who faced gender-based as well as class-based restrictions on their public behavior.

At the same time, the increased demand for order came to shape not only the enforcement of the law, but the law itself. In the early nineteenth century, Boston’s laws only prohibited habitual drunkenness, but in 1835 public drunkenness was also banned. Alcohol-related arrests increased from a few hundred each year to several thousand.95 In 1878, police powers were extended even further, as they were authorized to arrest people for loitering or using profanity.96 In Philadelphia, “after the new police law took effect,” as historian Allen Steinberg has documented, “the doctrine of arrest on suspicion was tacitly extended to the arrest and surveillance of people in advance of a crime.”97

Police scrutiny of the dangerous classes was at least partly an outgrowth of the preventive orientation of the new police. Built into the idea that the cops could prevent crime is the notion that they can predict criminal behavior. This preventive focus shifted their attention from actual to potential crimes, and then from the crime to the criminal, and finally to the potential criminal.98 Profiling became an inherent element of modern policing.

So, contrary to the crime-and-disorder explanation, the new police system was not created in response to escalating crime rates, but developed as a means of social control by which an emerging dominant class could impose their values on the larger population.

96 Lane, *Policing the City*, 173.
97 Steinberg, *Transformation of Criminal Justice*, 152.
A fall in the real crime rate allows officially accepted standards of conduct to rise; as standards rise, the penal machinery is extended and refined; the result is that an increase in the total number of cases brought in accompanies a decrease in their relative severity.91

Once established, the police themselves may have helped to raise expectations. In New York, Chief Matsell actively promoted the panic over public disorder, in part to quiet criticism of the new police.92 More subtly, the very existence of the police may have suggested the possibility of urban peace and made it seem feasible that most laws would be enforced—not indirectly by the citizenry, but directly by the state.93 And the new emphasis on public order corresponded with the morality of the dominant Protestant class and the demands of the new industrialized economy, ensuring elite support for policing.

This intersection of class bias and rigid moralism was particularly clear concerning, and had special implications for, the status of women. In many ways, the sudden furor over prostitution was typical. As the social mores of the Protestant ruling class came to define legal notions of “public order” and “vice,” the role of women was re-defined and increasingly restricted. As Stephanie Coontz remarks, “Fond paternalistic indulgence of women who conformed to domestic ideals was intimately connected with extreme condemnation of those who were outside the bonds of patronage and dependence on which the relations of men and women were based.” As a result, women were held to higher standards and subject to harsher treatment when they stepped outside the bounds of their role. Women were arrested less frequently than men, but were more likely to be jailed and served longer sentences than men convicted of

92 Stansell, City of Women, 194–95.
93 Silver, “Demand for Order,” 21; and Lane, Policing the City, 223.

The new police ranked as extremely modern by the criteria listed earlier: a single organization was entrusted with the exclusive responsibility for law enforcement, served a specialized police function, patrolled twenty-four hours a day, and employed salaried personnel.184 In fact, New York City is often credited with having the first modern department in the United States. As we’ve seen, its claim to this title is debatable. The Day and Night Police marked a step forward in a nationwide progression, drawing from and solidifying ideas already in circulation elsewhere. But if New York’s police did not invent the model, they set the standard for the rest of the country. At the same time, they also set a new standard for political interference.

The mayor’s power to appoint officers of all ranks made it clear that the new police force would be politically driven. An officer’s job came as a reward for his political loyalty, and to keep the job he needed to support the officials who appointed him.185 Even if the politicians themselves did not demand such support, it was nevertheless built into the system. Since any incoming councilman would be likely to replace the present police with those of his own choosing, the cops understood that to keep their jobs they had to keep their patrons in power.

184 The issues of centralization and continuity are more problematic. For while the overall organization had citywide jurisdiction, the ward structure of city government ensured that it would be internally fragmented, with precincts functioning for the most part as autonomous units. Likewise, though the same officers patrolled every night, the overall continuity of the organization was subject to interruption with every change in municipal politics.
the police came to represent not only a means of securing political support through patronage, but also of ensuring influence through more direct means. In 1894, the Lexow Commission concluded that in a very large number of the election districts in the city of New York, almost every conceivable crime against the elective franchise was either committed or permitted by the police, invariably in the interest of the dominant Democratic organization of the city of New York, commonly called Tammany Hall.

The Committee’s report goes on to document police involvement in the Arrest and brutal treatment of Republican voters, watchers, and workers; open violations of the election laws; canvassing for Tammany Hall candidates; invasion of election booths; forcing of Tammany Hall pasters upon Republican voters; general intimidation of the voters by the police directly and by Tammany Hall election district captains in the presence and with the concurrence of the police; colonization of voters; illegal registration and repeating, aided and knowingly permitted by the police; denial of Republican voters and election district officers of their legal rights and privileges ... and on and on.¹⁸⁶

Political corruption was not new to the city, and law enforcement had always had a role in it. But the political use of the Day and Night Police extended the established pattern and reached a new level of malfeasance. The watch had previously been used as a source of patronage, as political parties filled its ranks with their supporters.¹⁸⁷ But the watch offered only a hint of the political uses to which the police could be put; a more developed example was provided by the marshals. Marshals, who operated more or less like constables, were created in the early nineteenth century to enforce laws that had previ-

New York City’s campaign against prostitution certainly followed this pattern. During the first half of the nineteenth century, the official view on prostitution transformed from one of complacency to one of moral panic. Beginning in the 1830s, when reform societies took an interest in the issue, it was widely claimed that prostitution was approaching epidemic proportions. Probably the number of prostitutes did increase: the watch estimated that there were 600 prostitutes working in 1806, and 1,200 in 1818. In 1856, Police Chief George Matsell set the figure at 5,000. But given that the population of the city increased by more than six times between 1820 and 1860, the official estimates actually showed a decrease in the number of prostitutes relative to the population.⁸⁹

Enforcement activities, however, increased markedly during the same period. In 1860, ninety people were committed to the First District Prison for keeping a “disorderly house.” This figure was five times that of 1849, when seventeen people were imprisoned for the offense. Likewise, prison sentences for vagrancy rose from 3,173 for the entire period covering 1820–1830, to 3,552 in 1850 and 6,552 in 1860. As prostitutes were generally cited for vagrancy (since prostitution itself was not a statutory offense), the proportion of female “vagrants” steadily rose: women comprised 62 percent of those imprisoned for vagrancy in 1850 and 72 percent in 1860.⁹⁰

This analysis does not solve the problem, but merely relocates it. If it was not crime but the standards of order that were rising, what caused the higher standards of public order? For one thing, the relative absence of serious crime may have facilitated the rise in social standards and the demand for order. Lane observes:

¹⁸⁶ Ibid., 233.
¹⁸⁷ In 1816, when the Democratic political network Tammany Hall took control of the general council, it immediately replaced all city officials with federalist leanings, including a great many of the watchmen. Ibid., 21.

⁸⁹ Ibid., 172–73.
A critic of this view might suggest that the rise in public order arrests reflected an increase in public order offenses, rather than a shift in official priorities. Unfortunately, there is no way to verify this claim. (The increase in arrests does not provide very good evidence, since it is precisely this increase the hypothesis seeks to explain.) However, if the tolerance for disorder was in decline, this fact, coupled with the existence of the new police, would be sufficient to explain the increase in arrests of this type.85

The Cleveland police offered a limited test of this hypothesis. In December 1907, they adopted a “Golden Rule” policy. Rather than arrest drunks and other public order offenders, the police walked them home or issued a warning. In the year before the policy was established, Cleveland police made 30,418 arrests, only 938 of which were for felonies. In the year after the Golden Rule was instituted, the police made 10,095 arrests, 1,000 of which were for felonies.86 Other cities implemented similar policies—in some cases, reducing the number of arrests by 75 percent.87

Cleveland’s example demonstrates that official tolerance can reduce arrest rates. This fact suggests an explanation for the sudden rise in misdemeanor arrests during the previous century: if official tolerance can reduce arrest rates, it makes sense that official intolerance could increase the number of arrests. In other words, during the nineteenth century crime was down, but the demand for order was up—at least among those people who could influence the administration of the law.88

85 Ibid., 222, 161.
87 Harring, Policing a Class Society, 40.
88 “Although the problems of the streets—the fights, the crowds, the crime, the children—were nothing new, the ‘problem’ itself represented altered bourgeois perceptions and a broadened political initiative. An area of social life that had been taken for granted, an accepted feature of city life, became visible, subject to scrutiny and intervention.” Christine Stansell, City of

ously been left to the attention of civilian informants.188 While the watch was a resource for rewarding supporters with jobs, the marshals were becoming an active force in local politics—a force that Tammany Hall would harness and direct for its own ends. Placed under the mayor’s command, the marshals provided one means of controlling the city council. As James Richardson writes:

There were only one hundred marshals, but this force could exert great influence upon the primary meetings at which candidates for the general election were chosen. The marshals often had enough political influence in the wards to block the nomination of a candidate for alderman or assistant alderman, and sometimes they had sufficient power to ensure the nomination of their favorites.189

The new Day and Night Police replaced the watch and the marshals, concentrating police power (and its political potential) in a single agency.190 Predictably, the police expanded their political role in new directions, becoming a tool for ambitious politicians to increase their influence. The career of Fernando Wood gives some idea of the uses to which police could be put.

Wood, a Democrat, ran for mayor on a reform platform and was elected in 1854. He began his term by launching an ambitious campaign against vice crimes, but quickly turned the effort to his own advantage. Saloons, gambling houses,
and brothels were shut down—unless their owners supported
the mayor’s political machine. While declaring, “I know
no party and recognize no political obligation,” Wood
disciplined police along strictly partisan lines and was willing
to impose all sorts of political obligations on the officers
under his command. Police were required to make financial
contributions to the mayor’s re-election campaign, and many
were ordered to canvass for him as well. Those on duty
ignored irregularities in polling, and two officers—Petty and
Hanley—inspected all the ballots in the first ward, beating
anyone who voted against the mayor. When Wood was
reelected, the Tribune estimated the police had been worth
10,000 votes.

But while the Democrats retained the mayoralty and con-
trolled both boards of the council, the Republicans held the
governor’s mansion and the state assembly, sharing the senate
with the Know-Nothings. In 1857 the state legislature passed
the Metropolitan Police Bill, creating a new police force with
jurisdiction over Kings, Westchester, Richmond, and New York
counties, and dissolving the existing municipal police. A five-
member board was established to oversee the new department,
and no Democrats were appointed to it. Harper’s Weekly
noted: “Of this change the practical effect will be to transfer
the patronage of our city police to Albany.”

78 In fact, crime was such a minor concern that it was
not even mentioned in the marshal’s report of 1824. The
city suffered only a single murder between 1822 and 1834.

Whatever the real crime rate, after the introduction of mod-
ern policing the number of arrests increased. The majority
of these arrests were for misdemeanors, and most were related to
victimless crimes or crimes against the public order. They did
not generally involve violence or the loss of property, but in-
stead concerned public drunkenness, vagrancy, loitering, dis-
orderly conduct, or being a “suspicious person.” In other
words, the greatest portion of the actual business of law en-
f orcement did not concern the protection of life and property,
but the controlling of poor people, their habits, and their man-
ners. The suppression of such disorderly conduct was only
made possible by the introduction of the modern police. For
the first time, more arrests were made on the initiative of the
officer than in response to specific complaints. Though the
charges were generally minor, the implications were not:
the change from privately initiated to police-initiated prosecutions
greatly shifted the balance of power between the citizenry and
the state.

195 Ibid., 95–100.
196 Ibid., 99. In the 1860s, the city’s fire, health, and liquor control depart-
ments were also taken under state control. “These acts were closely modeled
after the Metropolitan Police Law, setting the same boundaries for the dis-
tricts involved, having many of the same administrative provisions, and in
some cases having the police commissioners as members of the boards ex
officio.” Ibid., 42–43.
levels of crime and disorder in an era of phenomenal growth and profound social change.\textsuperscript{73}

I will refer to this as the “crime and disorder” theory.

Despite its initial plausibility, the idea that the police were invented in response to an epidemic of crime is, to be blunt, exactly wrong. Furthermore, it is not much of an explanation. It assumes that “when crime reaches a certain level, the ‘natural’ social response is to create a uniformed police force.” But, as Eric Monkkonen notes, that “is not an explanation but an assertion of a natural law for which there is little evidence.”\textsuperscript{74}

It may be that slave revolts, riots, and other instances of collective violence precipitated the creation of modern police, but we should remember that neither crime nor disorder were unique to nineteenth-century cities, and therefore cannot on their own account for a change such as the rise of a new institution. Riotous mobs controlled much of London during the summer of 1780, but the Metropolitan Police did not appear until 1829. Public drunkenness was a serious problem in Boston as early as 1775, but a modern police force was not created there until 1838.\textsuperscript{75} So the crime-and-disorder theory fails to explain why earlier crime waves didn’t produce modern police. It also fails to explain why crime in the nineteenth century led to policing, and not to some other arrangement.\textsuperscript{76}

Furthermore, it is not at all clear that crime was on the rise. In Boston, for example, crime went down between 1820 and 1830,\textsuperscript{77} and continued to drop for the rest of the nineteenth century.

Wood refused to acknowledge the legitimacy of the Metropolitan Police Law and ordered the police to obey only his authority. Eight hundred officers and fifteen captains sided with Wood, and about half as many joined the Metropolitans. For two months the city had two competing police forces, resulting in occasional street fights and brawls in the station houses. The conflict reached its peak when fifty Metropolitans tried to arrest Wood; 500 municipal police came to his defense, attacking the Metropolitans with their clubs and forcing a retreat. Finally, in July, after an appeals court ruled in favor of the Metropolitans, Wood dissolved the municipal police.\textsuperscript{197}

The Metropolitan Police Department lasted until 1870, when another series of power struggles led to its reorganization. In the 1869 election the Democrats won control of the mayor’s office, the governorship, and the majority of the legislature. William M. Tweed proposed a new city charter and invested $600,000 in its passage. Under the new charter, the mayor appointed the police board, and the police controlled the board of elections, they selected all inspectors and clerks, guarded the polls, and supervised the counting of the ballots.\textsuperscript{198}

In this, too, New York set the standard for the rest of the country. Political machines arose throughout the East, and in a more subdued fashion, in the West as well. In every case, the police department served as the strong arm of the machine—

  \item Ibid., 101–8; and Richardson, Urban Police, 39.
  \item A similar “City Hall War” occurred in Denver in 1894. There the Republican-controlled Board of Commissioners refused to resign when the governor appointed anti-gambling commissioners to their seats. Police officers, sheriff’s deputies, and assorted gangsters barricaded themselves inside City Hall, facing off against the militia. Tensions were relieved when the governor ordered the militia to Cripple Creek for more important matters—breaking a strike. For a time following this incident, Denver had two police boards and three police chiefs, but the Republicans eventually surrendered to a court order. Monkkonen, Police in Urban America, 43.

\end{footnotesize}
regardless of which party held power, or whether the depar-
ment answered to the city or state government.

The police, as we know them, came into maturity at about
the same time as the urban political machine. And while the
machine’s growth depended crucially on the police, their rela-
tionship was not that of equals. The cops were the tools of the
machine. As tools they were used, as tools they were refined,
and as very important tools they were fought over. Neither the
political machines nor any part of them invented the police for
this purpose, but they were well adapted to it, and—without
submitting to teleological reasoning—we should consider the
implications of this fact for policing, and for political author-
ity.

The police, since police (in the North, at least) patrolled alone or in
pairs, and were sparingly armed. Furthermore, an impersonal
system was to be preferred over either a military model or a
more informal arrangement because—ironically—it was less ob-
viously a tool of the ruling classes.72

To the degree that industrialization and urbanization created
changes related to the diversity of the urban population, eco-
nomic specialization, and social stratification, they certainly
produced new challenges of social control. But the question
remains, what did those difficulties have to do with crime? Put
differently, it might be asked: Were the dangerous classes crim-
nal? Or were they criminalized?

The Demand for Order

It is generally assumed that the police were created to deal with
rising levels of crime caused by urbanization and the increasing
numbers of immigrants. John Schneider describes the typical
accounts:

The first studies were legal and administrative in their fo-
cus, confined mostly to narrative descriptions of the step-by-
step demise of the old constabulary and the steady, but often
controversial evolution of the professionals. Scholars seemed
preoccupied with the politics of police reform. Its causes, on
the other hand, were considered only in cursory fashion, more
often assumed than proved. Cities, it would seem, moved in-
evitably toward modern policing as a consequence of soaring

72 “The newer sources of wealth turned toward a bureaucratic police
system that insulated them from popular violence, drew attack and animos-
ity upon itself, and seemed to separate the assertion of ‘constitutional’ au-
thority from that of social and economic dominance.” Allan Silver, “The De-
mand for Order in Civil Society: A Review of Some Themes in the History
conomic order in each place, and had profound implications for the systems of social control they adopted. As Michael Hindus writes:

Slavery was not primarily a penal institution, though that was one of its results. In addition to its role in the southern labor and social system, the plantation kept under confinement and control the one class that was most threatening to the social order. Similarly, the prison was not primarily a labor system, but it mandated labor for rehabilitation, profit, and internal order. The prison adopted many features of the factory system and justified forced labor of convicts because of the moral uplift it provided.70

Both systems supplied large-scale, unpaid labor for the propertied classes, deprived the workers of their most basic civil liberties and political rights, and relied on corporal punishment and shaming for discipline.71 Furthermore, in both cases the economic systems created the class of people they were then at such pains to control—the slaves in the plantation system, and the immigrant working class in industrialized cities.

While elite anxieties about the dangerous classes supplied the impetus for new forms of social control, other concerns also helped to shape the emerging institutions. The modern police system, unlike less formal means of control, actually required very little of ordinary citizens in the way of enforcement, and exposed the respectable classes to almost no personal danger. And, though supplying an organized force under control of the government, it avoided the unseemly image of a military occu-

3: The Genesis of a Policed Society

In the context of nineteenth-century municipal government, New York’s Tammany Hall was exceptional only in the level of its success. Similar machines emerged in nearly every American city. Powerful neighborhood bosses arose and affiliated, gaining control through a system of patronage and protection, keeping it through increased application of the same means, and administering civil affairs along lines that were not merely partisan, but personalistic as well. Favoritism became the central principle of local government.1

Under the machines, the resources of the government were the spoils of victory, belonging less to the public than to the reigning faction. Thus, quite removed from the ideal of delib-

---

1 "The machine was urban America’s outstanding contribution to the art of municipal government. Exemplified by Tammany Hall, it emerged in New York, Philadelphia, and other eastern cities in the early and middle nineteenth century and in Chicago, Kansas City, San Francisco, and other western cities not long after. A highly decentralized outfit, the machine was an association of loosely affiliated and largely autonomous ward organizations whose power depended on their ability to get out the vote on election day. Whether allied with the Democrats, as in New York, the Republicans, as in Philadelphia, or neither party, as for a while in San Francisco, the ward bosses operated in much the same way in most American cities. They gave out contracts to local businessmen, found and if need be created jobs for recent immigrants, provided opportunities for aspiring politicians, and otherwise exchanged material inducements for political loyalty. In return for delivering the vote, the ward bosses demanded a good deal to say not only about the policies of the mayor’s offices and city councils but also about the operations of the police departments and other municipal agencies." Fogelson, Big-City Police, 17.

---

70 Ibid., 126.
71 Ibid., 127.
ervative democracy, elections were neither contests of principle nor gauges of the public will, but battles between rival cliques—battles fought as often in the streets as at the polls. And these battles determined the distribution of jobs, services, and graft. Elections decided who made the law, who supplied public services, and who controlled the city treasury. And more importantly, they decided whose friends would fill public jobs, which neighborhoods would receive attention or suffer neglect, which illicit businesses would continue operation, and whose palm would be greased in the process.

Political Machines: The Gang and the Government
The gang and the government are no different.
—Jane’s Addiction

Corruption was the foundation and the defining characteristic of the political machine. Edward C. Banfield and James Q. Wilson offer a formal definition: “A political ‘machine’ is a party organization that depends crucially upon inducements that are both specific and material.” Put more simply, “Machine government is, essentially, a system of organized bribery.” But perhaps even that puts too pleasant a face on it, for machines did not use only bribery to get what they wanted; they used whatever means were available to them, including

with other causes have brought among us great numbers who have not had the benefit of a New England training and who have heretofore been held in restraint rather by fear of the law-giver than respect for the law. Moreover, criminal behavior was understood as a threat to the social order, not merely to its real or potential victims. Theft obviously challenged the sanctity of private property, but more to the point, drunkenness and vagrancy seemed to threaten the standards of diligence and self-control central to Protestant morality and crucial to an economic system dependent on regularity, predictability, and a disciplined workforce.

Crime and criminality were thus constructed to reflect the ideological needs of elites. Criminality was less a matter of what people did than of what they represented. The idea of the dangerous classes was intimately tied to the prevailing eco-

---

3 They continue: “[A] specific (as opposed to general) inducement is one that can be offered to one person while being withheld from others. A material inducement is money or some other physical ‘thing’ to which value attaches. Nonmaterial inducements include especially the satisfaction of having power or prestige, doing good, the ‘fun of the game,’ the sense of enlarged participation in events and a pleasant environment. A machine, like any formal organization, offers a mixture of these various kinds of inducements in order to get people to do what it requires. But it is distinguished from other types of organization by the very heavy emphasis it places upon specific, material inducements and the consequent completeness and reliability of its control over behavior, which, of course, account for the name ‘machine.’” Edward C. Banfield and James Q. Wilson, City Politics (Cambridge, MA: Harvard University Press and the M.I.T. Press, 1963), 115.
4 Ibid., 125.
edging the underlying causes that produced them. Instead, local elites preferred to blame the problems of urbanization on the moral shortcomings of the poor, and the idea of the “dangerous classes” was born.

In the years preceding the rise of police departments in London and in the United States, [Richard Lundman notes,] middle-class and elite members of society attributed crime, riot, and public drunkenness to the members of the “dangerous classes.” The image was that of a convulsively and possibly biologically criminal, riotous, and intemperate group of persons located at the base of society. Their actions were seen as destroying the very fabric of society. 64

The particular population identified with the dangerous classes varied by locale. In England, the dangerous classes consisted of the urban poor, vagrants, and prostitutes in particular. In the northern United States, it was the immigrant lower class; in Boston, the term was especially applied to Irish Catholics. 65 The term was not used much in the South, but the dangerous classes found an analogy in the Black population, and especially the slaves. In addition to their association with crime and disorder, the dangerous classes also represented an alien presence, a group with different values whose behavior was therefore suspicious as if by definition. 66 The Boston Council reported:

In former times the Night Watch with a small constabulary force, were quite sufficient to keep the peace in a city proverbial for its love of order and attachment to the laws and remarkable for the homogenous character of its population. But the rapid development of the system of railroads and of the means of communication, with all parts of Europe, together

65 Ibid., 29–30.

threats, fraud, blackmail, and actual violence. Machines were concerned about power and resources, not principles—and certainly not democracy. 5 Principles were espoused, of course, as justification for their actions, to differentiate one party from another, and to gain and maintain the allegiance of a constituency committed to such values. But it was typical of machine politics that principles were always secondary to the demands of power.

The privileging of power over principle meant that every aspect of the government’s activity was directed toward maintaining the ruling clique’s control. By the same token, every resource at the city’s disposal was available as a reward for the machine’s supporters. The police served in both capacities. Hiring, discipline, transfers, and promotions were all governed by the convenience of the machine organization. Hence, whenever control of the city government changed hands, turnover in the police department was sure to follow. Without regard for the qualifications of the individual officer, each party dispensed with the supporters of the other and replaced them with their own. Very nearly full turnover of police personnel followed the Los Angeles election of 1889, the Kansas City election of 1895, and the Chicago and Baltimore elections of 1897. 6

In the 1907 Louisville election, when a Republican was unexpectedly elected mayor, every captain was reduced to a patrolman, and Republicans (many lacking in police experience) were appointed in their place. When the Democrats won in the following election, the process was reversed. Again in 1917, the Republicans gained control and fired 300 from a department of 429. Everyone above the rank of sergeant was replaced. 7

5 Ibid., 116.
6 Fogelson, Big-City Police, 30.
In New York, positions were so sought after that appointments relied on political sponsorship or outright bribery, or sometimes both. Hence, from the first moment, the importance of political influence and bribes was made clear to new recruits. A patrolman’s position typically sold for $300 and required the approval of the district leader. Higher positions cost more. In 1893, Timothy Creeden paid a commissioner $15,000 to be promoted from sergeant to captain. As a captain’s salary was only $3,000 each year, it is obvious that he would need to rely on graft just to pay for his job.

Even when civil service tests were instituted in the 1880s, conditions remained largely the same. Politicians circumvented civil service requirements by appointing partisan boards, administering the exams in essay style, or requiring the civil service commission to provide three qualified candidates for every open position and allowing police officials to choose among them. Experiments with state-level police boards proved equally unhelpful. The creation of state boards, a partisan maneuver by design, only transferred the control of patronage from one group to another—as indeed it was intended to do. Likewise, bipartisan boards, rather than eliminating political spoils, merely divided them between the two strongest parties, to mutual advantage.

Nor did political interference end once an officer was hired. Police with powerful friends proved nearly impossible to discipline, no matter how corrupt, brutal, or negligent they might be. Even such routine matters as going on patrol and wearing uniforms were difficult to enforce.

creation of a professional, preventive police was both a result and a cause of the inability of citizens to deal with these matters themselves.” Lane, *Policing the City*, 221.
As we have seen, the first significant advances toward modern police appeared in the South, where elite attitudes about the state were characteristically ambivalent. The maintenance of slave laws originally relied upon informal, universal enforcement requirements reminiscent of the frankpledge: every White member of the community had the responsibility to uphold the law. The Southern system of slave control underwent a full transition from this informal policing system, through various stages of specialization, to its apex in the creation of the quite modern Charleston police force.\textsuperscript{60} Clearly this transformation relied on social stratification, the existence of a political state, and the use of the policing function to maintain the racial and economic status quo (that is, to protect the interests of the slave-owners). However, while police powers were intentionally divorced from the community and invested in a specialized group, this change was not—as Robinson and Scaglion’s model might imply—instigated at the behest of the slave-owners, but to some degree accomplished over their objections and despite their resistance. It was instead political elites who created slave patrols as a guard against the (political) threat of revolt more than against the (economic) dangers of escape. While the state functioned in the interests of the ruling class, it was not yet an agent of the ruling class—but a competing nexus of power, and a challenge to the aristocratic pretensions of the slave owners.

In cities, industrialization and its accompanying entourage of social changes led to the breakdown of the informal means of social control that had proved (mostly) sufficient to that point.\textsuperscript{61} Cities thus produced advances in social control that

\textsuperscript{60} This process is detailed in chapter 2.

\textsuperscript{61} “As long as the community was small there were sanctions more powerful than law, and when the law was invoked, the sheriffs, constables, and courts relied in practice on the initiative of the inhabitants in making complaints and swearing out warrants…. But as the city developed, problems arose which the community was unable to meet in traditional fashion. The

Since each officer’s career was politically controlled from beginning to end, the police became ardent supporters of their patrons. Police support was central to the survival of the machines: for much of the nineteenth century New York’s Board of Elections was under the supervision of the police board. The commissioners chose the polling places, drew up the voting districts, had the ballots and voter registration lists printed, and appointed the polling inspectors and clerks. The police department itself verified the registration lists, guarded the polls, and counted the votes. Mayor William R. Grace described this system as “a standing menace to the safety and purity of the ballot box, and tend[ing] to render the police of the city its masters rather than its servants.” Tammany police commissioner John Sheehan once bluntly stated that control of the police was more important than how the votes were cast.\textsuperscript{14}

This power tended to magnify the significance of the administrative branch, and especially bolstered the influence of the mayor.\textsuperscript{15} The career of Boston’s Josiah Quincy anticipated the trend. Beginning in 1823, Quincy was elected mayor six times. In 1829, he was dubbed “The Great Mayor,” a title which probably reflected the extent of his power more than the quality of his performance. During his term, Quincy chaired every important committee, allowing him to build an efficient administration and, as importantly, consolidate power under his personal leadership. At the same time, Quincy maintained his influence in the wards with the assistance of the nascent police apparatus. Central to this effort was the creation of a new office—marshal of the city—which, lacking precedent and statutory limits, could be made to fit whatever demands the mayor placed on it. The marshal served as head constable, commanded the night watch, acted as the city’s chief health officer,
prosecuted minor cases—and took on additional responsibilities after the creation of a day police in 1838.16

The marshal’s power reached its peak during the term of Francis Tukey, who took office in 1846. Within the first year of Tukey’s command the number of officers on the force was doubled, a detective division added, and a special night force created.17 But there were limits to how far this power would be allowed to develop. In 1851, the police voted as a bloc for Benjamin Seaver in the mayoral election, acting under the assumption that he would bar Irish immigrants from joining the force. Seaver won, but did not ban Irish police. Apparently the night police had crossed a line when they marched to the polls en masse. Seaver responded by firing all the night duty officers, dissolving that branch of the force, and leaving its patrols entirely in the hands of the barely existent night watch. Over the course of the next year, power was systematically moved away from the marshal and toward the mayor and the aldermen. In April 1852, the aldermen limited the marshal’s tenure to one year. Two months later, they replaced the position with that of chief of police. While Tukey was not fired outright, neither was he named the new chief. The Boston Semi-Weekly Atlas drew a comparison: “The Great Caesar fell for his ambition.”18

The lesson was clear: the police were a tool for the political machine; they would not be allowed to develop as a political force in their own right.

This balance could be difficult to maintain, though, since police were so central to the functioning of the machines. The police served the interests of political machines in three key ways: police jobs served as rewards for supporters; police controlled the elections; and police regulated illicit businesses, de-

(1) the origin of a specialized police function depends upon the division of society into dominant and subordinate classes with antagonistic interests;
(2) specialized police agencies are generally characteristic only of societies politically organized as states;
(3) in a period of transition, the crucial factor in delineating the modern specialized police function is an ongoing attempt at conversion of the social control (policing) mechanism from an integral part of the community structure to an agent of an emerging dominant class; and
(4) the police institution is created by the emerging dominant class as an instrument for the preservation of its control over restricted access to basic resources, over the political apparatus governing this access, and over the labor force necessary to provide the surplus upon which the dominant class lives.59

There is much to recommend this as a general scheme, though it seems to exaggerate the role of elite foresight and planning at the expense of after-the-fact opportunism. It does more to characterize the result than the process, assuming that the outcome corresponds with some original intention. Robinson and Scaglion’s account offers a useful outline of the preconditions necessary for the creation of the modern police, but the long and complex process of transition from pre-modern to modern policing suggests a more complicated picture than their theory would indicate, especially in regard to the relationship between economic elites and the state.

While it is certainly true that the ruling class came to use the police as an instrument for the expansion and preservation of their power, it seems like a stretch to say that they created the institution for that end.

Urbanization and Industrialization

When the modern police first appeared, East Coast cities were experiencing a wave of expansion, fueled by industrialization. It is no accident that industrial society produced new means of social control, since it also created new risks for disorder. Put simply, in an increasingly complex society, there was more that could go wrong. While the sheer numbers and diversity of the population contributed to this complexity, specialization (especially in the production and distribution of goods) and increased social stratification were probably more important. These factors acted together to depress or reduce the standard of living for the greatest portion of the cities’ residents, creating conflict between economic classes and increasing friction between ethnic and religious groups.57 Seldon Bacon suggests:

These three factors of social change, the rise in specialization, the stratification of classes, and the lowering of standards and consequent limitation of activities brought about by increasing numbers, all created problems in the maintenance of a harmonious and secure society; the techniques of enforcement present in the 16th, 17th, and 18th centuries were unable to meet these problems. The family, the local church, the neighborhood, and the existing governmental agencies could not cope with the situation. In fact, there is a good deal of evidence to show that the changes were weakening all these institutions, especially as they helped bring about the mobility and individualism so characteristic of American society.58

Cyril D. Robinson and Richard Scaglion argue along similar lines, placing the advent of modern policing in the context of the emerging capitalist system. They present four interdependent propositions:

19 As historian Robert Fogelson tells it,

Contrary to the conventional wisdom, the police did not suppress vice; they licensed it. From New York’s Tenderloin to San Francisco’s Barbary Coast and from Chicago’s Levee to New Orleans’ French Quarter, they permitted gamblers, prostitutes, and saloon keepers to do business under certain well-understood conditions. These entrepreneurs were required to make regular payoffs, which ranged, according to the enterprise and the community from a few dollars to a few hundred dollars per month, and to stay inside the lower- and lower-middle-class neighborhoods...20

In this way vice laws, and liquor laws especially, proved a useful tool for political machines to enhance their power. Protection money provided a source of funding, and selective enforcement allowed political bosses to discipline their supporters and put their competitors out of business.21

In New York, precinct captains used detectives to collect protection money.22 In other places, the landlord would collect it as a part of the rent, then pass it on to the police. He would say to the proprietor of the saloon or brothel: “You can have this house for two hundred dollars, with police protection, or one hundred dollars if you take care of yourself.”23

Police detectives, like the thieftakers before them, were more interested in retrieving stolen property and collecting rewards than in catching crooks. Of course, the easiest way to get hold of stolen goods was to work with the thieves. In exchange for immunity and a portion of the reward, thieves would supply detectives with their loot. The detectives would return the

23 Quoted in William McAdoo, Guarding a Great City (New York: Harper & Brothers, 1906), 86.
stolen items to the rightful owners—minus whatever sum they claimed as a reward. Many professional criminals would not work outside of such a framework, and these deals could be quite profitable for the cops. Between January 1, 1855, and April 30, 1857, Robert Bowyer of the New York Police Department earned $4,700 in rewards—more than twice his salary for the same period.24

Sometimes, no effort would be made to retrieve the stolen property, or to return it to the victim. Pickpockets and con artists were generally allowed to go about their business un molested so long as they cut the cops in on the action. The profits then worked their way up the political food chain. The Patrolmen were required to give a portion of their take to their commanders, the local politicians, and their affiliates, thus avoiding any punishment.25

Shakedowns weren’t restricted to illicit enterprises, either. Legitimate businesses could also be inconvenienced by strict enforcement of the law and were vulnerable to the disruption caused by routine harassment. Builders, bootblacks, produce merchants, and other peddlers had to pay off the beat cop, or else they might be taken in for blocking the sidewalks.26

The system of bribery and extortion that was nineteenth-century policing far surpassed anything that could be termed individual misconduct, or even organizational deviance; it resembled nothing so much as institutionalized corruption, state-sponsored crime. Graft and the abuse of power were not merely allowed, they were expected, required, and enforced—within the police department and throughout the city administration. The political machine may best be understood as an exercise in government of, by, and for corruption.

As Fogelson implies, this tendency developed in part because the police offered a means for the local government to impose its will, regulate the behavior of the citizens, and generally keep an eye on things with unprecedented efficiency and regularity. It thus became a constant temptation to use this power in new and expanding ways, often to the detriment of the specialized law enforcement function.

Further specialization then relied on the development of additional bureaucracies to take on these extraneous duties. As historian Roger Lane writes:

The police were valued especially for the flexibility which made them adaptable to new demands. But when better machinery was developed the government did not hesitate to transfer their responsibilities. The creation of the sewer, health, street, and building departments all diminished the role of the police in local administration.55

Policing is thus tied to a more general trend in government administration—namely, the rise of bureaucracies. The development of modern police both depended on and promoted the creation of other municipal bureaucracies. In the first place, the creation of other bureaucracies allowed the police to specialize. Second, the consolidation of police forces facilitated a more general move toward bureaucratization by providing a model for these same bureaucracies to adopt. For both of these reasons, the modernization of the police was a key component in the modernization of city government.56 But the impact of the new police was not restricted to its effect on municipal administration. Policing was also closely connected to the economic conditions attending widespread industrialization, and the consequent expansion of the cities themselves.

55 Lane, Policing the City, 221.
56 The slow transfer of power from the wards to the central administration, which began with an attempt to secure the influence of the machine, was later pursued by reformers as a means of limiting the machine’s power. This process will be described in detail in chapter 6.
from the militia, they became law enforcement bodies, and new duties were added accordingly.

The tension between specialization and generalization did not vanish with the creation of the modern police. The police retained many duties that were quite remote from their alleged purpose of preventing crime and enforcing the criminal law. Robert Fogelson explains:

In the absence of other specialized public bureaucracies, the authorities found the temptation almost irresistible to transform the police departments into catchall health, welfare, and law enforcement agencies. Hence the police cleaned streets and inspected boilers in New York, distributed supplies to the poor in Baltimore, accommodated the homeless in Philadelphia, investigated vegetable markets in St. Louis, operated emergency ambulances in Boston, and attempted to curb crime in all these cities.54

In fact, even today, the police continue to hold duties quite removed from the enforcement of the law and the prevention of crime. In many cities cops still direct traffic, license parades, escort funerals, remove panhandlers, quiet loud parties, find lost children, advise urban planners, make presentations to civic groups and school children, sponsor youth sports leagues, respond to mental health crises, and perform other tasks quite apart from any concern about crime.

54 Fogelson, Big-City Police, 16.

Before the rise of the modern welfare system, the police were often the only government agency available to care for the poor. As such, they provided overnight lodging for the homeless (in an area apart from the jails); distributed free firewood, shoes, and other necessities; and sometimes ran soup kitchens and employment services. See: Monkkonen, Police in Urban America, xiii, 86–127, 147; Fosdick, American Police Systems, 366, 370–76; Fogelson, Big-City Police, 60, 87, 187; Dulaney, Black Police in America, 107–8; Lane, Policing the City, 76, 114, 191–94, 206; Rousey, Policing the Southern City, 132–33; Sidney L. Harring, Policing a Class Society: The Experience of American Cities, 1865–1915 (New Brunswick, NJ: Rutgers University Press, 1983), 220; and Richardson, New York Police, 264–65.

This fusion of government and criminality follows a certain kind of logic. In “War Making and State Making as Organized Crime,” Charles Tilly argues:

Banditry, piracy, gangland rivalry, policing, and war making all belong on the same continuum.... [C]onsider the definition of a racketeer as someone who creates a threat and then charges for its reduction. Governments’ provision of protection, by this standard, often qualifies as racketeering. To the extent that the threats against which a given government protects its citizens are imaginary or are the consequences of its own activities, the government has organized a protection racket.27

The history of American cities gives concrete expression to Tilly’s theoretical claim. In the classic political machines, government agencies and organized criminal enterprises were not only moral equivalents, they often comprised the same people. Nineteenth-century policing did not just resemble racketeering, it was unmistakable gangsterism.

The police were a central component of this system. Both the protection schemes that ensured the cooperation of the underworld and the brawling gangs that controlled the polls on election day relied on—at the very least—the acquiescence of the police. In many respects the development of the political machines depended upon the simultaneous development of the modern police. At the same time, the modernization of policing made possible important advances in municipal government. In particular, the police provided the means by which the power of local government could be consolidated into a single coherent system. In this respect, the rise of political machines resembled the earlier rise of the state itself. A brief comparison of these processes may tell us something about the
engineering of power and the uses of policing in establishing its claims.

**Machine Politics, State Power, and Monopolies of Violence**

In general terms, we can discern a common principle underlying the creation of local political machines and that of national states. As Tilly explains: "A tendency to monopolize the means of violence makes a government’s claim to provide protection, in either the comforting or ominous sense of the word, more credible and more difficult to resist."\(^{28}\) He identifies four activities characteristic of states:

1. making war (defeating external rivals);
2. making states (destroying internal rivals);
3. protection (defending clients from their enemies); and,
4. extraction (acquiring the resources to do the other three).\(^{29}\)

Cities have not, since the colonial period, usually been forced to contend with external rivals, and thus have not been concerned with making war. But the other three tasks find clear analogies in the processes of municipal government, especially during the machine period. And at both the national and the municipal levels “all [these activities] depend on the state’s tendency to monopolize the concentrated means of coercion.”\(^{30}\)

Philadelphia’s history illustrates some more specific parallels. In the first half of the nineteenth century, urban growth had spread beyond the city’s jurisdiction, practically uniting it with nearby townships over which it had no authority. The urban area was divided between several municipalities, and these

Preventive seemed to mean that by their presence the police would inhibit the commission of crime and that they would deal with potentially serious crimes before they reached the crisis stage.\(^{52}\) This crude notion of prevention developed into a more serious and ambitious program as time passed, and came to inform the expansion of police powers. In Boston, for example, in 1850 the police were authorized to order any group of three or more people to “move on” or suffer arrest.\(^{53}\)

Of course, most of what the police did was still responsive, and most actual crime-fighting still took place after the crimes had been committed. But the preventive ideal was clearly gaining an articulation, and slowly techniques were developed to bring the practice closer to the principle.

The preventive ideal both prompted the expansion of police power and helped shape the specialized focus on crime. It is worth noting the tension between these two trends: if police powers expand over too large a range of duties, policing loses its character. The police come to resemble generalized inspectors, and enforcement of the criminal law becomes a secondary matter. But, if enforcement is overly specialized, the police are in effect replaced by a series of guards, traffic wardens, thief-takers, bounty hunters, and whatnot.

Constables, sheriffs, and marshals, as servants of the court or sovereign, were assigned general responsibilities. The slave patrols developed from the other end of the spectrum, beginning with a few select duties and accumulating responsibilities and power over time. This second path was the more straightforward route toward modernization because, rather than serving primarily as officers to the Crown or the court, the slave patrols existed solely as a means of preserving the status quo through the enforcement of the slave codes. As soon as they separated

\(^{52}\) Richardson, *Urban Police*, 32.
\(^{53}\) Lane, *Policing the City*, 94.
shall happen be absolutely discharged." Several other London
districts adopted a similar standard, though eventually the
limits of the system had to be admitted. A few months later,
St. Marylebone’s committee relented, acknowledging that
“many Robberies are committed within this Parish without the
possible knowledge of the Watchmen.”

Watchmen were thought to deter crime by their mere pres-
ence and they could detain people they suspected of criminal
acts, but the watch was not a detective force and had no means
for discovering the culprits after a crime was committed. The
odds, then, were against apprehension. While the idea behind
the watch was preventive, the watch’s methods were essen-
tially reactive, and even their reactive capabilities were quite
limited.

When Robert Peel created the London Metropolitan Police
in 1829, the prevention of crime was singled out as the new
body’s chief concern:

It should be understood, at the outset, that the principal ob-
ject to be attained is ‘the Prevention of Crime.’

To this great end every effort of the Police is to be directed.
The security of person and property, the preservation of the
public tranquility, and all the other objects of a Police Estab-
lishment, will thus be better effected than by the detection and
punishment of the offender, after he has succeeded in commit-
ning the crime.

Nevertheless, the Metropolitans remained unsure of how to
prevent crime. In the decades that followed, they essentially
replicated the patrols of the watch, with even less success.

In the United States, historian James Richardson tells us,
“the term ‘preventive police’ was used frequently and loosely.

were themselves divided geographically into neighborhoods,
politically into wards, and socially along religious and ethnic
ties—with a strong correlation between these sets of divisions.
It was nearly impossible to keep order. Catholics and Protes-
tants fought in the streets, White mobs attacked Black peo-
ple and abolitionist speakers, and the city government could
do practically nothing, even within the limited area of its au-
thority. The localized, ward-based system of city politics in-
hibited the government’s ability to enforce its will within
the neighborhoods. Yet, in the course of a few years, Philadelphia
was transformed from a fragmented megalopolis with only a
nominal central authority to a modern city with a unified gov-
ernment, a citywide political machine, and a police system to
enforce the will of each.

Much of the disorder in nineteenth-century Philadelphia
was perpetrated by the city’s volunteer fire departments.
Neighborhood-based fire companies adopted the ethnic and
religious identities of their members, and often saw themselves
as the champions of their neighborhood’s traditional culture
and honor. Firefighting became a source of neighborhood
pride, and offered an opportunity to settle scores against rival
groups. Demographic shifts and overlapping jurisdictions led
to frequent turf wars; firemen would often fight one another
while a blaze continued unabated. When opportunities for
battle did not present themselves, they were sometimes
created: fire companies would set fires in other precincts and
then ambush their rivals.

These brawls became neighborhood affairs, involving large
sections of the community. Many of the fire companies affiliated
with youth gangs, some with names like “Killers,” “Rats,”
and “Bouncers.” As the police at the time were also orga-
nized into separate ward organizations, they were ill-suited for suppressing such riots. Not that they were eager to: the cops generally felt little inclination to interfere with these battles, except in support of their neighborhood company.

This situation put conflicting pressures on the political system. On the one hand, it created demands for more centralization, such as government-run fire departments and a single police force capable of suppressing disorder. On the other hand, ward leaders saw the political potential of the fire companies and were quick to avail themselves of this additional source of election-day muscle.\(^{34}\) The balkanized state of the city therefore left local political bosses in a bit of a bind. Their personal fiefdoms were inextricably tied to the ward-based structure of government; it allowed them a distinct realm of influence and a base of support for pursuing their agenda in the citywide political arena. But the exercise of this authority relied on a certain minimum degree of public order—which this same ward structure, with its rivalries and fragmentation, constantly threatened.

The outcome of this dilemma is revealing. In 1850, a “marshal’s” police force was created for the entire city of Philadelphia. Police in the suburbs and the four city districts continued to act independently, but were also called on to cooperate with the marshal’s force. The first marshal, John Keyser, recruited the new police directly from the youth gangs associated with Nativist fire departments, reasoning that he could form a “strong-armed force prepared to slug it out with fire gangs.”\(^{35}\) By co-opting the most militant element of the fire companies and consolidating them into a single, citywide force, the marshal’s police organization afforded the new cops the opportunity to defeat their traditional rivals and greatly enhanced the

---

phasis on prevention, the tendency to expand police duties, and the move toward specialized agencies. Each of these three factors contributed to the process of modernization, but the ideal of prevention occupied a special place as a guiding principle of police development.

### The Preventive Ideal, Generalized Powers, and Specialization

The idea of preventing crime has long been the avowed aim of policing, but it has undergone significant revision over time. In the London Night Watch Acts of 1737 and 1738, crime prevention was explicitly cited as the goal of the watch, though it is unclear how the body was supposed to contribute to this aim.\(^{45}\) The instructions offered the Philadelphia Watch in 1791 were only slightly more explicit:

> [T]he said constable and watchmen, in their respective turns and courses of watching, shall use their best endeavors to prevent murders, burglaries, robberies and other outrages and disorders within the city, and to that end shall, and they are hereby empowered and required to arrest and apprehend all persons whom they shall find disturbing the peace, or shall have cause to suspect of any unlawful and evil design.\(^{46}\)

By 1800, the preventive rationale had been refined. The watch’s role was to ensure that criminals would be punished.\(^{47}\)

To this end, in 1794, the St. Marylebone Watch Committee resolved unanimously “that in case any Robbery be committed within the Parish, the Watchmen in whose Walk the same

\(^{47}\) “The task was increasing the certainty of detection and the difficulty of committing a crime.” Reynolds, *Before the Bobbies*, 77.
Centralization, even in meager form, not only changed the distribution of power, but also tended to transform the institutions that shared power. The modernization of the police allowed for a major advance in the organization and efficiency of the political machine, and with it the power of the municipal government. With a single police force in place, power could be, if not quite centralized, at least somewhat solidified. This step proved a major boon to the reigning machine, and provided one means for the machine to exert influence in wards where popular support was weak. As it did, however, it began the process by which control was shifted both upward and toward the center.

Inadvertently, the creation of a citywide police force both drew up the blueprint and laid the groundwork for the creation of other municipal bureaucracies, and for the eventual destruction of the ward-based machine system. While somewhat ironic, this turn of events represents a continuation of the trends that had shaped the development of law enforcement as it approached the modern period—specifically, the growing em-

39 "On the whole consolidation was, in many ways, illusory. Its success depended in large part on the acquiescence of the same politicians whose activities it had been designed to control.... The procedures of ward politics intensified with the rise of a citywide political machine. As a result, the police became closely tied to both the existing structure of primary justice and the new structure of urban politics." Ibid., 171.
rivals. So long as local political bosses could command their own sources of power, the central government as a whole was necessarily vulnerable. Again we find a parallel with the creation of the nation-state:

In one way or another, [Tilly writes,] every European government before the French Revolution relied on indirect rule via local magnates. The magnates collaborated with the government without becoming officials in any strong sense of the term, had some access to government-backed force, and exercised wide discretion within their own territories.... Yet the same magnates were potential rivals, possible allies of a rebellious people.

Eventually, European governments reduced their reliance on indirect rule by means of two expensive but effective strategies: (a) extending their officialdom to the local community and (b) encouraging the creation of police forces that were subordinate to the government rather than to individual patrons, distinct from war-making forces, and therefore less useful as the tools of dissident magnates.40

So, too, in Philadelphia: so long as the central government was dependent upon the cooperation of the ward bosses, the government’s influence was quite limited and no one faction could be assured of permanent dominance. Faced with difficulties resembling those of the early European states, Philadelphia’s local government followed a similar course.

[In England,] Tudor demilitarization of the great lords entailed four complementary campaigns: eliminating their personal bands of armed retainers, razing their fortresses, taming their habitual resort to violence for the settlement of disputes, and discouraging the cooperation of their dependents and tenants.41

In Philadelphia, all four aims were accomplished with one masterstroke: the creation of a citywide police force allowed the limited consolidation of the city government. The ward-based militants were either co-opted into the police or defeated by them. While no fortresses existed to be pulled down, the ward leaders were made increasingly vulnerable politically; their position came to depend as much on their status within the machine, citywide, as on their influence in their own ward. Inter-ward battles were either avoided by the new system or forcibly resolved by the new police. And the cooperation and loyalty of ward residents, once owed to their local boss, became attached to the new citywide machine.

Philadelphia did not become a nation-state, of course, or even a city-state. But the authority of the city government was produced by very similar means, and in this process the creation of modern policing played a central role. The new police were not simply one aspect of a modernizing city government; they also represented a means of consolidating power within the modernizing government. But as the city consolidated power, it embarked on the first of a series of adaptations that would strengthen the government itself at the expense of the local leaders, eventually leading to the decline of the machine system.42

41 Ibid., 174. This was not the only path to state-formation, nor does Tilly pretend that it was. See also: Charles Tilly, Coercion, Capital, and European States, AD 990–1990 (Cambridge, MA: Basil Blackwell, 1990).

42 The classic political machines were withering by the middle of the twentieth century, with Chicago offering one of the few examples to survive into the 1960s. But even without the machines, corruption continued to be a pervasive feature of police departments across the country. Fogelson, Big-City Police, 167–68, 172.

William Chambliss describes his findings: “In my research on organized crime in Seattle, Washington, I discovered a symbiotic relationship between organized crime and the police that made it impossible to differentiate between them. Law enforcement officers, from street patrolmen to police chiefs to members of the prosecuting attorney’s office, not only accepted payoffs from people who organized illegal gambling, prostitution, and drug sales, but the police and prosecutors were instrumental in organizing and...
Rowe had informed the FBI of the plan, and the FBI dutifully put it in their files while allowing the Klan to move ahead. Rowe’s handler claimed that there was nothing they could do, because of the involvement of the local police. But the FBI had played a further role in the Mother’s Day attack: government documents released during a 1978 lawsuit revealed that the FBI had provided the Birmingham police with the details of the Freedom Riders’ plan, knowing that the information would reach the Ku Klux Klan. Thus the Birmingham police provided a conduit for information to pass between the FBI and the KKK, while maintaining the federal government’s shield of plausible deniability. And Rowe, by monitoring Klan activity and reporting to the feds, served to confirm that the information they provided reached its intended audience.

The FBI finally used Rowe against the Klan in 1965, after the murder of Viola Liuzzo. Rowe and three others shot Liuzzo as she drove demonstrators back to Selma after a march to Montgomery. Leroy Moton, who was traveling with Liuzzo, described the shooting:

I looked at my watch. It was like eight o’clock, and I reached over for the radio and that’s when I felt this glass and everything hit me in the face, and the car goin’ off the road. Mrs. Liuzzo, last thing she said was, “I was just thinkin’ of this song, ‘Before I’ll be a slave, I’ll be buried in my grave.’” By the time she got “grave” out, that’s when she was shot. That’s when the glass started hittin’ me in the face. We ran into an embankment, a ditch, came out of it, and ran into a fence. And I reached over and called her, shook her. She didn’t say anything. That’s when I turned the motor off and the lights. This other car came back, stopped, and I looked over my left shoulder and I seen it, and I saw the door open and I passed out for about a half hour. I understand they thought I was dead, too. Because the blood

4: Cops and Klan, Hand in Hand

And the police are simply the hired enemies of this population. They are present to keep the Negro in his place and to protect white business interests, and they have no other function.

—James Baldwin

In the later nineteenth century, as political machines, industrialization, and the modern police reshaped urban society, politics in the South faced additional complexities in the aftermath of the Civil War. There, many of the trappings of machine politics were present—corruption, abuses of power, favoritism, and street brawls—but with a difference. The status of the newly freed Black population became the political question. The Republican Party, dominant following the war, developed a constituency among Black voters eager to assert themselves, and relied on the occupying Union army to suppress opposition. The Democratic Party aligned itself with disenfranchised Confederate veterans, deposed planters, former slave-owners, and the other reactionary remnants of the status quo ante, including many poor White people ideologically attached to the old

1 Baldwin continues: “They are, moreover ... quite stunningly ignorant; and, since they know they are hated, they are always afraid. One cannot possibly arrive at a more sure-fire formula for cruelty.” James Baldwin, “A Report from Occupied Territory,” in Collected Essays (New York: The Library of America, 1998), 734.

1961. When he asked why nothing was done to stop the assault, his FBI handler told him, “Who the hell are we going to report to?... The police department helped set [it] up.”

And indeed they had. In April 1961, Detective Sergeant Tom Cook, the commander of the Birmingham Police Department red squad, provided the Klan with a list of civil rights groups, the locations of their meetings, and the names of their members; he went on to offer them full access to the red squad’s files. As it happened, the man Cook passed the information to was Gary Rowe. Ironically, Cook told Rowe that the Eastview Klavern had been infiltrated by the feds, and promised to help them learn the identity of the snitch. (Further irony: Rowe was actually a triple agent, assigned by the Klan to attend civil rights meetings and report back. He also gave these reports to the FBI.)

Together, Cook and Rowe organized a series of meetings between Birmingham Klan leader Hubert Pape, Imperial Wizard Robert Shelton, Bull Connor, and themselves. At these meetings, they planned a response to the Freedom Rides. The Klan would meet the bus at the terminal, and the police would wait at least fifteen minutes before arriving. Connor recommended beating and stripping any Black people who entered the restroom. “[Make] them look like a bulldog got hold of them,” he said. Cook added: “I don’t give a damn if you beat them, bomb them, murder or kill them. I don’t give a shit. I don’t want them in Alabama when you’re through with them.”

The plan was executed as agreed. By the time the police showed up, the Freedom Riders had been beaten with iron bars, and most of the Klansmen had gone. Those remaining were sent away rather than arrested.

182 Donner, Protectors of Privilege, 308–09.

eling together to desegregate interstate bus lines.176 In 1961, the Congress of Racial Equality (CORE) Freedom Rides came through Birmingham. Connor had the Riders arrested, drove them to the Tennessee line, and left them stranded on the highway.177 When they returned, on Mother’s Day 1961, they were beaten by a group of Klansmen while Connor watched from a nearby office building.178

As we shall see, the Mother’s Day incident illustrates not only the extent to which the police shared the aims of organized racist groups (perhaps I should say, other organized racist groups), but also actively cooperated with them. This connection was not incidental. Nor was it an isolated occurrence. To understand something of its depth, we should turn briefly to examine the career of Gary Rowe.

The Strange Career of Gary Rowe

Gary Rowe was an FBI infiltrator in the Ku Klux Klan, working in that capacity from 1959 to 1965.179 Though not personally sympathetic to the Klan, he had, by his own admission, “beaten people severely, had boarded buses and kicked people, had [gone] into restaurants and beaten them with blackjacks, chains, pistols.”180 All this he did while on the FBI payroll. Rowe reported, sometimes in advance, about attacks on Black people at a county fair, at sit-ins, and on Freedom Rides—including advanced warning about the Mother’s Day attack of

2 “The maintenance of white supremacy, and the old order generally, was a cause in which white men of all classes felt an interest. All classes had been united in a defense of slavery before the war, occasionally joining a patrol or vigilante activity for that purpose, and they had jointly fought a war to preserve the institution.” Allen W. Trelease, White Terror: The Ku Klux Klan Conspiracy and Southern Reconstruction (New York: Harper and Row, 1971), 51.

3 The Klan was the most common type of organization, though it lacked any real coherence from place to place and could hardly be considered “one” organization. Still, the differences between the Klans and the other groups were negligible. I follow Trelease here in using the term “Klan” both to refer to the specific organizations that adopted that name, and as a generic term identifying the type of organization. Ibid., xlv–xlvi.

4 Ibid., 95.

5 Ibid., 17.

6 “Bands of a dozen or more disguised men rode about regularly after dark, calling or dragging Negroes from their homes and threatening, robbing,
ulated the social lives of the Black population, breaking up worship services, opposing the creation of Black schools (often with success), and establishing and enforcing a system of passes for Black workers.  

In less routine actions, White mobs sometimes attacked individual Black people, Black political assemblies, and White Republicans. These attacks often involved the police as participants, or even leaders. For example, in April 1866, after a crowd of African American Union Army veterans prevented the Memphis police from arresting two of their comrades, the cops led White mobs through the streets attacking Black people at random. Mounted squads headed by police rode through Black neighborhoods, beating anyone they found on the streets and setting fire to schools, churches, and homes. The attack lasted four days, until martial law was declared. Forty-six Black and two White people died; ninety-one houses, twelve schools, and four churches were burned.

That July in New Orleans, the police led a military-style attack against a majority-Black convention of Union loyalists. On July 30, as the delegates gathered at the Mechanics Institute, crowds of White men collected on the streets, many cops and firefighters among them. As a procession of a hundred or so Black delegates approached the Mechanics Institute, a fight beating, and occasionally killing them. Some white Republicans received the same treatment. Most of this activity followed a common pattern. Klansmen nearly always searched for and confiscated any guns they found; in a few locations they made a blanket requirement that Negroes deposit their guns at a certain place by an assigned date or face a whipping. Generally they quizzed their victims about their voting intentions at the forthcoming election. If a freedman answered that he planned to vote for Grant he was likely to be whipped; if he said he planned to vote for Seymour or else stay home he was more likely to get off with a warning and the loss of his gun. In some cases, blacks were robbed of money, watches, and other possessions.”

In 1963, Birmingham became the shame of the nation when television footage showed demonstrators with the Southern Christian Leadership Conference being beaten by Connor’s officers, attacked with police dogs, and sprayed with fire hoses. Reverend Fred Shuttleworth had to be taken away in an ambulance. Connor expressed his disappointment: “It should have been a hearse.” Connor’s disdain for Shuttleworth had a long history. In 1958, when the reverend’s home had been bombed, Connor publicly accused Shuttleworth of doing it himself. The accusation, made without evidence, came in the midst of a bombing campaign commonly known to be the work of the Klan. Black homes and Jewish synagogues were attacked so often that one part of the city was nicknamed “Dynamite Hill.” The fire department (which was also under Connor’s control) generally let the buildings burn down entirely, and the police made no serious efforts to investigate the attacks. Connor preferred to blame civil rights workers for stirring up trouble. Connor expressed special animosity for “out-of-town meddlers” like the Freedom Riders—Black and White people traveling in Mississippi (which is duplicated in parts of Alabama and Louisiana at least) is in gathering information on fundamentally lawless activities which have the sanction of local law enforcement agencies, political officials, and a substantial segment of the white population.”

Ralph McGill, the publisher of the Atlanta Constitution, concurred: “In the small community you too often find that the sheriff is a member [of the Klan] or that the deputies are members. And the poor white man, or more particularly the poor Negro in a small community, he well knows that he has no protection at all. The law isn’t going to help him because the law is, more often than not, in the Klan or sympathetic with it in the small Southern community.”

none who were White. Judge George Edwards of the United States Court of Appeals for the Sixth Circuit, described the riot as "open warfare between the Detroit Negroes and the Detroit Police Department."  

**Birmingham: Bull Connor and the Law**

Shortly after World War II, resistance to White supremacy began to accumulate a critical mass. Nearly a century after the Civil War, Black people had had enough—more than enough—of empty promises and the thin simulacrum of freedom that had been their lot since the end of slavery. Tired of being excluded and exploited, sick of segregation and second-class citizenship, they determined to—as James Forman put it—either “sit at the table,” or “knock the fuckin’ legs off” of it. First in the South, but soon throughout the country, Black people were demanding their due of White society. And White people, as usual, were serious about not giving it to them.

The police occupied their traditional place, standing firmly in the way of African Americans’ efforts to win their rights. The situation demanded nothing new of the police, though in times of crisis their function may have been a bit clearer than usual, as the rhetoric of legal impartiality slipped further and further away from them. Birmingham’s police chief, Bull Connor, put it plainly: “We don’t give a damn about the law. Down here we make our own law.” It was a startling admission, but undoubtedly true.

169 Ibid., 232.
170 Kerner Commission, Report, 85.
172 Quoted in Donner, *Protectors of Privilege*, 306.
173 Attorney General Robert Kennedy wrote in a memo to President John F. Kennedy: “The unique difficulty as it seems to me to be presented by

broke out. It is disputed what, precisely, led to the fight, but it is generally agreed that a White policeman fired the first shot. The delegates returned fire and hurried into the building. The mob, more than a thousand White people, surged in after them, breaking down doors, firing into the assembly hall, and clubbing those inside.  

A *New Orleans Times* reporter described the scene following the massacre:

Out of the Senate Chamber, once more in the cross passage, pass through the hall, here is the last step of the main stairway. Blood is on it. The white wall is smeared with blood in the track of what had been a live man’s shoulder leaning up against it. Blood on the next step. Blood marks higher up on the walls, blood and marks of sanguinary struggle from the top to the bottom…. A door opens outward on the stairway leading down into the vaults. The first thing noticed is a bloody handmark, blood-spots line the white walls on the side, and blood spots the steps…. It is with a sensation of sickening horror that you leave all the scenes and respectfully picking your way through cast off hats and shoes that are all over every floor of the building, find yourself in the open street, the sidewalk of which ran with blood.

With the convention in ruins, the police led bands of White vigilantes around the city, beating any Black people they encountered and shooting at those who fled. The majority of the victims had no connection to the convention. At least thirty-eight people were killed, and many times that number wounded. Overwhelmingly, the victims were Black.

10 Quoted in Melinda Meek Hennessey, “To Live and Die in Dixie: Reconstruction Race Riots in the South” (PhD diss., Kent State University, 1978, University Microfilms International), 45.

Dr. Albert Hartstuff, an Army surgeon, counted thirty-four Black people and four White people killed, along with 153 Black and thirty-one...
That afternoon, bodies were piled into baggage cars. Many of the wounded were loaded in with the dead, and witnesses later swore to seeing police systematically shooting those who stirred.\textsuperscript{12} No one was prosecuted for the massacre, though a Congressional committee concluded that it had been planned by a group of police—mostly Confederate veterans.\textsuperscript{13} They were assisted by a Know-Nothing group called (appropriately) “the Thugs” and a vigilante regiment named “Hays’ Brigade,” acting under the leadership of police Sergeant Lucien Adams and Sheriff Harry T. Hays, respectively.\textsuperscript{14}

These two examples, especially the Mechanics Institute massacre, illustrate the character of such attacks. As historian Melinda Hennessey explains,

The actions of whites in many of the Reconstruction riots ... had less in common with mob rule than with the organized character of paramilitary units.... Antebellum militias and slave patrols gave southern whites experience in local military organization, and this trend continued in the locally based Confederate military units.\textsuperscript{15}

White people adhered not only to the values of the slave system, but to its methods as well.

The central role of the police in these two disturbances was unfortunately typical of the period. In her comprehensive study of Reconstruction-era unrest, Hennessey finds, “In only three riots, including Mobile in 1867, Vicksburg in 1875, and

White injured. He considered this a low count, and it surely was, since it was later confirmed that five White people died, including a cop who collapsed from heat exhaustion. Hennessey, “To Live and Die in Dixie,” 47.

\textsuperscript{12} Ibid., 46.
\textsuperscript{13} Rousey, Policing the Southern City, 119; and Hennessey, “To Live and Die in Dixie,” 49.

“The new police force appointed by the former Confederate mayor and commanded by the former Confederate chief was dominated by Confederate veterans.” Rousey, Policing the Southern City, 115.

\textsuperscript{14} Hennessey, “To Live and Die in Dixie,” 49–50.
\textsuperscript{15} Ibid., 407.

The police attacked Black crowds with clubs and, where looting was most prevalent, shot at anyone inside the stores. Black bystanders were ordered to “run and not look back;” many were shot as they did. Police also used hit-and-run tactics against small groups of Black people quite removed from the riot area: they would pull up in a squad car near a group of Black people; several officers would then jump out, beat them, get back in the car, and drive away.\textsuperscript{165} That night, a cop was shot in a vacant lot near Vernor Highway; he returned fire and the assailant was killed. Nevertheless, the police retaliated against the entire neighborhood. They laid siege to an apartment building at 290 East Vernor, shining searchlights on the building and firing into it with revolvers, rifles, and machine guns. They eventually forced the residents out with tear gas and beat them as they fled. Then the apartments were ransacked, doors kicked in, locks broken, furniture overturned. Money, jewelry, and liquor were stolen.\textsuperscript{166}

In an article titled “The Gestapo in Detroit,” NAACP attorney and later Supreme Court Justice Thurgood Marshall reported, “They used ‘persuasion’ rather than firm action with white rioters, while against Negroes they used the ultimate in force: night sticks, revolvers, riot guns, sub-machine guns, and deer guns.”\textsuperscript{167} He concluded:

This record of the Detroit police demonstrates once more what all Negroes know only too well: that nearly all police departments limit their conception of checking racial disorders to surrounding, arresting, maltreating, and shooting Negroes. Little attempt is made to check the activities of whites.\textsuperscript{168}

Of the thirty-four people killed, twenty-five were Black and nine were White; the police killed seventeen Black people and

\textsuperscript{168} Ibid., 247.
he could never defy them for fear of his job—and his life. The Klan was like a kind of Mafia in dirty sheets.\(^{162}\)

Also during the early part of the twentieth century, the police again played a significant role in the nation’s numerous race riots. Starting the century out badly, on August 15, 1900, a fight between Black residents and New York City police escalated into a riot, with Irish mobs in the streets attacking Black passers-by. Police refused to protect Black citizens, and in many cases joined in on the attacks. Despite considerable evidence, the police commissioners refused to discipline their officers, noting that Black witnesses “displayed a strong and bitter feeling while under examination.”\(^{163}\)

The police took a more active role in the Detroit riot of 1943. The disorder began on June 20, with a short-lived skirmish between Black and White patrons at the Belle Isle amusement park. More of a brawl than a riot (really, more of a fight than a brawl), the initial conflict was over nearly as soon as it began. The police interposed, arresting several Black people and sending the rest away. But a rumor spread that a Black man had raped a White woman during the encounter, and soon White mobs were attacking Black patrons at the Roxy Theater. The disorder spread throughout the (White) Woodward neighborhood, and crowds beat, stabbed, and shot Black people, and stoned their cars. Around the same time, a rumor spread through the Black neighborhoods of Hastings and Adams that White sailors had thrown a Black woman and her baby into a lake. Black people began attacking Whites in the area and breaking the windows in White-owned businesses.\(^{164}\)

---

\(^{163}\) Quoted in Richardson, *The New York Police*, 277.

---
Joseph P. Doyle of Madison County, Alabama, worried, "I have nobody to protect me." When Klan-type violence occurred, arrests were unusual, prosecutions rare, and convictions almost unknown. The attitudes (and sometimes, involvement) of police officers and sheriffs certainly impeded the enforcement of the law, but this was only one of many obstacles standing in the way of convictions. Prosecutors were unwilling to press such cases, and magistrates were often glad to dismiss them. Klansmen frequently dominated juries—including grand juries and coroners’ juries. Witnesses and victims, like Sheriff Norris, were intimidated and refused to testify, while Klan members were eager to swear false alibis on one another’s behalf.

The law, when it did oppose Klan activity, did so in times and places where the Klan was politically weak. As Allen Trelease notes:

Wherever Union men were numerous and sufficiently well organized to sustain the local authorities ... [Arkansas Governor Powell] Clayton encouraged sheriffs to mobilize them as posses, and they were used to good effect. Thus the sheriff of Carroll County managed to quell the small-scale terror there, even if he failed to catch the criminals. In Fulton County, where the governor had to send in reinforcements from other counties and make use of Monk’s Missouri volunteers, the policy contributed to a mutual escalation but was ultimately successful.

Even then, the usual form of conflict was not open warfare or even vigorous enforcement of the law, but a kind of rivalry or dual power. The police and the Klan became counterbalancing forces rather than outright antagonists. Under such conditions, police may have limited the Klan’s worst atrocities, but

When the Klan was at the peak of its power in Colorado, it counted among its members many prominent businessmen, state representatives and senators, the Colorado secretary of state, four judges, two federal narcotics agents, and scores of police. In Denver, the mayor, city attorney, manager of public safety, two deputy sheriffs, the chief of police, and a police inspector were all Klan members. Former mayor George D. Begole claimed that the Klan controlled the civil service commission, fire department, and police.

During the 1930s, about 100 Michigan cops—including the chief of police in Pontiac—joined either the Klan or its successor organization, the Black Legion. The Black Legion, in addition to attacking racial minorities, embarked on a deliberate campaign targeting the left; they beat and sometimes murdered suspected radicals, bombed their offices, and burned their homes.

In his memoirs, Atlanta Police Chief Herbert Jenkins described the Klan’s influence in Southern police departments:

In the thirties in Atlanta and throughout the South it was helpful to join the Ku Klux Klan to be an accepted member of the force. This was your ID card, the badge of honor with the in group, and it was unfortunately often an allegiance stronger than the policeman’s oath to society.

Not every member of the Atlanta force belonged to the Klan but those who did not had very little authority or influence. The Klan was powerful in that it worked behind the scenes with certain members of the Police Committee and the City Council. A well-liked and respected member of the department who was not a Klan member could still get promoted through the ranks if supported by the Klan. But as he owed his rank to the Klan

Activities (also called the Fish Committee) that the Klan helped the Birmingham police and the FBI keep track of Communists by following Communist Party organizers, identifying people at their meetings, and so on. In other places, whole Klaverns were deputized for Prohibition raids, and many cops signed up in the “Invisible Empire.”

The extent of joint membership was often startling. In 1922, when Los Angeles District Attorney Thomas Lee Woolwine raided the area Klan headquarters and seized their records, he discovered that Los Angeles Chief of Police Louis D. Oaks, Sheriff William I. Trager, and U.S. Attorney Joseph Burke were all connected to the Klan. The police chief and police judge in nearby Bakersfield were both members, as were seven Fresno officers, twenty-five cops in San Francisco, and about a tenth of the public officials and police in the rest of California’s cities.

Further north, in Portland, Oregon, the connection between the police and the Klan was public knowledge. In 1923, the Portland Telegram reported that the police bureau was “full to the brink with Klansmen.” At times, this relationship was officially sanctioned, as when the police bureau deputized one hundred Klansmen specially selected by Grand Dragon Fred Gifford, designating them “Portland Police Vigilantes.” Of course, Klan membership was not limited to policemen. The Portland-based Klan No. 1 boasted 15,000 members, and on March 3, 1923, it hosted a banquet featuring Governor Walter Pierce and Mayor George L. Baker.

Likewise, the Klan, while not usually driving the sheriff out of town or making good on their threats against him, limited the scope of his authority and greatly restricted his agenda (especially where the sheriff was a Republican). In Homer, Louisiana, the sheriff gave up policing whole areas of the parish where the Klan was strongest. One Texas sheriff found it impossible to raise a posse against Klan activity; White citizens told him derisively to “Call on your nigger friends.”

But usually, law enforcement agents were unwilling to move against the Klan, even when they were backed by federal military force. And they were almost never willing to avail themselves of the one source of power that may have been most readily mobilized against Klan activity—the Black population. Even when faced with widespread lawlessness, White officials proved unwilling to arm and rally their Black constituency.

24 Near Lumberton, North Carolina, this arrangement was institutionalized. Rather than forming a Klan-type group, Confederate veterans were invited to join “police guard” units. Union army officers armed and deputized them, granting them much of the responsibility for keeping order. Within limits, the military authorities ignored abuses against Black people and Union sympathizers. Hadden, Slave Patrols, 206–7.

25 Trelease, White Terror, 96.

26 Ibid., 104.

27 Ibid., 400. Even when the army made arrests, few convictions resulted. Only the worst offenders were prosecuted, and many received pardons. In 1876 the entire approach was undermined by the Supreme Court’s ruling that the federal government could only protect civil rights against the actions of states, not those of individuals. Ibid., 412–18.

28 Alexandria, Louisiana, provides one exception: There the sheriff armed 200 Black people and drove back a Klan attempt to intimidate voters. Ibid., 95.

For a brief while, radical governments incorporated Black people into the state militia and used them to enforce the provisions of martial law, intimidate Democrats on election day, engage in street battles over contested elections, and come to the aid of law enforcement officers facing violent opposition. For example, in Vicksburg, Mississippi, the Black sheriff, Peter Crosby, was illegally deposed by a committee of White citizens. The ensu-
It may be that they worried such a move would create a panic among Whites and provoke further violence, or it may be that they feared creating a Black resistance that they could not then control. Whatever the reasons, the result was disastrous for African Americans.

As renegade states were reincorporated into the Union and the federal commitment to Reconstruction waned, Black people were returned to something very much like their previous status. When Democrats attained control of state legislatures and local governments, they passed a series of “Black Codes” designed to regulate the former slaves and reconstitute the system of White supremacy—based not on the private institution of slavery, but on publicly established segregation. Black people were, whether by law, custom, or Klan intimidation, commonly forbidden to own land, run businesses, work on railroads, change employers, travel, or vote. Those convicted of crimes, even nominal offenses such as “vagrancy,” could be imprisoned and returned to involuntary servitude, leased

At the bottom of that scale, “it is literally a crime to be poor,” while at the top, rich people “literally cannot be prosecuted.”

This double-standard follows the same pattern as nineteenth-century public order arrests, and may be presumed to fulfill a similar function. It’s not about justice. It isn’t even really about money. What it’s about, as Taibbi puts it, is this: “It’s about fucking with people.” Specifically, it’s about which kinds of people get fucked with.

Secret Societies, Public Terror

Laws have been passed, and interpreted, and enforced in ways designed to maximize the control White people exercise over people of color. But they have also been broken, and ignored, and under-enforced with the same aim in mind. When the demands of White supremacy and the requirements of the law have conflicted, the maintenance of White supremacy has almost always appeared higher on the police agenda. Police illegality and complicity in White terror continue in an unbroken sequence from Reconstruction to today.

In the early twentieth century, police re-established their ties to the newly revived Klan. During the 1920s, Klansmen were enlisted to aid the authorities in their fight against the evils of alcohol and Communism. In 1930, John G. Murphy, a member of the Alabama Knights of the Ku Klux Klan, testified before the House Special Committee to Investigate Communist

---

29 Such reservations certainly limited the use of Black militias. Mississippi governor Adelbert Ames, among others, worried that arming Black people could produce “a war of races.” Quoted in Ibid., 146.

30 New Orleans writer George Washington Cable put it succinctly: “He still served, we still ruled.... Emancipation had destroyed private, but had not disturbed public, subjugation.” Quoted in Trelease, White Terror, xvi.

31 Rousey, Policing the Southern City, 194; Hadden, Slave Patrols, 196–97, 205; and Trelease, White Terror, 288, 290.

32 Under the Mississippi Black Codes, “anyone who ... was drunk, was wanton in conduct or speech, had neglected job or family, [or] handled money carelessly” was guilty of vagrancy, as were “all other idle and dis-

152 Ibid., 325.

153 Allen Steinberg concludes that in the nineteenth century “the primary lesson of the minor police cases was that the public disorder of the lower classes was subject to the repressive activity of the state.... The exceptional treatment of ‘respectable’ miscreants proved the rule. Their indiscretions could be overlooked because the larger problem of public disorder was a problem of the lower classes.” Steinberg, The Transformation of Criminal Justice, 128.

154 Taibbi, The Divide, 323.
one, for any of the systemic crimes that wiped out 40 percent of the world’s wealth. Even now, after JPMorgan Chase agreed to a settlement north of $13 billion for a variety of offenses.... the basic principle held true: nobody went to jail. Not one person.\textsuperscript{149}

Taibbi helpfully contrasts white-collar corporate fraud—the kind that produced a global financial crisis—with a paradigmatic poverty crime, welfare fraud. On the one hand, he finds, “Twenty-six billion dollars of fraud: no charges”; on the other, the San Diego County District Attorney’s office conducts 26,000 warrantless, preemptive searches every year to make sure that welfare recipients really are exactly as poor as the poverty bureaucracy demands that they be.\textsuperscript{150} The operative principle of American justice, he concludes, is that “rights aren’t absolute but are enjoyed on a kind of sliding scale.”\textsuperscript{151}

\textsuperscript{150} Ibid., 323.

Criminologist Kaaryn Gustafson argues that programs targeting welfare fraud assume “that the problem of individuals making misrepresentations to the welfare office and receiving some level of benefits to which they are not entitled outweighs the problem of poverty in the United States”—whereas, in fact, welfare benefits are generally so meagre that, if recipients did not supplement government payments with undeclared income, the “vast majority ... would be unable to survive.” Kaaryn Gustafson, “The Criminalization of Poverty,” \textit{The Journal of Criminal Law & Criminology} 99:3 (Spring 2009): 689–90.

She explains: “Poor families usually turn to the welfare system only when they are in desperate need and cannot find employment to provide their most basic needs. However, the cash benefits available under TANF [Temporary Assistance for Needy Families] are too low to sustain a family. The gap between resources and need often leads welfare recipients to seek income to supplement their welfare benefits and to hide that income from the welfare office.... When it comes to violating the welfare rules, most welfare recipients are damned if they do and doomed if they don’t. In short, the U.S. system both produces and punishes lawbreakers.” Ibid., 681.

33 Ibid., 28–37. Davis ruefully notes that “in many important respects, convict leasing was far worse than slavery,” because slaves “represented significant investments” for their owners while convicts “could be worked literally to death without affecting ... profitability.” Ibid., 32. See also: Michelle Alexander, \textit{The New Jim Crow: Mass Incarceration in the Age of Colorblindness} (New York: The New Press, 2010), 28–32.

34 This history—and especially the legacy of slavery—weighs uniquely on the position of Black people in American society. The Black experience has been different than that of Latinos, Asians, Native Americans, Jews, gays, and other marginalized groups. The experiences of these other minorities deserve more substantial treatment than they can be given in these pages. But it is specifically the subjugation of Black people that has done so much to shape the institution of policing, at times defining its central function. The treatment of the subject here reflects that predominance.

\textbf{Slave Patrols Revisited}

During the Reconstruction period, the line between legal and extra-legal authority became extremely hazy. The Klan took on criminal violence in the defense of an archaic view of law and order, and the local authorities were either incapable or unwilling to challenge them. In many cases, the police were actually complicit with Klan violence, and it seemed that the two organizations pursued the same ends, sometimes using the same means. These common features were not arrived at by chance. Both the police and the Klan were adaptations of an earlier and deeply entrenched Southern institution—the slave patrols.\textsuperscript{34} As Sally Hadden recounts:

In the new regime of Reconstruction, Southern whites were forced to adopt laws and policing methods that appeared racially unbiased, but they relied upon practices derived from slave patrols and their old laws that had traditionally targeted

\textit{orderly persons.” Quoted in Angela Y. Davis, \textit{Are Prisons Obsolete}? (New York: Seven Stories Press, 2003), 29.}

\textit{This was termed, in the parlance of Southern Whites, “Redemption.” For Black people, it was more like damnation.}
blacks for violence. To resolve this apparent contradiction, the more random and ruthless aspects of slave patrolling passed into the hands of vigilante groups like the Klan.... Meanwhile, policemen in Southern towns continued to carry out those aspects of urban slave patrolling that seemed race-neutral but that in reality were applied selectively. Police saw that nightly curfews and vagrancy laws kept blacks off city streets, just as patrollers had done in the colonial and antebellum eras.  

The slave patrols helped form the character of both the police and the Klan. Like the slave patrols, the Klan was organized locally, operated mostly at night, drew its members from every class of White society, enforced a pass system and curfew, broke up Black social gatherings and meetings, searched homes, seized weapons, and enforced its demands through violence and intimidation. A former slave, J.T. Tims, remarked, “There wasn’t no difference between the patrols and the Ku Klux that I know of. If th’d ketch you, they all would whip you.”

As a part of this same tradition, racial minorities (especially Black people) became the objects of police control, the targets of brutality, and the victims of neglect. Perhaps the clearest inheritance from this tradition is the racial characterization of violence and intimidation.

Or consider drunk driving: In the mid-80s, at about the same time legislators were establishing draconian sentences for small amounts of crack cocaine, they were also setting minimum sentences for driving under the influence. The juxtaposition is revealing. At the time, drunk driving killed about 22,000 people each year, which was more than all other drug-related deaths combined. But while crack was tagged with a five year minimum sentence, the penalty for drunk driving was typically two days for a first offense, up to ten days for a second. The difference is that, while 93 percent of those convicted of possessing crack are Black, 78 percent of those arrested for drunk driving were White men.

And let’s not forget the enormous range of corporate crimes that are essentially handled as violations of administrative rules or as civil matters rather than as criminal conspiracies. As journalist Matt Taibbi recalls in his book The Divide:

It’s become cliché by now, but since 2008, no high-ranking executive from any financial institution has gone to jail, not

36 Ibid., 211.
37 Ibid., 212–13. For a detailed discussion of the connection between slave patrols and the KKK as they appear in Black folklore and oral histories, see: Gladys-Marie Fry, Night Riders in Black Folk History (Knoxville: University of Tennessee Press, 1975).
38 “Postwar police forces would transform patrolling into a highly effective but still legal means of racial oppression, building upon the practices that many prewar police forces had used when acting as urban patrollers.” Hadden, Slave Patrols, 202.
39 Neglect is not so incongruous with brutality and heightened scrutiny as one might assume. During the nineteenth century, “Faced with such abuse from the police, black New Orleanians became reluctant to call on the police when they were victimized by crime.” Rousey, Policing the Southern City, 167.
caine elicits a fraction of the penalty for possessing crack—literally: mandatory sentences for yuppie-style coke are 1/18 those for the ghetto brand.\(^{146}\)

...vvergent ideological and social-control orbits. Conventional crime was dealt with punitively but corporate misbehavior was handled through administrative agencies or relatively lenient criminal statutes.” Sally S. Simpson, 

\(^{146}\) The 2010 “Fair Sentencing Act” established minimum sentences for crack possession of five years in prison for seventy-eight grams and ten years for 280 grams. Since 1986, the trigger points had been five grams (five years) and fifty grams (ten years). The reform law also eliminated the minimum sentence for first-time possession. Nevertheless, it preserved a significant disparity, since one would have to possess much larger quantities of powder cocaine to receive similar penalties (500 grams for five years, 1,000 grams for ten). Danielle Kurtzleben, “Data Show Racial Disparity in Crack Sentencing,” U.S. News and World Report, August 3, 2010, accessed October 19, 2014, us-news.com; and “The Fair Sentencing Act Corrects a Long-Time Wrong in Cocaine Sentencing,” Washington Post, August 3, 2010, accessed October 19, 2014, washingtonpost.com.

Though it is debatable whether Blacks use crack at a higher rate than Whites, the disparity in enforcement is certain. In 1995, after a decade of mandatory minimums, “no Caucasian defendant had been charged with crack cocaine offenses in federal courts in Los Angeles, Boston, Denver, Chicago, Miami, Dallas, or in seventeen state courts. In 2000, less than six percent of crack cocaine offenders were Caucasian, and more than eighty percent were African American. By 2006, for every ten African Americans tried for crack cocaine possession, one white defendant was charged with a crime involving crack cocaine.” Alyssa L. Beaver, “Getting a Fix on Cocaine Sentencing Policy: Reforming the Sentencing Scheme of the Anti-Drug Abuse Act of 1986,” Fordham Law Review 78 (2010): 2549. Emphasis added.

William Chambliss argues that it is always easier for the police to focus their attention on people who are relatively powerless. Social inequalities thus create a permanent bias in law enforcement activity. “Put quite simply, if the police treat middle and upper-class delinquents (or cocaine-snorting college students) the same way they treat lower-class delinquents (or black, ghetto crack users), they are asking for trouble from people with power. If, on the other hand, they focus their law enforcement efforts on the lower classes, they are praised and supported by ‘the community,’ that is, by the middle and upper-class white community.” Chambliss, Power, Politics, and Crime, 115.

Profiles and Prejudice

One critic of racial profiling, David Harris, defines the concept in terms of more general police techniques. He writes:

*Racial profiling grew out of a law enforcement tactic called criminal profiling.*

*Criminal profiling has come into increasing use over the last twenty years, not just as a way to solve particular crimes police know about but also as a way to predict who may be involved in as-yet-undiscovered crimes, especially drug offenses.* Criminal profiling is designed to help police spot criminals by developing sets of personal and behavioral characteristics associated with particular offenses. By comparing individuals they observe with profiles, officers should have a better basis for deciding which people to treat as suspects. Officers may see no direct evidence of crime, but they can rely on noncriminal but observable characteristics associated with crime to decide whether someone seems suspicious and therefore deserving of greater police scrutiny.

When these characteristics include race or ethnicity as a factor in predicting crimes, *criminal profiling can become racial profiling.* Racial profiling is a crime-fighting strategy—a government policy that treats African Americans, Latinos, and members of other minority groups as criminal suspects on the basis of criminality—the criminalizing of people of color, and Black people especially. Presently understood in terms of “profiling,” the practice is much older than the current controversy. Under slavery, “Bondsmen could easily be distinguished by their race and thus became easy and immediate targets of racial brutality.”\(^{40}\) The only thing new about racial profiling is the term, which makes prejudicial harassment seem procedural, technical, even scientific.

\(^{40}\) Hadden, Slave Patrols, 4.
assumption that doing so will increase the odds of catching criminals.41

Harris is right that racial profiling is a subset of criminal profiling, but he has the genealogy reversed. As we saw in previous chapters, long before the police used high-discretion tactics and vice laws to regulate the lives of the immigrant working class, their predecessors in law enforcement were using race as the sole factor directing their activities. Harris overlooks a crucial feature of this history: both the slave patrols and the laws they enforced existed for the express purpose of controlling the Black population. There was no pretense of racial neutrality, and so there was less concern with the abstract aim of controlling “crime” than with the very concrete task of controlling Black people. Black people were, in a sense, criminalized—but more importantly, they were permanently deemed objects for control.

As cities industrialized, White workers formed another troublesome group. Efforts to control these new “dangerous classes” were more legalistic and impartial (in form, if not in application) than those directed against the slaves. Laws against vagrancy, gambling, prostitution, loitering, cursing, and drinking (the nineteenth-century equivalent of our current war on drugs) brought the habits of the poor into the jurisdiction of the police, and the police directed their suspicions accordingly. Thus, contrary to Harris’s account, racial profiling gave birth to the broader category of “criminal profiling”—not the other way around.

What may distinguish our contemporary notion of “profiling” from simple prejudice is the idea that suspicious characteristics can somehow be scientifically identified and formulated into a general type in order to rationally direct police suspi-

The following May, Los Angeles police, allegedly responding to rock-throwing youths, attacked an immigrants rights demonstration. Helmeted cops pushed through the crowd at MacArthur Park, firing 146 rubber bullets and beating journalists and protestors alike. More than 250 people were injured, including eighteen officers.143 The police chief later apologized, and the city paid out $13 million to settle lawsuits.144 But it is hard not to feel that the cops were offering a lesson in real-world civics, reminding the activists of the limits to their rights and the risks of resistance.

White and Wealthy Criminals (an Aside)

Black people have been stereotyped as criminals, Latinos as “illegals.” And activities associated with these groups have been increasingly criminalized as a result—hyper-criminalized, in the case of crack cocaine.

What about the crimes of rich white people? Rather than producing profiles and leading to concentrated enforcement, these offenses are downplayed, legitimized, treated leniently, or even decriminalized.145 Thus, the possession of powder co-

---

145 Sally Simpson describes the historical handling of elite crime: “For the most part, drug addiction (including alcohol) and violence were deemed problems for ethnics (Mexican, Chinese, Italian, Irish, and Black people) and immigrants (predominantly Catholic working class). The ‘real’ crime problem was thought to rest with the constitutionally inferior and morally lax. Corporate criminals, on the other hand, were drawn from America’s newly emerging capitalist Brahmins. Although perceived to be opportunistic and ruthless in their business practices, these entrepreneurs were part of the governing and newly emerging social elite. Consequently, popular definitions of and legal responses to crime and criminals were framed within di-
tian Parenti argues, American capitalism needs a steady supply of immigrant labor, but it needs it cheap. By criminalizing the workers, the state helps to keep them uncertain, uneasy, disorganized, and docile. The attack on immigrants, therefore, is both “[p]olitically...an organic expression of nativist hostility and a very useful, rational system of elite-inspired class control”—“the primary product” of which “is ... fear.”

It is hardly surprising, then, that when immigrants amass to demand respect, they are met with police violence. On May 1, 2006—International Workers Day—tens of thousands of workers, mostly Latino, marched in cities across the country, opposing a bill that would make it a felony to be in the country without official authorization. In the process demonstrators also, not incidentally, collectively withdrew their labor from the economy for the day. Among other things, the protest was the most widespread agricultural strike in California history. And it worked: the criminalization bill was withdrawn. When the demonstrations were over, though, repression began anew. Raids and roundups followed, led by ICE but often supported by local police. Sometimes they targeted factories, restaurants, or other workplaces, sometimes individual homes, and sometimes entire neighborhoods. Over the next couple years, approximately 900,000 people were deported, three times the previous level.

prevalent among undocumented residents (62 percent and 61 percent, respectively), but were still fairly common among the native-born (27 percent and 22 percent). Theodore, Insecure Communities, 11.

The scientific basis of Vogel’s system is questionable—his “cumulative similarities” were based on a sample of thirty cases—and its application even more worrisome. While Vogel claims that race was never a factor in his approach, his deputies’ behavior tells a different story. Black people and Latinos represented 5 percent of the drivers on the roads his department patrolled. But according to a review of 148 hours of videotape from cameras mounted in squad cars, minorities made up 70 percent of the people stopped and 80 percent of those searched. Of the 1,100 drivers appearing on the tapes, only nine were issued tickets.

Likewise, under “Operation Pipeline” the DEA told the police not to consider race as a factor, while continuously referencing the race of suspected drug dealers. Pipeline emphasized the use of pretext stops and “consent” searches (that is, searches lacking probable cause). The results were predictable. According to a 1999 report by the California legis-

47 Alexander, New Jim Crow, 69.
lature’s Task Force on Government Oversight, two-thirds of those stopped as part of Operation Pipeline were Latinos. The report noted the systematic nature of this bias:

It should be emphasized that this program has been conducted with the support of CHP [California Highway Patrol] management. Individual officers involved in these operations and training programs have been carrying out what they perceived to be the policy of the CHP, the Department of Justice, and the Deukmejian and Wilson Administrations. Thus we are not faced with “rogue” officers or individual, isolated instances of wrongdoing. The officers involved in these operations have been told repeatedly by their supervisors that they were doing their jobs exactly right.48

By 2000, the DEA had trained over 25,000 cops working for more than 300 agencies in forty-eight states.49

The Flawed Logic of Racial Profiling

The theoretical groundwork for racial profiling was in place long before the DEA popularized its current form. Writing in the middle of the twentieth century, LAPD Chief of Police William H. Parker defended the police saturation of minority neighborhoods. His views anticipate those supporting the use of other race-based police tactics. They are worth quoting at length:

Deployment is often heaviest in so-called minority sections of the city. The reason is statistical—it is a fact that certain racial groups, at the present time, commit a disproportionate share of the total crime. Let me make one point clear in that regard—a competent police administrator is fully aware of the multiple conditions which create this problem. There is no inherent physical or mental weakness in any racial stock which

Obviously traffic safety is just a pretext in these operations, a seemingly race-neutral rationale for rounding up members of a target population. But then, some Rogers cops have dispensed with the pretext altogether, asking people directly about their status without making an arrest.133 Likewise, in Irving, Texas, once the jail started reporting to ICE, the police began arresting greater numbers of Hispanics for low-level public order offenses.134

The Department of Homeland Security (which manages both Immigration and Customs Enforcement and Customs and Border Protection) captured 517,000 foreign nationals in 2010, 83 percent from Mexico. Of those half-million visitors, 363,000 were held in jail while waiting for a hearing.135 That same year, 29,016 were charged with immigration violations in federal court (twelve times the 1994 level, 2,453);136 and immigration violations accounted for 12 percent of the federal prison population—approximately 260,000 people.137 Additionally, 387,000 immigrants were deported under a judicial order, and another 476,000 were “returned” without a hearing.138

The result is that immigrants are increasingly isolated, fearful, and powerless.139 That is likely part of the point. As Chris-

---

48 Quoted in Harris, Profiles in Injustice, 51.
49 Alexander, New Jim Crow, 69.
by the Supreme Court—is an inevitable result of proactive immigrant-hunting. As Nancy Morawetz and Alina Das observed, writing for the Police Foundation:

Local officers will not be able to “observe” an immigration violation the way they might observe a violation of criminal law. Under such circumstances, there is a serious risk that the grounds for suspicion will in fact be nothing more than a series of assumptions that begin with a profile about people who speak another language or have a particular racial or ethnic profile.... Such tactics may well be ingrained in certain federal immigration enforcement efforts.

Raymond Dolourtch, a St. Louis attorney, describes a pattern he has seen in recent cases: Police pull over Latino drivers, usually on some pretext. Since undocumented immigrants cannot apply for a driver’s license, they will be arrested for operating a vehicle without one. In jail, then, police will run their prints and check their status—leading to criminal charges or deportation.

In towns like Waukegan, Illinois and Rogers, Arkansas, police set up checkpoints for the same purpose.

In U.S. vs. Brignoni-Ponce, the Court ruled that “the likelihood that any person of Mexican ancestry is alien is high enough to make Mexican appearance a relevant factor.” Quoted in Alexander, New Jim Crow, 128.

Cops in California seem more interested in impounding vehicles than making arrests. They set up “sobriety checkpoints,” not near bars at closing time, but on the edge of Latino neighborhoods during rush hour (Taibbi, The Divide, 239). Over a two-year period, 61 percent of California’s roadblocks were in areas with a Latino population of 31 percent or more. In 2009, police in the state made 3,200 DUI arrests at checkpoints, but seized...
level; he then defends institutional bias by denying individual prejudice. He also attempts to justify institutionalized racism by casting it in “statistical” terms. Hence, we’re reassured that race-based police tactics are not based on “a police attitude” or on a belief in the inherent criminality of people of color, while at the same time we are urged to accept practices designed to target specific populations.

Parker explains unequal police attention with reference to variations in crime rates among different groups. No evidence is offered concerning these variations, but they are said to be the product of unidentified “multiple conditions,” which we are informed are not the business of the police. The possibility that policing may preserve or contribute to these “socio-economic conditions” is not discussed, though the function of policing is identified as “maintaining order.”

Put differently, Parker tries to justify the police department’s discrimination with reference to other discrimination. If this line of reasoning is accepted, then so long as an overall system of White supremacy exists, no particular aspect of it can be faulted. Landlords could justify discrimination in housing, or bankers in lending, just by noting that “the reason is statistical,” that “for some reason” unemployment is higher among “certain racial groups.” Employers could justify discrimination in hiring by explaining that, statistically speaking, certain groups tend to be less qualified. And so on. The moral and political faults of such reasoning are obvious, but there is a logical fallacy as well. An individual’s ability to pay the rent, to perform a job, or to obey the law, cannot be judged on the basis of the statistical performance of a group to which she belongs.51

Of course, it’s not just Arpaio.127 Police across Arizona search Blacks and Latinos more than twice as often as Whites, and search Native Americans three times as often. Likewise, in 2006, two thirds of the law enforcement agencies in Texas reported searching the vehicles of Latino drivers at a higher rate than those of Whites; more than a quarter searched Latinos at twice the rate of Whites.128 Racial profiling—blessed
in the United States.”\textsuperscript{124} The Justice Department also expressed concern about the “pervasive culture of discriminatory bias” in the sheriff’s office, including not just racial profiling, but racial slurs and racist jokes.\textsuperscript{125}

Phoenix Mayor Phil Gordon was blunt in expressing his views on Arpaio:

The sheriff’s method is to profile people with brown skin and to ignore the civil rights we should all be enjoying. It is unconstitutional and wrong.... \textit{Citizens} are being stopped because they are brown. Immigrants here quite legally, carrying their paperwork, are detained.... These stories have nothing to do with green cards. They have everything to do with brown skin. They were about racism and nothing else.\textsuperscript{126}

In the end, Parker’s argument is circular; the premises assume the conclusion. It calls for intensive scrutiny of people of color based on a “disproportionate share of the total crime” committed by them. And how do we know they commit more crimes? Because of their contact with the criminal justice system, obviously!\textsuperscript{52} David Harris explains the problem simply:

In the case of consensual crimes such as drug activity and weapons offenses, arrest and incarceration rates are particularly poor measures of criminal activity. They are much better measures of \textit{law enforcement activity}.... Arrest statistics tell us that police arrest disproportionate numbers of African American males for drug crimes. This reflects decisions made by someone in the police department—the chief, lieutenants, street-level supervisors, or even individual officers themselves—to concentrate enforcement activity on these individuals.\textsuperscript{53}

While admitting that the very categories of race are “unscientific” and “a fiction,” Parker argues that race is a “useful fiction” and so should be maintained. But we should ask, useful for what? Presumably for identifying criminals, or rather—for identifying \textit{suspects}. That is, race is a “useful fiction” for delineating groups of people to be \textit{treated as suspects} by the police.

The analogy to the color of the car implies that the use of race as an indicator is something of an accident. Of course, it

\textsuperscript{125} Ibid., 10–11.

\textsuperscript{52} Faced with statistics showing that, during the years 1989–1992, 85 percent of Volusia County’s asset forfeiture cases involved Black motorists, Bob Vogel offered this analysis: “What this data tells me … is that the majority of money being transported for drug activities involves blacks and Hispanics.” Quoted in Christian Parenti, \textit{Lockdown America: Police and Prisons in the Age of Crisis} (London: Verso, 1999), 54.

\textsuperscript{53} Harris, \textit{Profiles in Injustice}, 78. Emphasis in original.
is nothing of the sort.\textsuperscript{54} It is more paradigmatic than fortuitous, a matter of design rather than happenstance. Race—unlike car color—is used as a profiling tool because society as a whole uses race as a marker of privilege or privation. And according to Parker’s theory, race-based tactics are useful in crime control for just that reason.

**Color by Numbers**

Today’s law enforcement administrators still seek to justify police practices by appealing to racist conceptions of crime and criminality. In 1999, the New Jersey Attorney General’s office issued a report showing that during the two previous years (1997 and 1998), 40 percent of motorists stopped on the New Jersey Turnpike and 80 percent of those searched were minorities. According to Carl Williams, the superintendent of the New Jersey state police, that’s because “The drug problem is mostly cocaine and marijuana. It is most likely a minority group that’s involved with that.”\textsuperscript{55}

Studies in other states reveal a common pattern. Following a 1995 lawsuit, the Maryland State Police were required to keep data on every traffic stop that led to a search. Temple University’s John Lamberth analyzed the data from 1995 and 1996. He found that while Black people represent 17 percent of Maryland’s driving population and can be observed to drive no differently than White people, 72 percent of those stopped and searched were Black. Fully one-half of the Maryland State Police traffic officers stopped Black people in at least 80 percent

Pepto-Bismol pink.\textsuperscript{120} (Ostensibly the pink was to deter theft, but Arpaio admits “there was the matter of embarrassing the prisoners.”)\textsuperscript{121} His jail guards, meanwhile, gained a reputation for strapping inmates into restraint chairs and torturing them with tasers.\textsuperscript{122}

Beginning in 2006, Sheriff Joe (as he likes to be called) turned his attention to immigration. He started arresting immigrants as co-conspirators in human trafficking. He led deputies, as well as his 3,000-strong volunteer posse, on raids of workplaces looking for undocumented immigrants—including an after-hours raid to arrest the cleaning staff at the Mesa City Hall. It’s always the staff, too; in only three cases has he arrested their White employers. And in the City Hall case, the workers turned out to be legal residents. Sometimes his raids target entire towns, as when deputies besieged the hamlet of Guadalupe with mounted patrols, a mobile command center, and helicopter coverage for two days in 2008.\textsuperscript{123}

A 2012 Justice Department investigation found that in Maricopa County “Latino drivers were between four to nine times more likely to be stopped than similarly situated non-Latino drivers,” with 20 percent of traffic stops failing to meet the legal standard of reasonable suspicion. It represented, in the estimation of one consultant, “the most egregious racial profiling

---

\textsuperscript{121} Ibid., 99.

\textsuperscript{122} Finnegan, “Sheriff Joe.”

\textsuperscript{123} Ibid.; Hagan, “Long, Lawless Ride.”
police make an arrest, they now run the suspect’s fingerprints, not only through federal criminal databases, but immigration databases as well.\footnote{\textit{Insecure Communities}, 2.} In the first year of the Secure Communities program’s implementation in California, it resulted in 19,109 deportations, 25 percent of which occurred without a conviction.\footnote{Amalia Greenberg Delgado and Julia Harumi Mass, \textit{Costs and Consequences: The High Price of Policing Immigrant Communities} (ACLU of Northern California: February 2011), 24.}

All of that has meant a great deal more scrutiny on the Latino community, including checkpoints, neighborhood sweeps, and workplace raids—as well as armed vigilante patrols along the U.S./Mexico border.\footnote{For a good overview of checkpoints, sweeps, raids, and racial profiling, see: National Network for Immigrant and Refugee Rights, \textit{Over-Raided, Under Siege: U.S. Immigration Laws and Enforcement Destroy the Rights of Immigrants} (January 2008).} Undoubtedly the man who has personified the worst of these practices—or, as he would have it, the “toughest”—is Sheriff Joe Arpaio of Maricopa County, Arizona. Arpaio, who has served as sheriff since 1993, has always courted controversy and regularly shrugged off concerns about constitutionality. He first came to national notice when he erected an outdoor tent city to hold the county’s prisoners and subjected them to a host of petty deprivations—no cigarettes, no coffee, no movies, no pornography, no hot lunches, no salt. He instituted chain gangs (even for juvenile offenders), dressed inmates in cartoonish black-and-white striped uniforms, and outfitted everything in the men’s prisons—towels, sheets, underwear, handcuffs—in of their stops. One officer stopped Blacks in 95 percent of his stops, and two only stopped Black people.\footnote{Ibid., 61–62.}

Likewise, a 1999 Ohio state legislator’s review of 1996 and 1997 court records revealed that Black drivers in Akron were 2.04 times as likely as all other drivers to receive tickets. In Toledo, they were 2.02 times as likely; and in Columbus and Dayton, 1.8 times.\footnote{Ibid., 68.} Researchers with North Carolina State University found that in 1998, Black people were 68 percent more likely than White people to be searched by the North Carolina Highway Patrol.\footnote{Ibid., 80–81.} The \textit{Boston Globe} analyzed 764,065 traffic tickets from the period April 2001 to November 2002 and found that Black people and Latinos were ticketed at a rate twice that of their portion of the Massachusetts population. And once ticketed, Blacks were 50 percent more likely than Whites to have their cars searched.\footnote{Black people represent 4.6 percent of the state’s driving-age population, but receive 10 percent of all traffic citations; Latinos are 5.6 percent of the driving population but 9.6 percent of those ticketed. Bill Dedman and Francie Latour, “Traffic Citations Reveal Disparity,” \textit{Boston Globe}, January 6, 2003, accessed January 26, 2003, database: NewsBank Full-Text Newspapers.} The LAPD’s statistics from July to November 2002 show that Black motorists were stopped at rates far outstripping their portion of the local population: 18 percent of the drivers pulled over were Black, while Black people make up only 10.9 percent of the city’s populace. Of those pulled over, Black people and Latinos were significantly more likely to be removed from the car than were White drivers: 22 percent of Black people and 22 percent of Latinos were removed from the vehicle, as opposed to 7 percent of White people. And once out of their cars, Blacks and Latinos were more likely to be searched: 85 percent of Black...
people and 84 percent of Latinos were searched, as compared to 71 percent of White people.60

In Omaha, Nebraska, during the year 2011, Blacks represented 21.6 percent of traffic stops, but only 12.2 percent of the local population. They were almost three times as likely to be searched as Whites (2 percent of Black stops, as opposed to 0.7 percent of White). In Lincoln, Blacks were 3.3 percent of the population, but 7.7 percent of the drivers stopped by police; and they were searched more than twice as often as Whites (3.5 and 1.7 percent, respectively). Hispanics in Lincoln were not particularly likely to be pulled over (5 percent of population, 4.6 percent of traffic stops), but they were searched with disproportionate frequency (2.7 percent, Hispanic drivers; 1.7 percent, White drivers). The Nebraska State Patrol (NSP) pulled over Blacks and Hispanics at rates below their share of the population, but searched both groups more frequently than Whites (1.4 percent for Black and Hispanic drivers; 0.8 percent for White drivers).61

Interestingly, Native Americans were stopped below their population level in Omaha and Lincoln, and above it in State Patrol stops (1.1 percent of stops; 0.8 percent of state population), but all three agencies searched them at much higher rates than any other group. Native Americans were searched by the NSP 2.9 percent of the time (almost twice the rate of Blacks and Hispanics, and more than three times the rate of Whites). They were searched by police in Omaha in 4.2 percent of traffic stops (more than twice the rate of Blacks, and also come to focus more and more on the interior of the country, in cities and farm towns far from the border.114

The implications for civil liberties have been serious, and bad: Because immigration has historically been an administrative and civil (rather than criminal) matter, it has weaker safeguards and suspects enjoy fewer rights. For example, the courts have been more flexible in search and seizure requirements and often allow illegally obtained evidence to be presented in deportation hearings; Homeland Security’s Immigration and Customs Enforcement (ICE) has thus been aggressive in testing the limits of the Fourth Amendment, a habit that police will likely carry with them into criminal investigations as well. Police may also take advantage of the lower standards and decide to treat immigration enforcement as a cover for criminal investigations, using ICE databases, civil warrants, and immigration holds for other purposes.115

Police involvement began in earnest in 2002, when Florida entered into an agreement with the federal authorities under which local cops would be trained and deputized as immigration officers. Such arrangements had been authorized by the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, but the provision, section 287(g), had never been used before. Soon others followed suit—Alabama in 2003, six more jurisdictions over the next three years; by 2013, thirty-five agencies in eighteen states had some 287(g) agreement.116 At the same time, other federally-driven programs, such as the Criminal Alien Program and Secure Communities, have greatly increased the flow of information between agencies. When local

to enforce immigration law.\textsuperscript{111} The new police duties came as a result of several major shifts occurring simultaneously, or in quick succession. Border enforcement has been increasingly militarized, incorporating the use of helicopters and drones, and sometimes involving marines and Army Special Forces.\textsuperscript{112} At the same time many immigration violations, which had previously been treated as administrative or civil matters, have now been criminalized; and the remaining administrative elements have become increasingly punitive.\textsuperscript{113} Enforcement has

Seventy-two percent of police chiefs think that immigration is a federal, not local or state, issue (Ibid., 17). More than half (54 percent) don’t think that local departments should be involved in immigration enforcement at all. Scott H. Decker et al., “Immigration and Local Policing: Results of a National Survey of Law Enforcement Executives,” in \textit{The Role of Local Police: Striking a Balance between Immigration Enforcement and Civil Liberties} ed. Anita Khashu (Washington, DC: April 2009), 181.

Many police leaders worry that immigration enforcement will strain relationships with immigrant communities and reduce their cooperation. Ibid., 23–30.

For empirical evidence supporting concerns about the effect on immigrant attitudes, see: Nik Theodore, \textit{Insecure Communities: Latino Perspectives of Police Involvement in Immigration Enforcement} (University of Illinois at Chicago, Department of Urban Planning and Policy: May 2013).

\begin{table}

\end{table}

...six times the rate of Whites). And they were searched by the Lincoln police in an astonishing 7.1 percent of stops (twice as often as Blacks, more than two-and-a-half times as often as Hispanics, and more than four times as often was Whites). Similar disparities were apparent in the arrests that sometimes follow from traffic stops. The State Patrol arrested 1.8 percent of the White drivers they stopped, 3.7 percent of Hispanics, 4 percent of African Americans, and 5.7 percent of Native Americans. The Lincoln police arrested 0.8 percent of Whites, 2.1 percent of Hispanics, 4.1 percent of Blacks, and 9.7 percent of Native Americans. The handcuff-happy Omaha police, meanwhile, arrested 11.9 percent of Whites, 23.9 percent of Hispanics, 29.8 percent of Blacks, and 31.4 percent of the Native American drivers they stopped.\textsuperscript{62}

Nationally, the most recent Justice Department study found that in 2011, “Relatively more black drivers (13%) than white (10%) and Hispanic (10%) drivers were pulled over.”\textsuperscript{63} and Blacks (7 percent) and Hispanics (6 percent) were ticketed at a higher rate than whites (5 percent). More telling, cops were also twice as likely to end the stop without taking further action—writing a ticket, or even issuing a warning—if the driver was Black (2 percent) than if he or she was White or Hispanic (1 percent each), suggesting that Blacks are more subject to arbitrary pretext stops. Likewise, while police only searched 2 percent of White drivers, they searched 6 percent of Blacks and 7 percent of Hispanics.\textsuperscript{64}

The studies show that people of color are more likely than White people to be pulled over, removed from the car, and

\textsuperscript{64} Ibid., 7, 9.

These finding are in keeping with those of previous BJS reports. See, for example: Christine Eith and Matthew R. Durose, \textit{Contacts between Police and the Public, 2008} (Bureau of Justice Statistics: October 2011), 1.
searched. But they reveal something else as well: Race is useless as an indicator of criminality. While Blacks and Latinos accounted for 78 percent of those searched at the south end of the New Jersey Turnpike during the year 2000, evidence was more reliably found by searching White people: 25 percent of White people searched had contraband, as compared to 13 percent of Black people and 5 percent of Latinos. According to the North Carolina study, 26 percent of those Black people searched and 33 percent of the White people searched were found to possess contraband.65 In Massachusetts, 16 percent of White people searched were found to possess drugs, as compared to 12 percent of Black people and 10 percent of Latinos.66

In Portland, in 2011, African Americans were the subject of 11.8 percent of all traffic stops and 19.5 percent of all pedestrian stops, though they are only 6.3 percent of the local population. They were searched in 12.6 percent of these stops, which is 3.7 times the rate at which White people were searched. Latinos were stopped at a rate below their portion of the population (6.2 percent of traffic and 6 percent of pedestrian stops, as opposed to 9.2 percent of the census total), but they were searched 8 percent of the time (2.7 times the White rate). Again, police were more likely to find contraband on Whites (42.7 percent of searches) than Blacks (30.5 percent) or Latinos (29.8 percent).67

Of course the racial politics of policing are not simply Black and White. Over the last two decades immigration, like crime, has increasingly served as a coded proxy for race, a way of talking about it without saying it. Immigration enforcement, then, has operated as an ostensibly color-blind means of maintaining White supremacy, which has directed police attention toward those groups with a sizeable proportion of immigrants—the Latino community most of all.109

 Until the mid-1990s immigration was treated as a strictly federal matter. Aside from notifying the Immigration and Naturalization Service when taking foreign nationals into custody, local and state police had little role to play in enforcement. In the last two decades, and especially since the terrorist attacks of September 11, 2001, local cops have increasingly been enlisted—sometimes eagerly, sometimes over their objections—

65 Harris, Profiles in Injustice, 80–81.

Anecdotally, a Black man in Oregon reports being pulled over twenty-four times in the course of nineteen years, receiving just four tickets (three of which were dismissed). When he inquired about the reason for the stop most of the officers said that he had been driving suspiciously, without further elaboration. L. Jawn Hollingshed, “Twenty-Four Traffic Stops: One Black Man’s Story about Racial Profiling,” OregonLive, March 6, 2010, accessed November 2, 2014, oregonlive.com.

110 I will discuss the relationship between immigration enforcement and counter-terrorism, and its implications for Middle Eastern immigrants and their communities, in chapter 7.
Taken together, the numbers on police stops, searches, arrests, and incarceration, show a persistent bias in the criminal legal system, one neither explained nor justified by any considerations related to crime. The evidence absolutely contradicts the idea that racial profiling is useful in getting drugs, or guns, or criminals, off the streets. If we insist on viewing the police as crime-fighters, profiling can only be seen as a mistake, a persistent disaster. But if we suspend or surrender this noble view of police work, and look instead at the actual consequences of what the cops do, profiling does make a certain kind of sense; it follows a sinister logic. Racial profiling is not about crime at all; it’s about controlling people of color.

Racial profiling doesn’t only label certain groups as the objects of official control, it also limits the mobility of people of color, and thus restricts their access to resources and opportunities. Harris notes:

It may cause many people of color to plan their driving and travel routes in certain ways, to take (or not take) particular jobs.... They may simply stay out of places and neighborhoods where they will “stand out”—where police may feel they don’t “belong”.... [And thus,] these tactics help to reinforce existing segregation in housing and employment.107

Race-based policing, and especially the fear of Black criminality, has a more subtle function as well—maintaining the ideological basis of White unity and indirectly controlling the political allegiances of White people. While people of color are the targets of racial profiling, there are actually two audiences. Profiling serves to humiliate and threaten those who are targeted; even when it does not lead to criminal sanctioning, it serves as a not-very-subtle reminder of their “place.” And it helps to align White people with the power structure by con-

Crackdown in Seattle

Of course, these biases aren’t limited to traffic and pedestrian stops. In her study of drug arrests in Seattle over a four-month period in 2005 and 2006, University of Washington sociologist Katherine Beckett found that, though Blacks represent only 8 percent of the city’s population, they make up 67 percent of drug arrests. This placed the arrest rate (per 100,000 population) for Blacks at 13.6 times that of Whites, and the arrest rate for selling drugs at 21 times that for whites.68 Even adjusting for different patterns of consuming and distributing narcotics, the disparity remains: Depending on the source, empirical studies suggest that Blacks represent between 11 and 28 percent of Seattle’s drug consumers and between 14 and 28 percent of the city’s drug dealers.69 Direct observation of outdoor drug markets in the Downtown and Capitol Hill areas support these estimates: African Americans were 33.3 percent of sellers observed Downtown and 9.1 percent in Capitol Hill, but represented 85.3 and 27.2 percent of arrests in these areas, respectively. In other words, Blacks delivering drugs in Capitol Hill were 3.9 times more likely to be arrested, and those Downtown were 13.6 times more likely than “whites engaged in the same behavior in the same geographic area” during the same period of time.70

Beckett’s study considers, tests, and eliminates a variety of possible explanations for the disparity, including different rates of drug use and participation in the drug economy, higher arrest rates for outdoor sales, the geographic concen-

69 Ibid., 46. The study examined data “from multiple sources—surveys of public school students, needle exchange clients, and the general Seattle population; mortality data; drug treatment admission data; and an observational study of two outdoor drug markets.” Ibid., 1.
70 Ibid., 66–71, 70–71. Emphasis in original.
tration of enforcement activity in the Downtown area, and the police focus on crack cocaine. Of these, only crack was a statistically significant factor. Of all the city’s drug arrests, 72.9 percent were for crack, and 73.4 percent of those arrested for crack were African American. Thus, if one recalculates leaving out crack-related arrests, the Black rate drops from 21 times the White rate to a more modest 2.8. This correlation offers some support to the idea that the excessive focus on crack is driving the disproportionate arrest rate.

But then the question arises, why the focus on crack? Looking at data concerning the frequency of crack sales, calls to police reporting drug dealers, public health considerations, and gun violence, Beckett could find no rational reason for the crack obsession. She concludes: “Although colorblind on its face, the focus on crack cocaine does not appear to be a function of race-neutral considerations, and continues to produce an extraordinarily high degree of racial disparity in Seattle drug arrests.” She also notes that “it is not possible” to rule out the theory that “the SPD’s focus on black suspects explains the preponderance of crack cocaine arrests,” rather than the other way around. In fact, even just looking at crack cases, Blacks are still over-represented, making up 72.9 percent of arrests but (according to drug user surveys) 49.4 percent of dealers.

Whichever comes first—the focus on Blacks or the focus on crack—it amounts to much the same thing. The result is a disproportionate number of African Americans in police custody. And the impulse behind each approach turns out to be a racist one. In an earlier study, looking at arrests from 1999 to 2001, Beckett drew a sharp conclusion: “the focus on crack,” like the

75 Ibid., 99–100.
76 Ibid., 42.
77 Justice Statistics, at the end of 2010 there were 2,226,832 people in jail or prison in the United States, another 4,887,900 on probation or parole—for a total of 7.1 million in some way under the supervision of the correctional authorities. That means that 3 percent of adults were under correctional supervision, including 1 in 48 on probation or parole and 1 in 104 in jail or prison. Put differently: almost 1 percent of the adult population is behind bars (962 per 100,000). Of those, in 2010, Blacks were 13 percent of the national population but 40 percent of the prison population; Hispanics were 16 percent of the U.S. population and 19 percent in prison; and Whites were 64 percent nationally, but only 39 percent carcerally. For every 100,000 Black women in the U.S., 260 were in prison; for every 100,000 Latina women, 133; for White women, 91. More startling still, for every 100,000 Black men, 4,347 were in prison; for Latino men, 1,775; for White men, 678. Doing the math, we see that Black women are almost three times as likely to go to prison as White women (2.8): Latina women are almost half again as likely (1.45). Black men are 6.4 times as likely to be imprisoned as White men, and Hispanic men nearly three times as likely (2.6). By some estimates, one in every three Black men will go to jail at some point in his life.

---

overrepresentation of people of color among those arrested, “reflect[s] a racialized conception of ‘the drug problem.’” The obsession with “the drug most strongly associated with ‘blackness’” suggests that law enforcement policies and practices are predicated on the assumption that the drug problem is, in fact, a black and Latino one, and that crack, the drug most strongly associated with urban blacks, is ‘the worst.’”77 A kind of double profiling takes place. By virtue of their association, the drug is racialized and Blacks are criminalized.

### Stop and Frisk: Racial Profiling on Trial

On April 20, 2007, as David Floyd was walking home, three New York police officers approached and asked, “Excuse me, may I speak with you?” Floyd stopped, and the officers demanded to see his ID. He gave it to them, and then, though he explicitly told them he did not consent to a search, they patted him down and looked in his pockets. Finding nothing of interest, they gave him back his driver’s license, warned him to get it updated, and left.78 On the spectrum of police encounters, this incident hardly registers. It was completely banal, entirely routine, the sort of thing that happens all of the time—which is precisely the point.

Between January 2004 and July 2012, the New York City police made 4.4 million stops just like David Floyd’s. In 52 percent of those stops, they frisked the subject; 8 percent of those 2.3 million searches were more extensive—opening jackets, looking in pockets. Eighty-six percent of searches, like Floyd’s, pro-

---

duced no contraband. Also like David Floyd, 52 percent of the people stopped were Black.\textsuperscript{79}

That’s more than twice the African American portion of the local population (23 percent). Altogether, 90 percent of those stopped were people of color. (Hispanics, at 31 percent, were the second-largest group; New York City’s population is 29 percent Hispanic.) Weapons—which are nominally the point of this exercise—were discovered in just 1.5 percent of searches. And as we’ve seen elsewhere, they were more often found on Whites: 1.4 percent of Whites had weapons, while 1.1 percent of Hispanics and 1 percent of Blacks did. Whites were more likely to be carrying drugs or other contraband as well: 2.3 percent, compared to 1.8 percent of Blacks and 1.7 percent of Hispanics. On the other hand, police report using force more often against people of color: in 24 percent of Hispanic stops, 23 percent of Black stops, and 17 percent of White stops. Put differently, Blacks were 30 percent more likely than Whites to have force used against them, and Hispanics were 9 percent more likely.\textsuperscript{80}

Six percent of these stops led to arrest, and another 6 percent led to citations.\textsuperscript{81} The arrest and citation rates were actually 8 percent lower for Blacks than for Whites (and lower still in majority-Black neighborhoods), suggesting (as a court later found) “that blacks are likely targeted for stops based on a lesser degree of objectively founded suspicion than whites.”\textsuperscript{82} However, when accused of the same offenses, Blacks were 30 percent more likely than Whites to be arrested rather than cited.\textsuperscript{83} The most common charges were public consumption of alcohol and disorderly conduct (both violations, the legal profile. He was a young Black man, and that was enough. He became, quite literally, a target. The police gunned him down as he stood in his doorway. They fired forty-one shots.

Diallo’s shooting represents only one cost of racial profiling—the losses calculated in terms of bodies, bullet holes, scars, and stitches. But there are other victims, other costs, counted in years, marked off in cell blocks, ringed with razor wire.\textsuperscript{99} Race-based policing contributes to the overrepresentation of minorities (especially Black people) at every stage of the criminal legal process. Statistics from mid-sized cities across the country show startling disparities in the drug arrest rates for Whites and Blacks.

If we look specifically at the rates for drug sales (excluding marijuana), the gap is even more striking:

Arrest leads to court, and court leads to prison, and the disparities continue at each step.\textsuperscript{102} According to the Bureau of

\end{footnotesize}
him. Diallo was unarmed, and had committed no crime. He was simply in the wrong place at the wrong time, and Black.

Stephen Worth, a lawyer for the Patrolman’s Benevolent Association, explained the shooting: “He is acting strange, he fits the rapist’s description in a generic way…. The reason they are shooting him is they think he has a gun.” Worth refused to elaborate on Diallo’s “strange” behavior, the “description” he matched, or why the police would think he was armed. But witnesses later helped to fit the shooting into a broader pattern; they told the Village Voice that earlier in the evening the same officers—members of the elite Street Crimes Unit—were stopping and searching numerous Black men, seemingly at random. Such behavior fit the unit’s established modus operandi. In 1997 and 1998 the Street Crimes Unit stopped and searched 45,000 men, mostly Blacks and Latinos; it made 9,000 arrests.

Amadou Diallo was not a criminal. He was not, in any real sense, a suspect. He matched a “generic” description. He fit the equivalent of a parking ticket), and 42 percent of the citations were later dismissed.

The most common cause for arrest was possession of marijuana, which is troubling for separate reasons: Marijuana has been decriminalized in New York; simple possession is treated as a violation unless it is in public view. In many of these cases, the “public view” only occurred because of the search. Police order a suspect to empty his pockets, the joint that was in his jacket is now in his hand, and a violation-level charge becomes a misdemeanor. The search, in other words, literally produces the crime.

David Floyd, along with eleven other people—all Blacks and Hispanics—sued. They argued that in nineteen separate incidents they had been unfairly targeted because of their race and searched without any legal justification, thus violating their rights under the Fourth and Fourteenth Amendments to the U.S. Constitution.

In the spring of 2013, over the course of a nine-week trial, the City of New York and the New York Police Department tried to defend their “stop and frisk” policy. They argued that the focus on Blacks and Hispanics was justified because “blacks and Hispanics account for a disproportionate share of … crime perpetrators.” One of the City’s expert witnesses testified:

Obviously, if particular racial or ethnic groups in New York participate in crime at a rate disproportionate to their share of the population, we would expect officers to conduct … stops for

---

97 Quoted in Ibid.
84 Ibid., 35n126 and 35n129.
86 Scheindlin, Floyd v. New York, 4.
87 Ibid., 88. Clearly, police leaders were not concerned about the racial disparity. Mayor Michael Bloomberg complained that the NYPD was “disproportionately stopping whites too much and minorities too little,” and Police Chief Ray Kelly declared, “really, African-Americans are being under-stopped.” Both quoted in Ibid., 190n776.
such groups at rates higher than each group’s respective share of the City’s population.  

The judge, Shira Scheindlin, was unsparing in her assessment of the City’s case:

The City and its highest officials believe that blacks and Hispanics should be stopped at the same rate as their proportion of the local criminal suspect population. But this reasoning is flawed because the stopped population is overwhelmingly innocent—not criminal. … [T]here is no basis for assuming that the racial distribution of stopped pedestrians will resemble the racial distribution of the local criminal population if the people stopped are not criminals. …

If the police are stopping people in a race-neutral way, the racial composition of the innocent people stopped should more or less mirror the racial composition of the areas where they are stopped, all things being equal. 

She goes on to argue that even if one demographic group or another is more involved with criminal activity, it in no way follows that innocent people from the same group are more likely to behave suspiciously, giving police grounds to stop them. The use of race as a proxy, it seems, has been substituted for the legal standard of reasonable suspicion and led the police to search for suspects "from the pool of non-criminals not exhibiting suspicious behavior"—which is, very nearly, the definition of racial profiling. As Judge Scheindlin explains, “To say that black people in general are somehow more suspicious-looking, or criminal in appearance, than white people is not a race-neutral explanation for racial disparities in NYPD stops: it is itself a racially biased explanation.” In other words, “Rather than a defense against the charge of racial profiling, … this reasoning is a defense of racial profiling.”

Judge Scheindlin ruled that nine of the nineteen stops discussed in court were unconstitutional and, of the remaining ten, five involved unconstitutional searches. Moreover, she found that, at an absolute minimum, the police had engaged in 200,000 stops that fail the test of constitutionality. She blamed police leaders for their “deliberate indifference” to the rights of minorities, noted the pressure they put on their subordinates to aggressively stop and search people of color, and pointed to shortcomings in record-keeping, supervision, training, and discipline. 

She did not, however, order an end to the stop-and-frisk per se, but only prescribed policy reforms and increased monitoring to change how it is done. Such half-measures may reduce the scale of the practice, but they will not stop the police from viewing people of color with suspicion, arbitrarily stopping them, rifling through their pockets, arresting them—and worse.

**Consequences of Profiling**

On February 4, 1999, a twenty-two-year-old West African immigrant named Amadou Diallo was killed by New York City police officers while standing in front of his own home. Four cops—Sean Carrol, Edward McMellon, Kenneth Boss, and Richard Murphy—fired a total of forty-one shots. Nineteen hit...
Since 2000, Priest’s goon squad has been designated a “special police agency” under the state’s Company Police Act of 1991, thus empowering them to carry firearms and make arrests. By 2003 the Smithfield Specials were stationing armed guards throughout the plant, and placing plainclothes agents on the shop floor, among the workers. “It’s all part of the anti-union campaign,” one UFCW supporter said, “to intimidate us and turn the plant into an armed camp. For those of us from Central America it is especially frightening because where we come from the police shoot trade unionists.”

In 2006, the Immigration and Customs Enforcement also got involved. In the fall of that year, Smithfield sent letters to 640 workers threatening to fire them if their papers did not match government records. Some of the letters went to U.S. citizens; but in November, Smithfield started to make good on its threats, firing fifty workers. In response, on November 16, at least 500 employees—mostly Latinos and Latinas—walked off the job. But the pressure only continued to build. After a call from Smithfield managers, ICE started making arrests in January, often at workers’ homes in the middle of the night. Approximately 1,500 workers fled rather than risk arrest. The union accused Smithfield of using ICE to undermine their organizing. The company said that they were merely following the law and the union campaign was not a factor—a claim that might be more credible if supervisors hadn’t been threatening to use ICE against union supporters for more than a decade.

eral marshals for law enforcement purposes also remained conveniently forgotten. Whatever Rowe’s own intentions, the inaction of his superiors was certainly culpable, and their explanations disingenuous.

Mississippi: "Underneath Her Borders the Devil Draws No Line"

Even where White violence was at its most extreme, even where Black people were most oppressed, the federal government was loath to act. Its position, for most of a century, had been that Black people were on their own; or, put differently, that local officials were free to treat them in whatever way they saw fit. When the federal government was moved to act, it was usually because some particular atrocity created a national uproar. One such event was the 1964 disappearance of three civil rights workers in the Mississippi back country.

On June 21, 1964, Michael Schwerner, James Chaney, and Andrew Goodman traveled to Philadelphia, Mississippi, to investigate a fire at a Black church. They never returned. That was just one of many instances of violence and intimidation visited upon the participants of the Mississippi Summer Project organized by the Council of Federated Organizations (COFO), a coalition including the Student Nonviolent Coordinating Com-

Then not only were black people second-class citizens, but civil rights law was second-class law.” Howard Zinn, “Selma, Alabama,” in You Can’t Be Neutral on a Moving Train: A Personal History of Our Time (Boston: Beacon Press, 1994), 63.

Unfortunately, the Justice Department’s enforcement priorities have not much changed. “Not only are police misconduct cases prosecuted at the lowest rate among civil rights prosecutions, but civil rights offenses themselves are prosecuted less than any other category of offense handled by the U.S. Justice Department.” Human Rights Watch, Shielded from Justice, 94.

194 In 1962, the Marshals were used to force the integration of the University of Mississippi. Stark, Police Riots, 135.

2001, when the unions finally gave in. Only a third of the striking workers were rehired—at lower wages, of course.90

It is hard to know how much of the blame for this defeat really falls to the police, especially given the poor planning of the unions, media hostility, and court orders limiting the number of strikers on picket lines. But it is easy to see what the cooperation of the police was worth to the Detroit News Agency. During the course of the strike, the company donated nearly a million dollars to the Sterling Heights police. Police violence escalated accordingly, and crowds took to chanting “Bought and paid for!” when the cops arrived.91 Mayor Dennis Archer explained that riot police helped to preserve “a good business climate.”92

Policing the Abattoir

Where the Detroit News Agency hired private guards and more or less rented the local police department, Smithfield Foods has gone further and formed its own state-certified police agency, “Smithfield Foods Special Police.” Smithfield, the largest pork processor in the country, runs the largest hog slaughterhouse in the world, which employs more than 5,000 workers and kills 30,000 pigs a day. It was at that plant, located in Tar Heel, North Carolina, that the company was embroiled in a fifteen-year fight with the United Food and

91 Quoted in Butzbaugh, “Newspaper War,” 9.

mittee (SNCC), CORE, the National Council of Churches, and the NAACP.

The violence used against civil rights workers was audacious and severe. But more staggering was the violence against the Black community at large. Chaney, Goodman, and Schwerner weren’t the only three men to disappear in Mississippi that summer. They’re just the three who made headlines; they’re just the three we remember. When White people disappeared, people noticed. And Schwerner and Goodman were White. When Black people disappeared, who cared? Who took notice? Black folks could vanish—Black folks could hang—without stirring even a mutter from the nation’s newspapers, without so much as a report from the FBI.196

Dave Dennis, a field secretary for CORE, draws out the point:

During the time they were looking for the bodies of Chaney, Schwerner, and Goodman, they found other bodies throughout the state. They found torsos in the Mississippi River, they found people who were burned, they even found a few bodies of people on the side of the roads. As soon as it was determined that these bodies were not the three missing workers, or one of the three, these deaths were forgotten. That’s what we were talking about in terms of what the Freedom Summer was all about, in terms of why it was necessary to bring that attention there. Because people forget, and if it had just been blacks there, they would have forgotten again. It would just have been three black people missing.197

196 Mary Frances Berry notes: “The federal government’s response to the Chaney-Goodman-Schwerner murders remained exceptional. Segregationist violence, arson, and murders of civil rights workers for trying to exercise constitutional rights continued unabated…. In fact, the FBI agreed with the Southern devotion to white supremacy. FBI agents spent more time investigating the white students and black activists, who were considered a threat to national security, than worrying about the segregationist violence.” Berry, Black Resistance, 163.
197 Quoted in Hampton, Voices of Freedom, 194.
Following the disappearances, COFO collected 257 affidavits for use in a lawsuit against Neshoba County Sheriff Lawrence Rainey, among others. Fifty-seven of these were selected as typical and printed as the *Mississippi Black Paper*. The lawsuit, *Council of Federated Organizations et al. v. L.A. Rainey et al.*, was filed on July 19, 1964. It alleged:

Murders, bombings, burnings, beatings, terrorization and intimidation continue throughout the state at a steadily increasing tempo without any attempts by state or local authorities to prevent them. In many instances, the police themselves were—and are—directly involved or [have] tacitly or openly encouraged—and encourage—the form of brutalization being employed.

As documentation, COFO provided:

Approximately 90 affidavits as to illegal acts of Mississippi law enforcement officers against civil rights workers and the Negro citizens of Mississippi, including physical violence, intimidation, harassments, unprovoked arrests, and prolonged unjustified incarceration which are daily continuing....

Approximately 35 affidavits as to the failure of Mississippi law enforcement officers to take any or adequate steps to safeguard civil rights workers and Negro citizens against physical violence and property destruction although fully warned in advance of the possibility of their occurrence, all of which is daily continuing....

Approximately 35 affidavits as to the failure of the law enforcement officers of Mississippi to prosecute known perpetrators of violence, destruction and terrorism against the persons and property of civil rights workers and Negro citizens, all of which is daily continuing.

85 Ann Mullen, “A Million-Dollar Question,” *Metro Times* (Detroit, MI), April 19, 2000, accessed September 9, 2002, www.metrotimes.com; and Mia Butzbaugh, “Media Giants Take Aim at Newspaper Unions,” *Labor Notes*, September 1995, 3. A Sterling Heights Police memo dated July 18, 1995, described a meeting between police and the newspapers’ management. It said that the company’s representatives were “very impressed and very happy with the performance of our department and that they will do their best to assist us, so as to keep things running smoothly.” Quoted in Mullen, “Million-Dollar Question.”

89 Butzbaugh, “Newspaper War,” 1, 9.
a campaign of massive, often deadly, battles to one of quick, bloodless, guerrilla attacks. Both the longshore and the ship workers immediately instigated a series of on-the-job actions against unfair and dangerous conditions. The small-scale strike quickly became the workers’ most powerful weapon. Between January 1, 1937, and August 1, 1938, the West Coast docks were the site of 350 strikes, mostly brief and localized “quickies.”

“Bought and Paid For”

From the past two decades, the most famous example of police-managed union-busting is probably that of the Detroit Newspaper Strike (and later, lockout). In July 1995, when 2,600 employees of the Detroit News and the Detroit Free Press went on strike, the newspapers (together, the Detroit News Agency) responded by hiring 2,000 private security guards supplied by Vance International, and by giving money to police in the suburb of Sterling Heights, where the papers’ production plants are located. Police initially confiscated clubs and other weapons from Vance guards, but after the Detroit News Agency’s first donation—a sum of $115,921—the cops’

The Black Paper makes for disturbing reading. At times, it is distinctly reminiscent of the statements former slaves made about the patrols. One young woman testifies:

On February 6, 1962, when I was 19, I was walking with a young man down a Clarksdale street when Clarksdale police officers _______ and _______ stopped us and accused me of having been involved in a theft. I was taken to jail by the officers and they forced me to unclothe and lie on my back. One of the officers beat me between my legs with a belt. A few minutes later, the other officer began to beat me across my naked breasts.

The range of abuses described is astonishing, sometimes within even a single deposition. Douglas MacArthur Cotton, for example, tells of being followed by the McComb police as he canvassed for a mock election: “Police followed me wherever I went, stood beside me on the front porch of people, photographing them and taking their names while I was talking to them.” More terrifying, he also attests to the abuse of prisoners: “On approximately July 20, Willie Carnell was hung by his hands to the cell bars for 30 hours. Guards accused him of ‘singing.’” These documents help to situate Goodman, Schwerner, and Chaney’s disappearance—their murder—with a broader pattern of ongoing violence.

In her deposition Rita Schwerner, the wife of one of the missing men, tells of the numerous threats they received, and the constant harassment by police officers. She remembers one occasion, when her husband went to bail out picketers who had been arrested. The desk sergeant told him: “If you get any more of these damn kids arrested, Schwerner, I’m going to get you,

84 Brecher, Strike!, 158

The new militancy signaled a shift in the attitude of the workers, much to the dismay of their bosses. Looking back on the strike a few years later, Thomas G. Plant told a conference of longshore employers: “Most of us heaved a big sigh of relief, and felt that the old peace and order would soon be restored. But the old order had changed. The old union had said to us, ‘We believe our interests are common with yours; we will cooperate with you in every way...’ The new union was to say to us, ‘We believe in the class struggle, that there is nothing in common between our interests and yours, therefore, we will hamper you at every turn, and we will do everything we can to destroy your interests, believing that by doing so we can advance our own.” Quoted in Selvin, A Terrible Anger, 240.

200 Quoted in Misseduc, Mississippi Black Paper, 6. The names of officers were omitted from the published version, for fear of lawsuits.
and that’s a promise.” Such threats were not made, or taken, lightly. Someone did “get” Michael Schwerner. And Andrew Goodman. And James Chaney.

After a long investigation, the FBI found an informant who was willing to talk. He led them to an earthen dam where the three men were buried and told investigators what happened on the night they disappeared: Deputy Cecil Price arrested Schwerner, Goodman, and Chaney. He released them in the middle of the night, and then pulled them over again. This time, Price put them in his car and drove them to a deserted area, where Klansmen shot and killed them.

Nineteen men were charged with conspiracy to deprive the activists of their civil rights. Among them were Sheriff Rainey, Deputy Price, and a Philadelphia, Mississippi, police officer. As Seth Cagin and Philip Dray observe in We Are Not Afraid, their history of the case:

The participation of a law officer was evidently considered vital to the conspiracy. Not only would the civil rights workers be more likely to stop for a marked police car, southern lynching mobs had traditionally had their victims handed over to them by the police, a convenience that lent the proceeding a shade of social legitimacy.

In October 1967, a jury of White Mississippian convicted Price and six Klansmen. Price was sentenced to six years, and served four.

In arbitration, the workers won a raise and a thirty-hour week, but were only granted partial control of the hiring hall—falling short of their most important demand. The strike delivered real gains, but not the decisive victory the workers wanted. In this case, they proved unwilling to accept even a partial defeat, and the class war shifted from

205 Ibid., 288.
206 Ibid., 382, 452, 456.

In 2005, forty-one years after the murders, another conspirator, Edgar Ray Killen—a former Klansman and Baptist preacher—was arrested and tried for the deaths of Chaney, Schwerner, and Goodman. A jury found him guilty of manslaughter, and he was sentenced to sixty years in prison. Sophia Pearson, “Killen Sentenced to 60 Years in Prison in 1964 Deaths,” building-trades workers laid down their tools and walked off their jobs. They were joined by 27,000 workers affiliated with the Central Labor Council.

On July 17, the second day of the general strike, the police launched a coordinated attack. That morning a group of uniformed officers and plainclothes detectives raided the Maritime Workers Industrial Union office, breaking down the door, destroying office equipment and furniture, smashing windows, seizing records, and arresting everyone present, often delivering a beating in the process. This was the first in a daylong series of similar raids, not only in San Francisco, but throughout the state. Police, National Guard troops, and vigilantes attacked radical hangouts, strike kitchens, newspapers offices, and even a school. About 300 people were arrested.

Shortly thereafter, on July 20, the strike committee voted to end the general strike, though the longshore and maritime workers continued striking on their own. The announcement was met with another wave of police raids and vigilante attacks. Eleven days later, the last strikers returned to work. The strike had lasted eighty-two days and involved 30,000 dock workers. Seven were killed, hundreds were hospitalized, and thousands were treated at the ILA clinic. There were 938 arrests in San Francisco alone.

In arbitration, the workers won a raise and a thirty-hour week, but were only granted partial control of the hiring hall—falling short of their most important demand. The strike delivered real gains, but not the decisive victory the workers wanted. In this case, they proved unwilling to accept even a partial defeat, and the class war shifted from

By the end of the day, in addition to Sperry and Bordoise, one other worker had been killed, and at least 115 hospitalized. Thus July 5 came to be known as “Bloody Thursday.” Strike leader Harry Bridges called it a “reign of terror.” He said: “It was an attack by armed men against unarmed peaceful pickets. It was a massacre of workers by the shipowners through the police.” The next day, the corner of Steuart and Mission was covered with flowers. Chalked on the street were the words: “Two men killed here, murdered by police.”

One week later, 4,000 truck drivers walked out, marking the move toward a general strike. They were quickly joined by butchers, machinists, welders, laundry workers, culinary workers, cleaners and dyers, and boilermakers: thirteen unions, representing 32,000 workers, joined the strike. The Teamsters picketed the city’s southern limits, guarding the only vehicular route to the city. There they turned back—and sometimes turned over—non-union trucks. A strike committee issued permits for hospital supplies, food, and other necessary services, but the city could not function as usual. Signs began appearing in shop windows: “Closed, Out of Supplies,” “No Gas, Due to the Strike,” “Closed for the duration,” and “Closed till the boys win.”

The next day the authorities declared an emergency. The police began stockpiling weapons, swore in 500 special officers, and created an “anti-radical and crime prevention bureau.” Eighteen hundred cops and 4,500 National Guard troops were now on strike duty, reinforced with machine guns, tanks, and artillery. Meanwhile, across the bay in Oakland, 15,000

Rainey, who was not part of the original conspiracy but aided in the cover-up, was acquitted. However, he was removed from his position as sheriff, and never regained the office. Though Rainey remained free and racist violence continued, the trial ended a terrible reign in Neshoba County. During his time in law enforcement, Rainey—who voiced open support for the Klan—had been involved in a great many beatings, arbitrary arrests, and incidents of harassment directed against Black people and civil rights workers. He had also been a party to at least two suspicious shootings, in addition to those of Chaney, Schwerner, and Goodman. In one case, he had—gun drawn—approached a Black couple sitting in a parked car, and ordered them out. When the man complied, Rainey shot and killed him. That was in October, 1959; Rainey had been a Philadelphia, Mississippi, police officer. Shortly thereafter he became a Neshoba County sheriff’s deputy, and was party to a second shooting. He and Sheriff Hop Barnett were transporting a handcuffed Black man to the state mental hospital when, they say, he reached for one of their guns. Barnett shot him, fatally.

In 2014, fifty years after their murders, President Barack Obama posthumously awarded James Chaney, Andrew Goodman, and Michael Schwerner the presidential Medal

208 While awaiting trial, Sheriff Rainey appeared on the platform at a Klan rally. He said: “I’ve been accused by the FBI … [of being sympathetic to] the Klan and everything and so I came down today to see the head man and investigate it and see what there was to it. And I found it so far to be mighty good. They just done a lot of lying about it. I’ve met some of the best fellows I think there are in Alabama and Mississippi and other places. And I’ve had to lay some deputies out that’s been investigating it and they reported to me a while ago, they’d met some fine people and thought it was a mighty good organization. Thank you.” Quoted in Lowe, Invisible Empire, 104–5.
209 Cagin and Dray, We Are Not Afraid, 253–54.
Selma, Alabama: Bloody Sunday

As the civil rights movement advanced, violence continued—with police in the vanguard and the Klan in the wings. Birmingham was, unfortunately, only the most notorious example. Throughout the South, cops followed Bull Connor’s example.

Albert Turner described a march in Marion, Alabama, near Selma:

As we went out of the church to begin the actual march—we got about half a block from the door—the sheriff and several troopers halted us. We were told that we was an unlawful assembly and that we had to disband the demonstration and go back to the church. We had planned already to have a prayer at that point. We had Reverend [James] Dobynes who got down to pray. And they took Reverend Dobynes, who was on his knees immediately behind me, and they just started beating

But force seemed to be the authorities’ preferred means of convincing the workers to return to their jobs. On July 5, the entire San Francisco Police Department was put on strike duty.65 The fighting was concentrated in the area surrounding Pier 38 and Rincon Hill. But the police also moved in on a crowd at Steuart and Mission, near the ILA hall. Suddenly a car carrying two police inspectors appeared in the intersection. The inspectors stepped out of the car, fired their pistols into the crowd, and then fled as the crowd hurled rocks and bricks at them.66 Two men died in the attack—Howard S. Sperry, a longshoreman, and Nick Counderakis (a.k.a. Nick Bordoise), a Communist. A third man, Charles Olsen, was also shot, but survived.67 When the injured were taken to the ILA’s clinic, the police fired into the building and filled it with tear gas. As the unionists barricaded themselves in the hall, the telephone rang: “Are you willing to arbitrate now?”68

That evening 1,700 National Guard troops were deployed and armored cars patrolled the streets. The Embarcadero, the street nearest the waterfront, was enclosed in barbed wire and guarded with machine guns. But the military fortifications fell short of their objective: the work remained undone. Two hundred fifty ships sat idle along the coast. Even when a military guard made it possible for scabs to unload and move cargo, it just sat in the warehouses, where Teamster truckers refused to touch it.69 As in Lawrence, the state was reminded of the practical limits of its reliance on force.

65 Yellen, Labor Struggles, 318.
66 Selvin, A Terrible Anger, 149. The police naturally reversed this chronology in their official statements, claiming that the inspectors merely defended themselves against the hail of rocks coming from the crowd. Several witnesses, including Harry Bridges, testified that nothing was thrown until after the shots were fired. Ibid., 14.
67 Ibid., 11–12, 14.
68 Quoted in Ibid., 150.
69 Yellen, Labor Struggles, 319; and Brecher, Strike!, 153.
force. When the clashes came, as they did, the police—not the strikebreakers—were pitted against the strikers.60

The violence started early, and escalated throughout the strike. On the first day, the police dispersed 500 picketers with relative ease. By the end of the month, however, the pickets were fighting back, hurling bricks at the cops. The police then used clubs, gas, and eventually shotguns to break up groups of strikers.61

The most serious violence accompanied efforts to operate the docks, especially attempts to move goods to or from the ports.62 On July 3, 1934, the police created a corridor down King Street to Pier 38, guarded by a police line on one side and a row of box cars on the other. As trucks approached, the cops sought to break up the crowd of strike supporters. They attacked with clubs, tear gas, and gunfire, injuring many in the crowd as well as numerous bystanders. (A stray bullet wounded a teller in the nearby American Trust Company.) Strikers retaliated by throwing rocks, bricks, and tear gas containers back at the police. At least two strikers were shot, one killed, and eleven hospitalized; nine cops were injured.63 The ILA issued a statement on the encounter: “Striking pickets were clubbed down and rode over by the police who a short time ago were supposed to be the friends of these same workers. The strike cannot and will not be settled by force.”64

---

60 Ibid., 93.
61 Brecher, Strike!, 152.
62 Violence was less common in Portland and Seattle, where the persistent threat of a general strike discouraged any attempt at opening the docks. (Selvin, A Terrible Anger, 104). The most notable incident in the northwest came as the San Francisco General Strike was winding down. Seattle mayor Charles Smith ordered 300 police to remove 2,000 picketers from the city’s pier at Smith’s Cove. The cops used tear gas and nausea gas against the crowds, and the police chief resigned in protest. Ibid., 225; and Yellen, Labor Struggles, 332.

One man, Jimmy Lee Jackson, was severely beaten by state troopers and then shot at close range. He died as a result on February 26, 1965.212

Jackson’s death served to mobilize increasing numbers of people and inspired civil rights groups to escalate their actions. A march was planned in response to Jackson’s murder—from Selma to Montgomery, on Sunday, March 7. Governor George Wallace prohibited the march, saying that it would be impossible to protect the demonstrators. Ignoring or defying him, 600 people gathered in Brown’s Chapel in Selma. As the crowd moved out of the church building and through the town, they were attacked by state police under the command of John Cloud, and by the deputies of Sheriff Jim Clark. The police used clubs, tear gas, cattle prods, horses, and dogs. Seventeen people were hospitalized as a result, including an eight-year-old child. Forty others were treated at Good Samaritan Hospital and released.213 March 7, 1965, became known as “Bloody Sunday.”

The violence in Selma forced President Johnson’s hand on the civil rights issue. On March 15, in a televised address to Congress, he announced that he would introduce voter registration legislation, underscoring his intentions with the movement’s slogan, “We shall overcome.”214 Historian Howard Zinn explains the change in policy: “Selma became

---

211 Quoted in Hampton, Voices of Freedom, 223.
212 Ibid., 224–26.
213 Ibid., 226–29.
a national scandal, and an international embarrassment for the Johnson administration.”215 But the nation’s sheriffs were not embarrassed by the violence; even less were they moved by Johnson’s speech. Barely a year after he led the attack at Selma, they elected Sheriff Jim Clark to head their national association.216

**Panthers and Police**

The country’s sheriffs weren’t the only ones unimpressed by LBJ’s gesture. While the White establishment was wringing its hands over integration, voter registration, and the free speech rights of Black people, the civil rights movement was transforming itself, redefining its goals to keep pace with its successes, rethinking its tactics in light of its defeats. A new militancy emerged. The sweet tune of “We shall overcome” gradually faded into the background, replaced by the more forceful cries of “Black Power!”217

Emblematic of the new militancy, the Black Panther Party for Self Defense appeared in Oakland in 1966. Formed by Huey Newton and Bobby Seale, the Panthers offered a comprehensive ten-point program for addressing the injustices facing the

**General Strike and Reign of Terror**

In 1934, the West Coast witnessed an extended, and at times bloody, conflict between dockworkers represented by the International Longshore Association (ILA) and the business interests represented by the Waterfront Employers Union and the Industrial Association. Principally, the conflict concerned the control of the longshore hiring hall and related issues of scheduling, seniority, and, of course, wages. The bosses preferred to arbitrate the dispute, and the union leadership was willing to compromise, but the workers had other ideas. A strike began on May 9 among longshore workers in San Francisco, and quickly spread to maritime and related industries, reaching up and down the coast.57 It stalled the economy of the entire country, but the center of conflict remained in San Francisco, where it escalated through a series of bloody battles to become a general strike.58

Violence was a major feature of the San Francisco strike, a tool used by both sides. Strikers commonly beat up scabs, and sent “sanitary” or “clean-up” crews to patrol the waterfront with bats.59 The bosses, however, mostly relied on the violence of the state, especially the police. This was a convenient relationship, as it legitimized anti-strike violence and shifted the target of public outrage away from the employers and onto the police. Historian David Selvin emphasizes the point:

[T]he police even more than the strikebreakers became the strikers’ chief antagonist. The role of the strikebreaker was soon stabilized and contained, while police came to serve, day by day, as the employers’ virtual private assault

57 Ibid., 308–13, 316–17.
58 One oft-cited example: Oregon lumber mills shut down, because there was no way to ship the wood. Brecher, Strike!, 151; and Yellen, Labor Struggles, 315.
was embarrassing, the attempt to disrupt it was absolutely scandalous. On February 24, when forty children tried to leave for Philadelphia, they found the train station full of police. A member of the Women’s Committee of Philadelphia later testified about what happened next:

When the time approached to depart, the children arranged in a long line, two by two, in orderly procession, with their parents near to hand, were about to make their way to the train when the police closed in on us with their clubs, beating right and left, with no thought of children, who were in the most desperate danger of being trampled to death. The mothers and children were thus hurled in a mass and bodily dragged to a military truck, and even then clubbed, irrespective of the cries of the panic stricken women and children.55

No further effort was made to interfere with the children, and on March 12, the American Woolen Company agreed to a new pay rate.

The workers voted to end the strike, but the struggle was not over. New slogans appeared: “Open the jail doors or we will close the mill gates.” As the September 30 trial date for Ettor, Giovannitti, and Caruso approached, textile workers in Lawrence, Haverhill, Lowell, Lynn, and elsewhere threatened to strike if they were convicted. As a demonstration of their seriousness, 15,000 staged a one-day strike a few days before the trial was set to start. The police attacked the strikers, arresting fourteen, and almost 2,000 were fired and blacklisted. But the strikers had already seen worse, and knew something of their own strength. Amid threats of further strikes, the mill owners were forced to back down, and after a fifty-eight-day trial, all three defendants were acquitted.56

Black community.218 In keeping with the principles of their program, the Panthers provided free breakfasts for school children, ran free medical clinics, gave away shoes and clothing, and, most famously, organized armed patrols against police brutality.219

The Panthers’ politics were surely enough to raise the ire of White elites, and the sight of Black people with guns created something of a panic among government officials. The

---

55 Quoted in Zinn, *People’s History*, 329.
Panthers posed a challenge to White society and, in the form of the patrols, to the police in particular. Of course some response was expected, but the viciousness of the government attack was remarkable, even by the standards of the time. Harassment, arrests, and violence were constant threats. In 1969 alone, police raided Panther offices in San Francisco, Los Angeles (twice), Chicago (three times), Denver, Sacramento, and San Diego. In nearly every case, several Panthers were arrested. In at least two of the raids, office equipment and food (for distribution in the community) were destroyed. One Panther was killed in L.A., two in Chicago. By the end of the year, thirty Panthers were charged with capital offenses, forty faced life imprisonment, fifty-five faced sentences of up to thirty years, and another 155 were either in jail or in hiding.

Not all the attacks on Panthers involved raids, arrests, or gun battles. In Los Angeles, cops pulled Panthers over on sight and often tore out their dash boards, door panels, and upholstery when conducting searches. Many Party members simply stopped driving as a result. Furthermore, supporters with Black Panther bumper stickers complained of routine police harassment. In 1969, a professor at California State College decided to test their claims. He assembled a group of fifteen student volunteers—five Black, five White, five Mexican; three men and two women in each group—all with perfect driving records. They affixed to their vehicles orange and black bumper stickers featuring a picture of a panther and the words “Black Panthers.” Within two hours one of the students had received a ticket for an “incorrect lane change.” On the fourth

---

252
The repression of the strike was immediate and intense. Arbitrary arrests and summary judgments became the order of the day, and many strikers were sentenced to one-year prison terms without ever having the opportunity to put forth a defense. Leaders were marked for more serious charges, and extreme measures were taken to discredit the union. When dynamite was discovered in a cobbler’s shop, police and press alike were quick to blame the strikers, though there was no evidence to support such a conclusion. The tactic backfired. First, a school board member, John C. Breen, was arrested, tried, convicted, and fined $500 for planting the dynamite. Then, Ernest W. Pitman, president of Pitman Construction Company, implicated himself and several other business leaders in a confession to the district attorney. Pitman revealed that the incident had been planned by one of the textile companies, leading to conspiracy charges against Fred E. Atteaux, the president of the Atteaux Supply Company, and William M. Wood, the president of the American Woolen Company.49

Regardless of the scandal, union leaders were generally blamed for any violence—not only the violence of the strikers, but that used against them as well. On January 29, when striking workers attempted to block the mill gates, the police and the militia attacked, and a riot ensued. An Italian striker, Anna Lo Pizzo, was shot and killed. Witnesses identified the culprit as officer Oscar Bemoit, but two IWW leaders were arrested instead. Neither Joseph Ettor nor Arturo Giovannitti had been present when the shooting occurred, but the complaint alleged that “before said murder was committed, as aforesaid, Joseph J. Ettor and Antonio [sic] Giovannitti did incite, procure, and counsel or command the said person whose name is not known, as aforesaid, to commit the said

49 Yellen, Labor Struggles, 176–79, 194. By the end of the strike, 296 had been arrested. Ibid., 189.

day of the experiment, one student was forced to quit because he had received three tickets and was in danger of losing his license. Three others reached the three-ticket limit within a week. After seventeen days, the $500 fund to pay for tickets hit zero, and the experiment officially ended. All the participants removed the stickers from their cars. A total of thirty-three citations had been issued, with no variation according to race, sex, style of dress, or type of vehicle. Some of the cars were searched, and a White woman was questioned at length about her reasons for supporting “criminal activity.”223

Police tactics were not always so overt. Disinformation, the use of informants to create rifts within the Party, and the promotion of violent rivalries between the Black Panthers and similar organizations also hampered the Panthers’ efforts. That was, of course, precisely the point. The Panthers personified everything that White society most feared—Black people, armed and smart, militant, radical, and organized. In attacks on the Panthers, the racist undertones of police actions often came to the surface. In 1968, members of a New York police organization, the Law Enforcement Group, packed a courtroom where Panthers were being tried and beat Panther supporters with blackjacks in the hallway outside.224 They shouted slogans such as “Win with Wallace!” and “White Power!”225

Greensboro: Death and the Klan

A decade later, on November 3, 1979, in Greensboro, North Carolina, Klansmen and members of the American Nazi Party (acting together as the United Racist Front) gunned down demonstrators assembled for a “Death to the Klan” rally organized
by the Communist Workers Party. Five labor leaders and community organizers—Jim Waller, Sandi Smith, Bill Sampson, Cesar Cauce, and Mike Nathan—were killed, and ten other people were wounded. At the time of the attack, the Greensboro Police Department tactical squad was, literally, out to lunch, and routine patrols were mysteriously absent. Afterward, while slow to move against the Nazis, the police were quick to arrest eight anti-Klan demonstrators, charging them with planning a riot.

One of the Klansmen, Eddie Dawson, was a paid informant for the Greensboro Police Department (and, previously, for the FBI). Dawson later stated that he was "in charge" of the attack. He recruited the Klansmen and arranged the meeting with the Nazis. But he had a great deal of assistance in planning the massacre. The police supplied him with a copy of the parade permit, which noted the starting place and route of the march. And an ATF agent, Bernard Butkovich, had infiltrated the Nazi Party, urging them to join the Klan's attack and providing them with guns.

Let me say that again clearly: an agent of the Greensboro Police Department assembled this band of assassins, drew up the plan, and saw the mission through to completion. Meanwhile, an agent of the Bureau of Alcohol, Tobacco, and Firearms brought reinforcements and provided them weapons. And both agencies stood aside while a bloodbath ensued.

230 Dawson testified that he contacted the police thirteen times in the three weeks prior to the massacre. He called them twice on the morning of November 3, reporting that they were armed and headed to the site. He

This combination of coercion, compensation, and ideological justification has mostly worked to keep the cops following orders, controlling workers, and breaking strikes. As Tracy Fuller put it so succinctly: “That’s [the] job.”

An exhaustive recounting of labor battles, police attacks on picket lines, and unlawful arrests cannot be supplied here, but a few case studies may offer some sense of the usual police role.

### Bread and Roses, Bayonets and Cloth

In 1912, Massachusetts law reduced the workweek for women and children, from fifty-six hours to fifty-four. The American Woolen Company complied with the letter of the law, if not the spirit; it reduced the workweek, but made corresponding cuts in pay. In Lawrence, Massachusetts, where 60,000 people depended on the earnings of the 25,000 textile workers, and where the average wage was $8.76 per week, 25 cents more or less made an enormous difference in the workers’ ability to feed their families. Thus, on January 11, when the workers received their paychecks and discovered the reduction, they walked out—first at the Everett cotton mill, and the following day at the Washington mill. The Washington workers marched to the Wood mill, shut off the power, and called out the workers there. By that evening, 10,000 were on strike. By the end of the month, the strike had spread to other industries, and 50,000 people (in a town of 86,000) were striking.

One picket sign expressed the workers’ position clearly, capturing both the desperation of the moment and the hope for a better future: “We want bread and roses too.”

---

their position. Bruce Smith, an early scholar of policing, makes the point clearly:

The substitution of non-union labor for union labor is perfectly legal, and the police are bound to give protection against any and all interference with the right to work. The effective performance of this duty ... frequently "breaks the strike," and the police, whether local or state, are charged with conducting a strike-breaking operation. At such times, evenhanded justice almost necessarily operates to the ultimate advantage of vested property rights.44

Those occasions when police side with strikers are notable precisely because they are so rare—increasingly so over time.45 The authorities noticed when police disobeyed, and took steps to prevent future mutinies. Sometimes they shifted strikebreaking responsibility away from local cops (who may have divided loyalties) and relied instead on State Police or Pinkertons. Commanders also instituted changes designed to improve discipline in the ranks and reduce the cops’ concern for the workers’ cause. In his book Policing a Class Society, Sidney Harring lists several mechanisms that serve to maintain officer discipline during strikes. These include racism and ethnic divisions, disdain for unskilled or low-wage workers, organizational norms and penalties, the law-and-order ideology, the criminalization of strike activity, and financial and professional incentives. Most work by using the personal biases and institutional culture of the police to undercut any sympathy for disobedient workers—especially when those workers are immigrants or people of color. Furthermore, those officers who participate in strike duty may earn overtime pay or bonuses, while those who avoid strike duty may lose the respect of their peers or face punishment.46

The killers were tried twice—first for murder, then for civil rights violations. Both times they were acquitted by all-White juries, despite video evidence provided by local television stations.231 The district attorney blithely suggested that most Greensboro residents "felt the communists got ... 'about what they deserved.'"232 Finally, in 1985, a lawsuit awarded three plaintiffs $390,000. The jury found three Nazis, two Klansmen, a police informant, and two cops liable for the wrongful death of Michael Nathan, but—strangely—insisted that there had been no conspiracy.233

Since the Seventies

While it’s uncommon these days to hear police chiefs publicly ranting like Bull Connor (Joe Arpaio being the exception), and while police departments have added increasing numbers of minorities to their ranks, the use of the police to control people of color and guard White supremacy continues in a refined form. Race-based tactics remain in prominent use, racist ideology still exercises a strong pull on individual officers, and racist organizing within law enforcement has entered a new phase. Michael Novick of People Against Racist Terror documented more than fifty incidents of police involvement in racist organizing between 1976 and 1994. His chronology listed occurrences across the country and described the involvement of

233 Jack Fowler, Roland Wayne Wood, and Mark Sherer; David Wayne Mathews and Jerry Paul Smith; Edward Dawson; and Jerry H. Cooper and Lieutenant P.W. Spoon, respectively. Cooper was Dawson’s police handler. Spoon was in charge of the officers assigned to cover the demonstration. Fowler, Wood, Mathews, and Smith were also held liable for assaulting Paul Bermanzohn and Thomas Clark. “8 in Klan Trial Told to Pay Plaintiffs $390,000,” New York Times, June 9, 1985.
police, prison guards, and federal agents in building racist organizations, attacking minorities, and ignoring (or engaging in) Klan-style terrorism.\textsuperscript{234}

To give just a brief sample, from Novick’s list and elsewhere: In 1978, the Klan publicly revealed its penetration of police agencies in northern Mississippi.\textsuperscript{235} In 1980, the San Diego Police Department assigned a reserve officer to infiltrate the Klan. Through him, the department provided funding, equipment, and other assistance to a petition drive to place noted White supremacist Tom Metzger on the ballot for Congress. In Chicago’s 1983 mayoral race, members of “Police for Epton” sided with a White Republican against Black candidate Harold Washington. Police decorated their uniforms with plain white buttons, or buttons with a circle and slash around a picture of a watermelon. The media also uncovered a plot to target Black neighborhoods for mass arrests on the eve of the election; the idea was subsequently abandoned.\textsuperscript{236}

A few years later, in 1987, Alex Young was fired from the Jefferson County, Kentucky, police force after passing data from police files to the KKK. Young had earlier founded the department’s chapter of Confederate Officers Patriot Squad (COPS). He claimed to know at least twenty other Klansmen working as police.\textsuperscript{237} In 1988, former Youngstown, Pennsylvania, police chief David Gardner was indicted for

\textsuperscript{234} Novick, \textit{White Lies}, 70–82. For details on White supremacist organizing among prison guards, see: Parenti, \textit{Lockdown America}, 206–7.

in 1929, several New Orleans officers resigned rather than work as strikebreakers.\textsuperscript{42}

Most recently, in February 2011, when unionists occupied the Wisconsin capitol building and tens of thousands more filled the streets surrounding it in opposition to a bill that would strip public employees of most of their collective bargaining rights, they were joined by a small contingent of off-duty police, wearing shirts reading “Cops for Labor” and “Deputies for Democracy.” When the governor threatened to end the sit-in by force, cops showed up with sleeping bags and stayed the night, engaging in an act of civil disobedience precisely when confrontation seemed most likely. Solidarity did not extend to their working hours, however. Within a few days, police cleared out the protestors and removed the barricades around the capital, arresting 59 people in the process. Wisconsin Law Enforcement Association executive board president Tracy Fuller confessed that the notion of resisting orders “hasn’t even come up.” He said: “I’m not able to even fathom that any of those police officers would not carry out whatever orders were given.” Fuller went on: “I guess that’s the one ironic thing about this…. I could be down there confronting my wife with the protest sign that I made…. That’s my job.”\textsuperscript{43}

Wherever the sympathies of individual officers may lie, the institution’s imperatives are always in the service of power. Even where police do not deliberately side with the employers—even, and maybe especially, when they present themselves as neutral—class bias is nevertheless built into

the police did almost nothing to impede their activities.\footnote{Stephen Harlan Norwood, \textit{Strikebreaking and Intimidation: Mercenaries and Masculinity in Twentieth-Century America} (Chapel Hill: University of North Carolina Press, 2002), 70.} During the 1919 Steel Strike, Cleveland Mayor Harry Davis ordered police to treat scabs as suspicious persons and run them out of town.\footnote{Richardson, \textit{Urban Police}, 161.} Likewise, during the 1934 Milwaukee Electric Railway and Light Company strike, Mayor Daniel Hoan ordered the arrest of 150 strikebreakers.\footnote{Robert Michael Smith, \textit{From Blackjacks to Briefcases: A History of Commercialized Strikebreaking and Unionbusting in the United States} (Athens: Ohio University Press, 2003), 70–71.} “In grappling with the dilemmas posed by community polarization,” historian James Richardson explains, the police tended to follow the lines of power and influence.... If the authorities favored the workers or were at least neutral, the police remained neutral. If on the other hand, political leaders and newspapers viewed the strikers as un-American radicals or a threat to the town’s prosperity by making industry reluctant to locate there, then the police acted as agents of employers in their strikebreaking activities.\footnote{Richardson, \textit{Urban Police}, 159.}

In general, then, such instances should be understood not as the cops siding with labor in the context of class struggle, but following the direction of their superiors in a dispute between elites.

However, there were also occasions when the police supported strikers despite their orders, sometimes facing discipline as a result. Cops refused to break strikes in Paterson (1877), Chicago (1894), and Cleveland (1896). About a quarter of the force in Columbus was suspended when they refused strike duty in 1910. In 1916, five New York cops were fired when they refused to guard trains during a transit strike. And providing armed guards to protect a counterfeiting operation run by the White supremacist group Posse Comitatus.\footnote{Novick, \textit{White Lies}, 75.} Two White LAPD homicide detectives were reprimanded in 1989 for displaying the flag of apartheid South Africa on their squad car.\footnote{Ibid., 80.} Around the same time, two Black cops complained that Nazi and Klan literature was being circulated in the stationhouses. Soon thereafter, one of the whistle-blowers, Donald Jackson, was attacked by Long Beach officers. They threw him through a plate-glass window.\footnote{Simmons, “The Los Angeles Rebellion,” 144.}

In June 1991, Indianapolis police officer Wayne Sharpe shot and killed Edmund Powell, a Black man suspected of shoplifting. Sharpe claimed Powell attacked him with a nail-studded board, but witnesses said that Powell was lying on the ground when Sharpe shot him. It was soon learned that Sharpe had killed a Black burglary suspect ten years before and had briefly been involved with the National Socialist White People’s Party. A jury awarded Powell’s family $456,000, but Sharpe was never disciplined.\footnote{Human Rights Watch, \textit{Shielded from Justice}, 191–92.}

That same year, a Klan group was found to be operating in the LAPD’s Foothill Division—home of the officers who beat Rodney King. A few months later, as the King case went to trial, the Klan organized rallies in Simi Valley with the slogan “Support the Police.” Neither the Simi Valley police chief nor the Ventura County sheriff ever repudiated this support, though they were called on to do so by members of the local community. Also in the wake of the Rodney King beating, police officers—especially Black officers—who agreed to testify before the Christopher Commission found themselves ostracized and sometimes threatened by their colleagues. One Black cop, Garland Hardeman, discovered a chalk outline in front of his locker, marked to indicate two bullet wounds in
the head. After testifying before the Commission, another officer found a hangman’s noose tied to his telephone.

More recently, in March 2003, FBI Special Agent Joseph Thompson acknowledged ties between police, the Klan, and—probably the largest Nazi organization in the country at the time—the National Alliance. When Chester James Doles, the Georgia organizer for the National Alliance and a longtime Klan member, was arrested on gun charges, Agent Thompson testified at his bail hearing: “Mr. Doles has a support network including law enforcement.” Thompson explained that the involvement of police “vastly increase[s] the capacity of the network” because cops “can look the other way.”

During the course of a 2003 lawsuit addressing police violence against anti-war protestors, it came to light that one of the accused Portland police officers, Mark Kruger, had been photographed (off-duty) dressed in an historical Nazi uniform, complete with swastika. Further, he had built a shrine to five Nazi soldiers, including a Waffen SS Obersturmfuehrer and the commander of a regiment that massacred thousands of

243 Christopher Commission, *Report*, 78. The Commission’s report offers some indication of the tension within the LAPD: “The Commission was told by most of the minorities interviewed that racially derogatory remarks are made on an ongoing basis at roll call and that racist jokes and cartoons appear from time to time on the bulletin boards in the station’s locker rooms. Latino officers reported they are often referred to by ethnic nicknames such as ‘Chico,’ ‘burritoman,’ and ‘Chuy.’” Christopher Commission, *Report*, 79.

The Commission’s survey revealed that a substantial percentage of minority officers had heard racial slurs used by peers or supervisors: 45 percent of Black males, 40 percent of Black females, 27 percent of Latino males, 36 percent of Latina females, 31 percent of Asian males, and 24 percent of Asian females. Christopher Commission, *Report*, 81.

283

supremacy, even as laws and policies have changed. With class, as with race, it is the status quo that the police act to preserve and the interests of the powerful that they seek to defend, not the rule of law or public safety. The law, in fact, has been a rather weak guide for those who are meant to enforce it.

To take just one of many examples, the Interchurch World Movement’s Commission of Inquiry reported that:

During the [1919 Steel Strike] violations of personal rights and personal liberty were wholesale; men were arrested without warrants, imprisoned without charges, their homes invaded without legal process, magistrates’ verdicts were rendered frankly on the basis of whether the striker would go back to work or not.

Thus, in a time of crisis, the pretense of law enforcement was given up in favor of naked repression and class warfare. The police, the jails, and the courts acted to serve, not the law, but the interests of business.

**Moments of Ambivalence**

There have been exceptions, times when the police briefly departed from their usual role, typically because the local government’s agenda conflicted with the immediate interests of the company.

During a 1902 streetcar strike, the mayor of the Providence suburb Pawtucket openly sided with the striking workers, and

---

35 See chapter 4.

37 The discussion in this section is largely drawn from my earlier article, Kristian Williams, “Cops for Labor?” in *Fire the Cops.*
abandoned. Though many of the victims could identify their attackers, no charges were ever filed. The pattern continued for years. In June 1924, a vigilante mob, organized in part by the police, attacked the IWW hall with clubs and guns. They destroyed the furniture in the building, beat many of the men and women present, tarred and feathered the leaders, and deliberately scalded several children with hot coffee.\textsuperscript{33} While the police ignored these offenses, and sometimes actively protected the perpetrators, they simultaneously engaged in aggressive enforcement practices against the unionists. Between 1919 and 1925 the LAPD arrested 504 union organizers; 124 were convicted of “criminal syndicalism,” a charge designed to stifle union activity and specifically targeting the IWW.\textsuperscript{34}

While union-busting remained a joint venture between public and private forces, during the Progressive Era the authority to use or license violence slowly moved out of private hands, solidifying the state’s theoretical monopoly on it. Over the coming decades, as we’ll see, the balance between private security and public police, between corporate funding and government authority, would shift back and forth repeatedly according to the demands of the moment and ideological trends. Despite this continual re-configuration, the police mission during strikes remained fairly stable: to defend the company’s interests, to preserve the status quo.

Where conflicts arise between workers and bosses, between the rights of one class and the interests of the other, the machinery of the law is typically used as a weapon against the workers. Even where the law is contrary to the demands of powerful corporations, the police often act not from principle or legal obligation, but according to the needs of the ruling class. This tendency shouldn’t surprise us, if we remember the lengths to which the cops have gone in the defense of White POWs.\textsuperscript{245} Two of Kruger’s high school friends later told the press that as teenagers the three of them liked to drive around town listening to recordings of Hitler’s speeches, tagging buildings with Nazi graffiti, and harassing people of color on the street.\textsuperscript{246} Kruger is now a captain in the Portland Police Bureau.\textsuperscript{247}

In Florida, James Elkins was forced to resign from the Fruitland Park police in 2009, after the publication of photos showing him wearing a Klan robe over his police uniform.\textsuperscript{248} Elkins, who describes himself as “very much a National Socialist” says that “My quote-unquote politically incorrect beliefs were no secret,” and estimates that at least ten of the town’s dozen full-time officers were sympathetic. Indeed, two years later, the new chief, Terry Isaacs, said that he was “shocked” by the racist remarks he heard from his staff; he fired nine of the town’s thirteen cops and the department secretary. And again, in July 2014, a deputy chief and a police corporal were likewise fired for their involvement in the United Northern and Southern Knights of the Ku Klux Klan.\textsuperscript{249}

\textsuperscript{34} Newton, War Against the Panthers, 18.
Perhaps most notably, in 2013, two L.A. County deputies filed suit alleging an “inappropriate relationship” between jail guards and “various inmate gangs, especially white supremacists.” The suit accuses Sheriff’s Department officials of violating the constitutional rights of both prisoners and guards by (among other things) using select inmates as “proxies” to enact violence, obstructing a federal investigation into corruption and brutality, and retaliating against whistleblowers. The plaintiffs complain of death threats, vandalism, and White Power fliers being left at their homes. They put part of the blame on the Vikings, a group of deputies once characterized by a federal judge as a “neo-Nazi, white supremacist gang.”

The Vikings had been the subject of a 1991 class action lawsuit, which listed 130 abuses, mostly against Black or Latino victims—among them: sixty-nine warrantless searches, thirty-one uses of excessive force, and sixteen incidents described by attorney James Foster as “outright torture, meaning interrogations with stun guns, beating victims into unconsciousness, holding a gun in a victim’s mouth and pulling the trigger on an empty chamber.” The more recent suit names Lt. Greg Thompson and Undersheriff Paul Tanaka as defendants. Both men were Vikings in the late eighties and have the tattoos to prove it; Tanaka went on to become the second most powerful officer in the department, overseeing the jails and answerable only to the sheriff himself.

Pennsylvania State Constabulary, the idea of a state police force took hold across the country. By 1919, of the six existing state police departments, all but one were modeled after Pennsylvania’s. Ten years later, there were twenty-five such departments. And by 1940, every state had one.

However, with or without a state police force, the independence of the police in relation to the larger companies was somewhat illusory. And in the 1920s, following the federally directed Red Scare, distinctions between union-busting and law enforcement practically dissolved. In Philadelphia, the police issued a proclamation on March 21, 1921, that they would not interfere with union meetings “so long as the meeting is orderly and not of radical character, but all meetings of radical character will be prohibited or broken up.” The policy offered the police license to attack any union meeting, since it was assumed all labor organizing was Communist in nature.

At times, anti-union campaigns drew on a practice familiar from the efforts to control African Americans; police formed alliances with, actively cooperated with, and provided official cover for right-wing vigilante groups. In Los Angeles, for example, the police joined in a partnership with the American Legion, deputizing members of its “law and order committee.” The American Legion then commenced a series of raids against meetings of the Industrial Workers of the World (the IWW, or the “Wobblies”). In the first such raid, four Wobblies were hospitalized and five were arrested for “inciting a riot.” A few months later, in April 1921, the IWW’s offices and meeting halls were again raided, its supporters arrested, and men, women, and children beaten with ax handles. Those identified as leaders were driven to the desert, beaten unconscious, and

32 Quoted in Donner, Protectors of Privilege, 41.
The law creating the Pennsylvania State Constabulary intended the new body “as far as possible, to take the place of the police now appointed at the request of various companies.”

It is hard to think of a more literal description of their role. Whereas strikers had previously had their heads cracked by guards in private employ (or police leased to the company, which comes to much the same thing), they increasingly had the honor of having their heads cracked by impartial public servants, authorized by the government and funded by the tax. By investing this responsibility in the state itself, the ruling class made provision for the more regular and predictable service of its needs, with the costs shared—in a sense, socialized—and, for that matter, at least some portion of the costs borne by the workers themselves.

Though Pennsylvania did not boast the first state police force, it did pioneer the current type. Earlier state forces were either military organizations, vice squads, or short-lived civil rights agencies. But following the success of the

A Storm in New Orleans

No single episode from the opening years of the twenty-first century has symbolized the continued legacy of racism in American society, and the role of the police within it, so well—or so terribly—as the events surrounding the devastation of New Orleans, physical and then social, in the late summer of 2005.

On August 29, Hurricane Katrina, a storm of incredible force and apocalyptic effect, reached the Louisiana coast. Soon thereafter, the levees protecting New Orleans failed—the result of years of infrastructure neglect in the name of fiscal conservatism—and the city flooded. Eighty percent of New Orleans was underwater. The wind and the rain were only part of the disaster. Indifference, incompetence, and racial hostility also had a role to play.

As the storm approached, the city was placed under a mandatory evacuation order, but an order was all there was: no organized transport or other meaningful assistance was forthcoming. Those who were too poor, too old, too sick, or too disorganized to arrange their own exit were abandoned in a city that essentially shut itself down, lacking commerce and basic government services, and then, too, lacking clean water and electricity. Similarly stranded were those people who felt themselves responsible for the care of elders, invalids, or neighbors, and were unwilling to leave them to face the storm alone. At least 1,580 people died as a result of Katrina, 70 percent of them senior citizens.

254 Rebecca Solnit, A Paradise Built in Hell: The Extraordinary Communities that Arise in Disaster (New York: Viking, 2009), 235.

255 Billy Sothern, Down in New Orleans: Reflections from a Drowned City (Berkeley: University of California Press, 2005), 313.
The truth of this situation was bad enough—people trapped in attics, homes destroyed, bodies floating in the street—but the fearful imaginings of a racist culture were far worse. Rumors spread, echoed and amplified by an over-eager media, describing violence on a massive scale—senseless, vicious, and random. Tales circulated about piles of corpses at the Superdome (where 20,000 people sought shelter), widespread sexual assault, children with their throats slit, snipers firing at rescue workers, hospitals being looted, gangs running amok. Many of these stories were little more than grotesque stereotypes of Black criminality—rapists, looters, and gangsters—dropped into a terrifying new setting, a ruin of a city, a swamp overtaking civilization.\(^{256}\) Police and other officials both heard and propagated these stories. Mayor Ray Nagin appeared on Oprah, speaking in ominous tones about “hundreds of gang members” in the Superdome, “hooligans killing people, raping people,” while Police Chief Eddie Compass broke down in tears, describing “little babies getting raped.”\(^{257}\)

Jordan Flaherty suggests a higher figure: “It is estimated that at least 1,800 people died due to Hurricane Katrina. Most of these deaths were in New Orleans, including 1,000 people in the Lower Ninth Ward alone. But there is no agreed-upon method as to which deaths are counted. People who died outside of the Gulf Coast from injuries related to the storm and its aftermath are often not included in the totals. Suicides and other deaths related to the evacuation are also generally not counted. Most importantly, the recovery of bodies was so slow and incomplete that there are doubtless some who have not been counted because their bodies were never found. For all these reasons, the numbers of those who died are approximate.” Jordan Flaherty, *Floodlines: Community and Resistance from Katrina to the Jena Six* (Chicago: Haymarket Books, 2010), 65.

\(^{257}\) Quoted in Solnit, *Paradise Built in Hell*, 236.

Another statement is unusual only for its source. Hugh Kelley, the chief of police in South Bethlehem, wrote:

When the constabulary arrived here, February 26, 1910, neither the burgess nor myself, as chief of police, were informed of their arrival. They were in charge of the sheriff.... They beat people standing peaceably on the street; men were arrested and taken to the plant of the Steel Company and there confined.

They started out on our streets, beat down our people without any reason, whatever, and they shot down an innocent man, Joseph Zambo, who was not on the street, but was in the Majestic Hotel. One of the troopers rode up on the pavement at the hotel door and fired two shots into the room, shooting one man in the mouth and another (Zambo) through the head.... There was no disturbance of any kind at this hotel, the Majestic was the headquarters of the leaders who were conducting the strike.... Troopers went into the houses of people without warrant and searched the inmates, drove people from their own doorsteps. They beat an old man, at least, sixty years of age. Struck him with a riot stick and left him in a very bad condition.

This is only one of a dozen similar cases.\(^{27}\)

\(^{27}\) Ibid., 28–29.
to the local community. The Pennsylvania State Federation of Labor called for the organization’s elimination and published a volume of evidence against the state police. Titled *The American Cossack*, the book collects witness statements, newspaper accounts, legislative debate, and other material. A typical story comes from S. P. Bridge of New Alexandria, Pennsylvania, dated February 21, 1911:

**Gentlemen:**

State Police came to New Alexandria July 31, 1910, Sunday. The State Constabulary are of no use in this country to farmers or workingmen. They make all efforts to oppress labor.

Six of them were stationed at this town for a period of two months for the benefit of the coal company. Their duty was in and around the works.

At the time they were here there was trouble between them and the miners. There was a camp located within two hundred feet of my house. There were three State Constabulary and two deputy sheriffs went into camp. They rode their horses over men, women, and children. They used their riot clubs freely on the miners without cause or provocation.

One of the men had to be sent to the hospital, one received a broken arm, one woman was clubbed until she was laid up for two weeks.... They used their clubs on everyone that protested against their conduct and I was an eye-witness to the affair.

In the end, nearly all the horror stories were shown to be, at the very least, perverse exaggerations. Most were simply false. Between the Air Force, Coast Guard, and Homeland Security, no one could authenticate reports of helicopters taking sniper fire. And the death toll at the Superdome was six—one drug overdose, one suicide, and four from natural causes. No children had their throats cut.

Racist fables of Black savagery in an ungoverned city had direct and deadly consequences. Two days into the disaster, on August 31, Mayor Nagin ordered police to cease rescue operations and concentrate on ending looting—in effect, announcing that private property was a higher priority than human life. Presumably he was unaware that some officers had been conscientiously facilitating the looting of survival goods like food, water, and clothing, or that others had opportunistically stolen jewelry and electronics, as well as the entire inventory of a local Cadillac dealership (almost 200 cars). Some of the vehicles were used to flee the city—by precisely the people under orders not to evacuate. Following Katrina, 228 officers were investigated for deserting during the emergency and ninety-one others resigned. One cop, Officer Lawrence Celestine, told his commander that the behavior of his peers pushed him past the point of despair; he killed himself moments later. The NOPD public information officer, Paul Accardo, committed suicide as well.

258 Kathleen A. Bergin, “Witness: The Racialized Gender Implications of Katrina,” in *Seeking Higher Ground: The Hurricane Katrina Crisis, Race, and Public Policy Reader*, eds. Manning Marable and Kristen Clarke (New York: Palgrave Macmillan, 2008), 177. Bergin also offers a careful and nuanced consideration of the reports of rape during the disaster, and the political manipulations surrounding such reports, leading variously to the exaggeration and the minimization of the numbers.

259 Solnit, *Paradise Built in Hell*, 244.

260 Ibid., 236.

The sheriff’s department performed no better. As the city jail, the Orleans Parish Prison (OPP), began to flood, guards simply fled and left their 8,500 charges locked in their cells, with water quickly rising. “They left us to die there,” one prisoner recalled. Those inmates who got out—as most, by working together, did—were met at the gate by guards who beat and maced them, then held them on a highway overpass without food, water, or shelter for days. In the end, prisoners were scattered to other jails around the state, usually without the paperwork identifying their charges. People arrested for very minor offenses—the cops had orders to “clear the streets” before the storm—spent months in jail, far from home, sometimes literally lost in the system. Most of the prisoners at OPP were not even convicts, but were being held for trial; they were, therefore, “presumed innocent” by law. Nevertheless, under the declaration of emergency, Governor Kathleen Blanco suspended the right to a speedy trial. The average stay for an inmate arrested during the Katrina period, before trial, was more than a year (385 days); one man was held 1,289 days.

Those outside the jail’s walls were hardly more free. At an evacuation camp on Interstate 10, thousands of people, 95 percent of them Black, were held for days behind metal barricades, surrounded by the National Guard, with no shelter from the sun.

Outside the camps, people were similarly trapped. Those who tried walking across the bridge to the suburb of Gretna, which was not flooded, found their way barred by a Sheriff’s posse, firing guns over their heads. Larry Flaherty, Floodlines, 139–42; Sothern, Down in New Orleans, 74–80. Figures are from Flaherty, Floodlines, 142. ”They left us” and “clear the streets” are quotes from Sothern, Down in New Orleans, 74. Larry Flaherty, Floodlines, 40. Solnit, Paradise Built in Hell, 260. Even a reporter for the right-leaning Fox News was outraged by the blockade. Shepard Smith railed: ”They won’t let them walk out…. Anyone who walks out of that city now is turned around. You are not allowed to go to Gretna, Louisiana from New Orleans, Louisiana. Over there, there’s hope. Over there, there’s electricity.

During the early-twentieth-century Progressive Era, such civic-minded concerns, matched with the employers’ unwillingness to bear the full cost of strikebreaking, shifted responsibility for these duties to the public police.

The creation of the state police illustrates this process clearly. After the 1902 Great Anthracite Strike, President Theodore Roosevelt appointed a body to investigate the conflict and make recommendations concerning the unresolved disputes. The Anthracite Coal Strike Commission, as it was called, took this task a step further, recommending thoroughgoing changes in the policing of strikes. After quite a few damning words about the strikers, the commission concluded: ”Peace and order … should be maintained at any cost, but should be maintained by regularly appointed and responsible officers … at the expense of the public.” In May 1905, Pennsylvania Governor Samuel Pennypacker signed into law an act creating a state police force.

The Pennsylvania State Constabulary proved an effective force against strikes, since it recruited from across the state, thus minimizing the influence of any particular officer’s ties

---

21 Quoted in Donner, Protectors of Privilege, 25.
22 For example, the commission remarked that “the resentment expressed by many persons connected with the strike at the presence of the armed guards and militia of the State does not argue well for the peaceable character or purposes of such persons” and that “a labor or other organization whose purpose can be accomplished only by the violation of law and order of society, has no right to exist.” Quoted in Katherine Mayo, Justice To All: The Story of the Pennsylvania State Police (New York: GP Putnam’s Sons, 1917), 4.
23 Quoted in Mayo, Justice To All, 5.
24 Ibid., 10.
Such coercive activity is now generally considered the exclusive domain of governments, but the use of violence to break strikes was at first the right and responsibility of private employers. In the period immediately following the Civil War, company guards were sometimes relied on to perform this function, while in other cases the company reimbursed the city government for expenses incurred during strikes.\footnote{17 See, for example: Lane, Policing the City, 206–7.}

Either way, capitalists facing unruly workers were caught between the desire to directly control strikebreaking activity, and the expense and difficulty of maintaining security forces at the necessary level. It was under these conditions that the Pinkerton Detective Agency grew to national prominence, achieving special notoriety for its use of an agent provocateur against the radical miner’s organization, the Molly Maguires.\footnote{18 A Pinkerton agent, James McParland, joined the Molly Maguires, aided in the commission of crimes, and then testified against them to gain a conviction. The Pennsylvania Supreme Court upheld the practice in its 1877 Campbell vs. Commonwealth decision. Nineteen militants were executed on the basis of such evidence. Donner, Protectors of Privilege, 10; and Howard Zinn, A People’s History of the United States, 1492–Present (New York: Harper-Perennial, 1995), 239.}

By the mid-1880s, the Pinkertons had become part of the standard response to labor trouble, and their dual roles as spies and leg-breakers were often sanctified by deputization into local police departments.\footnote{19 Donner, Protectors of Privilege, 24.}

In the coal fields of Pennsylvania, recurring unrest led the coal companies to dispense with the Pinkerton middle-men and maintain an industry police of their own, the “Coal and Iron Police.” For a fee of $1 per officer, the state conferred police powers upon these company-controlled guards.\footnote{20 Bruce Smith, The State Police: Organization and Administration (New York: Macmillan, 1925), 33.}

In 1915, the Commission on Industrial Relations noted with disapproval that one of the greatest functions of the State, that of policing, Bradshaw, a White paramedic who attempted to negotiate one group’s passage, reported that the cops told him, “This is not New Orleans…. We’re not going to have any Superdomes here.” Bradshaw comments, “To me, that was code … for ‘We’re not having black people coming into our neighborhood.’”\footnote{265 See, for example: Lane, Policing the City, 206–7.}

Worse, investigative journalist A.C. Thompson has documented ten police shootings in the days after the storm.\footnote{266 Flaherty, Floodlines, 172.}

The most notorious was the incident on the Danziger Bridge, when plainclothes cops attacked a crowd without warning, killing two and wounding four. The barrage of gunfire blew one woman’s arm off, killed a teenage boy, and struck a developmentally disabled man in the back. Police then proceeded to kick him to death.\footnote{267 Seven cops were indicted, but no one was convicted. Solnit, Paradise Built in Hell, 248; and Flaherty, Floodlines, 173.}

The cops weren’t the only trigger-happy yahoos patrolling the disaster area. Governor Blanco mobilized 40,000 National Guard troops, and announced: “They have M16s, and they’re locked and loaded…. These troops know how to shoot and kill, and they are more than willing to do so if necessary, and I expect they will.”\footnote{268 Quoted in Solnit, Paradise Built in Hell, 237.}

At the same time, mercenaries from a dozen companies—including DynCorp, Intercon, American Security Group, Blackhawk, Wackenhut, Instinctive Shooting International, and Blackwater—were busy “securing neighborhoods” and “confronting criminals.”\footnote{269 Jeremy Scahill, “Blackwater Down,” in Unnatural Disaster: The Nation on Hurricane Katrina, 75.}

Over there, there is food and water. But you cannot go from here to there. The government will not allow you to do it.” Quoted in Solnit, Paradise Built in Hell, 260–61.

Seven cops were indicted, but no one was convicted. Solnit, Paradise Built in Hell, 248; and Flaherty, Floodlines, 173.

calls Security’s Michael Montgomery recounted a gunfight with some “black gangbangers,” who were injured in the exchange: “[A]ll I heard was moaning and screaming, and the shooting stopped.” A moment later the army arrived. “I told them what happened,” Montgomery recalls, “and they didn’t even care. They just left.”

More troubling still was the sudden reemergence of organized vigilantism, harkening back to the Klan days, or even those of the slave patrols. Scott Crow, an anarchist organizer and a founder of one of the most successful grassroots relief efforts, Common Ground, described the “white militias” as “barely more than an organized lynch mob.” Most of the vigilantes were middle-class, middle-aged, White men, and their activity took an expressly racist form. Patrolling in pick-up trucks and staffing roadblocks, they stopped and turned back Black people trying to cross through the Algiers Point neighborhood, harassed and intimidated Blacks who lived nearby, and sometimes, it seems, just shot people without warning. One patroller confessed to a journalist that his group had shot three Black men in one day, tagging them as looters because they were carrying tote bags. “People think it’s a myth,” he said. “But we killed people.” Another told a neighbor they shot anyone “darker than a brown paper bag.” A third boasted to a documentary filmmaker, “I’d be walking down the streets of New Orleans with two .38s and a shotgun over my shoulder. It was great. It was like pheasant season in South Dakota.”

Malik Rahim, a former Black Panther and another founder of Common Ground, estimates that eighteen young black men

charges) until the strike was over. The police also intercepted union organizers and radicals traveling to areas affected by strikes; the unionists and “reds” were usually interrogated, sometimes under torture, and released at the town line with a stern warning to stay away.

Writing in 1920, Raymond Fosdick described something of the range of police tactics, and the uses to which they were put:

The police are often used on behalf of employers as against employees in circumstances which do not justify their interference at all. This has been especially true in the handling of strikes. Lawful picketing has been broken up, the peaceful meetings of strikers have been brutally dispersed, their publicity has been suppressed, and infractions of ordinances which would have gone unnoticed had the violators been engaged in another cause, have been ruthlessly punished. Sometimes, too, arrests have been made on charges whose baselessness the police confidently admit. “We lock them up for disorderly conduct,” a chief of police told me when I asked him about his policy in regard to strikes and strikers. “Obstructing the streets” is another elastic charge often used on such occasions. Sometimes the arbitrary conduct of the police passes belief.

Newspapers favoring the strikers’ cause have been confiscated and printing establishments closed on the supposition that they would “incite to riot.” Meetings of workingmen have been prohibited or broken up on the theory that the men were planning a strike, and specific individuals have been denied the right to speak for the reason that they were “labor organizers.” “I have this strike broken and I mean to keep it broken,” a director of public safety told me, as if breaking strikes were one of the regular functions of the police.

reported in Miami, where a court ruled the practice illegal,\textsuperscript{12} and in Detroit, where social service providers blamed the crackdown on pressure from area businesses.\textsuperscript{13}

In these cases the police put their energies toward attacking, rather than protecting, some of society’s most vulnerable members. This use of resources only makes sense when viewed in the context of vast disparities in wealth. The continual harassment of the destitute reinforces their low social standing, stigmatizes poverty, keeps the poor under the supervision and control of the criminal justice system, and—in all these ways—serves to preserve existing inequalities. Given this perspective, routine attacks against the poor seem ruthlessly rational, and the suppression of organized labor becomes altogether too predictable.

\textbf{Strikebreakers, Pinkertons, and Police}

The role of the police as union-busters and strikebreakers was an outgrowth of their position in the class structure and their function regulating the behavior of workers for the convenience of the new capitalist economy. After about 1880, whenever strikes were anticipated, the police made special preparations to control, and thereby defeat, the workers’ efforts. Police were sometimes housed on company property for the duration of the conflict. In addition to attacking picket lines and rallies, they increased patrols in working-class neighborhoods, stepped up enforcement of public order laws, and took pains to close the meeting halls and bars where strikers gathered.\textsuperscript{14} Arbitrary arrests were common, and strikers were sometimes held on minor charges (or without

\textbf{White Sheets, Blue Uniforms}

The police did not create the racism in American society. If anything, it’s the other way around. But the police have, since their inception, enforced and defended the racist status quo—by controlling slaves, maintaining segregation, resisting civil rights efforts, and generally terrorizing the Black community and other people of color.

This function has remained constant even when the laws have changed. That is, even when it has conflicted with their official duties, the police have acted as a repressive force against the interests of people of color.

It will surely be objected that I have singled out the police unfairly. It will be pointed out—by critics at both ends of the

political spectrum—that all of Southern society (perhaps, all of American society) has been implicated in racist violence. It is hardly surprising that policemen were also involved.

Were my point simply that individual police officers were complicit, this complaint would be well grounded. But it overlooks two major features of my argument: first, that the involvement of the police is different than the involvement of, say, dentists or auto mechanics; second, and more importantly, the cop-Klan connection is institutional, not merely individual.

The participation of police officers in White supremacist organizations and racist violence is different than the involvement of other people because the police are often professionally as well as personally involved. They use their professional position to advance the aims of the group, they use their standing in the community to legitimate vigilante violence, and they are often considered attractive recruits for just these reasons. The same may be true of certain other occupational groups as well—journalists, clergy, politicians—but cops engage in these crimes when they have sworn to stop them. To understand this contradiction we must view it, not only in terms of personal prejudice and individual action, but as a sustained institutional relationship.

Historically, the police and the Klan have operated as parallel and, in general, mutually reinforcing types of organizations. Cops (like other officials) have sometimes drawn on the political support of the Klan to buttress their own authority. Conversely, the police can offer some degree of validation to Klan activity by lending it their support, or less directly, by refusing to treat racist violence as crime. At times the police have supplied the institutional nucleus around which vigilante activity could orbit.

The police, as an institution, have shared many of the aims, methods, and values of Klan-type groups. During the Reconstruction period, for example, police authority and vigilante activity neatly paralleled one another. In part, the similari-

This tradition of class control continues today, in many forms, including urban "quality-of-life" and "zero-tolerance" policies, the war on drugs, and "gang suppression" efforts that seem aimed at disrupting the normal course of neighborhood life. One of the clearest examples of class bias in law enforcement, in the nineteenth century and today, is the persecution of the homeless. Beginning in the 1870s, cities around the country began vigorously enforcing laws against "vagrancy," and mounted special efforts to limit the mobility of migrant workers (in the parlance of the day, "tramps"). For nothing other than the crime of being poor, vagrants and tramps were forced out of town, subjected to violence, and oftentimes imprisoned for as long as six months. While contemporary laws are careful to proscribe certain behavior (rather than poverty per se), statutes prohibiting trespassing under bridges, sleeping on sidewalks, and panhandling clearly have the same effect as the vagrancy laws of the earlier period.

The practices surrounding the enforcement of these laws are often simply cruel, involving intimidation, violence, seizing (and never returning) identification, and the destruction of personal possessions. In the fall of 1993, I was witness to an incident in which numerous police officers, all wearing latex gloves, moved methodically through Lafayette Park in Washington, D.C., seizing the belongings of the people who lived in the park—sleeping bags, backpacks, pieces of tarpaulin. With the White House in the background, the police carried the items to a nearby garbage truck, where they were unceremoniously crushed. Similar incidents have been

10 Harring, Policing a Class Society, 201.
In 1876, the Report of the General Superintendent of Police in Chicago warned: “There is in every large city, a dangerous class of idle, vicious persons, eager to band themselves together, for purposes subversive to the public peace and good government.”5 The police, in Chicago and elsewhere, took as their main task the control of this dangerous class, especially when the poor “banded themselves together,” but also in the course of daily life. The police concentrated their enforcement activities in poor neighborhoods, armed with the tools of physical violence and a variety of laws prohibiting public order offenses, vice crimes, and a great deal of other activities associated with the working class.6

It was a short step from selective enforcement to the criminalization of poverty itself and of poor people as a group. While the wealthy were treated leniently by the courts, the poor were sometimes convicted where no crime was even alleged. (In Philadelphia, 1839, Sarah Hays and Thomas Firth were jailed for the non-offense of kissing in public. The mayor admitted that there was no law prohibiting such behavior, but based on the reputation of the neighborhood where they were arrested, he ordered them jailed just the same.)7 In short, the laws themselves targeted the poor, the courts issued harsher judgments against poor defendants, and the police treated poor people with intense suspicion. The instructions to the Philadelphia police explained: “As a general thing, any idle, able-bodied poor man has no right to complain if the eye of the police follows him wherever he roams or rests. His very idleness is an offense against all social laws.”8

What is remarkable is the degree to which the resemblance between the police and the Klan has persisted. It may tell us a great deal about the real function and fundamental character of the police that, after more than a century of institutional development, legalism, bureaucratization, professionalization—and more than one hundred years since the death of the Confederacy—they would continue to behave like racist terrorists. The police have persisted in denying people of color the rights guaranteed to them by the Constitution, have actively sought to frustrate their efforts to exercise such rights or become in a real sense full citizens, and have resorted to the most vicious, brutal, and often patently unlawful means to do so. These facts can leave no doubt as to the institution’s priorities when the demands of White supremacy clash with those of the law. The police cannot be considered simply the custodians of the legal order, but must be seen as the guardians of the social order as well. That they defend it wearing blue uniforms rather than white sheets is a matter of only minor importance.

5: The Natural Enemy of the Working Class

I have no particular love for the idealized “worker” as he appears in the bourgeois Communist’s mind, but when I see an actual flesh-and-blood worker in conflict with his natural enemy, the policeman, I do not have to ask myself which side I am on.
—George Orwell

The Greensboro massacre of 1979 represented a racist assault against people of color, but it also marked an attack on the rights of working people. The “Death to the Klan” rally was organized as part of an effort to end the harassment of poultry workers as they fought to form a union, and most of those killed were union organizers. Such pairings of racist oppression and class exploitation have been the historical norm; slavery, for example, was a system of production as well as a system of race control.

Though there are divergences between race and class, the means for control in each area have always been very closely linked. This connection is perhaps never clearer than when racist means are used to suppress the resistance workers mount against capitalism—as in Greensboro, or, to take an earlier example, as in 1885, when Mayor Joseph Guillote of New Orleans responded to a levee workers’ strike by ordering the police to arrest any Black man who “did not want to work.”

Control of the lower classes has been a function of policing at every point since the institution’s birth, and has served as one of the major determinants of its development. In the South, the police first approached their modern form after a long process of adaptation and experimentation in the official means of controlling the slave population. This mandate was over-determined, required both by the demands of White supremacy and by the economic needs of the plantation system. The mechanisms developed to control slaves eventually expanded in each direction, as slave patrols were charged additionally with regulating the behavior of free Black people and that of poor White people, especially indentured servants. As modern capitalism took shape, the new industrial working class posed new challenges to the social order, and the police institution evolved to meet them. Like the slaves, these “dangerous classes” were marked as permanent objects for police control, and their lives became increasingly regulated by specially designed laws, selective enforcement, and heightened scrutiny.

The Majestic Equality of the Law

The law, in its majestic equality, forbids rich and poor alike to sleep under bridges, beg in the streets, or steal bread.

---

Greensboro was not the first time the KKK took an interest in destroying unions. To offer just one example, in the autumn of 1936, the Klan burned a cross near the rubber factory in Akron, hoping to intimidate striking workers who had occupied the factory. Jeremy Brecher, *Strike!* (Boston: South End Press, 1972), 185.

3 Quoted in Rousey, *Policing the Southern City*, 167. The majority of the strikers were Black.
Our earlier discussion of police brutality led us to pose a series of questions we are now primed to address. These were: To what degree is violence the “property” of the state? At what point does the police co-optation of violence challenge the state’s monopoly on it? When do the police, in themselves, become a genuine rival of the state? Are they a rival to be used (as in a system of indirect rule) or a rival to be suppressed? Is there a genuine danger of the police becoming the dominant force in society, displacing the civilian authorities? Is this a problem for the ruling class? Might such a development, under certain conditions, be to their favor?

These questions suggest another, prior, question: What is the state? Let us begin with that.

It may seem odd to talk about an independent private organization, such as a police association, as a constitutive part of the state. The tendency is to think of the state as a monolithic institution claiming an exclusive right to the use of force. But this conception of state power is overly simple, both in terms of the state’s actual operation and in terms of its historical development.

Martin J. Smith defines the state as “a set of institutions which provide the parameters for political conflict between various interests over the use of resources and the direction of public policy.” The state is not a unitary organization, but rather a complex network, with components termed “the welfare state,” “the police state,” etc., and with extensions identified as “the military-industrial complex,” “the prison-industrial complex,” and so on. As the state becomes increasingly differentiated and its power ever more diffuse, its precise edges become difficult to define and the public/private

---

In any case, the immigration ploy backfired. The vacancies left by the raids were mostly filled with African Americans, who on the whole strongly supported the union drive. And the November walk-out showed that the Latina and Latino workers who remained were willing to fight. In December 2008, after fifteen years of organizing, two failed votes, and lawsuits from each side, Tar Heel workers voted 2,041 to 1,879 in a court-supervised election to affiliate with the UFCW. “It was close,” said Smithfield Foods media representative Dennis Pittman, but: “As we said all along, we will respect their decision.”

Class Conflict, Continuity, and Change: The Long View

Smithfield and Sterling Heights show how little has changed over the course of a century. Naturally, strikes and other labor actions still focus on many of the same issues, since there is a permanent conflict of interest between workers and their employers when it comes to matters of pay, hours, and control. And in the clashes between workers and capital, the police continue to line up on the side of capital. But the differences between these later disputes and those of the early twentieth century are also clear enough. Violence persists, but at lower levels. Battles between police and workers are sometimes bloody, but rarely deadly.

These reduced levels of violence are the result of a shift in the form of class conflict: unionization, collective bargaining, and even strikes have been formalized, institutionalized, and subject to legal regulation. Increasingly, this development has taken the struggles of workers out of the factories and the streets and placed them instead in courthouses and govern-
Companies, then, have come to rely less on police or Pinkerton thuggery to keep the workers in line. At the same time, the militancy of the labor movement overall has suffered a sustained decline, and the power within unions has shifted away from the rank and file and toward the official leadership, the paid staff, and their legal advisors.

This process was already taking hold at the time of the San Francisco General Strike of 1934. In fact, the strike may be seen as the workers’ direct resistance to the institutionalization of class conflict on two fronts: first, in their refusal to submit substantive issues to arbitration; and second, in following the leadership of rank-and-file members like Harry Bridges, rather than obeying the orders of union officials. The depth of this resistance—the degree to which workers refused to play by the prescribed rules, and rejected the given definitions of victory and defeat—is evident in the continuation of the struggle even after they had returned to work. The strike ended, but the workers did not surrender. They, in effect, moved the conflict to an arena where the influence of the union officials,

102 Beginning by upholding the National Labor Relations Act but prohibiting sit-down strikes, “the courts allowed unions to engage in collective bargaining over a limited range of issues, but prohibited them from using the kind of militant, direct action that had built the CIO.” James R. Green, The World of the Worker: Labor in Twentieth-Century America (New York: Hill and Wang, 1980), 165–66. See also: Harring, Policing a Class Society, 257.

103 “The institutionalization of the new unions began soon after their explosive creation in the mass strikes of the mid-thirties. The top leaders hastened this process, especially after the employers’ vicious counterattack in 1937. Moreover, the whole structure of collective bargaining, as determined by the courts and the NLRB, favored a more routinized, businesslike relationship between top leaders of labor and management, with the government as referee. As a result, many of the issues, such as speedup, that precipitated the original labor revolts were shunted aside.” Green, World of the Worker, 172.

104 One high-ranking police official attributed the General Strike to just this change of leadership: “the rank-and-file workers became convinced that their leaders were too much hand-in-glove with the industrial interests of the city.” Quoted in Brecher, Strike!, 252.

least one sense, police associations are best conceived of as semi-autonomous, but constitutive, parts of the state.

The Police Union as a Semi-Autonomous Component of the State

The independent organization of police officers has done a great deal to protect both individual cops and whole departments from meaningful oversight. Unionization has thus served to preserve patterns of abuse and discrimination, while at the same time advancing the agenda of law enforcement on the social and political fronts. This development represents, as per William Westley’s analysis of police brutality, the collective usurpation of governmental authority and the means of violence:

This process then results in a transfer in property from the state to the colleague group. The means of violence which were originally a property of the state, in loan to its law-enforcement agent, the police, are in a psychological sense confiscated by the police, to be conceived of as a personal property to be used at their discretion.154

But whereas Westley analyzed police brutality in terms of the informal, “psychological” confiscation of authority, union negotiations formalize the officers’ claim to partial control of the institution and, by implication, its capacity for violence.155

102

103

104

made their way by assuring rulers of tribute and acquiescence from these populations.” Tilly, Coercion, Capital, and European States, 104.

154 Westley, “Violence and the Police,” 289–90. This analysis is considered in chapter 1.

155 The degree to which this is true may be indicated by union efforts to authorize the use of force where it was prohibited by law or departmental policy. The most famous case, Cassese’s rule to “enforce the law 100 percent” (quoted in Gunther, “Cops in Politics,” 65), has already been discussed, but other examples are available. For instance, in 1970, the Atlanta FOP voted to illegally carry their own guns while on duty. In Detroit, at around the same
These instruments are generally called unions, though that misnomer (like so many others in “police science”) relies on a false analogy to other, dissimilar organizations. Police unions provide the means by which the officers can collectively negotiate with the civil authorities, determine together the conditions under which loyalty may be ensured—loyalty to the police commanders, civil authorities, and the ruling class, respectively. It is not the loyalty of the individual officers that is at stake: they are not freelancers or mercenaries negotiating a fee for service. Rather, it is the loyalty of the institution that the officers collectively, through their union, may not control but can disable. Interestingly, this leverage does not only increase the power and autonomy of the union, but of the entire department relative to the rest of the city government. The officers may, under rare conditions, even use their associations to compete with the civil authorities for control. Such power struggles are generally of short duration, but their effects can be long-lasting. They demonstrate the limit of police loyalty and the threat of mutiny—really, the usurpation of the institution—and in so doing they help to set the price for that loyalty. When that price is agreed on, the police again become fully available for the uses to which the ruling class, the state authorities, and their own commanders would put them.

As police organize, lobby, and strike, it seems that their negotiations have as much to do with the elites’ access to, and the smooth functioning of, the police institution itself as with wages and working conditions. In this, police bargaining resembles less the struggles of exploited workers than the agreements formed between sovereigns and their intermediaries in the creation or expansion of states. In fact, in at

153 “Before the seventeenth century, every large European state ruled its subjects through powerful intermediaries who enjoyed significant autonomy, hindered state demands that were not to their interests, and profited on their own accounts from the delegated exercise of state power. The intermediaries were often privileged members of subordinate populations, and the courts, and the police could be minimized, and where the strength of the workers was greatest—on the shop floor.

More than seventy years later, these tensions were still present in the longshore unions. Beginning in the summer of 2011, dockworkers in Longview, Washington engaged in a series of increasingly militant actions in an effort to force Export Grain Terminal (EGT) to bargain with their union, the International Longshore and Warehouse Union (ILWU). On July 11, more than 100 workers were arrested when they tore down a fence, briefly occupied EGT’s yard, and sabotaged machinery. A few days later, 600 people, including members of other unions, blocked rail lines leading to EGT’s terminal, forcing trains to return to their point of departure without unloading their cargo. That September, a judge issued an injunction against blocking trains and limited picket lines to eight people at each gate. But the actions continued. Four hundred blocked the train tracks for four hours on September 7, until police with shotguns cleared them away. The next day, 500 union supporters returned and stormed the property, breaking windows in the guardhouse, sabotaging equipment, and dumping approximately 10,000 tons of grain. In the weeks that followed, police started arresting longshore workers, often roughly, at their homes, in their cars, and at church. In response to the arrests—and other harassment, such as police shining spotlights into homes in the middle of the night—the union organized a silent march from their meeting hall to the courthouse, where all 200 members offered to turn themselves in. The sheriff refused, saying he wasn’t prepared to take so many people into custody, but piecemeal arrests continued.105

On September 21, as eighty cops escorted a train into the EGT yard, nine members of ILWU Women’s Auxiliary #14 peacefully sat on the tracks in an act of civil disobedience. The police response was not as peaceful. Arresting the women, they broke the arm of fifty-seven-year-old grandmother Phoebe West, wrenching it far behind her back. ILWU Executive Board member Kelly Muller and some other longshore workers ran over to help the women, and were immediately attacked themselves. “They hit us,” Muller said. “They didn’t even give us a warning. Here comes four or five cops. They take us to the ground and are on my back. I hit my head on the railroad track.” Other witnesses confirm that, while Muller was on the ground, the cops kicked him, cuffed him, and then got out their pepper spray. “The cops pried both my eyes open,” he recalls. “They spray into my face and into my mouth while I’m handcuffed.”

“We have a city government here,” Local 21 president Dan Coffman observed, “that’s basically EGT’s security force.”

In the end, however, the workers were not defeated by the police, but by their own union leaders. Fearing a confrontation they could not control, the ILWU’s international officers cut off support for the strike, interposed politically and sometimes violently to disrupt solidarity actions, took direct control of negotiations, and ultimately imposed a contract without a vote of the membership. It was a bad bargain: the union lost control of the hiring process, the company gained the right to use scabs, and workers were assigned twelve-hour shifts without overtime pay. The defeat was widely viewed as a precedent—but peaceful drunk, the basis on which people are treated with suspicion—these are left to the individual officer’s discretion.

Here is a convenient rule of thumb: police will be disciplined when their behavior threatens the smooth operation of the institution. But there is a corollary to this: to the degree that officers collectively control the department, discipline will be weaker, as elites will have to bargain for access to the institution’s power. That is one effect of police unionization.

Police labor action reminds local governments that they have created for themselves a rival to their own power. Unlike private-sector strikes, which threaten the bosses’ ability to make a profit, public worker strikes threaten the local government’s ability to provide services or, in the case of the police, to rule. They work by disrupting the city government’s access to the institutions by which it achieves its ends. While a sit-down strike may raise the specter of workers controlling industry—since there is a natural continuum between workers shutting down a plant, occupying it, and running it themselves—analogous actions by the police would fall on a different continuum and foreshadow less utopian futures: if the police continued to patrol, make arrests, and otherwise conduct surveillance and enact violence but do so without direction from the local government, that would amount to a transfer of power from the one institution to the other. It would portend the possibility of direct rule by the police.

In 1919 it was thought, clumsily, that this was a threat to be repressed. And such repression has occurred since then, when police excesses create the conditions for unrest or otherwise threaten the status quo. But police ambitions cannot be permanently repressed if the cops are to continue in their capacity, reliably suppressing the unruly portions of the population. And so, through a long series of reforms and negotiations, a strategy of co-optation developed, and with it emerged the instrument for balancing police loyalty with the demands of a semi-autonomous organization.

officer autonomy has its benefits for both the commanders and the line officers. Though police regulations do notoriously little to actually control officer conduct, they do provide a layer of plausible deniability between commanders and the routine activities of their troops. That is, the rules help to insulate commanders from responsibility for misconduct while at the same time police unions defend the rank and file from meaningful discipline. This arrangement allows for the formal appearance of a rigorous command and control while maintaining maximum discretion at the lowest levels of the organization. The command staff can minimize the criticism it faces through the manipulation of formal policies and bureaucratic shuffling, but concessions granted at that level need not affect much of what happens on the street.

Of course, discipline does exist and can be quite stringent when it comes to certain procedural or organizational matters—scheduling, the chain of command, uniforms, budgets, and so on. But both discipline and discretion exist within carefully proscribed bounds according to the needs and aims of the institution. Discipline fails and discretion is preserved in those areas where it is most convenient for the department that it be so—that is, when the police come into contact with the public. The public cares very little about whether cops are issued light blue or dark blue shirts, whether they stand at attention during roll call, whether they work eight- or ten-hour shifts, are dispatched in pairs or alone, etc.—but these are just the sort of matters over which management exercises the most control. Those elements with which the public is especially concerned—when and how force is used, how the police deal with a noisy

less democracy in the union, fewer demands on the boss, worse conditions on the docks.\textsuperscript{109}

The institutionalization of class conflict has changed unions and strikes, certainly; it has also changed the means of controlling the working class, and the role of the police in particular. Police tactics, strategies, and organization have all shifted and developed as the forms of conflict have. All the while, the basic aims of policing—control of the powerless, defense of the powerful—have remained essentially the same. The relationship between these changes and continuities will be examined in the chapters that follow.

\textsuperscript{109} Brenner \& Weissman, “Unions that Used to Strike.” Chapter 6: Police Autonomy and Blue Power
6: Police Autonomy and Blue Power

The ongoing history of police anti-labor action seems at odds with the growth of militant police unions in the latter part of the twentieth century. Nevertheless, the police have organized unions, and in many cases their unions occupy a central place in the constellations of local political power. In addition to advocating improved wages and working conditions, prosecuting grievances, and obstructing (or sometimes preventing) discipline against individual officers, the unions also have a strong hand in setting public policy, inside and outside their respective departments. Few changes in public safety or security policies can be made without the tacit approval of the police unions, and the officers’ associations are routinely consulted on changes in the criminal code, or in city policies that might indirectly affect police work. When controversies arise concerning the police, their actions, or their role in society, it often falls to the unions to detail the "law and order" perspective. The organization’s agenda may then dominate the debate, or even define its terms.

This influence has been hard-won and always controversial. The police union’s development, between the end of the nineteenth century and today, has been tightly braided with

---

1 “If there is any group for whom unions and job actions seemed unlikely, it was the police personnel. Their job is to preserve law and order; they have traditionally been the strike breakers; and they have been subject to the harshest restrictions against their unionization.” Margaret Levi, *Bureaucratic Insurgency: The Case of Police Unions* (Lexington, MA: Lexington Books, 1977), 2.

and who therefore cannot be protected by their supervisors. For instance, in 1981, when two Portland officers were fired for leaving dead possums on the doorsteps of Black-owned businesses, the Portland Police Association organized a march of 850 supporters, demanding they be reinstated. The case went to arbitration, and the officers returned to work. Almost thirty years later, in 2009, officer Chris Humphreys was suspended after firing a less-lethal shotgun at close range and hitting a twelve-year-old Black girl. The PPA again mobilized their supporters to demand he be reinstated. Six hundred people, mostly off-duty cops, marched on City Hall carrying signs reading “I am Chris Humphreys.” He was returned to desk duty, and later exonerated by the Chief of Police.¹⁵¹

The police union represents an extreme of autonomy, protecting officers of the lowest rank from authority both inside and outside the department. This has the effect of distributing some kinds of power toward the bottom of the formal hierarchy.¹⁵² The careful tension between departmental policy and

---

¹⁵² “Certainly if the police chief or police commissioner ignores legislative mandates or other directives from policy-makers, he must suffer the consequences, whereas even the rookie patrolman soon learns the art of camouflaging both inefficiency and policy infractions. In this sense, not only does the individual officer, acting in an isolated instance, make a subjective
The social function of policing provides a permanent basis for the conservative orientation of police unions.

In turn, police associations provide a stronghold for the most reactionary aspects of the profession—elements that the command hierarchy is often at pains to disavow. When the police command cannot, for legal or political reasons, resist demands for civilian oversight, for more diversity in the department, or for redress in particular cases, the union can defend the departmental status quo. Historically, most police associations barred Black members, and police in Detroit and St. Louis threatened strikes to keep African Americans off the force. Police departments accommodated the racist officers in various ways, sometimes by refusing to hire Black people, in other cases by keeping Black officers out of uniform, restricting them to Black neighborhoods, or barring them from arresting White people. As recently as 1995, a group of Black LAPD officers sued the Police Protective League for its role in preserving discrimination on the force, describing the union as a “bastion of white supremacy.”

Police unions are also on hand to defend individual officers whose misbehavior becomes embarrassing to the department.

Changes concerning standards of public morality, the shape of municipal government, race relations, and, of course, class conflict. Embedded within every strand of this cord, exposed with every tangle and snare, lies a question about the nature of democracy, and about the role of police power in a democratic society.

From Strikebreakers to Strikers (and Back Again)

Beginning in the late nineteenth century, police in many cities belonged to social organizations, called either “Patrolmen’s Benevolent Associations” (PBAs) or “Fraternal Orders of Police” (FOPs). The two types of organizations functioned along similar lines, providing their members insurance and promoting their overall health and well-being. The main differences were that, whereas the PBAs were only open to patrolmen and were strictly independent, the FOPs were open to any officer and were affiliated nationally. Both groups petitioned for better working conditions, efforts that the authorities tolerated so long as there was no move toward unionization. The rank and file crossed that line during World War I, when a steep rise in the cost of living pushed several organizations to apply for charters from the American Federation of Labor. In a break with its previous position, the AFL granted the charters, and the police unionized in numerous cities, including Cincinnati, Washington, Los Angeles, St. Paul, Fort Worth, and, most famously, Boston.

Unhappy with long hours, low pay, favoritism, and the sorry condition of their stationhouses, on August 15, 1919, members

---

147 Former Atlanta police chief Herbert Jenkins described that city’s police union as “not a union at all, but in fact a thinly veiled cover for Klan membership.” Jenkins, *Keeping the Peace*, 23.

148 The Miami Police Benevolent Association had a constitutional provision requiring that membership be open only to “white members of the police force.” That clause was removed in January 1970, but when five Black officers applied for membership in December of that year, their applications were rejected. Dulaney, *Black Police*, 145.

2 Fogelson, *Big-City Police*, 196.

of the existing police association, the Boston Social Club, voted to affiliate with the AFL.\(^5\) They thus created the Boston Police Union Number 16 of the American Federation of Labor.\(^6\) Less than a month later, on September 8, Police Commissioner Edwin Upton Curtis responded by suspending nineteen union supporters. A strike began the next day.\(^7\)

Approximately three-quarters of the Boston Police Department joined the strike, creating a politically uncomfortable situation made worse by rampant crime and widespread disorder.\(^8\) Almost immediately, small crowds gathered around craps games on the Boston Common. By the evening of September 9, the disorder had escalated to the point of looting. Rioters overturned parked cars, and numerous gang rapes were reported. Some rowdies took the opportunity to settle scores with striking police. Crowds gathered at stationhouses and pelted the strikers with mud, rocks, bottles, and rotten fruit as they left the building. A South Boston Vigilance Committee was formed and tried to keep order, but its volunteers were savagely beaten.\(^9\)

---

\(^6\) Russell, *City in Terror*, 78.

\(^7\) Lyons, "Boston Police Strike," 148. Boston was not the country’s first police strike. That honor goes to a successful walkout among the Ithaca police in 1889. The city council voted to lower police pay, the police struck, and the council immediately rescinded their decision. Russell, *City in Terror*, 233.

\(^8\) Of 1,544 officers, 1,117 went on strike, leaving the force at about one-quarter strength. Lyons, "Boston Police Strike," 160.

\(^9\) Russell, *City in Terror*, 122–25, 131–33, 137–38, 151–52. Additionally, 100 of the 183 state-controlled Metropolitan Park Police were put at Curtis’s disposal (but fifty-eight of these refused the duty and were suspended). Private companies armed their employees or hired guards, Harvard was patrolled by the university police and ROTC, and federal property was protected by the army. Ibid., 119, 127, 150, 166.

In each case, the workers seek to make common cause with their clients—but the clientele of the various agencies are quite different. Smaller classes benefit both teachers and students; additional social services are good for the people who receive them and for those who provide them. However, such provisions likely inconvenience taxpayers, other portions of the government (who compete for the funds), and the business and government elites who feel they can surely find “better” uses for the money and have little sympathy for the plight of public school students and the poor. In the case of the police, these relationships are exactly reversed: the police defend the interests of elites, and it is the poor who are burdened.\(^146\) Thus, the police, in contrast, advocate longer prison sentences, fewer safeguards against brutality, and new weaponry.\(^145\)

\(^{145}\) Levi, *Bureaucratic Insurgency*, 9; and Center for Research on Criminal Justice, *The Iron Fist and the Velvet Glove*, 146. Levi examines the difference between private and public employees, but not between cops and other public workers. In fact, she takes the police to be paradigmatic. But as long as the police represent the coercive apparatus of the state, they must be understood as fundamentally different than, say, sanitation workers, firefighters, and teachers. Robert Reiner explains: “The determinants of the policeman’s economic situation are to an extent diametrically opposed to those for other workers. This is because, when governments attempt to implement policies of wage restraint against union opposition, the police assume a peculiar importance due to their role in situations of industrial conflict. Then they will have to be treated as a most ‘special case’ in pay negotiations. Furthermore, their work situation, in particular when it involves confrontations with trade unionists at pickets, inclines them towards a conservative world-view and a sense of alienation from the labour movement. This conflicts with pressure towards forms of organization of a more or less unionate nature, deriving from their own concerns as employees.” Reiner, *Blue-Coated Worker*, 4. Emphasis in original.

\(^{146}\) “Their efforts to serve ‘the public’ often reveal how divergent conceptions of ‘the public’ can be. Police employee organizations demand the material and laws which enable them to protect working- and middle-class homeowners; they are far less concerned with the protection of ghetto dwellers, hippies, and political activists. The radical caucuses of social worker and teacher unions tend to make the opposite choice; they are less interested in defining and containing a problem population than in providing the impov-
ern” guise. Currently, the “medieval” aspects find an analogy in the relations between police departments and governments (wherein bargaining is implicit), and the “modern” are in evidence with the three-party relations between the unions, the departments, and the government. However, with the police, the corporatist deal is not between the state and some outside group, but between various sections of the state. Specifically, it is an agreement between the elected civil authorities (the government), the police commanders (the department), and the representatives of the rank-and-file officers (the union).144

This alignment between workers and management is not unique to police labor relations, but a common feature of many public or semi-public institutions. In the wave of public employee unionization of the 1960s, many public service workers—not just cops—began to demand changes in the way their work was organized, and sometimes sought to influence the social conditions that affected their work. But whereas teachers and social workers rallied against discrimination, inequality, and the meager remedies of the Great Society, the police turned sharply to the right. For example, a major demand of the 1967 Chicago social workers’ strike was the provision of additional services for clients. Teachers’ unions frequently demand smaller classes and better material. The

The rioting ended when 3,000 State Guard troops, scab police, and a provost navy guard unit broke up the crowds. The State Guard killed three people in the process—including one bystander and one person who was fleeing. A fourth was killed as the soldiers broke up the craps games on the Common, and two more died when the militia attacked a group of boys trying to steal a manhole cover. By September 11, eight were dead and more than seventy injured—twenty-one seriously, several of them children. More than $300,000 in property had been damaged or stolen. On September 12, the striking patrolmen voted unanimously to end the strike if only their suspended colleagues would be reinstated. Instead, Curtis fired all the striking police.10 The State Guard patrolled until December 12.11

Following the strike’s defeat, many states passed laws forbidding police unions, and the AFL revoked the charters of all its police locals.12 Isolated from the rest of the labor movement and lacking political support, the new unions were crushed in city after city. Local governments then raised wages so as to remove any incentive for re-forming the unions. Immediately after the strike, the starting salary for Boston police was increased to $1,400 per year. (Only a few months before it had been as low as $730).13 Between 1919 and 1929, police wages increased by 30 percent in Detroit, 50 percent in Chicago, 70

144 If this analysis is sound, then it suggests a particular picture of the state and the role of the police union in maintaining its power. Rather than standing as a unitary sovereign with various subordinate agencies at hand to enact its will, the state would consist of a complex network comprising these agencies, and dependent on their cooperation for its power. This idea will be expanded in the pages that follow. For now, let’s just note that this view complicates Crouch and Dore’s definition of a “corporatist arrangement,” since they identify “the state” as one party in the arrangement, and overlook the possibility that the state itself may in part consist of such corporatist relations.

10 Ibid., 149, 159, 162–63, 167–70, 181–82, 217; and Lyons, “Boston Police Strike,” 165. Meanwhile, Governor Calvin Coolidge, who had initially refused Mayor Andrew Peters’s request for National Guard deployment, positioned himself to take credit for breaking the strike, issuing an executive order placing himself in control of the Boston Police Department. He eventually used the strike to leverage himself into the presidency. Russell, City in Terror, 173–74, 196–98; and Lyons, “Boston Police Strike,” 159.

11 Lyons, “Boston Police Strike,” 166. After the strike, it took the police department a while to reform itself. For one thing, it had lost most of its officers and, with the stigma of strikebreaking so fresh, faced considerable difficulty finding recruits. To make matters worse, tailors refused to make new uniforms. Ibid., 165.

12 Russell, City in Terror, 234, 239; and Fogelson, Big-City Police, 195.

percent in Los Angeles, and 100 percent in Oakland. By 1929, patrolmen earned between $1,500 (in Cincinnati) and $2,500 (in New York), which put them on par with most skilled laborers.¹⁴

This strategy worked to neutralize rank-and-file organizing throughout the 1930s, restricting their activity to the lobbying tactics of the early PBAs.¹⁵ But in the 1940s, unionization was again on the agenda, and by 1944 the AFL had police unions in 168 cities.¹⁶ In the name of preserving their neutrality, police departments generally responded to this new wave of organizing in the same way they had before—barring the organizations and firing union supporters.¹⁷

In the 1950s, after the NYPD defeated a Transport Worker’s Union drive by offering the officers concessions, Commissioner George Monaghan established Rule 225: “No member of the police force of the city of New York shall become a member of any labor union.” He reasoned that the rule was necessary to protect the policemen from influences or commitments which might impair their ability to perform their duties impartially and without fear or favor, or might tend to weaken or undermine the discipline and authority to which they must necessarily be subjected.¹⁸

Appeals to the “neutrality” of the police are questionable, given their historical use against strikes and unions. Monaghan’s second reason probably comes closer to the truth: unionization was seen as a threat to the authority of police commanders.

An institutional pattern which involves an explicit or implicit bargain (or recurring bargaining) between some organ of government and private interest groups (including those promoting “ideal interests”—“causes”), one element in the bargain being that the groups receive certain institutionalized or ad hoc benefits in return for guarantees by the groups’ representatives that their members will behave in certain ways considered to be in the public interest.

They go on to cite both historical and recent examples:

The doctors and lawyers of medieval England—as well as the civil engineers and all the other professional groups which got their charters in the nineteenth century—were granted monopoly privileges (the right to decide who should and who should not be allowed to sell certain kinds of services) in exchange for promises to make sure that the professional standards of those who did sell those services—their skills and their morals—were what the public had a right to expect.

More modern forms—this time the granting by the state of an ad hoc concession rather than an institutionalized privilege—include, for instance, the bargains sometimes struck in the 1960s and 1970s in Britain between the British Rail management, the railway unions, and the government: more state funds for railway modernization provided that the unions would agree to get their members to accept productivity improvements and changes in the work practice.¹⁴³

Corporatist arrangements in policing have taken both the “medieval” and the “modern” forms that Crouch and Dore describe. As the historical comparisons indicate, each phase of police reform has tended toward corporatist arrangements—bureaucratization and professionalization under the “medieval” model, and unionization in a more “mod-

---

¹⁴ Fogelson, Big-City Police, 81–82.
¹⁵ Levi, Bureaucratic Insurgency, 13, 28–29. Carl Parsell referred to this mode of operation as “collective begging.” Quoted in Fogelson, Big-City Police, 200.
¹⁶ Additionally, the FOP had 169 local chapters. Levi, Bureaucratic Insurgency, 7.
¹⁷ The mayor of Jackson, Mississippi, for example, fired thirty-six officers for organizing with an AFL affiliate. Levi, Bureaucratic Insurgency, 132.
Margaret Levi explains:
As the literature on private labor unions so often illustrates, collective bargaining often serves as a device of social control. It channels conflict and sets its terms. But collusive bargaining goes one step further: it enables management and labor negotiators to cooperate actively with each other. (In order to convince their constituencies of their motives the bargaining teams fight publicly, but privately they compromise.) By engaging in collusive bargaining, city leaders gain credibility with the public for being tough, gain some assurance of relatively uninterrupted service delivery, and regain some power to make programmatic innovations. Of course, in return, they must grant some of the union’s demands.¹⁴¹

Union leaders, meanwhile, put on a similar act for the benefit of their constituency. As a result, they are able to deliver gains to the union members and retain their positions of influence—all without the risks of genuine conflict.

As an example of this collusive approach, Levi cites the relationship between the Fraternal Order of Police and Atlanta Police Chief John Inman: “The chief found the FOP was sympathetic enough to his policies to become a much-needed ally, and the FOP discovered it could gain promotions and respect.... However, this alliance also contributed to the racism of the police labor organization.”¹⁴² In this way, antagonisms between labor and management become secondary to their common, institutional aims. As both press to increase the power, resources, and autonomy of the institution, they form a community of interests, an alliance against the meddling of city officials or the competing demands of other government agencies.

Such an alliance bears the markings of “a corporatist arrangement,” defined by Colin Crouch and Ronald Dore as:

Whatever the justification, restrictions against unionization proved ineffectual, and some commanders were forced to try other approaches in order to preserve their control. In 1941, the AFL supported an FOP organizing drive in the Detroit Police Department. The department harassed officers who supported the drive, fired its leaders, and procured court orders barring unionization, but half of the patrolmen joined the organization anyway. The next year, however, the FOP lost ground when the Detroit Police Officers Association (DPOA) was formed with the backing of police commanders. Carl Parsell, who served as the DPOA president in the late sixties, explained: “It started out basically a company union under their guidance, under their control. They gave you the rights at their pleasure.”¹⁹

Things took a different turn in New York, though a similar strategy was in evidence. The PBA sued to protect itself from Rule 225, and won. The court found that the department could bar “organizations of policemen affiliated with non-police labor associations or officered by non-policemen,” but could not interfere with the PBA’s activities.²⁰

The distinction became relevant in June 1958, when the Teamsters publicly announced an effort to unionize the police. The announcement put pressure on the PBA leadership to produce results, and it also gave police managers an incentive to cooperate with the PBA rather than face the stronger muscle of the Teamsters.²¹ A Journal-American editorial suggested:

The surest way of slapping down Hoffa would be for Mayor Wagner, Commissioner Kennedy, and the representatives of the Patrolmen’s Benevolent Association to begin exploring methods by which such grievance machinery would be set up with proper safeguards all around.²²

¹⁹ Ibid., 91–93.
²⁰ Ibid., 31.
²¹ Ibid., 43. This dynamic was in effect in cities throughout the country. See: Fogelson, Big-City Police, 204.
²² Quoted in Levi, Bureaucratic Insurgency, 45.
That is, more or less, what occurred. After the Teamsters’ drive was defeated, PBA president John Cassese set about winning gains for his organization’s members. By 1961, lobbying, lawsuits, and job actions (including ticket speed-ups and slowdowns) had won the PBA a dues check-off, protections against management retaliation, and a formal grievance system. Two years later, Mayor Robert Wagner (whose father had authored the National Labor Relations Act) extended collective bargaining rights to police officers, and the PBA won better wages and retirement benefits as a result. In exchange, the PBA agreed to a no-strike clause and a bar from affiliating with other unions.23

The leaders of the police associations (PBA and FOP alike) were only too glad to protect their positions from the competition of the Teamsters or American Federation of State, County, and Municipal Employees (AFSCME), but no-strike provisions proved more difficult to enforce. The authorities learned this the hard way in 1967 when the Detroit police staged a sick-out (nicknamed the “Blue Flu”). A year later, the Newark police did the same, and the Chicago cops threatened their own Blue Flu epidemic.24 In 1969, the Atlanta FOP organized “Operation No Case,” in which the police issued fewer tickets and overlooked minor offenses.25 The next year, Atlanta officers repeated the tactic without union approval, initiating a ten-week slowdown.26 The trend continued throughout the seventies, with strikes in Baltimore, Cleveland, Memphis, and New Orleans.27 When faced with a walkout or slowdown, the authorities usually decided that the pragmatic need to get the cops hide one another’s mistakes from those above them, but superiors shield subordinates from outside scrutiny.139

Such managerial complicity reinforces the sense of identity and group cohesion, thus reducing the possibilities for conflict within the department. And as the rank and file have become a more vocal, and more powerful, political constituency, some commanders have extended this strategy in order to share in the benefits of militancy.140 A savvy commander can secure the loyalty of his troops by participating in their revolt, providing himself with the platform for leadership and at the same time retaining a militant force prepared to back him up in clashes with civil authorities.

Police unions exercise influence over departments in ways other unions can only envy. However, apart from localized (usually individual) grievances, the officers and their managers share interests, perspectives, and a sense of identity. In the end, their institutional identification is superior to their class consciousness. To a very large extent, police departments achieve internal peace by subsuming the interests of both workers and managers to those of the institution. Even economic issues, like wages and hours, become common ground for cops and their bosses: both want increases in department budgets. The officers, of course, enjoy a higher standard of living as a result, and police administrators can look forward to more funding, larger departments, better morale, and an easier time attracting recruits. For this reason some scholars describe police contract negotiations as exercises in “collusive bargaining.”

23 Ibid., 49–51, 54–55; and Fogelson, Big-City Police, 210.
26 Ibid., 140.

When the PBA organized in New York, collective bargaining rights were traded for no-strike agreements and a bar from affiliating with other unions. During the same period, police unions around the country were defecting from AFSCME to form police-only locals. Almost twenty years later, in 1970, the NY PBA took this dissociation further than the law required, moving to break parity with other city employees, including firefighters, corrections deputies, and sanitation workers. That move is telling, and not just because it shows the lack of solidarity between police associations and the rest of the working class. It indicates that police associations organize more along institutional rather than class lines—that is, they organize police as police, not as workers.

The police exhibit an institutional unity that is fundamentally different than the class consciousness underlining union activity. The chief difference is that—despite fissures along race lines, disputes between superiors and subordinates, and intra-departmental rivalries—a sense of shared identity extends to every branch of police organizations and is felt at every level, from the highest commander to the rookie on the beat. This solidarity helps the commanders maintain the loyalty of their troops and, as mentioned before, it also leads cops of all ranks to cover up for each other. Not only do street

never supports his strongest claim—that the police do actually defend the interests of workers (specifically White workers) as workers. To the degree that White workers have an interest in racist inequalities, it is obvious that the police defend their interest in that regard—which is to say, the police defend the privileges White workers enjoy as White people in a racist society. Perhaps the article would be more properly titled “Taking Care of Whitey.”

Murray, “Should the Police Unionize?,” 532. In an ironic postscript to the infamous strike of 1919, the Boston Police Patrolmen’s Association was founded in 1965, and won a contract in 1968. But when, that same year, the legislature lifted the prohibition on affiliation with other unions, the BPPA declined to attach itself to the AFL-CIO. Russell, City in Terror, 232.

The Detroit sick-out provides an interesting illustration of the forces at work in these conflicts. The action began on May 16, 1967, with a ticket slowdown. The police continued to pull over speeding motorists, thus technically enforcing the law, but they issued warnings rather than citations. Overnight the number of traffic tickets dropped to one-half its previous level. Between May 16 and June 14, the number of tickets was down 66.9 percent compared to the previous thirty days, and 71.5 percent relative to the same period a year before. It’s estimated that the effort cost the city about $15,000 each day. On June 6, the DPOA escalated the conflict when its members voted to stop volunteering for overtime. The following week, police commanders responded to the disruption by suspending sixty-one officers. Then, on June 15, 323 cops called in sick.

DPOA president Carl Parsell denied that the action constituted a strike, but said: “Policemen for the first time are joining the labor movement. They are beginning to think and act like a trade union.” The city filed a lawsuit against the DPOA, instituted emergency twelve-hour shifts, and alerted the National Guard. The strike not only continued, but grew. On June 17, 800 of the city’s 2,700 officers were absent. Of these, 170 had been suspended, 459 were “sick,” and fifteen cited family emergencies. As the conflict escalated, each side grew increasingly
eager to find a resolution, and on June 20, a tentative agreement was reached. The next day, the police returned to work.\footnote{Levi, \textit{Bureaucratic Insurgency}, 113–15, 117; and Bopp, “Detroit Police Revolt,” 172. Quote in Levi, \textit{Bureaucratic Insurgency}, 114.}

The proposed agreement granted the DPOA changes in policy and discipline, and established a grievance procedure, but it was not at all clear that the fight was over, or which side would prevail. All “non-economic” issues were settled, but there was still the matter of wages, and the deal had to be approved by the city council.\footnote{Bopp, “Detroit Police Revolt,” 172.} The tension persisted. Commanders had only a tenuous grasp on the loyalties of their subordinates. But then a funny thing happened—the Detroit riot of 1967. With the Black community in open revolt, the cops, the city government, and local elites very quickly rediscovered their previous affinity. In bringing the labor dispute to a close, the specially appointed Detroit Police Dispute Panel noted: “Far more than the interests of the police officers themselves is involved. As has become obvious in recent months … the police force is the first line of defense against civil disorder.”\footnote{Quoted in Levi, \textit{Bureaucratic Insurgency}, 120. Levi describes the city’s acquiescence: “The effect of the Detroit riot on the police discipline dispute was immense…. It became imperative to rebuild rank and file morale, ensure department unity and discipline in case of emergency, and develop the means of squelching community discontent without engendering protest from either the police themselves or the subject population. The first step was to reward the patrol force for their participation in putting down the black uprising. [Police Chief Ray] Girardein rescinded the earlier suspensions and pay withholdings. Two weeks after the end of the racial conflict, the Common Council rushed through its approval of the DPOA contract.” Ibid., 119.}

The cops got their raises.\footnote{Bopp, “Detroit Police Revolt,” 172.}

In contrast to the defeated strike of 1919, the labor skirmishes of the 1960s and 1970s solidified the positions of the police associations and had the somewhat paradoxical effect of buttressing the top-to-bottom unity of the departments. The unions asserted increasing levels of influence over depart-

...
classes and in the alienation of the workers they control. This basic fact requires elites to treat police differently than other workers, seeking through ideology and material incentives to separate them from the mass of workers (and the labor movement especially), tying the interests of the police to those of capitalism and the state. This trick is accomplished through peculiar means, using what is ostensibly a labor organization—the police union.

### Police Unions Aren’t Unions

The status of police unions, and their relationship to the labor movement as a whole, has always been troublesome. When the NYPD challenged the legality of the Patrolman’s Benevolent Association in 1951, the court ruled that the PBA could organize police and could negotiate contracts precisely because it was not a union. According to the court, the police could join “associations” like the PBA and FOP, but not any organization that had either non-police leadership or affiliation with non-police unions. This ruling represented something of a compromise position, seeking both to preserve the “neutrality” of police action against strikes and to respect the officers’ right to free association.

As legal reasoning goes, that’s not very impressive. New York City Police Commissioner Stephen P. Kennedy, who strongly resisted the PBA’s demands for recognition in the late 1950s, argued that the distinction between an independent association and a union was meaningless: “When an organization acts like a union, talks like a union, makes demands like a union and conducts itself like a union, it cannot be heard to free association.

Levi describes this relationship in New York: “In the next several years, the PBA leaders learned to work closely with the department hierarchy and to negotiate more effectively with the city. Issues of management prerogative remained formally outside the scope of collective bargaining. But, as one legal advisor to the association once remarked, ‘What’s bargainable is determined by strength, essentially.’ Certainly new questions became available for discussion, and the PBA exerted greater direct influence on department policy. At the same time, the city and department learned to demand more for their money. They expected acquiescence to policy innovations in exchange for contract benefits.”

For example, in January 1971, a six-day wildcat strike by 85 percent of New York’s patrol officers ended when each striker was fined $600. Levi, *Bureaucratic Insurgency*, 88–89.
tuted one part of the Progressive movement’s general effort to re-invent urban government.

It is not hard to see why reform was needed. Under political machines, there was little to distinguish an official’s personal attachments, interests, loyalties, and obligations from the duties, responsibilities, powers, and benefits of his office. Authority rested as much in the informal and decentralized ward networks as in the government itself or the offices of the various municipal departments. Positions were filled strictly along partisan lines or as personal favors; there was no pretense of professionalism or impartiality. Discipline was lax, corruption was sanctified, and bribery was a major source of income at every level of the hierarchy. In this context, it was the job of the police to protect illicit businesses, extort money from honest citizens, rig elections, and otherwise enforce the will of neighborhood bosses. So long as they were successful in these central tasks, it made little difference to the machine bosses whether the cops engaged in petty crime, neglected their legal duties, were rude in their encounters with the public, or used violence unnecessarily.37

As a result, police legitimacy was sorely lacking. This problem was aggravated by a long series of scandals implicating departments around the country in organized crime and other types of corruption. For example, at the turn of the century, Los Angeles mayor Arthur Harper, police chief Charles Sebastian, and a local pimp formed a syndicate in order to monopolize prostitution in the city; the police were used to suppress competition and protect the syndicate’s operations. In 1912, Herman Rosenthal, a professional gambler, accused the New York City Police of protecting gambling houses; he was murdered on his way to meet with the district attorney. The next year, San Francisco papers revealed that a group of detectives had recruited a gang of con men, offering protection in return for control those who do the work, and they actively maintain the conditions that allow for profitable exploitation.128

The police thus occupy a dual position as workers and overseers, but this is not a fatal contradiction: a worker can be made to discern “his own” interests, apart from the interests of the working class as a whole. Such is the nature of the so-called “middle class,” which is really a section of the working class bought off by the capitalists to act on their behalf and manage their affairs.129 Class status, as economist Harry Braverman argues, is determined neither by income nor by ownership, but by power relations:

Since the authority and expertise of the middle ranks in the capitalist corporation represent an unavoidable delegation of responsibility, the position of such functionaries may best be judged by their relation to the power and wealth that commands them from above, and to the mass of labor beneath them which they in turn help to control, command, and organize.130

The peculiar distinction of this middle stratum is that its members share in both the power and rewards of the upper

128 The use of law enforcement to manage the work force is nothing new. Under the rule of Edward VI (1547–53), English law called on constables and justices of the peace to force laborers to work on farms suffering labor shortages, to wake them early in the morning, and to hurry them through mealtimes and breaks. Cyril D. Robinson and Richard Scaglion, “The Origin of the Police Function in Society: Notes Toward a Theory,” Law and Society Review 21, no. 1 (1987): 147.

129 Braverman offers a clear description of the middle class: “Like the working class it possesses no economic or occupational independence, is employed by capital and its offshoots, possesses no access to the labor process or the means of production outside that employment, and must renew its labors for capital incessantly in order to subsist. This portion of employment embraces the engineering, technical, and scientific cadre, the lower ranks of supervision and management, the considerable numbers of specialized and ‘professional’ employees occupied in marketing, financial and organizational administration, and the like, as well as, outside of capitalist industry proper, in hospitals, schools, government administration and so forth.” Braverman, Labor, 403.

130 Ibid., 405

37 For more on the political machines, see chapter 3.
status attached to it. And finally, there is the nature of the work itself. “After all,” as David Bayley and Harold Mendelsohn remind us, “police work is often physical, sometimes dirty, involves shift-work, and brings officers into contact with undesirable elements of society.”\textsuperscript{125}

The police have certainly faced their share of uncomfortable and unfair working conditions. In the nineteenth century, police received low pay (unless one counts graft), worked long shifts, were given no vacations, enjoyed little job security, and had no guarantee of income if they were injured (or of support for their families if they were killed).\textsuperscript{126} Such standards are appalling, for certain, but most workers were no better off.\textsuperscript{127} In the twentieth century, the pressures of bureaucratization and professionalization were often resented by the officers at the lowest levels. Bureaucratization increased discipline, eliminated political patronage and protection, and supplied rule-bound prescriptions for police action. Professionalization represented, from the perspective of the old-school cops, an unnecessary intrusion of elitist organizational goals at the expense of a traditional hard-nosed approach. Both reform movements created structural tensions within the police departments that later motivated the drive toward unionization.

But the proletarian aspects of policing are only half the equation. Though individually they receive just a meager portion of capitalism’s benefits, the police represent both the interests and the power of the ruling class. Like managers, police con-

\textsuperscript{125} Bayley and Mendelsohn, \textit{Minorities and the Police}, 14.

\textsuperscript{126} See, for example, Rousey, \textit{Policing the Southern City}, 53.

\textsuperscript{127} In fact, in many ways the police enjoyed more favorable conditions than other workers. “These [police] jobs were quite attractive. Patrolmen earned from $600 in Kansas City to $1,200 in San Francisco, more than laborers, weavers, miners, and factory workers and about as much as painters, carpenters, teamsters, blacksmiths, and street railway conductors.” Fogelson, \textit{Big-City Police}, 19. See also: Lane, \textit{Policing the City}, 76.

for 15 percent of the total take (an estimated gross of $300,000 annually). And during Prohibition, dozens of Cincinnati cops sold confiscated liquor and offered protection to bootleggers in return for a share of the profits.\textsuperscript{38} Such scandals largely discredited the police departments and the machines to which they were attached.\textsuperscript{39} The Progressive agenda offered a map toward legitimacy.

Seeking to replace the machine system, Progressive reformers looked to business and the military for organizational models. Schools, for instance, were reorganized on a corporate model, whereas the police were structured along military lines.\textsuperscript{40} This military analogy provided a positive ideal of what the police could be—a disciplined, hierarchically organized force, with the chief holding nearly absolute power. More specifically, the reformers offered three recommendations for change: departments should be centralized; the quality of personnel should be improved; and police operations should

\textsuperscript{38} Fogelson, \textit{Big-City Police}, 72. Numerous similar examples could be listed. For a selection from the Prohibition period, see: Herbert Asbury, \textit{The Great Illusion: An Informal History of Prohibition} (Garden City, NY: Doubleday & Company, 1950), 187.

\textsuperscript{39} The machines were not well equipped to defend themselves. “In short, by virtue of their extraordinary decentralization the machines could not as a rule compel the politicians, policemen, gangsters, and other members to ponder the organization’s long-term interests before pursuing their own short-run opportunities.” Fogelson, \textit{Big-City Police}, 73.

\textsuperscript{40} Ibid., 53–54. In areas other than policing, the business model was in the forefront. This predominance was anything but accidental. While governments were undergoing a period of rationalization, corporations were engaged in a similar process. Each set of changes sought to increase the institution’s legitimacy by eliminating the appearance of partial and personalized control, replacing it with “impartial” and formalized laws—legislative and administrative rules in the case of the government, the dictates of the market for corporations. Maurice Zeitlin, “On Classes, Class Conflict, and the State: An Introductory Note,” in \textit{Classes, Class Conflict, and the State: Empirical Studies in Class Analysis}, ed. Maurice Zeitlin (Cambridge, MA: Winthrop Publishers, Inc., 1980), 9; and, Harring, \textit{Policing a Class Society}, 30.
be narrowly focused on crime control, with an emphasis on prevention.\(^41\)

Toward these ends, police departments were divided, as far as possible, into specialized units with a streamlined chain of command and an articulated hierarchy. Chiefs were given more control and discipline was moved from external boards, which were deemed “political,” to internal “professional” mechanisms. Civil service procedures were instituted, age and education requirements were established, and character checks and psychological exams were introduced.\(^42\)

But the success of the Progressive movement was uneven overall. Despite the trend toward centralization and rationalized management, little changed in the areas of policy or procedure, and neighborhood precinct stations retained much of their autonomy.\(^43\) Police chiefs did not, on the whole, receive the lifetime tenure Progressives proposed.\(^44\) And the police still had a broad range of duties, even after specialization. In fact, contrary to the rhetoric of the time, the police function

\(^{41}\) Fogelson, *Big-City Police*, 56–58. The crime-prevention focus was paired with a renewed enthusiasm for proactive tactics. “The reformers also thought that, so long as the police forces only responded to civilian complaints, they could not stamp out gambling, prostitution, and other victimless crimes or keep tabs on trade unions, radical parties, and other left-wing groups. Hence they supported departments that tempted bartenders to sell liquor after hours, enticed women to engage in prostitution, tapped public telephones, infiltrated labor organizations, employed agents provocateurs, and otherwise ignored long-standing restraints on police power.” Ibid., 90.

\(^{42}\) Ibid., 178–80, 184.

\(^{43}\) Ibid., 97. Progressive reformers eventually pushed their agenda too far, with the attempt at the nationwide prohibition of alcohol in the 1920s. Rather than improving the health and morals of the population, the main effect was to grant a renewed importance to the convergence of organized crime, law enforcement, and political patronage that had characterized the machine era. See, for example: Daniel Okrent, *Last Call: The Rise and Fall of Prohibition* (New York: Scribner, 2010), 251–66, 270–75.

\(^{44}\) Fogelson, *Big-City Police*, 74–77. One place where the chief was granted a permanent position was Los Angeles—with disastrous results. See: Christopher Commission, *Report*, 186.

police have unionized and gone on strike—but continue in their role as strikebreakers.\(^124\) They have pitted themselves against their bosses and the government, but represent a threat to democracy rather than an expression of it. They have resisted authority for the sake of authoritarian aims, have broken laws in the name of law and order, and have demanded rights that they consistently deny to others.

This situation is sometimes thought to create a bind for those who both support the rights of workers and demand that police be accountable to the community. But the dilemma here is illusory. The ethical demands of solidarity are with the oppressed, and against the police. Working people cannot afford to extend solidarity to the police, and we cannot let the reactionary goals of police unions restrain us in our attacks on injustice. Confusion in this matter represents a set of related misconceptions; these can be resolved by clearly examining the class status of the police and the nature of their organizations.

### Wage Slaves and Overseers

The class position of the police is complex, and even contradictory. Individual officers may consider themselves “working class” for any of a variety of reasons. First, there is the fact that, even after the period of professionalization, most officers are still drawn from working-class backgrounds. There is also the persistent sense that, regardless of income, the job has little social

\(^{124}\) In 1959, *The Nation* gleefully reported that a unionized police force could still be effectively employed against striking workers: “Members of the Bridgeport [Connecticut] police local have also proved themselves capable of enforcing the law in cases involving their brethren in other unions. Police quelled picket-line disturbances during two bitter industrial strikes in 1955, in both cases receiving expressions of thanks from the plant managers. There have been no significant picket-line battles in Bridgeport since.” Edmund P. Murray, “Should the Police Unionize?” *The Nation* (June 13, 1959): 531.
through the police barricades while shouting racial slurs. Police Chief David W. Scott later said, “I’m disappointed in the fact that police officers would violate the law.”

The demonstration carried obvious racial overtones. Signs read, “Dinkins, we know your true color—yellow bellied,” and “Dear Mayor, have you hugged a drug dealer today?” T-shirts urged, “Dinkins must go!” Demonstrators chanted, “The mayor’s on crack” and “No justice! No police!” Kelly’s report suggests that the demonstration was self-defeating, as “the inability of the on-duty personnel assigned to police the demonstration has raised serious questions about the department’s willingness and ability to police itself.” I would actually say that it answered those questions, but the demonstration had greater practical consequences, helping to launch the candidacy of Rudolph Giuliani. Giuliani, who spoke at the rally, was elected mayor following Dinkins and immediately set about expanding police power. In retrospect, the September 16 rally has all the flavor of a municipal-level coup.

Police activism, especially in the guise of union activity, remains somewhat perplexing. The historical development is clear enough, but politically it is troublesome—especially for the left. The whole issue presents a nest of paradoxes: the did not so much narrow, as it shifted to meet new demands for social order.

Yet modest successes had a profound effect on the character of government. Around the country, political machines were beginning to decay. The localized, personalistic, and unabashedly corrupt machine system was giving way to a new kind of public administration. In theory, the new system was very nearly the opposite of the old—it operated legalistically, acting according to general principles and enforcing rules impersonally. City government was becoming bureaucratized.

45 “Most police departments ... assumed the additional responsibility to control narcotics, censor motion pictures, curb juvenile delinquency, and infiltrate trade unions and left-wing groups.” Fogelson, Big-City Police, 106.
46 Weber describes an ideal bureaucracy: “Only the supreme chief of the organization occupies his position of dominance (Herrenstellung) by virtue of appropriation, of election, or of having been designated for the succession. But even his authority consists in a sphere of legal ‘competence.’ The whole administrative staff under the supreme authority then consists, in the purest type, of individual officials ... who are appointed and function according to the following criteria: (1) They are personally free and subject to authority only with respect to their impersonal official obligations. (2) They are organized in a clearly defined hierarchy of offices. (3) Each office has a clearly defined sphere of competence in the legal sense. (4) The office is filled by a free contractual relationship. Thus, in principle, there is free selection. (5) Candidates are selected on the basis of technical qualifications. In the most rational case, this is tested by examination or guaranteed by diplomas certifying technical training, or both. They are appointed, not elected. (6) They are remunerated by fixed salaries in money, for the most part with a right to pensions.... (7) The office is treated as the sole, or at least the primary, occupation of the incumbent. (8) It constitutes a career. There is a system of ‘promotion’ according to seniority or achievement, or both. Promotion is dependent on the judgment of superiors. (9) The official works entirely separated from ownership of the means of administration and without appropriation of his position. (10) He is subject to strict and systematic discipline and control in the conduct of the office.” Max Weber, Economy and Society: An Outline of Interpretive Sociology, vol. 1, ed. Guenther Roth and Claus Wittich (Berkeley: University of California Press, 1978), 220–21. Emphasis in original.

Bureaucratization and Bourgeois Control

Police reforms contributed in several ways to the rise of bureaucracy. The narrowing of the police function promoted bureaucratic development, not only within police departments, but throughout the city government. As elections, health regulations, licensing, and welfare duties were removed from the list of police responsibilities, other municipal departments—other bureaucracies—were created to take over these tasks. A similar process occurred within departments, as civilians began performing clerical, technical, and administrative work.47

The efforts to improve personnel also resulted in increased bureaucratization. Cops were assigned civil service status or military rank, barred from accepting rewards, paid higher salaries, provided better training, and hired and promoted on the basis of exams.48 By rationalizing the selection of personnel and the delivery of services, the new procedures reduced the opportunities for personal favors and patronage, thus cutting machine bosses off from their means of securing support.49

Centralization, likewise, reduced the importance of the local precincts and undercut a strategic base of the ward organizations.50 It also made it possible for such specialized functions as vice control, record-keeping, internal investigations, and detective work to be removed from the precincts and assigned to squads controlled by headquarters.51 This reorganization limited the opportunities for corruption and, again, put them [the police] if you get out and organize, you could become one [of] the strongest political units in the commonwealth.”114

By the end of the 1960s, the trajectory of these developments was clear, and elites started to worry. The New York Times opined, “[A] city cannot be ruled by its police force, any more than a free nation can be ruled by its military establishment.”115 The police, both in their departments and in their unions, were coming to represent a force that could rival the civil authorities. In 1968, Boston mayor Kevin White confessed, “Are the police governable? Yes. Do I control the police, right now? No.”116 In 1972 L.A. city administrative officer C. Erwin Piper said Fi-Po had “more political clout than any other group in city government.”117

Unfortunately, the period of police militancy has outlasted many of the social conditions that produced its rise, and police activism continues to have major political consequences. In 1992, when New York mayor David Dinkins proposed a civilian review committee, the PBA mounted a protest-cum-riot, which Acting Commissioner Raymond Kelly described as “unruly, mean-spirited and perhaps criminal.” According to Kelly’s report, 10,000 off-duty cops took over the steps of City Hall, blocked traffic on the Brooklyn Bridge, damaged property, and assaulted passersby. The response of the on-duty officers was “lethargic at best.”118 Several officers, including one captain and two sergeants, failed to hold police lines, and a uniformed officer—Michael P. Abitabile—waved protestors

47 Fogelson, Big-City Police, 60.
48 Ibid., 59.
49 Ibid., 169.
50 Though centralization undercut the foundation of the machine system, it can also be read as an extension of the earlier process of consolidating municipal power—the very process that established the citywide machines.
51 By 1930, such squads abounded—riot squads, prohibition squads, narcotics squads, gambling squads, homicide squads, robbery units, auto theft teams, missing persons bureaus, bomb squads, bicycle squads, motorcy-

duties and their oath as policemen.” It seems that the PBA saw its own political agenda as defining the scope and content of police duty.

This view was given a fuller expression in August 1968, when PBA president John Cassese issued his own orders concerning police behavior during demonstrations. Cassese instructed PBA members, “If a superior tells a man to ignore a violation of the law, the policeman will take action notwithstanding that order.” When the PBA finally published its full guidelines they turned out to be more bark than bite, as they mostly just paraphrased existing laws and policies, but the episode demonstrated something of the PBA’s aims. In particular, it suggested an emerging system of dual power within police agencies, with commanders and union-leaders sometimes sharing and sometimes competing for control. This situation was a natural outgrowth of earlier struggles for departmental autonomy, like that against the Civilian Review Board.

In the course of these conflicts, the political ambitions of police became more aggressive: they not only sought to insulate themselves from all outside control, but also wanted to exercise control over other areas of the government and public policy. Henry Wise, the lawyer for the Patrolmen’s Benevolent Association, was very optimistic about the organization’s potential: “We could elect governors, or at least knock ’em off. I’ve told...
short, cops became neither soldiers nor bureaucrats; they did, however, cease acting as the pawns of the political machines.

Reformers quickly learned that this administrative independence cut both ways. Historian James Richardson writes:

While civil service procedures reduced some of the politician’s power over the policemen’s working life, they also reduced policemen’s receptivity to reform leadership. Increasingly, the police could follow their own lead, independent both of the party organizations and the innovative administrations.56

Hence, while the new system of administration diminished the influence of machine bosses, it did so by bolstering the position of municipal bureaucracies as independent seats of power. While sometimes frustrating reformers, this arrangement was not wholly disadvantageous for the city administrators, mayors, and politicians, as it let them disavow the police department’s excesses without needing to do anything to stop them. If authority was invested exclusively in the police chiefs, then the chiefs would also incur whatever blame was directed at the department, though they faced few consequences of public disfavor.57 But even the position of the chief of police was not necessarily as strong as it appeared, and discipline was generally limited by the need to maintain the loyalty of those in his command. Egon Bittner observes:

It is exceedingly rare that a ranking police officer can take positive charge of police action, and even in the cases where this is possible, his power to determine the course of action is limited to giving the most general kinds of directions. But like all superiors, police superiors do depend on the good will of

322

the spectacle were dozens of American Nazis and John Birch Society members toting American flags and shouting encouragement to the police.107

The New York review board was defeated by a two-to-one margin—1,313,161 to 765,468.108 Elsewhere during the same period, similar battles were fought more quietly, with police associations convincing city councils or mayors to refuse proposals for review boards—sometimes even dismantling existing boards. Such was the story in Los Angeles, Denver, Cincinnati, Seattle, Detroit, Newark, San Diego, Hartford, Baltimore, San Francisco, and Philadelphia.109

But it is worth noting that the police were not univocal in their opposition to civilian review. In many cases, associations of Black officers openly favored the review proposals.110 In New York, when one such group, the Guardians, released a statement expressing their support of the mayor’s proposal, a PBA spokesman protested, “they put their color before their

56 Richardson, Urban Police in the United States, 85.
57 New York Police Commissioner Howard Leary invited such complaints: “If there is any criticism of the department’s policies, administration, or operations, it should be directed toward the Police Commissioner, because he is the commander.” Quoted in Ed Cray, “The Politics of Blue Power,” in The Police Rebellion, 58.
107 Quoted in Stark, Police Riots, 194.
108 Bopp, “New York City Referendum,” 133.
109 Fogelson, Big-City Police, 286.
110 Lynne Wilson, “Enforcing Racism,” CovertAction Quarterly (Winter 1995–96): 9. The efforts of Black police associations demonstrate the possibility of police support for liberal causes. But these organizations, while stark critics of department policies and a sincere voice for civil rights, always embody something of a compromise. They represent the contradictory positions occupied by Black cops. A Black officer must be constantly aware of his second-class status, even (or especially) within the department. And when he takes off his uniform he merges again, almost wholly, into the mass of people whom it is the cops’ job to regard suspiciously, and sometimes to attack, and always to control. These dual roles mark the boundaries of the Black officers’ political activity. If, for example, Black police associations only represent the “policing” perspective, there is neither any way to differentiate them from the other (White-dominated) police associations, nor any need to. But, if they represent only the “Black” perspective, then they exist only as social or civil rights groups—and as rather conservative ones at that. The result will always be half-measures, which seem radical only by comparison to the department as a whole, and to their White counterparts.
then sponsored an extensive ad campaign and individual officers put anti–review board signs on their cars, distributed literature, and harassed those who campaigned in favor of the board—often while on duty.103

The anti-review board propaganda openly appealed to public anxieties about civil unrest and crime—two issues, in the context of the time, with obvious racial overtones. One poster showed a young girl at the entrance to a subway; its text read: “The Civilian Review Board must be stopped. Her life, your life, may depend on it.”104 Another poster showed a riot-torn street, cluttered with rubble and lined with damaged storefronts. The caption stated: “This is the aftermath of a riot in a city that had a civilian review board.” An August 18, 1966, Reporter editorial titled “License to Riot” worked from the same theme: Did you see the pictures of those Cleveland riots, of Negro thieves running wild, in and out of wrecked establishments, arms loaded? And did you see the cops standing by, idly watching the debauchery? That was the result of a Police Review Board.106

As the November election approached, police tactics became more brazen. The PBA and their supporters packed a meeting about the review board, chaired by Councilman Theodore S. Weiss. Former FBI agent William Turner described the scene: Thousands of off-duty policemen in uniform, with service revolvers strapped on and wearing PBA buttons (the buttons were later removed at the request of the police commissioner) tightly ringed City Hall and packed its corridors. Many carried signs with such slogans as “What About Civil Rights For Cops,” [and] “Don’t Let The Reds Frame The Police.” Adding to the subordinates… Thus, they are forced to resort to the only means available to insure a modicum of loyalty, namely, covering mistakes. The more blatantly an officer’s transgression violates an explicit departmental regulation the less likely it is that his superior will be able to conceal it. Therefore, to be helpful, as they must try to be, superiors must confine themselves to white-washing bad practices involving relatively unregulated conduct, that is, those dealings with citizens that lead up to arrests.58

The protection that the individual policeman once received from his political patron now came from his superior officers. In a formal sense, the police faced more discipline, while in practice they continued to engage the public—or certain parts of it—according to their own judgment. Hence, bureaucratization increased the autonomy of the department as a whole and, ironically, preserved the discretion enjoyed by officers at the lowest ranks.

Yet this gap in accountability was not particularly worrisome to reformers of the time. The Progressive movement, while often credited with improving the quality of public services and reducing corruption, was not especially concerned with protecting the rights of the poor. Reform efforts were not led by Black and immigrant workers, who constituted the usual victims of the police abuse, but by businessmen and professionals.59 The Progressive agenda reflected the

---

105 Quoted in Skolnick, Politics of Protest, 209. Emphasis in original.
106 Quoted in Black, People and the Police, 210–11.
59 “Available evidence indicates that the source of support for reform in municipal government did not come from the lower or middle class, but from the upper class. The leading business groups in each city and professional men closely allied with them instituted and dominated municipal movements.” Moreover: “These reformers ... comprised not an old but a new upper class. Few came from earlier industrial and mercantile families. Most of them had risen to social position from wealth created after 1870 in the iron, steel, electrical equipment, and other industries, and they lived in
ideology and interests of this constituency. By promoting bureaucratic reform, these “respectable” classes sought to ensure their own control over the workings of the local governments. J.W. Hill, an influential reformer in Des Moines, wrote: “The professional politician must be ousted and in his place capable business men chosen to conduct the affairs of the city.” Likewise, I.M. Earle, the general counsel of the Bankers Life Association and a reform advocate, explained, “When the plan [for a commission government] was adopted, it was the intention to get businessmen to run it.”

Put simply, the reformers hoped to break the machines and, at the same time, push working-class immigrants out of politics. Because immigrants generally lived together in distinct neighborhoods, they had been well placed to influence the ward-based machines. So Progressive reforms replaced the newer rather than the older fashionable areas.... They represented not the old business community, but industries which had developed and grown primarily within the past fifty years and which had come to dominate the city’s economic life.” Samuel P. Hays, “The Politics of Reform in Municipal Government in the Progressive Era,” Pacific Northwest Quarterly (July 1964): 159–60.

60 “From the common background and experience the reformers derived a common outlook, at the core of which were three distinct yet clearly related assumptions about American society. First, they believed that social mobility was an economic, private, and individual process, as opposed to a political, public, and collective one, and that success was a result of industry, frugality, integrity, and occasional good luck. Second, they held that political legitimacy was a function of the public interest, the common objectives of the entire community, and not of the parochial interests of particular neighborhoods, ethnic groups, and social classes. And third, they thought that American morality was based on a commitment to abstinence and respectability, an abhorrence of self-indulgence and deviance, and a willingness to employ the criminal sanction to distinguish the one from the other.” Fogelson, Big-City Police, 47.

That same year, Charles Stenvig, a former police detective and the business manager of the Minneapolis Police Officer’s Federation, was elected mayor, having run solely on a law-and-order platform. Stenvig convinced patrolmen to campaign for him. When an interviewer asked one officer, “Did you introduce yourself as a patrolman?” the officer responded: “Sure. That was the whole point. The idea was to convince people that a cop would know how to bring peace back to the community.”

At times, such political efforts—especially electioneering—crossed lines of decorum. In 1964, many departments had to issue special orders to prevent officers from wearing Goldwater or Wallace buttons on their uniforms, or from putting campaign stickers on squad cars. Some cops even handed out campaign literature while on duty.

In each arena, whether their efforts involved electioneering, lobbying, or strikes, the police pursued a conservative agenda—specifically one that increased the power, autonomy, and central role of law enforcement. L.A.’s Firemen’s and Policemen’s Protective League (“Fi-Po”) represented the direction of the new activism; it lobbied for counter-subversive laws, promoted right-wing rallies, sponsored conservative speakers, and sold businesses a blacklist naming union organizers and radicals.

“No justice! No police!”

In July 1966, New York supplied the first real test of this newfound power. Mayor John Lindsay made good on one of his campaign promises, restructuring the city’s police complaint board to include a civilian majority. The Police Benevolent Association immediately and vigorously attacked the plan, eventually forcing the issue to the ballot. The PBA

society: the emergence of the police as a self-conscious, organized, and militant political constituency, bidding for far-reaching political power in their own right.”

The police also returned to open electioneering—like in the machine days, but with a difference. Rather than owing allegiance to their patrons and taking orders from the ward bosses, the police had developed into a constituency for the politicians to wow and woo. Police support could make or break a candidate, and once in office the politician owed his allegiance to the cops, rather than the other way around.

Some politicians made the most of the new balance of power. Philadelphia police commissioner, and later mayor, Frank Rizzo deftly exploited the political potential of the department, building himself a career while at the same time amplifying the power of the police and increasing their independence. Under Rizzo’s guidance, the police department became the unrivaled foundation of his power.

It wasn’t long before police unions started producing their own candidates, and served in some places as a ladder into office. In 1969, Wayne Larking, who had served as head of the Police Officer’s Guild, was elected to the Seattle City Council.

62 Fogelson, Big-City Police, 42.

63 The reformers emphasized the representative aspects of government at the expense of its participatory aspects. “According to the liberal view of the Progressive Era, the major political innovations of reform involved the equalization of political power through the primary, the direct election of public officials, and the initiative, referendum, and recall. These measures played a large role in the political ideology of the time and were frequently incorporated into new municipal charters. But they provided at best only an occasional and often incidental process of decision-making. Far more important in continuously sustained day-to-day processes of government were those innovations which centralized decision-making in the hands of fewer and fewer people.” Hays, “Politics of Reform,” 163.

64 Fogelson, Big-City Police, 47, 62–63.

65 Stark goes on: “Indeed, in their new mood the police reject their historic role as the enforcers of established political and social policies. They now seek the power to determine these policies... [This pursuit] causes them to challenge radically the authority of their own commanders, the courts, civil authorities, and constitutionality.” Stark, Police Riots, 192–93.

66 In 1995, California Common Cause observed: “If legislators vote against bills supported by police interests, they know they run the risk of being labeled as ‘soft on crime,’ even if the legislation has nothing to do with public safety. The last thing a legislator wants in an election year is to lose the endorsement of police groups, or worse yet, end up on their hit list.” Quoted in Lynne Wilson, “Cops vs. Citizen Review,” CovertAction Quarterly (Winter 1995–96): 11. See also: Max Gunther, “Cops in Politics: A Threat to Democracy?” in The Police Rebellion.

67 In 1995, California Common Cause observed: “If legislators vote against bills supported by police interests, they know they run the risk of being labeled as ‘soft on crime,’ even if the legislation has nothing to do with public safety. The last thing a legislator wants in an election year is to lose the endorsement of police groups, or worse yet, end up on their hit list.” Quoted in Lynne Wilson, “Cops vs. Citizen Review,” CovertAction Quarterly (Winter 1995–96): 11. See also: Max Gunther, “Cops in Politics: A Threat to Democracy?” in The Police Rebellion.

heads and other administrators who are able to command the support of professional associations and civic groups become indispensable to the mayor and are therefore harder for him to control. Whereas the spoils of office formerly went to “the boys” in the [vote-]delivery wards in the form of jobs and favors, they now go in the form of urban renewal projects, street cleaning, and better police protection to [public opinion-producing] newspaper wards.65

The poor did not control, or especially benefit from, the political machines. But the machines required their participation and offered them something in return. The emerging bureaucracies of the Progressive Era, in contrast, were designed to limit their participation. The poor did not control these either, and the new system offered them terribly little.

Machine rule was replaced with the more subtle power of the capitalist class. Where local government had been administered according to strictly material incentives, it was now guided by administrative norms and the formal rules of bureaucracy, backed with the moral standards and political ideology of the Protestant bourgeoisie. This victory was ironic, in a sense, because Progressive rhetoric centered on “taking the police out of politics,” and conversely, “taking the politics out of policing.” Though the reforms did grant police commanders a fresh independence from the demands of politicians, the idea of taking the politics out of policing was doomed at the outset—as ridiculous a notion as taking the politics out of government. As Robert Fogelson argues:

Far from being mere administrative bodies that enforced the law, kept the peace, and served the public, the police departments were policy-making agencies that helped to decide which laws were enforced, whose peace was kept, and which public was served.... [The] police thereby exercised a great deal of influence over the process of mobility, the distribution

department91 and the autonomy of individual officers.92 But unionization took the latter as one of its principle aims, and for that matter, sought to provide the lowest-level officers collective power over the institution as a whole.93

As the police unions grew, they set about negotiating policy matters, including those governing patrols, deployment, and discipline.94 As Jerome Skolnick noted, the agenda quickly broadened to include “questions of social policy, including which type of conduct should be criminal, societal attitudes toward protest, the procedural rights of defendants, and the sufficiency of resources allocated to the enforcement of the criminal law.”95 These efforts represented what sociologist Rodney Stark recognized as “a phenomenon new to American

65 Banfield and Wilson, City Politics, 127.
ingly resentful of the police. As we have seen, this antipathy bore bitter fruit in the years that followed.

**Unionization and Blue Power**

Today’s police unions are the bastard children of the mid-century professionals. Though earlier union efforts had met with little success, the fissures and contradictions of the professional agenda helped create conditions that made unionization possible. While the rhetoric of professionalization lent legitimacy to demands for higher pay and greater autonomy, the prescriptions of the reformers alienated the regular officers and produced additional strife with the public. This situation created new tensions within police departments and brought the idea of unionization back to the fore.

Though coming as a direct result of the attempts to professionalize policing, union organizing efforts were of a quite different character. The movement for police unions reflected a working-class labor perspective rather than a middle-class professional agenda, and found its support with the mass of patrol officers rather than with commanders. The International Association of Chiefs of Police recognized this difference as crucial, and described unionization as sounding “the death knell of professionalization.”

The influence of unionization has extended far beyond such basic matters as wages, working conditions, and grievances. Unionization, like the previous two waves of reform, had the general effect of increasing the institutional autonomy of the

90 Quoted in Ibid., 207. Emphasis in original.
the delineation of available options. It is through hegemony that the ruling class creates a bounded sphere of institutional autonomy. Without need of conspiracies or actual censorship, its ideological ascendancy determines in advance which issues will be raised, which debates will be aired, and ultimately, whose interests will be considered and whose rights respected.

Professionalization: A Conspiracy Against the Laity

Despite the limitations of their actual reforms, the Progressives’ ideology prevailed, and a perspective that was both Nativist and bureaucratic became the accepted view of newspapers, churches, commercial organizations, civic associations, universities, and other opinion-makers. It also, predictably, found an audience among police administrators.

A second wave of police reform originated from within law enforcement. More specifically, it was brought to policing by newcomers to the field. During the 1930s, depressed economic conditions made police work attractive to the large numbers of men seeking steady employment. Police departments became more selective, and the sudden influx of middle-class officers—many of whom shared the values of the Progressive

70 Fogelson, Big-City Police, 136, 138.
71 Ibid., 143; and Lipset, “Why Cops Hate Liberals,” 30.
72 Richardson, Urban Police, 137–38. By 1940, half of the new recruits to the NYPD had bachelor’s degrees. This marked a significant change since...
were thus framed as professional matters with which the uninitiated should not be trusted to interfere.

The move toward professionalization embodied both a continuation of and a reaction against the bureaucratization of policing. The advocates of professionalization, usually police administrators, envisioned their project as an extension of the bureaucratic reforms, with an increased emphasis on the quality of recruits and higher public esteem for the occupation. The rank-and-file officer, on the other hand, had a very different notion of what professionalization implied: “The professionally-minded patrolman,” James Richardson explains, “wants to act according to his evaluation of the situation and not according to some bureaucratic directive.”

Professionalization very clearly promoted police autonomy, but it was deeply ambivalent about what this meant for the management of departments. Did professionalization only require the autonomy of the institution relative to the civilian authorities, or did it also demand the autonomy of the patrolman relative to departmental control? In practice the second followed from the first, as commanders sought to protect themselves from criticism. Rather than exposing abuses and disciplining the officers, internal affairs investiga-

---

84 Carl Klockars argues from this basis that the term “professional” was primarily of rhetorical value: “The fact is that the ‘professional’ police officer, as conceived by the professional police model, was understood to be a very special kind of professional, a kind of professional that taxes the very meaning of the idea. The distinctive characteristic of the work of professionals is the range of discretion accorded them in the performance of their work. By contrast, the police view of professionalism was exactly the opposite. It emphasized centralized control and policy, tight command structure, extensive departmental regulation, strict discipline, and careful oversight. While the professional model wanted intelligent and educated police officers and the technological appearance of modern professionals, it did not want police officers who were granted broad, professional discretion. It wanted obedient bureaucrats.” Carl Klockars, “The Rhetoric of Community Policing,” in The Police and Society, 433.

85 Richardson, Urban Police, 148–49.

---

reformers—changed the character of the institution. This “new breed” of officer found their backgrounds and ideals in conflict with the lowly status of their jobs and the ideology of the departments, but thanks to the civil service procedures, they soon moved through the ranks and into command positions.

The new police reformers retained Progressive assumptions about the purpose of the police, the need for its leaders to be autonomous, and the nature of political legitimacy, but were motivated by their own immediate frustration with the low level of respect accorded the occupation. Despite the previous wave of reforms, the police had remained ineffective and often corrupt. Departments were badly managed, with little forward planning, poor supervision, and no rational division of labor. Though formal standards and bureaucratic civil service procedures did exist, the personnel were poorly trained and generally undisciplined.

Faced with these conditions, the “new breed” sought to professionalize policing, and thereby raise their social standing. Beginning in the late 1920s and early 1930s, they developed a model of professionalism that achieved prominence in police circles by mid-century. This model emphasized strict admission standards, extensive training, a high level of technical knowledge, and a devotion to service and a commitment to the public interest. By becoming a profession, the reasoning went, police could improve the quality of their work, raise

74 Fogelson, Big-City Police, 144–46, 150–52.
75 Ibid., 154–55. Sociologists identify professions by six characteristics: (1) skills based on theoretical knowledge; (2) education and training; (3) competence ensured by examinations; (4) a code of ethics; (5) provision of a service for the public good; and (6) a professional association that organizes members. Abercrombie et al., The Penguin Dictionary of Sociology, s.v. “Profession.”
their own status, and further insulate themselves from outside interference.76

The professional movement overlapped chronologically with the latter part of the Progressive Era, and the new reforms continued some of the efforts begun by the Progressives. For example, they continued the project of reorganizing departments along functional lines and managed to close more precincts, extending the reliance on special squads and streamlining the hierarchy. While these changes did further diminish the influence of neighborhood bosses (whose power was already in decline), they often just shifted corruption from the wards to the squads. In a textbook case of failed reform, Chicago mayor Richard Daley responded to a 1960 burglary-ring scandal by replacing Police Commissioner Timothy J. O’Connor with reform luminary O.W. Wilson. Wilson set about professionalizing the department, removing corrupt or incompetent commanders, instituting a system of promotions based on seniority and competitive exams, and closing seventeen of the thirty-eight district stations—but corruption continued unabated. A 1964 Justice Department report revealed that a score of Chicago cops, including an internal affairs investigator, were running a protection racket.77

Reformers took steps to regulate the quality of the personnel, using physical examinations, education requirements, character checks, and the civil service process to weed out undesirable applicants.78 Whether these measures succeeded in “improving” the quality of recruits is another matter. Critics at the time denounced the professional ideology as elitist,79 and in many cities, the new requirements were used to prevent racial minorities from joining the force.80

The reform commanders seemed to want to fill departments with recruits whose backgrounds and values resembled their own, but the practical consequences of these changes were not what their advocates had intended. When the economy recovered from the Depression, the “professionalized” departments had trouble attracting and keeping recruits. The pay had not kept pace with that of other occupations, prestige was still lacking, and new officers could only enter the department at the lowest level.81 Since the best cops did not always advance through the ranks, and the worst were seldom removed, stagnation set in. The quality of leadership suffered, and the police became increasingly isolated.82

Compared to the Progressives, the advocates of professionalization had more success in instituting their prescribed reforms, but they did no better in achieving their ultimate aims. The status of the police did not come to equal that of doctors and lawyers, and the departments were only mildly cleaner than before. The main effect of professionalization was to increase police autonomy. And professionalization, like bureaucratization, not only institutionalized that autonomy, but helped to legitimize it.83 The discourse surrounding professionalization encouraged institutional problems to be thought of in technical terms, and thus referred to the “experts”—the police. Issues of accountability and oversight

Cromitie’s case, though pathetic, was hardly exceptional. In November 2010, the FBI arrested a Somali-American teenager for trying to bomb a public Christmas-tree lighting ceremony in Portland, Oregon. In 2009, Mohamed Mohamud, had tried to email a terrorist recruiter in Yemen. The FBI had intercepted the message and, almost a year later, sent two undercover agents to contact Mohamud. Over the course of months, the agents helped him design a bomb plot, taught him how to detonate the bomb, gave him $2,700 for rent, and supplied both the van and the (fake) car bomb. Mohamud was arrested after trying to trigger the explosion. His attorney argued that he had been entrapped, but a jury convicted him and the judge—who said that the FBI’s actions amounted to “imperfect entrapment”—sentenced him to thirty years just the same.

Reviewing all 508 federal terrorism cases filed in the decade following the 2001 attacks, journalist Trevor Aaronson found that “243 had been targeted through an FBI informant, 158 had been caught in an FBI terrorism sting, and 49 had encountered an agent provocateur.” The majority of those remaining were just “small-time criminals with distant links to terrorists overseas.” Of that lot, seventy-two were arrested for making false statements to investigators, and 121 faced immigration charges. “Of the 508 cases,” Aaronson concludes, “I could count on one hand the number of actual terrorists.”

167 For details on the Cromitie case and numerous other examples, see *Illusion of Justice*, especially pages 21–59.
170 Aaronson, *Terror Factory*, 15. A report from the Congressional Research Service likewise observes, “U.S. law enforcement has employed two tactics that have been described by scholars as the ‘Al Capone’ approach and the use of ‘agents provocateurs.’ The Capone approach involves apprehending individuals linked to

157 What has sometimes been hailed as a post-modern end to state sovereignty is in reality the modern state reaching maturity, drawing in additional elements, incorporating new sources of influence and legitimacy, and adjusting the balance of power accordingly.

Organizations and power networks win influence over the state according to their ability to aid or impede its operation (or to contribute to the aims of other institutional actors). Sometimes this influence will be established through sharp conflict and the decisive victory of one faction over another. More usually, however, it will be settled through a process of negotiation and bargaining. The latter is generally preferable, not only because it carries fewer costs than all-out battle, but also because by sharing power the various interests can oftentimes increase the power that is there to be shared.

Within these networks, [Clayton Szczech writes,] power is not simply wielded instrumentally by the autonomous state over social actors, or conversely by dominant social groups over a neutral or powerless state. Rather, power is to some extent *created* within these networks.... [I]t arises out of a relationship of dependence between state and social actors. Each actor provides something that the other cannot obtain on its own, and the power (or autonomy) of each is hence increased by the relationship.

158 Szczech, “Beyond Autonomy or Dominance,” 19. Emphasis in original. Again, Smith: “With policy networks, power is a relationship based on dependence and not a zero-sum. Power is something that develops within relationships between groups and state actors, and a policy network is fre-
In the case of police officers, police administrators, police departments, and police unions, this dynamic is at work simultaneously on several levels. Individual officers share in the authority of the department, while the department maintains its power through the concerted efforts of its individual members. By joining together in independent associations, the member officers can effectively shape the policies and operations of the department, and can sometimes influence the policies and priorities of the government more broadly. When police unions and administrators make common cause, they can pressure the civil authorities to increase the power, resources, and independence of the department—because, to a certain extent, the civil authorities are always dependent on the cooperation of the police to defend their power and enforce their will. Meanwhile, as the departments become more prominent as institutions, the share of power controlled by administrators and the unions increases proportionately—and the department finds itself well placed to form alliances with other government agencies (and sometimes private enterprises), enhancing the bargaining power of each. And, in the process, departmental quently a mechanism for enhancing mutual power rather than taking power from one or the other.” Smith, Pressure, Power and Policy, 7.

159 Again, the tendency toward corporatism is discernible. “Monopolistic and hierarchical groups have the resources to negotiate with governments because they have the ability to implement any decisions which are agreed. Under corporatism, the role of groups is regulatory as well as representative. They are responsible for ensuring that their members accept agreed policy decisions.” Ibid., 31.

160 Szczech’s thesis studies one manifestation of this process, the 1990s wave of prison expansion: “The expansion of the U.S. prison system has clearly augmented the power of criminal justice institutions and actors considerably. This came about however, through a political process of networking that has also increased the power and resources of social actors: prison guards’ and police unions, firms that contract with prisons, and rural communities that would otherwise have faced economic depression. Likewise, prison expansion has not increased the power or autonomy of the state as a whole. The fiscal costs of imprisonment have entailed severe fiscal cutbacks

The essence of what occurred here is that a government, understandably zealous to protect its citizens from terrorism, came upon a man both bigoted and suggestible, one who was incapable of committing an act of terrorism on his own…. It created acts of terrorism out of his fantasies of bravado and bigotry, and then made those fantasies come true…. I suspect that real terrorists would not have bothered themselves with a person who was so utterly inept…. Only the government could have made a terrorist out of Mr. Cromitie, whose buffoonery is positively Shakespearean in scope.”162

The defendant in the case, James Cromitie, was unemployed, mentally disabled, recovering from addiction, and suffering schizophrenia. An FBI informer offered him and three accomplices $250,000 to fire rockets at the Stewart Air National Guard Base and plant a bomb in a synagogue, while also making vague threats should they back out.163 Judge McMahon acknowledged, “There is no way that these four defendants would have dreamed up the idea of shooting a Stinger missile at an airplane or anything else; there is certainly no way they could have acquired a Stinger missile, operative or inert, unless the government provided them one.”164 Nevertheless, all four defendants were convicted and sentenced to twenty-five years in prison, the minimum allowable under the law.165 Reviewing the case on appeal, Judge Reena Raggi observed, “The government came up with the crime, provided the means, and removed all relevant obstacles.”166

and 700. Most of those detained were in the country legally. The registration requirements thus present immigrants with a classic catch-22: either comply with the law and risk detention, or violate the law and risk arrest. In the first year of the program, 83,310 immigrants registered and 13,740 were deported as a result. None were convicted of terrorism.

The FBI uses the threat of arrest and deportation to pressure Muslims to become informants. Or sometimes, federal agents resort to simple blackmail. In Operation Flex, the FBI recruited Craig Monteilh to enter the Orange County Muslim community and sniff out immigration violations, illicit affairs, drug use, or other minor misdeeds that the feds could use as leverage when recruiting other informers. “They wanted information that they could use to blackmail people,” Monteilh stated frankly.

In addition to using underhanded means to persuade, pressure, or outright bully people into becoming informants, the FBI was using equally unsavory tactics to convince foolish, desperate, or unstable people to become terrorists. In the typical case, an informant finds some sucker with dreams of a holy war, develops a relationship with him, and helps put together an (ultimately fictitious) mission. Posing as a representative of al Qaeda or some other outfit, the provocateur supplies the mark with all the ingredients for an attack—except the actual explosives—and then has him arrested. As U.S. District Judge Colleen McMahon explained in reviewing one case:

159 Johnson, Age of Anxiety, 469.
161 Quoted in Ibid., 106 administrators and union leaders alike can increase their personal influence.

This analysis is in keeping with the historical development of the state. Charles Tilly explains:

Because no ruler or ruling coalition had absolute power and because classes outside the ruling coalition always held day-to-day control over a significant share of the resources rulers drew on for war, no state escaped the creation of some organizational burdens rulers would have preferred to avoid. A second, parallel process also generated unintended burdens for the state: as rulers created organizations either to make war or to draw the requisites of war from the subject population—not only armies and navies but also tax offices, customs services, treasuries, regional administrations, and armed forces to forward their work among the civilian population—they discovered that the organizations themselves developed interests, rights, perquisites, needs, and demands requiring attention on their own.

Within this theoretical framework, it is possible to briefly re-interpret the history of policing. The use of legitimate violence, which was originally the “property” of individual slaveholders, and reduced capacity in nearly every other governmental sector, especially social welfare.” Szczech, “Beyond Autonomy or Dominance,” 85.

161 “Unions, as so many authors have noted, are a source of personal mobility. Union officialdom becomes a career in itself, and union officials act to preserve their privileges. Collusive bargaining offers a number of advantages to union leaders in this position. By engaging in collusive bargaining, association leaders win concessions for their members without engaging in strikes (which are always costly and problematic in the public sector where strong prohibitions still persist). Union leaders are also likely to increase personal mobility further through access to public figures, new job opportunities, and consultantships. But those benefits are not free. In trade, the union leaders must become ‘responsible’ in the eyes of the city government. This means that they must be able to assure the relatively uninterrupted delivery of services and agree to some programmatic innovations.” Levi, Bureaucratic Insurgency, 21.

162 Tilly, Coercion, 117.
heads of households, and various secular and ecclesiastic authorities, was slowly formalized and consolidated. On the local level, this process produced slave patrols and then police. Initially, the police were highly dependent on local patrons and served as the instruments of political machines. As the capitalist class and its middle-class supporters took control of the government, the police were transformed to a tool of class rule. The destruction of the machines, however, required the creation of formal bureaucracies, which quickly came to develop interests of their own and started to formulate their own demands. The police were the prototypical bureaucracy, and the following wave of professionalization only further decreased their dependence on the municipal administration while reinforcing the organization’s loyalty to the ruling class. The police rebellion came when the lowest ranking officers reacted against the demands of professionalization while taking advantage of the autonomy it granted. They organized independently and began presenting demands at every level—of administrators, of city and state officials, of legislatures, and of society. Because a strike would disrupt the city government’s power and therefore also weaken the state’s protection of the ruling class’s interests, the rank and file held enough control over the state’s coercive apparatus to credibly threaten its access to force, even if they could not fully mobilize it for their own purposes. By this telling, the coup of police unionization did not represent a sharp break from the institution’s previous development, but instead signaled a new step in the pre-existing pattern. The emergence of the police as social and political actors marked the maturity of the institution.

The police have always been thugs, but they have traditionally been thugs in the service of elites. The crises of the 1960s produced an outbreak of police hooliganism directed against the citizenry (especially Black people, students, and radicals) and a revolt against their own commanders and the civil authorities. The police, in short, became self-conscious political

violations until the authorities could be convinced of their innocence; they were then either released or deported.\footnote{CCR, “State of Civil Liberties,” 7; and Lichtblau, “Response to Terror.”}

In a typical case, Hady Hassan Omar, an Egyptian national, fell under suspicion because he made airline reservations from a Kinko’s computer. On the basis of this questionable conduct, he was arrested, held for two months, and then released without charges.\footnote{Cole, “Trading Liberty.”} Or, to take another case: Shahin Hajizadeh, a legal resident awaiting his permanent status, appeared at the INS office in Los Angeles to comply with regulations requiring the registration and fingerprinting of all Middle Eastern men over sixteen years of age. He was detained, kicked in the ribs by a guard, and placed in an overcrowded cell without adequate food, water, or bathroom facilities. He was then transferred to an unheated cell in the desert town of Lancaster, allowed to sleep for about an hour, moved back to L.A., and released.\footnote{James Sterngold, “Iranians Furious Over INS Arrests: Abuse Alledged After Men Agreed to Register in L.A.,” \textit{San Francisco Chronicle}, December 21, 2002, accessed December 21, 2002, database: NewsBank Full-Text Newspapers.}

Hajizadeh was just one of hundreds of Middle Eastern men detained while attempting to comply with the new rules. As usual, the government refused to cite exact figures, but put the number arrested somewhere “in the low two hundreds.”\footnote{Quoted in Nita Leyveld and Henry Weinstein, “INS Arrest Numbers Inflated, U.S. Says: Officials Accuse Groups of Exaggerating Figures Involving Immigrants from Muslim Communities,” \textit{Los Angeles Times}, December 20, 2002, accessed December 21, 2002, database: NewsBank Full-Text Newspapers.} Civil rights activists, attorneys representing the detainees, and anonymous immigration officials put the number between 500

154 CCR, “State of Civil Liberties,” 7; and Lichtblau, “Response to Terror.”

155 Cole, “Trading Liberty.”

Register, Detain, Infiltrate, Entrap

Predictably, the new government powers were first used against the Muslim community.

In the months following the September 11 attacks, the FBI rounded up an unknown number of Middle Eastern immigrants. (The Justice Department stopped counting at 1,147, and the ACLU estimated that the total may have been as high as 5,000 people.) Many detainees were held incommunicado. They were commonly denied legal representation and their families were not told where—or in some cases, whether—they were in custody. While Attorney General John Ashcroft called the detainees “suspected terrorists,” none were charged with a crime related to terrorist activity. In fact, the Justice Department estimated that only ten or twelve of those held were connected to al Qaeda, and documents released under the Freedom of Information Act show that, of the first 725 arrested, 300 were of no interest to any terror investigation. Yet in a clear inversion of the presumption of innocence, the detainees were held under the pretext of minor immigration

---

especially in times of crisis when that power is challenged. Under these conditions, though it may require shifting power and resources to the criminal legal system at the expense of other state enterprises, the police may—in part because of their high level of independent organization—be effectively used by the dominant group. But if the police mutiny for either material or ideological reasons, or if they begin to make demands that the government cannot accommodate, police control of institutional resources may threaten the power of civil authorities. Under such conditions, the civil authorities will feel compelled to break the police unions for the sake of preserving their own position.

Is there a genuine danger of the police becoming the dominant force in society, displacing the civilian authorities? A simple armed revolt would invite intervention at the state or federal level, and would surely fail. But, it is conceivable that the police could seize control of a local government if they proceeded with a combination of electoral and bully-boy tactics, on the Rizzo and Giuliani model. For the police to seize control nationally, they would either need to be networked on that level to a greater extent than they are presently, or else gain the assistance of some other institution (e.g., the military).

Is this a problem for the ruling class? Might it, under certain conditions, be to their favor? Logically speaking, it is possible that police-rule would favor the ruling class. Capitalists may feel that the cops are more willing or able to defend their interests than are the civilian authorities. Such may especially be the case if the authorities are so divided as to threaten regime collapse, while the police retain the unity necessary to take control and keep order. The significance of the 1967 riots for the Detroit police strike is precisely this: the state is more tolerant of some rivals than others, more willing to accept some challenges to its power than others, and more ready to bargain with its long-term allies than to face defeat at the hands of immediate antagonists. As rebellions go, a police rebellion

Department. The new Department of Homeland Security centrally manages tasks related to sharing information, monitoring electronic communications, regulating the borders, responding to emergencies, and coordinating local antiterrorism efforts. It includes 74,300 armed federal agents and takes on many of the tasks formerly performed by the Immigration and Naturalization Service (INS), Customs, the Coast Guard, and the Border Patrol. The FBI, meanwhile, was ordered to "shift its primary focus from investigating and prosecuting past crimes to identifying threats of future terrorist attacks." In the decade that followed, the Bureau more than doubled the number of its agents assigned to national security cases. It created seventy-one new Joint Terrorism Task Forces, bringing the total to 106 JTTFs, involving 4,400 officers from more than 650 organizations. And it amassed 700 million terrorism files, listing 1.1 million suspects.

146 John Ashcroft. Quoted in Eric Lichtblau et al., “Response to Terror: Justice Dept. to Tighten Focus on Terrorism Law,” Los Angeles Times, November 9, 2001, accessed November 11, 2001, database: News Collection from Dialog@CARL.
147 In early 2001, the FBI had approximately 10,000 agents, 30 percent (roughly 3,000) of whom had national security assignments. By 2011, it had 14,000 agents, with 50 percent (7,000) working national security. Jerome P. Bjelopera, “The Federal Bureau of Investigation and Terrorism Investigations” (Congressional Research Service, December 28, 2011), 2.
149 Weiner, Enemies, 448.
Predictably, by authorizing such practices while preventing any effective oversight, the law opened the door for more and greater abuses of power. But the full extent of domestic surveillance wasn’t clear—if, in fact, it is understood now—until in 2013 Edward Snowden, an intelligence contractor, leaked documents showing that in 2010 the National Security Agency intercepted 1.7 billion domestic communications each day, forwarding what it found to the CIA and FBI, practically without oversight.\textsuperscript{138} As Snowden explained his job at the NSA: “I, sitting at my desk, could wire-tap anyone, from you or your accountant, to a federal judge or even the president, if I had a personal email.”\textsuperscript{139} Glenn Greenwald summed it up: “Taken in its entirety, the Snowden archive led to an ultimately simple conclusion: The US government had built a system that has as its goal the complete elimination of electronic privacy worldwide.”\textsuperscript{140} In fact, General Keith Alexander, who headed the Agency from 2005 to 2014 took as his personal motto the phrase “Collect it all.”\textsuperscript{141}

In short, the first years of the new century saw the complete restructuring of the American security forces. The Patriot Act increased information-sharing between the FBI, CIA, NSA, immigration authorities, and Secret Service, and granted them access to previously off-limits grand jury information.\textsuperscript{142} A year later, the Homeland Security Act incorporated 170,000 employees from twenty-two agencies into an integrated domestic anti-terrorism apparatus, representing the largest bureaucratic re-organization since the creation of the Defense

\textsuperscript{139} Quoted in Ibid., 157.

\textsuperscript{141} Quoted in Ibid., 95.
\textsuperscript{142} ACLU, “USA Patriot Act.”
modern police forces marked an unprecedented incursion on the part of the state into the lives of the citizenry, and signified in retrospect a clear step toward totalitarianism.\textsuperscript{164} As the police institution has evolved, it has become a major source of power not only \textit{for} the state, but \textit{within} the state. This achievement represents another step in the same direction: as the institutions of violence become more autonomous, they isolate themselves from democratic control. That is bad enough, surely—but as these same institutions gain influence over policy and social priorities, they inhibit the representative aspects of other parts of government. Blue Power reduces the possibility of democracy.

While the police were undergoing their metamorphosis—from instrument of the machines to bureaucratic apparatus of class rule, to independent political force—they were simultaneously challenging democracy in other ways and expanding their social influence in some surprising directions. The task of the police in preserving race and class hierarchies made them experts in suppressing dissent, and police departments quickly developed specializations in this regard. More recently, as we shall see, these same designs have led them to seek ever-more involvement and greater shares of influence in aspects of social life quite removed from law enforcement.

surveillance, while limiting judicial oversight.\textsuperscript{134} It’s definition of “material support” for terrorism is so “vague” that former president Jimmy Carter expressed concern that “we [at the Carter Center] will be prosecuted for our work to promote peace and freedom.”\textsuperscript{135} His worry may well be real: The Holy Land Foundation was convicted under the material support provision for funding Palestinian charities that also received assistance from the U.S. government. The government did not even allege that Holy Land money found its way to terrorists, but merely that the programs it funded lent Hamas an air of legitimacy.\textsuperscript{136} It is hard to conceive of a more purely political prosecution.

The Patriot Act also reduced protections for individual privacy by encouraging secret searches, increasing eavesdropping, and removing many protections for confidential information. Section 213 allows police to search a person’s property without notifying her that a warrant has been issued. Likewise, Section 216 allows for increased surveillance of electronic communication, removes most restrictions on the use of wiretaps, and substantially limits the role of judicial review, essentially giving law enforcement a free hand to monitor telecommunications.\textsuperscript{137}

\textsuperscript{164} See chapter 3.

\textsuperscript{134} For an overview of the USA Patriot Act and its legal ramifications, see: Nancy Chang, “The USA Patriot Act: What’s So Patriotic About Trampling on the Bill of Rights?,” \textit{CovertAction Quarterly} (Winter 2001).

of their activities. Around the country, police pressed for increased powers and sought relief from the limits imposed in the 1970s.\textsuperscript{130}

Just weeks after the attacks, Congress did its part to advance the domestic espionage agenda, passing the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA Patriot) Act.

The \textit{Washington Post} described the law:

Molded by wartime politics and passed … in furious haste, the new antiterrorism bill lays the foundation for a domestic intelligence-gathering system of unprecedented scale and technological prowess, according to both supporters and critics of the legislation…. The bill effectively tears down a legal fire wall erected 25 years ago during the Watergate era….\textsuperscript{131}

Or, as the ACLU’s Dave Fidanque put it, "this is the dawn of a new day in secret government."\textsuperscript{132}

The Patriot Act represents the Palmer Raids and Watergate-style black bag jobs, rolled into one and stamped with congressional approval.\textsuperscript{133} Passed and signed on October 26, 2001, this law expanded the definition of “terrorism,” formalized guilt by association, reduced the legal rights of immigrants, and granted the police greater powers to conduct

\section*{7: Secret Police, Red Squads, and the Strategy Of Permanent Repression}

Police intervention during industrial strife has had a complex legacy, producing detailed riot control strategies and specialized units to handle political intelligence. Judging by appearances, one might not think that these two sets of activities have very much to do with each other. Riot cops wear full protective gear and operate in ways that are by definition very public. Police spies usually wear no uniform at all, and their activities are often covert. The targets are generally unaware of police intelligence activity; the public at large barely recognizes its existence. But historically, red squads were formed with crowd control in mind, and took on their secret police functions later.\textsuperscript{1} Separate divisions now generally handle these duties, but their operations remain connected at the root.\textsuperscript{2}

\subsection*{Haymarket: “Anarchy is on trial.”}

The role of police in crushing dissent, and the place of intelligence work within that pursuit, began to take shape in 1886 in response to the movement for an eight-hour workday. In May of that year, the nation saw a wave of strikes demanding “Eight hours for work. Eight hours for sleep. Eight hours for
what you will.”

Much of the action was centered in Chicago, where on May first, 40,000 workers walked off the job, and were joined a few days later by 25,000 more.

On May 3, police shot and killed four workers picketing the McCormick Harvester Works. Enraged, August Spies—an anarchist—printed a forceful handbill calling for an open-air meeting on May 4 in Haymarket Square. The flier was headed “Workingmen, To Arms,” and encouraged workers to come prepared to defend themselves. The rally began as a typical affair. Three thousand people came to listen to speeches, but as the evening wore on and storm clouds gathered, their numbers dwindled to just a few hundred. At last, when the final speaker was on stage, 180 police appeared and ordered the crowd to disperse. In response, someone from the crowd—it has never been determined who—threw a bomb into the line of police. Seventy-six cops were injured, seven later died. The police immediately opened fire, killing about a dozen of the crowd and injuring 200 more (as well as hitting some of their own).

The Haymarket bomb cost the eight-hour movement dearly, dividing the radicals from their natural base of support—unionists—and setting off the first serious red scare in American history.

In terms of official repression, the twenty-first century may come to surpass the twentieth. Repressive operations have only escalated, and accelerated, since the September 11, 2001, attacks on the Pentagon and the World Trade Center. Both the domestic security forces and the military have used the climate of fear following the attacks to justify radical expansion of their powers.

“A New Day in Secret Government”

In terms of official repression, the twenty-first century may come to surpass the twentieth. Repressive operations have only escalated, and accelerated, since the September 11, 2001, attacks on the Pentagon and the World Trade Center. Both the domestic security forces and the military have used the climate of fear following the attacks to justify radical expansion

fences to blockade a four-block area around the home of the organization’s members. From May 1977 until March 1978, the Powelton neighborhood came to resemble an internment camp. Under the command of red squad lieutenant George Fencl, the area was only accessible through a police checkpoint. Residents were required to show ID to enter, and were escorted to their homes by police; friends and family were only permitted inside if they had been previously listed by residents, and if they received police approval. Residents could only leave their homes with permission from the police.\footnote{AFSC, Police Threat to Political Liberty, 48–49.} The whole operation cost $2 million, required 1,000 officers, and ended with a shoot-out. One cop was killed, and eighteen other people injured (twelve police and firefighters, six members and supporters of MOVE). The siege ended with the beating of MOVE leader Delbert Africa as he tried to surrender.\footnote{Donner, Protectors of Privilege, 238.}

A few years later, in 1985, the neighborhood suffered another poorly conceived police action. Allegedly trying to serve four arrest warrants, cops fired into the MOVE house, and then used a helicopter to bomb the building. Eleven people were killed, including five children.\footnote{Ibid.} Sixty-one homes were destroyed in the fire that followed, leaving 250 people homeless. A commission established to study the incident found that police gunfire had prevented the residents of the house from evacuating, and noted that the “firing of over 10,000 rounds of ammunition in under ninety minutes at a row house containing children was clearly excessive and unreasonable.”\footnote{Milton Coleman, “The Move Disaster: Life Before, The Politics After,” Washington Post, May 26, 1985, accessed December 12, 2002, database: NewsBank Full-Text Newspapers.} The courts have tended to agree with more than fifty raids against newspaper offices, union halls, and other radical meeting spots.\footnote{Brecher, Strike!, 47.} State’s Attorney Julius Grinnell urged the cops, “Make the raids first and look up the law afterwards.”\footnote{Ibid.} Schaack apparently decided not to bother with the law at all. His published notes detailed seventy interrogations conducted during this period; they revealed that prisoners had been denied lawyers, food, water, and medical treatment.\footnote{Joseph G. Rayback, A History of American Labor (New York: The Free Press, 1966), 168–69.} Meanwhile, around the country, state legislatures hurriedly passed laws limiting the rights of labor unions, and courts began convicting strikers \textit{en masse}.\footnote{Among other questionable features, the jury contained members who admitted to prejudices against the defendants. Rayback, History of American Labor, 167–68.} This climate of political repression lasted well into the 1890s.

Of those arrested, eight anarchists were charged with murder: August Spies, Albert Parsons, Adolph Fischer, Samuel Fielden, Michael Schwab, Louis Lingg, Oscar Neebe, and George Engel. While it was never learned who threw the bomb, it was certainly none of these men. Most of them weren’t even at Haymarket. Those who were there were on the speaker’s platform, in plain sight. Nevertheless, after a highly irregular and explicitly political trial, all eight were convicted and seven were sentenced to hang.\footnote{Quoted in Donner, Protectors of Privilege, 238.} (Neebe was sentenced to fifteen years.)

The tool for convicting innocent men of a capital offense was the claim that they had urged others to violence, and were therefore responsible for the violence that occurred. The prosecutor had originally sought to prove that the defendants had executed the bombing themselves. Failing that, he resorted to

\end{enumerate}
\end{footnotesize}
a theory that they had conspired together to kill policemen, crafting a plot carried out by another, unknown person. But there was no evidence for any such plot. Instead the case came to rely on the allegation that the person who threw the bomb had been driven to do so by the defendants’ anarchistic writings and fiery speeches. Over the objections of the defense, the prosecutor read aloud the fiercest anarchist writings he could lay his hands on. Some of these were written by the defendants, others were not. Nobody paid much attention to such details, as the purpose of this “evidence” was purely prejudicial.

State’s Attorney Julius Grinnell put it this way, as he addressed the jury:

Law is on trial. Anarchy is on trial. These men have been selected, picked out by the grand jury and indicted because they were leaders. They are no more guilty than the thousands who follow them. Gentlemen of the jury; convict these men, make examples of them and you save our institutions, our society.

That it was anarchy on trial, Albert Parsons agreed. He wrote to a friend:

There is no evidence ... that I or any of us killed, or had anything to do with the killing of policemen at the Haymarket. None at all. But it was proven clearly that we were leaders. They are no more guilty than the thousands who follow them. Gentlemen of the jury; convict these men, make examples of them and you save our institutions, our society.

That it was anarchy on trial, Albert Parsons agreed. He wrote to a friend:

There is no evidence ... that I or any of us killed, or had anything to do with the killing of policemen at the Haymarket. None at all. But it was proven clearly that we were, all of us, anarchists, socialists, communists, Knights of Labor, unionists. It was proven that three of us were editors of labor papers; that five of us were labor organizers and speakers at workingmen’s mass meetings. They, this class court, jury, law and verdict, have decided that we must be put to death because, as they say, we are “leaders” of men who denounce and battle against the oppression, slavery, robbery and influences of the monopolists. Of these crimes against the capitalist class they found

tails of an FBI-run bomb school held on lumber company property weeks before the explosion. In the course of the training, Special Agent Frank Doyle simulated a bombing identical to that which injured Bari and Cherney a month later. The jury became convinced that the activists’ civil rights had been violated, and in June 2002, awarded them $4.4 million. The jury explicitly recognized the political motivations behind the police misconduct: violations of the plaintiffs’ First Amendment rights represented 80 percent of the damages. One unnamed juror told the Press Democrat, “There were too many lies and manipulation of the evidence. And way too much guilt by association. Law enforcement isn’t supposed to do that.” Another juror concurred, saying, “Now every time I hear anything about the FBI where they made an arrest I question it. That’s what this experience taught me.” But for Bari, justice delayed really was justice denied—she died of cancer while the case was still in litigation.

During the last quarter of the twentieth century, however, no set of events are as dramatically damning of police intelligence operations as the Philadelphia Police Department’s campaign against MOVE. MOVE is a radical Afrocentric, anti-technology organization inspired by the teachings of John Africa. After neighbors lodged noise and sanitation complaints against the group, police used eight-foot-high

13 Avrich, Haymarket Tragedy, 275.
14 Quoted in Nelson, Beyond the Martyrs, 192–93.

121 Quoted in Geniella, “Bari Juror Explains Verdicts.”
Handelman was not arrested at the event, and this political information—likely drawn from other files—had no bearing on any criminal case. Together these examples show that the police are loath to respect any restrictions placed on their operations (whether by the legislature or by the courts), and sometimes still view social movements as conspiracies hatched by sinister agitators.\footnote{On official conspiracy theories, see: Chip Berlet, “Re-Framing Dissent as Criminal Subversion,” Covert Action Quarterly (Summer 1992).} In fact, there are indications of COINTELPRO-style abuses and even outright atrocities during the Reagan-Bush-Clinton years.

Consider, for instance, the case of Judi Bari—bombed by persons unknown, then unsuccessfully framed by the Oakland police and the FBI. Bari was seriously injured on March 24, 1990, when a pipe bomb exploded under the seat of her car; Darryl Cherney was also in the vehicle, and was also injured, though not as badly. The two were members of the radical environmental group Earth First! and were in the midst of organizing a civil disobedience campaign against logging in Northern California. In the weeks before the attack, they had received numerous death threats, which the police declined to investigate. When the bomb exploded, the cops—under the always-helpful guidance of the FBI—were quick to blame the victims: Bari and Cherney were arrested for transporting explosives and branded in the media as terrorists. But the physical evidence did not match the official theory that the pair were knowingly transporting a bomb. The damage to the car, and to Bari herself, indicated that the bomb was under the driver’s seat, not in the back seat where the police said it had been. The DA declined to prosecute, the police refused to look for other suspects, and Bari and Cherney sued.\footnote{Judi Bari Website, “Brief History of the Judi Bari Bombing Case,” www.judibari.org, accessed December 10, 2002.}

The lawsuit brought forth evidence suggestive of possibilities far more sinister than simple incompetence—including disbelief beyond a reasonable doubt, and, so finding, they have sentenced us.\footnote{Quoted in Avrich, Haymarket Tragedy, 283.}

Parsons, Spies, Fisher, and Engel eventually did hang. Lingg committed suicide while awaiting execution. The survivors first had their sentences commuted to life imprisonment, and six years later were pardoned by Governor John Altgeld. Altgeld made it clear in issuing his pardon that he did so because “much of the evidence given at the trial was a pure fabrication.”\footnote{Quoted in Yellen, Labor Struggles, 69.}

Unfortunately, Haymarket established the pattern that anti-radical campaigns would follow for the century to come. The basic elements are present: in a climate of conflict and political polarization, an incident of dubious origin provides the pretext for suppressing radical movements. Raids, arrests, and media smear campaigns lead up to a criminal trial, at which the defendants’ political views and associations are presented as evidence.

The authorities involved in the Haymarket affair, Captain Schaack especially, pioneered the use of radical-hunting as a means of building a career, consolidating power, and lining one’s pockets at the same time. Schaack used his position for shameless self-promotion, casting himself as a first-class sleuth, bragging about conspiracies he had supposedly unearthed and plots he had foiled, and even writing a book on the matter, Anarchy and Anarchists. On top of that, Schaack gained control of a slush fund established by the conservative “Chicago Citizens’ Association” and used its resources to bribe witnesses, hire informers, and pay for other related investigative expenses. In addition to this considerable sum, it was later revealed that he had, on more than one occasion, personally accepted bribes and helped himself to a great deal...
of the “evidence” seized in raids.\textsuperscript{17} Schaack quickly became dependent on the role he had created for himself, the great anarchist hunter. To justify continued operations, he began creating the conspiracies he was to uncover. In 1889, Police Chief Frederick Ebersold told the \textit{Chicago Times}:

Captain Schaack wanted to keep things stirring. He wanted bombs to be found here, there, all around, everywhere. I thought people would lie down to sleep better if they were not afraid their homes would be blown to pieces any minute. But this man, Schaack … wanted none of that policy…. After we got the anarchist societies broken up, Schaack wanted to send out people to organize new societies right away…. He wanted to keep the thing boiling, keep himself prominent before the public.\textsuperscript{18}

Haymarket was not the first police excursion into the realm of political spying, but it did signify the beginning of a new trend. As Frank Donner notes:

The Haymarket tragedy … marked the emergence of a new form of policing: anarchists were indiscriminately surveilled not only as a means of crime suppression, but for ideological reasons alone…. This style of ideological warfare against anarchism broke ground for subsequent similar police initiatives against socialism and communism.\textsuperscript{19}

\textbf{Repression 101}

There’s nothing surprising about the antagonism between anarchists and authorities. Anarchists oppose the powerful and the institutions that maintain their power, especially the state. They don’t like bosses, bureaucrats, politicians, landlords, or cops. And, for the most part, the feeling is mutual.

\textsuperscript{17} Donner, \textit{Protectors of Privilege}, 14–20.
\textsuperscript{18} Ibid., 15.
\textsuperscript{19} Ibid., 20.
disarmament, U.S. policies in Central America, gay and lesbian rights, the AIDS crisis, abortion rights, the Gulf War, police brutality, immigrants’ rights, the environment, prison expansion, and economic globalization.\textsuperscript{113} And, as before, these movements were met with repression and police interference.

One article from the October 1988 issue of the \textit{Progressive} cited example after example of police surveillance, harassment, and interference with left-wing organizations in the years immediately previous: In 1983, the Georgia Bureau of Investigation (GBI) placed an undercover officer in a vigil organized by an group opposed to the death penalty. Three years later, the GBI began looking at a consumer group, the Campaign for a Prosperous Georgia, for possible ties to Libyan terrorists; after three months they closed the case, conceding that their agents were “unable to substantiate any illegal activity.” In Boston, Capitol Police infiltrated meetings of the Lesbian and Gay Political Alliance and Mass Act Out. Connecticut State Police photographed the audience at a Wesleyan University speech by Nation of Islam leader Louis Farrakhan. In Puerto Rico, police maintained a list of thousands of suspected “subversives.” The FBI coordinated a national campaign against the Central American solidarity movement, while local cops in Chico, California, infiltrated the Committee in Solidarity with the People of El Salvador (CISPES), and police in Orlando and Philadelphia sent informers to Pledge of Resistance meetings. In Orlando, police also infiltrated the Florida Nuclear Freeze campaign and posed as journalists to photograph a 1983 rally. In advance of the 1984 Democratic National Convention, San Francisco police amassed files on ninety-five groups, including gay rights organizations, labor unions, CISPES, Catholic Charities, and the ACLU. (“I think it’s silly to spy on the American Civil Lib-

The state’s reaction to such opposition is equally unsurprising. It is the nature of power to preserve itself, and this requires that efforts to change the structures of society be actively opposed by those who profit from the existing order. As Alan Wolfe defines it, “Repression is a process by which those in power try to keep themselves in power by consciously attempting to destroy or render harmless organizations and ideologies that threaten their power.”\textsuperscript{20} Repression may be accomplished through propaganda, indoctrination, and other ideological means, or when these fail, through more direct means like harassment, imprisonment, and violence.

Donner more specifically defines “political repression ... in the context of policing, . . . as police behavior motivated or influenced in whole or in part by hostility to protest, dissent, and related activities perceived as a threat to the status quo.”\textsuperscript{21} In addition to the means listed above, repression may involve a much broader range of both overt and covert activities, including surveillance, false arrest, media smear campaigns, the use of disinformation, burglary, blackmail, infiltration, sabotage, the promotion of factionalism, entrapment, threats, brutality, assassinations, and torture.

The form repression takes and the intensity with which it is applied will depend on a variety of factors, including the aims of the target group, its popularity, its strengths and weaknesses, its methods, and the goals, popularity, and relative strength or vulnerability of the government. But whatever its shape, the purpose of repression remains essentially the same. Based on his experiences in Northern Ireland, Kenya, Cyprus, and elsewhere in the crumbling British empire, military strategist Frank Kitson described the task facing a government when rebellion surfaces:

\textsuperscript{113} These movements, generally overlooked by the media of the time and forgotten by textbooks since, constitute what Howard Zinn termed “The Unreported Resistance.” Zinn, \textit{People’s History}, 589–618.

\textsuperscript{21} Donner, \textit{Protectors of Privilege}, 1.
Translated into normal terms, the aim of the government is to regain if necessary and then retain the allegiance of the population, and for this purpose it must eliminate those involved in subversion. But in order to eliminate the subversive party and its unarmed and armed supporters, it must gain control of the population.  

Repression is a tricky business. And it is complicated by the fact that the initiative seems to always rest with the subversives. Rebellions may brew, discontent spread, revolutionaries prepare their forces—all before the government even realizes it is facing a threat. Intelligence work is intended to fill this gap.

The Senate Select Committee to Study Government Operations with Respect to Intelligence Activities (the Church Committee) outlines the three types of intelligence activities:

The first is intelligence collection—such as infiltrating groups with informants, wiretapping or opening letters. The second is dissemination of material which has been collected. The third is covert action designed to disrupt and discredit the activities of groups and individuals deemed a threat to the social order. These three types of “intelligence” activity are closely related in the practical world. Information which is disseminated by the intelligence community or used in disruptive programs has usually been obtained through surveillance.

Furthermore, the same techniques may be used for more than one purpose simultaneously. Surveillance has its obvious uses in collecting information, but conspicuous surveillance may also be used to harass the target, breed paranoia and feelings of persecution, and so on. Likewise, informants can supply information, but they can also be used to disrupt a group’s

108 My own testimony was dismissed thus: “Williams appeared credible on the stand, but his actions ... suggest a significant hostility toward the police.” Alliance to End Repression v. City of Chicago (December 21, 2000), 20.

The consent decree’s final test began in 1996, when the Democratic National Convention was set in Chicago and Active Resistance, an anarchist “counter-convention,” was scheduled to coincide with it. Despite court-mediated limits on such activities, police—both in uniform and in civilian clothing—lurked around the anarchists’ meeting halls and patrol cars frequently cruised by, slowing down when passing a conference participant on her way in or out. Police even conducted surveillance from a helicopter, hovering over the conference area while participants ate a picnic lunch. Witnesses reported being followed, threatened, photographed, and questioned by police, and the cops repeatedly attempted to gain entry to the meeting space. A demonstration connected with Active Resistance was attacked by police using horses and nightsticks and those arrested were interrogated about their political views, their participation in protest activity, and related matters. Finally, on August 29, 1996, the conference space was raided by several officers wearing uniforms but no badges. They ordered everyone to the ground, pushing down or pepper-spraying those who refused. They searched conference participants’ belongings, and seized papers they deemed “subversive to the government of the United States.”

When the Alliance to End Repression (joined by the Active Resistance organizers and others) sued to enforce the consent decree, Judge Joan Gottschall rejected out of hand the testimony of numerous witnesses and found that the police had

---

106 I can speak of this incident from my own experience. At the time of my arrest, I had been trampled by a horse, beaten with batons, and kicked repeatedly by officer Michael Shemash. My wrist had then been cut by the cop removing my flex-cuffs. I was bleeding and blacking out; I asked repeatedly for medical attention. But before taking me to the hospital, the police interrogated me at length about political matters. At times there were as many as seven cops in the cell with me, asking questions.

---

organizing efforts—engaging in routine sabotage, provoking rivalries and in-fighting, and encouraging illegal (especially violent) activities that can discredit the movement.

The specific strategies and techniques involved have been developed over time, with the twentieth century representing a period of particular progress. The degree of actual activity has ebbed and flowed, for the most part following the level of disdendent political activity (particularly dissent from the left). At the national level, this work has been centered in the federal intelligence agencies—the FBI, the CIA, Army Intelligence—but has also come to involve, at times, practically every federal agency and every branch of government. At the local level, the bulk of intelligence work has been shared between the police and innumerable private agencies, beginning with the Pinkerton Detective Agency. Within police departments, the branches responsible for keeping the lid on subversives have gone under a wide variety of names, including the “Radical Bureau,” the “Anarchist Squad,” the “Bomb Squad,” the “Intelligence Division,” the “Industrial Squad,” the “Bureau of Special Services,” the “Special Investigations Bureau,” and others. For the sake of regularity, I will refer to them here primarily under the generic term “red squad.”

**The Red Squads**

New York City’s red squad got a head start on the rest of the country.

On January 13, 1874, in what came to be termed the “Tompkins Square Riot,” 7,000 people took to the streets in a demonstration against unemployment, and the police responded by ruthlessly beating them. Following that debacle, the police department began assigning detectives to spy on socialist and
union meetings. Within just a few years, their operations expanded enormously. In 1895 and 1896 the NYPD tapped 350 phones, including those of churches.

This pattern was repeated in cities around the United States. The police began by attacking public events, especially demonstrations. They rigorously enforced laws, forcibly dispersed crowds, and expended a great deal of energy trying to identify and nab individual agitators who, they assumed, must be responsible for any such disturbance. This latter pursuit quickly developed to the point where police targeted entire organizations, sending informants to their meetings.

The creation of special branches devoted to this task took hold after 1900, prompted by labor unrest, the increased popularity of socialism, and a wave of immigration.

The role of the red squads further expanded during World War I, thanks in part to Attorney General A. Mitchell Palmer and his successive campaigns against radicals and immigrants. Local cops aided the Justice Department first in 1917, with a series of raids against the Industrial Workers of the World. IWW headquarters were raided in eleven cities and hundreds of union leaders were arrested, allegedly for interfering with the draft. The red squads repeated their performance two years later, beginning in 1919, as they provided support for Justice Department raids on a wide range of leftist organizations, resulting in 4,000 arrests and almost 1,000 deportations.

Local police agencies found support for these endeavors.

Really, this is an old story: when New York’s “Anarchist Squad” was disbanded in 1914, its responsibilities were shifted to the bomb squad. Overt harassment was replaced with clandestine operations, and within a few months the bomb squad had an undercover unit.

Red Squads Reborn

At least some of those responsible for the reforms of the late seventies (and early eighties) knew about this history, and understood how fragile their gains really were. Richard Gutman, an attorney with the Alliance to End Repression, said in 1982:

History teaches that the intensity of political surveillance is not constant. It ebbs and flows. When the political establishment feels its power or policies threatened, political surveillance will resume. That resumption may be marked by a court-ordered revision of our injunction based upon “changed circumstances.”

And indeed, eighteen years later, the Chicago consent decree fell. In keeping with Gutman’s prediction, the court decided that:

The era in which the Red Squad flourished is history, along with the Red Squad itself. The instabilities of that era have largely disappeared. Fear of communist subversion, so strong a motivator of constitutional infringements in those days, has disappeared along with the Soviet Union and the Cold War. Legal controls over the police, legal sanctions for infringement of constitutional rights, have multiplied. The culture that created and nourished the Red Squad has evaporated. The consent decree has done its job.
formed in California, Connecticut, Maryland, Michigan, New Jersey, New York, Ohio, New Hampshire, and Georgia.  

A simultaneous charade was being played out at the federal level. As attorney Brian Glick notes:

By discontinuing use of the term “COINTELPRO,” the Bureau gave the appearance of acceding to public and congressional pressure. In reality, it protected its capacity to continue precisely the same activity under other names. Decentralization of covert operations vastly reduced the volume of required reporting. It dispersed the remaining documentation to individual case files in diverse field offices, and it purged these files of any caption suggesting domestic covert action.

From the FBI’s perspective, the problem with COINTELPRO was that it created a paper trail leading to its exposure. The solution, then, lay not in discontinuing the operation, but in decentralizing it—thus making it far less vulnerable.

One innovation—the Joint Terrorism Task Force (JTTF)—allowed both local and federal agencies to sidestep restrictions on their activities by working together. JTTFs are composed of agents from numerous local, state, and federal agencies, and headed by the FBI. Since local cops are ostensibly acting as federal agents, their activities are not subject to the supervision of local authorities and the information they collect remains secret. The FBI meanwhile can rely on these other agencies to do the heavy lifting, thus avoiding the unseemly impression of excessive federal involvement. Accountability disappears in a bureaucratic shell game.

explosion that critically injured a member of a reform group, the Citizen’s Independent Investigating Committee, which had been leading a campaign against police corruption.\(^32\)

Kynette’s zealotry led not only to a prison term, but to the dissolution of his unit as well. Shortly after his conviction, the City Council eliminated its funding. Elsewhere in the country, red squads fell victim to their own success. In the conservative climate of the 1950s, they faced a repeat of Captain Schaack’s problem—a shortage of subversives. The response to this situation was two-fold. In part, red squads focused again on their historical opponents, labor unions. At the same time, they were granted a new mission as auxiliary forces in the Cold War. But while the FBI still relied on local police for a great deal of information, the special units saw their numbers and resources dwindle.\(^33\) As a result, red squads became increasingly isolated within local departments and their activities became even more removed from regular police work.

Simultaneously, and somewhat paradoxically, Communist-hunting was becoming an American obsession. A national network of suspicion, denunciation, and blacklisting emerged. The FBI, the House Un-American Activities Committee, and Senator Joseph McCarthy stood together at the center, but the inquisition reached into every level of government, the academy, and private industry. Under the FBI’s “Responsibilities Program,” which was active from February 1951 to March 1955, the Bureau secretly alerted governors, college presidents, and other reliable leaders of suspected subversives in their employ. At least 800 people were thus branded as reds, more than half of them educators. Most were fired.\(^34\) In New York alone,

files, officer Tom Gerard moved them to his home. From there he distributed the documents to the Anti-Defamation League of B’nai B’rith (who passed them on to the Israeli government), and also to the apartheid government of South Africa. In total, Gerard maintained files on thousands of Arab Americans, thirty-six Arab groups, thirty-three anti-apartheid groups, 412 “pinko” organizations, 349 right-wing groups, and thirty-five skinhead gangs, as well as the ACLU, the National Lawyer’s Guild, \textit{Mother Jones} magazine, the United Auto Workers, the board of directors of KQED (a public television station), the Black Studies Department at San Francisco University, Democratic politicians, and journalists. When Gerard’s operation was discovered, it touched off a major scandal. But Richard Hirschhaut, executive director of the Anti-Defamation League Central Pacific Region, shrugged off the controversy: “[T]he relationship we had with him ... was the same as with thousands of police officers around the country.”\(^98\) Indeed, when the SFPD and FBI raided B’nai B’rith offices in San Francisco and Los Angeles, they discovered that the organization was keeping computerized files on nearly 10,000 people. Approximately 75 percent of the data in the files had been obtained illegally from police, federal agents, or the Department of Motor Vehicles.\(^99\)
\end{quote}

\textbf{A Shell Game}

As municipal red squads closed up shop, the burden of political repression was moved off of city police departments and onto county or state agencies. At the end of the 1970s, as city police were officially getting out of the spy business, state units were

letters against apartheid. The “IRA” file listed the names of hundreds of people who signed a petition against the mistreatment of political prisoners. The “Cults” file included the 1983 annual report of the First Unitarian Church.93 The file labeled “Terrorism, Misc.—Oregon” featured information on Physicians for Social Responsibility, the Portland State University Hispanic Student Union, and Ecumenical Ministries of Oregon.94 Soup kitchens, day care centers, food co-ops, a bicycle repair collective, a free dental clinic, and a rape crisis center all appear in the files.95

Collecting such information on people not suspected of crimes has been against Police Bureau policy since 1975, and after 1981 it violated Oregon law as well. But many of Falk’s reports were addressed to senior officers, indicating that police commanders knew what he was up to.96 While careful to deny knowledge of the files’ existence, former Portland police chief Penny Harrington recounted an episode in 1985, when Falk called her to report on the activities of liberal city councilors, alleging they were out to “take over the city government.” Harrington wasn’t surprised to hear that Falk had kept the files for his own use: “That was happening all over the country at that time.... Files were ending up in people’s garages and basements.”97

A similar file rescue occurred in November 1990, when San Francisco police chief Willis Casey shut down his department’s red squad. Instead of destroying the squad’s

97 Ibid.
The McCarthy era facilitated the federalization of intelligence and the specialization of red squad operations, producing a distinct organizational culture and a distance from other police (not to mention the citizenry). When the fifties became the sixties, the police were continually called on to suppress what seemed to be ever-growing social movements, and these characteristics solidified. As the role of red squads expanded and the number of officers involved grew, the flaws, faults, and excesses of intelligence agencies—perhaps of intelligence per se—increased in magnitude and became more readily apparent.

**A Renaissance of Repression**

During the 1960s, in city after city, red squads suddenly swelled like a fungus. Detroit’s intelligence unit had only six members at the end of the 1950s; by 1968 that number had grown to seventy. In most places, the rate of growth was sharpest at the very end of the decade. Between 1968 and 1970, the New York City red squad went from sixty-eight uniformed officers to ninety (plus fifty-five others assigned to undercover work). During the same period, Los Angeles increased its squad from eighty-four officers to 167. The Chicago Police Department had 500 intelligence officers at the end of the decade, and Illinois State Police Superintendent James T. McGuire estimated that more than 1,000 federal, state, and local operatives were working in the area undercover.

As the popular movements developed—first the civil rights movement, then student movements, anti-war efforts, and a host of others—the police understanding of these campaigns, their objectives, and the conditions producing them seriously

established. And police actively resisted reform—sometimes through lawyerly quibbling, sometimes by dragging their feet, sometimes through dirty tricks.

Secret Files

In 1976, Judge James Montante ordered the Detroit Police Department and the Michigan State Police to turn their files over to the people listed in them. Four years later, the state police finally complied with this order. The Detroit police never did. Instead, Mayor Coleman Young simply dissolved the red squad and transferred its files to other units in the department. Elsewhere, the police responded to lawsuits by destroying files, thus preemptsing the legal discovery process, the court’s attempt to inspect them, and any possible orders to make them public. That occurred in Memphis, Seattle, Chicago, and in a case involving the Mississippi Highway Patrol.

In Los Angeles, the police hid the files and just claimed they had been destroyed. Red squad detective Jay Paul rescued over 100 cartons of documents, storing them in several locations, including his own home. More than a dozen cops helped Paul with the move. Several others, including lieutenants and captains, knew it was happening, allowed it to proceed, and even approved the use of department resources and staff time to assist in the effort.

In 1983, Portland Police Bureau intelligence officer and John Birch Society member Winfield Falk undertook a similar task, stealing files that were headed for the shredder, taking them

Rizzo created a special thirty-three-member intelligence unit, answerable directly to him. The unit’s sole purpose was to investigate two of Rizzo’s political adversaries—city councilor Peter J. Caniel and city council president George X. Schwartz.  

As the range of targets grew, so did the range of tactics—first to improve surveillance and then, as is the pattern, to harass leaders, cripple organizations, and interfere with their political efforts. Wiretaps and mail opening came very much into fashion during this period. As in the thirties, informers were employed in increasing numbers, with a key difference—whereas previously infiltration was done primarily by private detectives or civilian volunteers, in the 1960s it became the norm to use police officers themselves.

Interestingly, the specialization of undercover work did nothing to abate the agent’s development from passive observer to saboteur, and then, from saboteur to provocateur. In fact, informers often suggested the plan, supplied the weapons, drove the car, and then made the arrest. ACLU attorney Frank Donner observes, “The most common provocateur is simply a professional police agent who coldly engineers a single provocative act designed to ‘set up’ leaders for roundup and arrest.”

---

46 Ibid., 318, 330.
47 “In the early years of [the twentieth] century, police gathered information from informers planted by private agencies, employers’ associations, and patriotic groups. By the thirties, big-city police had begun to recruit their own informers from the private sector and acted as the spy’s ‘handlers,’ ‘contacts,’ or ‘controls,’ only rarely themselves resorting to impersonation, dissembling loyalties, and the fabrication of cover identities. It was one thing to have an agent as an independent contractor to do the dirty work of spying, but quite another for a public servant to do it himself. But in the sixties, police, not only in Chicago and New York but in smaller cities—San Diego, Houston, Oakland, New Orleans, and Columbus, to name a few—went underground, and the ‘undercover agent’ became commonplace.” Ibid., 69–70.

But the political climate may well have been more important to the success of such legal action than either the law or the facts of the case.

Author Ken Lawrence describes the limits of legal victories: [Legal reforms are] more reflective of the political climate than they are a way of creating a favorable climate. So, it’s a mistake to regard a legal forum as itself a particularly useful way to create an improved political situation.... If you win an injunction, that’s more a sign that you have prevailed in changing the political climate. But it doesn’t for a minute mean that it’s going to place any serious restraint on the actions of the police. Success is rarely total, or permanent. Political repression didn’t end with the defeat of the red squads, any more than it ended with the termination of COINTELPRO, the death of J. Edgar Hoover, the resignation of Nixon, or the retirement of Captain Schaack decades before. Repression continues as a permanent feature of capitalist society and as a central function of the state. The changes necessary to remove it, then, are far deeper than anything that we can expect from the courts.

Judges issued a series of favorable rulings; however, as Donner put it, “the plaintiffs won all the battles but lost the war.” Maintaining the conditions established by the courts was a separate fight, and a difficult one, since even judges themselves proved very reluctant to enforce the rules the courts
government. A researcher for the Pentagon, Daniel Ellsberg, leaked the Defense Department’s secret history of the Vietnam War, revealing that the public had been deceived about the aims and methods of the war and, specifically, about American atrocities.  

Anonymous persons similarly released a series of documents stolen from the FBI office in Media, Pennsylvania, detailing the operations grouped under the heading COINTELPRO. It is quite ironic that the best tool for proving official misconduct by federal agencies turned out to be their own cherished files.

In an effort to salvage credibility, Congressional committees and special prosecutors tried to “come clean.” Even the intelligence agencies themselves tried to rehabilitate their public image; COINTELPRO and similar programs were quickly discontinued. And on the local level, opponents of police spying took the opportunity to move against the red squads.

So what kills a red squad? In Washington, D.C., it was a combination of lawsuits and pressure from city council. In Birmingham, it was the success of civil rights efforts and the shift of power that accompanied it. Official investigations and a change in local statutes did in the Baltimore unit. A series of court rulings, a change in political climate, the election of a liberal mayor, attacks in the media, and a sudden loss of allies conspired against the red squad in Detroit. A series of scandals finally cost the Los Angeles unit the last of its credibility, leading to its break-up. In Philadelphia, it was the combination of a Federal Civil Rights Commission investigation, lawsuits, judicial rulings, and a loss of public support stemming from widespread corruption. In Seattle, a city ordinance outlawed the red squad’s activities. In Memphis and Chicago, lawsuits produced consent decrees limiting political investigations. A

An infiltrator’s success didn’t always rely on discrediting an organization or bringing legal action against them. For example, in 1967 the New York Police Department sent Richard Lyons—a civilian—into the Veterans and Reservists Against the War (V&R). During the two years he was a member, he advocated the V&R attack soldiers with tear gas, burn GI weapons authorization cards (a federal offense), charge police lines during demonstrations, and carry replica machine guns. Each suggestion was firmly rejected in favor of legal and nonviolent tactics. Nevertheless, when he was finally exposed in 1968, the knowledge that they had been infiltrated greatly added to feelings of demoralization, and contributed to the V&R’s collapse.

In part, the work of infiltrators represented a move away from reactive practices and toward a proactive, anticipatory approach. Hence, red squads justified many of their activities with the claim that they were necessary in order to prevent violence. On the contrary, infiltrators often encouraged violence, as the V&R case shows. And the red squads’ methods carried with them inherent barriers to law enforcement. For example, information gathered illegally was usually inadmissible in court, and the reluctance to identify informants greatly limited their utility in actual prosecutions.

Add to this the fact that so much of the “information” police gathered was hopelessly off base. One Chicago cop told a Cook County grand jury that he listed as a “member” of an organization anyone who attended two of its public meetings. This “information” was passed on to the FBI, and disseminated from there. More recently, in 2002, files leaked to activist groups revealed that the Denver Police Department had used the label “criminal extremist” as a default category when no

other description seemed to apply. Featured under this heading were political activists, members of the clergy, troubled students, and—for some reason—people who had received honors from the department itself. A commission appointed by the mayor determined that none of the 3,400 files could be legitimately maintained, and ordered them destroyed. But the files, and their inaccuracies, had already been passed on to other agencies. 52

The harm of such exaggeration is multiplied as misinformation is spread from one agency to others. For example, in 1973 the Seattle Police Department’s intelligence division opened a file on a local Chicano activist. The American Friends Service Committee described the report’s transformation as it changed hands:

It began: “Modus Operandi—participant in demonstrations, supporting UFW x Safeway [sic], establishment of El Centro.” His only police record is for failure to disperse during a demonstration. By 1976, however, in describing him to the Portland Police Intelligence Division, Seattle Police stated, “M.O. Chicano activist—advocates terrorist acts.” There is no information in the SPD intelligence files to support such a defamatory and damaging claim. 53

Inaccuracies and distortions are phenomena familiar to anyone who reads even standard police reports, but the potential for mis-reporting is amplified by the nature of undercover work (especially when informants are paid for the information). As Donner observes:

53 AFSC, Police Threat to Political Liberty, 27.

activities and then concealed them from officials whom they had a duty to inform. 76

With this in view, the political operations touched on here, and the abuses that accompanied them, cannot be dismissed as the excesses of individual, overzealous officers, or even as the dysfunctions of particular departments. Instead, they should be understood as systemic in nature, institutional in scope, affecting the entire country, and (despite their purported aims) undermining democracy. That is certainly true of the most flagrant abuses, but it may also be true of “legitimate” intelligence operations. However restrained, intelligence activities function to suppress dissent and undercut basic political liberties. Yale University law professor Thomas Emerson explains:

The very process of investigating political activities, involving the questioning of friends, neighbors, employers and other government agents, is intimidating. The compiling of dossiers, which may be the basis of internment in the event of emergency or of other reprisals, is threatening. The very existence of agents, informers, and possible agents provocateurs is chilling. Opportunities for partisan abuse of intelligence powers become available and tempting. Freedom of expression cannot exist under these conditions. 77

Secret police are always the enemies of democracy.

The Death of the Red Squads?

Paradoxically, political repression may itself undercut the public’s faith in the government’s benevolence.

The 1970s were characterized by massive public distrust of the authorities, especially the federal intelligence agencies, but also their local counterparts. Along with the Watergate scandals, other startling revelations shook public confidence in the

76 Church Committee, Final Report, Book II, 5.
77 Quoted in AFSC, Police Threat to Political Liberty, 66–77.
ing, and in return the locals helped the Agency gather information, protect informants, and harass its critics.75

Since the practices of local cops inevitably came to resemble those of the organizations that trained, funded, supplied, and directed them, it is worth considering the conduct of these federal agencies. The Church Committee summed it up:

Too many people have been spied upon by too many Government agencies and to [sic] much information has been collected. The Government has often undertaken the secret surveillance of citizens on the basis of their political beliefs, even when these beliefs posed no threat of violence or illegal acts on behalf of a hostile foreign power. The Government, operating primarily through secret informants, but also using other intrusive techniques such as wiretaps, microphone “bugs,” surreptitious mail opening, and break-ins, has swept in vast amounts of information about the personal lives, views, and associations of American citizens. Investigations of groups deemed potentially dangerous—and even of groups suspected of associating with potentially dangerous organizations—have continued for decades, despite the fact that those groups did not engage in unlawful activity. Groups and individuals have been harassed and disrupted because of their political views and their lifestyles. Investigations have been based upon vague standards whose breadth made excessive collection inevitable. Unsavory and vicious tactics have been employed—including anonymous attempts to break up marriages, disrupt meetings, ostracize persons from their professions, and provoke target groups into rivalries that might result in deaths. Intelligence agencies have served the political and personal objectives of presidents and other high officials. While the agencies often committed excesses in response to pressure from high officials in the Executive branch and Congress, they also occasionally initiated improper

Both the pressures and inducements, along with the sense of guilt that required the betrayer to find some justification for his betrayal, tend to produce tainted information. All too frequently it is inaccurate, highly selective, and based on sinister and unwarranted inferences. Where a literal version of a target’s utterances would seem innocent, the informer will insist on stressing the connotations; conversely, where the language is figurative or metaphorical [sic] the informer reports it as literally intended. Most important of all, he seizes on the transient fantasies of the powerless—rhetoric and images not intended to be acted upon—and transforms them into conspiracies whose purpose and commitment are wholly alien to their volatile and ambiguous context.54

These interpretive practices underscore the symbolic value of red squad files. At first a simple administrative tool for collecting and organizing evidence, these files, like so much in the field of intelligence, quickly became a means of intimidation, and eventually became an end in themselves, serving to legitimize the red squad’s other activities.55

More often than not, the reported violence was only a much-exaggerated pretext for heavier repression. Donner describes the pattern as it appeared in Philadelphia:

Based on information typically supplied by a street tipster or casual informant, or “discovered” through several weeks of intensive surveillance by the CD [the Civil Disobedience unit], police would raid a private residence where they assertedly found explosives, guns, or inflammatory literature. A torrent of Rizzo-inspired publicity would then link the raided premises and the seized material to a group of militants, which, it usually suggested, was part of a larger and more powerful movement. Front-page stories under banner headlines would quote Rizzo’s blood-chilling description of

75 Ibid., 86–88, 389.
55 Donner, Protectors of Privilege, 221.
the plot, miraculously aborted, and the closeness of the city’s escape from destruction. Bail would be set at astronomical levels, but prosecution of the culprits usually faltered. After long delays (months and even years), the back pages of the newspapers whose front pages had originally blazed with reports of the sensational arrests would limply record that the prosecution had been dropped altogether or the defendants plead guilty to lesser charges (usually possession of weapons) or other, unrelated charges.56

The Philadelphia branch of the Student Nonviolent Coordinating Committee (SNCC) was destroyed by just such a “dynamite plot,” as was the Revolutionary Action Movement and—after several such raids—the Philadelphia chapter of the Black Panther Party.57

COINTELPRO: The FBI’s Greatest Hits

The Black Panthers bear the uneasy distinction of being the most targeted organization of the late 1960s, perhaps the most targeted organization of all American history. The Panthers were persecuted—there is no other word—by a campaign, code-named COINTELPRO (for “COunter INTELligence PROgram”). COINTELPRO was explicitly designed, in the words of FBI Director J. Edgar Hoover, “to expose, disrupt, misdirect, discredit, or otherwise neutralize the activities of black nationalist, hate-type organizations and groupings, their leadership, spokesmen, membership, and supporters, and to counter their propensity for violence and civil disorder.”58

The Church Committee offers more detail: COINTELPRO tactics included:

56 Ibid., 207–8.
57 Ibid., 209–10, 217.
58 Quoted in Ward Churchill and Jim Vander Wall, The COINTELPRO Papers: Documents from the FBI’s Secret Wars Against Domestic Dissent (Boston: South End Press, 1990), 92.

Beyond COINTELPRO

COINTELPRO was only one aspect of the relationship between local red squads and the federal government. Beginning in 1968, the Law Enforcement Assistance Administration supplied grants to intelligence units for training and equipment.71 At about this same time, the Justice Department’s Interdivisional Information Unit (IDIU) provided the means for intelligence agencies at all levels, and from around the country, to share information. According the Church report, this established a system through which the Attorney General received the benefits of information gathered by numerous agencies, without setting limits to intelligence reporting or providing clear policy guidance. Each component of the structure—FBI, Army, IDIU, local police, and many others—set its own generalized standards and priorities, resulting in excessive collection of information about law abiding citizens.72

Nor was that the extent of federal involvement: Throughout the late 1960s New York City’s red squad gave daily briefings to Army intelligence.73 In Chicago, the U.S. Army Region I, 113th Military Intelligence Group not only trained and traded information with the local police, but participated in interrogations.74

Never willing to be left out of the action, the CIA offered a six-week training course for local law enforcement personnel, teaching cops the basics of surreptitious entry, photographic surveillance, electronic eavesdropping, and the manufacture and use of explosives. Members of at least forty-four state, county, and municipal police departments received this train-
Pratt was convicted of first degree murder and sentenced to life in prison. The conviction rested on the testimony of Julius Butler, a former party member who claimed that Pratt had admitted to the murder. The prosecutor failed to mention that his key witness was on the police payroll, and Butler vehemently denied it under oath, saying he’d “never been in all the world a snitch.” Years later, documents surfaced identifying Butler as a paid informant for the FBI, LAPD, and district attorney’s office. Furthermore, an FBI report from June 1970 frankly admitted the bureau’s interest in Pratt: “constant consideration is given to the possibility of utilization of counter-intelligence measures with effort being directed toward neutralizing Pratt as an effective B.P.P. functionary.” After years of legal delays, in 1997 a conservative Reagan-appointed judge, Everett W. Dickey, overturned Pratt’s conviction.

— Anonymously attacking the political beliefs of targets in order to induce their employers to fire them;
— Anonymously mailing letters to the spouses of intelligence targets for the purpose of destroying their marriages;
— Obtaining from IRS the tax returns of a target and then attempting to provoke an IRS investigation for the express purpose of deterring a protest leader from attending the Democratic National Convention;
— Falsely and anonymously labeling as Government informants members of groups known to be violent, thereby exposing the falsely labeled member to expulsion or physical attack;
— Pursuant to instructions to use “misinformation” to disrupt demonstrations, employing such means as broadcasting false orders on the same citizens’ band radio frequency used by demonstration marshals to attempt to control demonstrations, and duplicating and falsely filling out forms soliciting housing for persons coming to a demonstration, thereby causing “long and useless journeys to locate these addresses”.

The Church Committee report devotes a small section specifically to “Cooperation Between the Federal Bureau of Investigation and Local Police Departments in Disrupting the Black Panther Party.” It details file-sharing practices involving the FBI and the police in San Diego, Oakland, Los Angeles, and Chicago, as well as FBI-instigated raids in San Diego and Chicago, and an FBI-directed disinformation campaign in Oakland. What the report doesn’t say is that between December 1967 and December 1969, twenty-eight Panthers were killed as the result of police attacks. It would require

69 Dickey reasoned that information about Butler’s connection to law enforcement might have influenced the jury’s decision. His thinking seems to have been sound; Jeanne Rook Hamilton, a juror from the case said, “If we had known about Butler’s background, there’s no way Pratt would have been convicted.” Quoted in Terry, “Los Angeles.”

59 Church Committee, Final Report, Book II, 10.
60 Church Committee, Final Report, Book III, 220–23.
61 Churchill and Vander Wall, COINTELPRO Papers, 143. FBI director J. Edgar Hoover instructed his agents, “The Negro youth and moderates must be made to understand that if they succumb to revolutionary teaching, they will be dead revolutionaries.” Quoted in Tim Weiner, Enemies: A History of the FBI, (New York: Random House, 2012), 274.
another book to consider all of these cases in detail, but a couple of examples may be quite telling.

In Chicago, efforts to disrupt the Black Panther Party focused on a young leader named Fred Hampton. First, the FBI tried to trigger a feud between the Panthers and a local street gang, the Blackstone Rangers. FBI operatives sent Ranger leader Jeff Fort an anonymous letter claiming that Hampton had ordered his assassination. This tactic seems to have been selected in hopes of producing violence. The FBI memo describing it reads:

> It is believed that the [letter] may intensify the degree of animosity between the two groups and occasion Forte [sic] to take retaliatory action which could disrupt the BPP or lead to reprisals against its leadership.... Consideration has been given to a similar letter to the BPP alleging a Ranger plot against BPP leadership; however, it is not felt that this would be productive principally because the BPP ... is not believed to be as violence prone as the Rangers, to whom violent type activity—shooting and the like—is second nature.

When the letter failed to produce the desired results, the FBI moved on to more direct means of neutralizing Hampton.

On the morning of December 4, 1969, at 4 A.M., fourteen police armed with submachine guns literally shot their way into Hampton’s apartment. The police fired ninety-eight rounds, killing Fred Hampton and Mark Clark (head of the Peoria, Illinois, BPP) and injuring three others. Only a single round of fire was returned—by Clark, as he died. Hampton was shot five times—three times in the chest, and then twice in the head.

The raid had been planned a few weeks before by COINTELPRO operative Roy Mitchell and two cops assigned to a special unit under the direction of State’s Attorney Edward V. Hanrahan. Mitchell had met with Hampton’s bodyguard, William O’Neal, and received from him a detailed floorplan of the apartment, including the location of Hampton’s bed. He also arranged for O’Neal to drug Hampton with a barbiturate on the night in question. A week after the raid, Robert Piper, the Chicago COINTELPRO section head, requested a $300 bonus for O’Neal.

In this case we see local police, under the direction of the FBI, serving as nothing other than a death squad.

Four days after the Chicago raid, forty SWAT officers and more than 100 back-ups launched a similar attack in Los Angeles. Under the leadership of red squad detective Ray Callahan, and again working from a floorplan provided by an FBI informant, the police began their offensive at 5:30 in the morning. This time, however, the target—Panther leader Elmer “Geronimo” Pratt—was not in his bed. The opening burst of gunfire missed him altogether. The Panthers held the police off until the media arrived and a crowd had formed; then, they surrendered. Six were wounded and thirteen arrested, but no one was killed.

The raid was a dud, but the campaign against Pratt continued, eventually resulting in his arrest for the 1968 robbery and murder of a White woman in Santa Monica. Pratt maintained that he was at a Black Panther Party meeting in Oakland when the crime was committed, a fact verified by other testimony. The defense sought to support the alibi with the FBI’s phone tap records, but the feds wouldn’t cooperate. They first denied that the telephone at the Oakland BPP office was tapped, then admitted that it was but refused to turn over the records on “national security” grounds, and finally produced the records—except for those from the period relevant to the murder case, which they claimed were lost.

The NYPD at War

Among local agencies, the most intensive domestic counter-terrorism—or more accurately, anti-Muslim—effort of the post-9/11 period is undoubtedly that of the NYPD’s Intelligence Division ("Intel"). With a staff of 600 and a budget of $60 million, Intel runs investigations far outside the department’s jurisdiction—in other states, and even in other countries. Its major task, however, is to learn everything there is to know about the Muslim population of New York City.

Developed with CIA assistance—advice, training, and embedded staff—and modeled on Israeli intelligence operations in the West Bank, the program aims for precise mapping of the city’s Muslim communities, beginning with demographic information drawn from census data, building toward detailed files on every mosque, business, and other institution, then identifying key individuals. To this end, plainclothes officers called “rakers” visit local restaurants, cafes, and bookstores, chatting with patrons and proprietors, and sometimes just listening in on conversations. On average, rakers file four reports a day, classified by ethnicity (covering twenty-eight “ancestries of interest”), and featuring details of the discussions they overhear, popular reactions to events in the news, whether or not al Jazeera was on the television, the nature of literature for sale, the fliers on the bulletin board, and even the clothes people wear. The idea is to identify and monitor “radicalization incubators.”

---

terrorist plots on lesser, non-terrorism-related offenses such as immigration violations. In agent provocateur cases ... government undercover operatives befriend suspects and offer to facilitate their activities.” Bjelopera, “Federal Bureau of Investigation,” 18–19.

171 Matt Apuzzo and Adam Goldman, Enemies Within: Inside the NYPD’s Secret Spying Unit and Bin Laden’s Final Plot Against America (New York: Simon and Schuster, 2013), 282.

172 Apuzzo and Goldman, Enemies Within, 24, 82–83, 87.

173 Ibid., 68, 73–76, 128, 282.
When immigrants from targeted countries are arrested, no matter what the nature of the charge, they are questioned by officers from the Demographics Unit (later renamed the Zone Assessment Unit). Interrogators ask, not only about terrorism, but for broad information concerning the community as a whole: where to find a cheap room, a fake ID, English-language lessons, a popular mosque, or a good gym. Sometimes low-level offenders are offered the chance to work off their charges by serving as “listening posts” in their neighborhood, and minor problems with immigration procedures or business licenses are likewise used as leverage to recruit informers.

Paid informers, called “mosque crawlers,” infiltrate Muslim congregations and report on the content of the sermons, the opinions and private lives of religious leaders, the ethnicities of those attending services, and the views of people taking classes. By 2006, the NYPD had catalogued more than 250 mosques, with profiles of their leadership, affiliations, and ethnic compositions. Fifty-three were listed as “mosques of interest,” and 138 individuals were tagged as “persons of interests.” The goal was to have an informer inside every mosque within 250 miles of New York City.

The net being cast here is extremely wide. Investigations focus less on individual suspects than on entire communities, because the emphasis is on intelligence rather than law enforcement—or, put differently, on politics rather than crime. As journalists Matt Apuzzo and Adam Goldman explain:

[The] NYPD wanted to identify terrorists early. Not just before they launched an attack; that was a given. [Intel head David] Cohen wanted to spot them before they picked targets, (that is, warning them that protestors may be violent, and building an expectation that police will have to respond forcefully). Finally, the implementation of Strategic Incapacitation depends on the police controlling the physical space in which protests occur. They typically do that by creating “hard zones,” which are guarded, fortified, and off-limits to the public. These find their mirror image in the contained areas where demonstrations are permitted: so-called “free-speech zones.” These designated protest areas are often surrounded by concrete barriers and chain link fencing, encircled by armed guards, and relatively isolated. Between these two well-defined areas, the rest of the city becomes a “soft zone.” It remains accessible to the public, but ordinary civil liberties are curtailed. Demonstrations are practically, if not legally, prohibited and police are granted extraordinary latitude to conduct searches, use force, and make arrests. It is in the soft zones that police and protestors are most likely to clash, and cops generally view demonstrators entering them to be, by definition, “bad” protestors.

177 Ibid., 129
lice, make self-interested demands, and are generally older. By contrast, protesters considered "bad" or transgressive articulate more abstract demands, use unpredictable and often illegal tactics, do not negotiate with police, and are generally younger.\footnote{Patrick F. Gillham, “Securitizing America: Strategic Incapacitation and the Policing of Protest Since the 11 September 2001 Terrorist Attacks,” Sociology Compass 5, no. 7 (2011): 640.}

The police work to accommodate and collaborate with the compliant, contained “good” protestors—within limits. The rules are strict, the conditions are established unilaterally by the police, and the communication is one-way. Disruptive, transgressive, “bad” protestors, in contrast, find themselves subjected to something like the old Escalated Force model, often employed preemptively.\footnote{“The use of force here is strategic rather than punitive. It is designed to control suspect populations and establish a zero tolerance framework for the control of disorder, rather than to punish groups based on their politics or tactics. For the most part, police control is exerted though preemptive intelligence-led actions and on the ground micro control rather than through violence. The effect is to deny the full right to assemble without the appearance of police brutality on the nightly news.” Alex S. Vitale, “The Command and Control and Miami Models and the 2004 Republican National Convention: New Forms of Policing Protest,” Mobilization 12, no. 4 (2007): 406.}

However, Gillham emphasizes that Strategic Incapacitation is not just “negotiated management with contained protestors and escalated force with transgressive ones,” but “a new strategy” incorporating “three other tactical dimensions”—intelligence, propaganda, and spacialized control.\footnote{Gillham, “Securitizing America,” 643.} The first of these is the demand for extensive, detailed intelligence, collected before, during, and between protest events and shared among police agencies. The second is the proactive and manipulative use of the media to shape public perception—vocally tagging protest groups as “good” or “bad” in advance of the action, undercutting support for the demonstrators’ cause, and preparing the public for the possibility of violence before they bought weapons, and, ideally, before a toxic ideology took root.

Cohen wanted to know whether you were going to be a terrorist before you knew yourself.\footnote{Ibid., 125.}

The effect, predictably, has been literally a kind of counter-terror—it terrorizes the subject population. Apuzzo and Goldman continue:

The Muslim community is marbled by fear and isolation.… Worshippers are afraid to congregate. Young men worry that growing beards will attract police attention. People fear that talking politics, marching in protests, or attending academic lectures will land them in police files.

They believe this because it happens.\footnote{Ibid., 282. For more on the consequences of law enforcement infiltration on Muslim communities, see: Human Rights Watch and the Human Rights Institute, Illusion of Justice, 166–69.}

### The Other War on Terror

At the same time, while the U.S. military bombed, invaded, occupied, and carried out covert ops in an ever-expanding, and ever-shifting, list of countries (mostly) in the Middle East—Afghanistan, Iraq, Pakistan, Yemen, Libya, Somalia, Iraq again, Syria—and while domestic law enforcement was engaged in wholesale surveillance and infiltration of Arab, Muslim, and immigrant communities, another, smaller, less deadly, more focused “war on terror” was also under way—this one targeting the environmental and animal rights movements.

The federal anti-eco campaign—sometimes called the “Green Scare”—has been characterized by extensive surveillance, petty harassment, long-term infiltration, “enhanced” sentencing, the
use of solitary confinement, entrapment by agents provocateurs, and legal maneuvering to criminalize political speech.\footnote{For an overview see: Will Potter, \textit{Green Is the New Red: An Insider's Account of a Social Movement Under Siege} (San Francisco: City Lights Books, 2011).}

For example, in 2006, six people affiliated with Stop Huntingdon Animal Cruelty were convicted of conspiracy to violate the federal Animal Enterprise Protection Act. Their crime was maintaining a website that detailed actions (including vandalism) against Huntingdon Life Sciences and listed the home addresses of corporate executives. For posting such information on the Internet, the activists were jailed for four to six years.\footnote{Center for Constitutional Rights, "U.S. v. SHAC 7," no date, accessed October 20, 2014, ccrjustice.org.}

In February that same year, another activist was arrested for a lecture he had given, describing an environmentally motivated arson for which he had already spent four years in federal prison. During the question-and-answer portion of his talk, Rod Coronado responded to a inquiry about the design of the firebomb he had used; he then found himself charged with demonstrating the manufacture of an incendiary device. Pleading guilty, he returned to prison for twelve more months.\footnote{Jenny Esquivel, "Building Conspiracy: Informants in the Case of Eric McDavid," in \textit{Life During Wartime: Resisting Counterinsurgency}, ed. Kristian Williams, Lara Messersmith-Glavin, and William Munger (Oakland: AK Press, 2013), 317.}

Also in 2006, on January 13, Eric McDavid, Zachary Jensen, and Lauren Weiner were arrested in Auburn, California, for conspiring to attack the Institute of Forest Genetics, take down cell phone towers, and blow up a dam. In keeping with the larger pattern of terrorism conspiracy cases, the plot was chiefly driven by an agent provocateur working for the FBI, and there was no bomb. The undercover operative, going under the name “Anna,” arranged the meetings, kept the notes, paid for their travel, rented the cabin where they stayed, and supplied the instructions and the materials for making a bomb—all

\footnote{Fernandez, \textit{Policing Protest}, 111 (provocateurs), 130–31 (surveillance), 136–37 (snatch squads).}

Miami Mayor Manuel Diaz called the FTAA operation “the model for homeland security.”\footnote{Ibid., 89.}

\section*{Good Protester/Bad Protester; Good Cop/Bad Cop}

By the end of the decade, the various stances, tactics, and techniques, came together to form something like a coherent approach to crowd control, which scholars John Noakes and Patrick Gillham termed “strategic incapacitation.” The new approach draws from both the Escalated Force and the Negotiated Management models, and incorporates additional elements stressing the role of intelligence, the control of urban space, and the management of public perception.

The primary goals for police in this new era [Gillham writes] are to preserve security and neutralize those most likely to pose a security threat. To reach these ends strategic incapacitation emphasizes the application of selectivity whereby police distinguish between two categories of protesters—contained and transgressive—in order to target those perceived most likely to engage in disruptive activities. Contained protesters, often referred to by police as ‘good protesters’ are generally known by police, use conventional and legal tactics, negotiate with po-
Miami became a militarized sector, closely resembling a war zone.\textsuperscript{108}

Nearly 2,500 cops from forty agencies were assigned to the FTAA events. A large portion of downtown was fenced off and forbidden to the general public; police manned military-style checkpoints and positioned snipers on rooftops in the surrounding area. Before the protests even started, cops were turning back busses full of union supporters, pressuring churches to rescind offers to house demonstrators, and forcing businesses to remove anti-FTAA posters from their windows.\textsuperscript{109}

Once the demonstrations were underway, police confronted protestors with batons, tear gas, and rubber bullets. The attack seemed indiscriminate: peaceful protests, demonstrations that had been issued permits, groups that were in the process of dispersing, medics, legal observers, and random passers-by were all subject to the use of force. One medic estimated that her team had seen about fifty head wounds, “ten serious, five of them critical”—including one man who had been jailed overnight without medical treatment while his brain hemorrhaged. “Most of the injuries we saw were from the shoulders up,” the medic told me. “That led us to believe that police were intentionally aiming at people’s heads with rubber bullets.”\textsuperscript{110}

In addition to being nearly surrounded by armed and armored riot cops, the protests were also well infiltrated by plain-clothes officers, some feeding intelligence to the command center, some serving as “snatch squads” to make arrests without warning, and some acting as agents provocateurs, antagonizing police and urging demonstrators toward foolhardy or coun-

\textsuperscript{108} Fernandez, Policing Dissent, 68–69. Ellipses in original.
\textsuperscript{110} Ibid., 57.

...while urging, cajoling, manipulating, or outright bullying the others to get more serious, think bigger, set “a damned goal,” and “keep the damned plan.”\textsuperscript{103} Diane Bennett, a juror from the case, accused the FBI, through Anna, of “providing all of the essential tools for the group; the cabin, the money, the idea, the books, everything.”\textsuperscript{104} For her efforts, Anna was paid over $65,000. Jenson and Weiner agreed to testify in exchange for reduced sentences (in fact, “time served”). McDavid was sentenced to nineteen years and seven months in prison, but was released after nine years when it was discovered that the FBI had withheld evidence from his attorneys.\textsuperscript{115}

The most spectacular success of the FBI’s campaign was surely “Operation Backfire.” The Backfire defendants were accused of a series of Earth Liberation Front and Animal Liberation Front arsons from the late 1990s—activities the FBI characterized as “domestic terrorism.”\textsuperscript{116}

The investigation into the ELF had stalled out for years, and only started to show progress in 2001 when an investigation into a stolen truck led the police to question a heroin addict named Jacob Ferguson. The police noticed that the theft occurred on the same night as an arson at a Eugene, Oregon

\textsuperscript{104} Diane Bennett, “Declaration of Juror Diane Bennett in Support of Defense Sentencing Memorandum,” United States of America v. Eric McDavid (Case 2:06-cr-00035-MCE Document 316), May 1, 2008, 3. Bennett argues that in McDavid’s case (as in the case of Geronimo Pratt), the jurors were misled as to the status of the informant and, had the issue been clarified, the outcome might have been different. Bennett, “Declaration,” 3–5. Bennett’s statement and similar documents from the case are archived at supporteric.org, accessed October 20, 2014.
SUV dealership, and deduced (wrongly) that Ferguson might have started the fire. Twice subpoenaed to grand juries and finally facing charges himself, in 2004 Ferguson offered investigators information on twenty-two Earth Liberation Front and Animal Liberation Front actions, naming those involved. He then spent months traveling the country, meeting up with his old comrades and secretly recording their reminiscences about their adventures as saboteurs.

Once it was going, the cycle of arrest and denunciation was quick to repeat itself. A few of those accused fought the charges, plead guilty without implicating others, or fled. Most, however turned against their friends in the hope of more lenient sentencing. Confronted with evidence from their former comrades, new suspects were then quick to inform on others, renewing the cycle—and leading to more interrogations, more confessions, more naming names, more arrests, and more jailed activists. Altogether eighteen people were indicted. Sixteen were sent to prison for as long as thirteen years, one is still at large, and one—William Rodgers—killed himself, soon after his capture.

**Anarchists, Again**

Overlapping with the suppression of the environmental movement, the authorities were also turning their attention, with renewed vigor, to the ideological descendants of their Haymarket adversaries, anarchists.

More than a year before the 2008 Republican National Convention, undercover cops started infiltrating protest planning

The ACLU described the event precisely, referring to it as “an orchestrated police riot.” A few days later, however, the cops showed a different face when thirty-seven people sat down in front of the notorious Rampart Division police station and refused to leave. A senior officer graciously accepted their list of demands, shook hands with the protestors, and politely placed them under arrest. One journalist noted: “The civil disobedience action ... attempted to focus on the brutality, corruption, and violence of the LAPD,” but because “the organizers had collaborated closely with the Rampart police prior to the action . . . the result was a PR/media opportunity to showcase the civility and non-violent behavior of the cops.” It was a masterful bit of theater.

The reliance on naked coercion reached its zenith in 2003, at protests against the Free Trade Area of the America negotiations in Miami. Luis Fernandez, a sociologist who observed the protests, describes the scene:

[The] Miami-Dade Police Department, in collaborating with dozens of local, state, and national law enforcement agencies, welcomed protestors with decisive force. In the days before the protest, the police patrolled the streets with heavily armored, military-style personnel carriers and swept over downtown Miami with police helicopters. By demonstration time, the city was packed with thousands of police officers dressed like soldiers in khaki uniforms with full black body armor and gas masks, marching down the streets shouting ‘Back! ... back!’ while beating batons against their shields. For no apparent reason, they fired skin-piercing rubber bullets indiscriminately into crowds of unarmed peaceful protestors, sprayed tear gas at thousands of others, and shocked still others with tasers. It is no hyperbole to say that, during the FTAA demonstration, the cops showed a different face when thirty-seven people sat down in front of the notorious Rampart Division police station and refused to leave.

---

2000 IMF/World Bank meetings. They also had more than 500 protestors in jail before the meetings even began, having surrounded an early march, arresting everyone present. Then they raided the protestors’ convergence center, where they seized puppets, banners, and first aid kits; they ordered the building closed under the pretext of fire code violations. As a result of these preventive measures, the police could rely less on actual force during the conference itself, and were widely praised for their restraint. At the Republican National Convention in Philadelphia later that summer, police took a similar approach—raids, seizing protest material, and preemptive arrests, with the added feature of conspiracy charges against protest leaders.

At the Democratic National Convention a few weeks later, the LAPD attacked the crowd at a concert in one of the designated protest areas. The cops cut power to the stage, declared the event an unlawful assembly, and gave approximately 10,000 people twenty minutes to leave through a single exit. Minutes later, police charged with horses and fired rubber bullets. The Reverend Jesse Jackson decried the “unnecessary brutality”; Commander David Kalish called it “a measured, strategic response.” They may both be right.

---

meetings around the country, and the Minnesota Joint Analysis Center began compiling, analyzing, and distributing information from police and military databases, DMV records, and court documents. Just before the start of the convention, sheriff’s deputies raided the homes of several activists, making arrests and seizing protest materials as well as cell phones, cameras, computers, diaries, checkbooks, and (in their words) “propaganda literature.” By the time the delegates left town, more than 800 people had been arrested—including eight members of the ironically-named “RNC Welcoming Committee.” The RNC 8 were charged with “conspiracy to riot in the furtherance of terrorism” under Minnesota’s state-level version of the Patriot Act. If convicted, they faced nearly eight years in prison. Instead, charges were dropped against three of them and the rest plead guilty to gross misdemeanors. Only one went to jail: ninety days.

This outcome was part of a larger pattern: The majority of people arrested—584 out of more than 800—were either released without charges or had their cases dismissed; only ten suffered felony convictions.
Among the unlucky ten were David McKay and Bradley Crowder, two young men convicted of making firebombs. They had traveled to St. Paul as part of the “Austin Affinity Group,” alongside an older, more experienced activist named Brandon Darby. Darby, who became something of a role model to them both, was secretly working for the FBI.

Almost as soon as they arrived in the Twin Cities, things started to go wrong. First, acting on a tip from Darby, the police stopped their van and seized home-made riot shields. The boys were discouraged, but Darby was vocal in demanding some sort of retaliation: “We’re not going to take this lying down. You’ve got to do something about it.”

That evening, McKay and Crowder made molotov cocktails, but lacking support from the rest of their affinity group, decided not to use them. Later, though, at Darby’s urging, McKay suggested attacking parked police cars. He didn’t follow up on the plan, and Crowder was already in jail at the time, but they were charged and convicted just the same. Crowder was sentenced to two years, McKay to four. Darby was paid $12,750, plus $3,028 for expenses. He’s now a columnist writing for conservative websites.

Such provocateur tactics, already well-established in the creation and arrest of Muslim terrorists, have increasingly targeted the anarchist movement as well. In 2012, five young men were similarly manipulated into a plot to blow up a bridge near Cleveland. An FBI informant posing as an Occupy Cleveland activist gained influence with the men by providing them with booze, drugs, and jobs, then offered to help them buy explosives. They received sentences ranging from six to

99 Ibid., 40.
100 Ibid., 3.
101 “Changes and learning processes of the police are initiated by an analysis of problematic public order interventions, that is, the police learn from their failures.... The importance of the body of past experience, however, seems such that it prevents the police from anticipating change. Tactical and strategic errors in confrontations with new movements and protest forms may trigger off a relapse into an antagonistic protest policing style.” Della Porta and Reiter, “Policing of Protest in Western Democracies,” 30.
that had been developed to close businesses, prevent logging, disrupt government meetings, or otherwise interfere with the operation of some part of society. That is to say, picketing may be fine, barricades are not. Rallies were in, riots were out. Taking to the streets—under certain circumstances—may be acceptable; taking over the factories was not. The danger, for activists, is that they might permanently limit themselves to tactics that were predictable, non-disruptive, and ultimately ineffective.97

On the other side, Negotiated Management opened a pitfall for police wherein they might come to rely on this cooperative arrangement. If the police assumed that activists would conduct themselves within the bounds set by this approach, they left themselves open for some nasty surprises.

Essentially, that is what happened to the Seattle police in 1999. According to the SPD’s After Action Report, police planners adopted a Negotiated Management strategy early on and failed to consider contingencies that would make other options necessary. Despite well-publicized plans to disrupt the WTO conference, the police decided to “Trust that Seattle’s strong historical precedents of peaceful protest and our on-going negotiations with protest groups would govern the actions of demonstrators.”98 On November 30, their mistake must have been only too obvious. When the institutional framework of protest was challenged, the cooperative relationship proved fragile and the basis of the Negotiated Management model was undermined. Not only did radicals refuse to play the game by its usual rules, even respectable protest groups were unable to keep their members in line. For example, when police changed

twelve years.98 A month later, just before the NATO summit in Chicago, three other anarchists were arrested for making molotov cocktails, acting under the guidance and with the direct aid of two undercover cops. Though they were acquitted of terrorism charges, they were convicted of mob action and possessing firebombs, resulting in prison terms of five to eight years.199

Also in 2012, on the morning of July 25, FBI agents outfitted with assault rifles, flack jackets, helmets, and olive drab uniforms broke down the doors of several Portland homes, searching for paint, sticks, road flares, cell phones, “diary and journal entries,” address books, black clothing, and “anti-government or anarchist literature.”200 Simultaneously, in Portland, Olympia, and Seattle, the feds were also delivering subpoenas summoning activists to a secret grand jury. In this case, there was no bomb plot, no molotov cocktails, no conspiracy charges. Instead, the FBI was purportedly responding to riotous demonstrations in Seattle on May Day—International Workers Day, and the annual commemoration of Haymarket. Court documents indicate, however, that the FBI was closely

97 Unlike their allies at the University of Kansas, Black people in South Africa actively resisted the institutionalization of protest. “Protest, especially in the townships, was not an institutionalized expression of specific grievances but an integral part of the ANC’s strategy of making the townships ungovernable.” Waddington, “Controlling Protest,” 137.
98 Seattle Police Department, After Action Report, 18.
monitoring a group of Portland anarchists in advance of the demonstrations.\textsuperscript{201} Those who appeared before the grand jury—most of whom were not even present on May 1—report a McCarthyite proceeding in which, without the rights to remain silent or to have an attorney present, they were asked about their political views, the beliefs of their friends, and who among their acquaintances know whom.\textsuperscript{202} They were questioned, in other words, not about crimes but about politics and were asked quite literally to name names. Four people who refused to answer such questions were cited for contempt of court and jailed as long as five months, much of that time in solitary.\textsuperscript{203} In the end, the grand jury produced no indictments.

\textbf{Looking Left, Leaning Right}

At every level of government, campaigns against dissent have tended to focus disproportionately on the activities of the left. For example, in 1975, a former detective leaked to the press a list of organizations with files maintained by the Baltimore Police Department’s Inspectional Service Division. Three of the 125 groups listed were classified as right-wing. Other categories included “subversive, extremist, civil rights, left-wing, pacifist, miscellaneous, and civic.” The NAACP, the ACLU, the

\textsuperscript{201} Perhaps quite a lot in advance: In June, shortly before the FBI raids, Portland police broke up squats where some of these same anarchists were living, and one was arrested for thirty-six acts of vandalism (charged as thirty-six counts of felony criminal mischief and thirty-six counts of felony conspiracy), dating back as far as 2010; he eventually plead to five counts and spent twenty days in jail.

\textsuperscript{203} Judge Richard Jones, under whose authority they were held (and released), observed, “Their physical health has deteriorated sharply and their mental health has also suffered from the effects of solitary confinement.” Quoted in Hermes, “Chasing Anarchists.”

as it was intended to. Instead, it quickly degenerated into a domineering red squad.\textsuperscript{95} This quick return to the antagonistic approach was the result of several deeply rooted features of the police as a group, including the rejection of compromise and conciliatory tactics, an obsession with agitators and conspiracies, and the system of political sponsorship that guided promotion into the unit.\textsuperscript{96}

Police/protestor cooperation required a fundamental adjustment in the attitude of the authorities. The Negotiated Management approach demanded the institutionalization of protest. Demonstrations had to be granted some degree of legitimacy so they could be carefully managed rather than simply shoved about. This approach de-emphasized the radical or antagonistic aspects of protest in favor of a routinized and collaborative approach.

Naturally such a relationship brought with it some fairly tight constraints as to the kinds of protest activity available. Rallies, marches, polite picketing, symbolic civil disobedience actions, and even legal direct action—such as strikes or boycotts—were likely to be acceptable, within certain limits. Violence, obviously, would not be tolerated. Neither would property destruction. Nor would any of the variety of tactics

\textsuperscript{95} As early as 1966, inspector Harry G. Fox was publicly writing of the unit’s intelligence potential: “Members of a good Civil Disobedience Squad should have daily contact with the various leaders, planners and rank and file of these [protest] groups. They get to know them by name, sight and action. The CD Officer talks to them, establishing rapport. He develops intelligence about their connections, background, personal life and ambitions. He influences them to give him a phone call prior to demonstrations or meetings.... Prior to any group action, he secures advance copies of literature, group size, techniques to be used, routes of marches, and duration of demonstration.... In short, a Civil Disobedience Squad can develop files, photos, informants, plus the ability to secure advance tips on impending demonstrations. Through reports or interviews, they can alert the police administrator of the who, where, what, why, when, and how.” Harry G. Fox, “The CD Man,” \textit{The Police Chief}, November 1966, 22.

\textsuperscript{96} Donner, \textit{Protectors of Privilege}, 206.
The bulk of the actual work of maintaining the peacefulness of the proceedings was performed by the demonstrators themselves. An estimated five thousand “marshals,” recruited from among the demonstrators, flanked the crowds throughout. Their effectiveness was shown when they succeeded in stopping an attempt by the fringe radicals to leave the line of the march in an effort to reach the White House.92

The nature of such an arrangement is not lost on those who study law enforcement. The academic literature describes marshals who “‘police’ other demonstrators,”93 and who have a “collaborative relationship” with the authorities.94 This is essentially a strategy of co-optation. The police enlist the protest organizers to control the demonstrators, putting the organization at least partly in the service of the state and intensifying the function of control.

Playing by the Rules

The Negotiated Management model had its weaknesses as well. Its success required a certain kind of cop and a certain kind of protest. If either was unavailable, Negotiated Management became impossible.

The Philadelphia police department made a very early attempt at this softer approach, and failed for lack of the right cop. In 1964, Police Commissioner Howard Leary created a “Civil Disobedience” unit charged with both keeping order and protecting the civil rights of demonstrators. This unit was to be headed by an officer proven to be calm, patient, and friendly. His job was to build a relationship with protest leaders and work with them to keep the peace. The unit never functioned

209 Cunningham, There’s Something Happening Here, 11.
tive. In the latter case, it is only when some faction pushes things a step too far that the state initiates a broad but temporary crackdown, followed by a renewed stasis. In the sixties, the Klan seems to have stumbled over one such political trip line when it started murdering White northerners. A similar line was crossed in the early 1980’s with The Order’s interstate spree of bank heists, bombings, and assassinations. The FBI’s response then was Operation Clean Sweep, a movement-wide multi-year campaign, leading to indictments against members of The Order, The Covenant, the Sword and the Arm of the Lord, Aryan Nations, Posse Comitatus, and the White Patriot Party, as well as select national leaders.210

Likewise, when Timothy McVeigh bombed the federal building in Oklahoma City, killing 168 people, law enforcement took a sudden interest in the right-wing militia movement. The resulting campaign saw federal prosecutions of, not only McVeigh himself, but the Montana Freemen, the Aryan Republican Army, the Aryan People’s Republic, and the Phineas Priesthood, as well as arrests related to other bomb plots in Oklahoma, West Virginia, Arizona, and Georgia. At the same time, the FBI’s anti-terrorism budget doubled, rising from $256 million in 1995 to $581 million in 1998.211 In 1996, President Clinton signed the Antiterrorism and Effective Death Penalty Act, which laid the foundation for the Patriot Act, and lengthened sentences for a range of crimes, imposed increasingly punitive conditions in prisons, expanded the death penalty, and (as the Freedom Archives’ Claude Marks explains) signaled “the first significant step in ending habeas

urban poor. They push for greater inclusivity at all levels of society. But they also denounce the actions that successfully brought attention to these problems, and effected change. The Eisenhower report explicitly denounces civil disobedience; the Scranton report insists that those responsible for campus unrest be disciplined.89 These reports push for rigorous adherence to constitutional guarantees of free speech and the like, while at the same time offering precise instruction on the means of limiting, containing, and controlling protests.

It is tempting to read such documents as well-intentioned but politically naive defenses of the rule of law. But one might also understand them as handbooks for social managers responsible for controlling dissent.90 Taken as such, the reports’ advocacy of civil liberties and the principle of minimal force reflect the sophistication of the liberal approach to repression. Negotiated Management was an innovation in the means of crowd control, but the basic aim remained unchanged. Both Negotiated Management and Escalated Force represented a defense of the status quo. Brothers’s article, for example, emphasizes again and again the “neutrality” of the police, but notes that their plans were designed to “minimize the impact of the event upon the media.”91 Presumably, had the demonstrations aimed at goals besides media attention, the police would have sought to minimize their impact in those areas as well.

The Eisenhower Commission offers the Peace Moratorium March of November 15, 1969, as an example of the success of Negotiated Management:

90 For a critical overview of riot commission politics, see: Feagin and Hahn, Ghetto Revolts, 205–26.

91 Brothers, “Communication is the Key,” 15.

211 Ibid., 413–14.
of the event and the route of the march were agreed upon, and organizers were encouraged (or sometimes required) to provide their own marshals to exercise discipline over the group as a whole.

A model application of Negotiated Management is described by John Brothers in his article "Communication Is the Key to Small Demonstration Control." Brothers documents a series of anti-apartheid actions on the University of Kansas campus and details the Kansas University Police Department’s response. Between April 29 and May 9, 1985, the campus was the site of three "moderate-sized" demonstrations and several small ones, including some accompanied by civil disobedience. Sixty-five arrests were made, but there were no injuries, no property damage, and no violence on either side. This small miracle was accomplished by establishing friendly relations with the demonstrators and being patient enough to let crowds dwindle on their own. Police kept their presence to a minimum and carefully crafted a non-aggressive demeanor (in part by not donning riot gear). They also provided refreshments on hot days, and waited to receive complaints before issuing citations. By these means, police won the cooperation of organizers, who met with them regularly to outline their plans.88

Clearly this approach is better suited to a political system that espouses ideals of freedom and popular sovereignty, but the ultimate aim of Negotiated Management remains the same as that of Escalated Force (or even Maximum Force, before that)—to control dissent, to render protest ineffective.

Looking now at the Scranton, Eisenhower, and Kerner reports, what strikes the reader is the apparent schizophrenia of them all. They decry social injustice with criticisms of racial discrimination, prison conditions, and the plight of the corpus.212 In sum, the government’s response to White supremacist violence was to enact legislation that would mainly harm the interests and curtail the rights of people of color.

Sometimes the state’s bias actually draws the cops into alliances with the far right.213 Red squad files have commonly been shared with right-wing organizations,214 and at times these relationships have gone further, as police made use of right-wing paramilitary and vigilante groups to carry out illegal campaigns of sabotage and violence. For example, during the late 1960s, the Legion of Justice conducted a series of burglaries, beatings, and arson attacks on behalf of the Chicago Police red squad.215 A few years later, in San Diego, the Secret Army Organization—a group led by an FBI informant and armed with $10,000 worth of Bureau-supplied weaponry—was busy beating up Chicano activists, trashing the offices of radical newspapers, and attempting to assassinate anti-war organizers.216 Here, too, the rightward bias is apparent. As Chip Berlet notes, “the U.S. government seems so ready to make use of the right to violently attack the left, but not the other way around.”217

88 John T. Brothers, “Communication is the Key to Small Demonstration Control,” Campus Law Enforcement Journal (September–October 1985): 13–16.

212 Quoted in Walidah Imarisha and Kristian Williams, "COINTELPRO to COIN: Claude Marks Interviewed (April 16, 2014)," in Life During Wartime, 36.

213 This tendency has been especially pronounced in police campaigns against the civil rights and labor movements. See chapters 4 and 5.

The Left/Right Imbalance

Even in period since the civil rights movement era, as the right wing has become more hostile to the state—less conservative and more revolutionary—this official bias has still largely remained intact. Law enforcement attitudes toward the right tend to be characterized by complacency, tolerance, and a kind of willful ignorance.

Journalist Will Potter has noted, for example, the that while the FBI was "exaggerating the threat" posed by the Earth Liberation Front and Animal Liberation Front (who had damaged property, but never targeted people), the Bureau was simultaneously "either grossly miscalculating, or intentionally downplaying murders and violent attacks from right-wing extremists." Between 2007 and 2009, the FBI counted forty injuries and seven deaths from right-wing violence. However, West Point's Combating Terrorism Center (CTC) counted 599 injuries and 108 deaths during the same period. In fact, the CTC estimated that right-wing violence had increased 400% since 1990, while the FBI reported that it was in decline.

Likely the cops’ crazily uneven willingness to react to—or even recognize—subversion or extremism reflects race and.

---

218 Leonard Zeskind carefully traces out this transformation, from the 1970s to the early twenty-first century, in his book Blood and Politics. He writes that in the seventies, "Aryan Nations had declared that its race was its nation. Pete Peters had made his race the basis of his religious beliefs and attached a notion of white (national) redemption to his salvation. David Duke had gone to the border and told reporters that he thought of America as a white nation. A gang of Order bandits had tried to finance a revolution, not a return to Jim Crow segregation; they wanted a territory established free of everything they regarded as ‘nonwhite.’ And Willis Cato and William Pierce... articulated a complete worldview... Theirs was a zero-sum equation, in which white people had it all or they had nothing." Zeskind, Blood and Politics, 244.

---

protesters when their civil disobedience is intentionally symbolic.85

Under Negotiated Management, arrests are used only as a last resort, and force is kept to a strict minimum. Rather than trying to disperse the crowd, the police plan so as to contain it. Rather than responding to disorder with force, the police calculate their tactics so as to defuse potentially explosive situations. The innovation of this approach lies in the understanding that de-escalation is sometimes possible. According to the political scientists Donatella della Porta and Herbert Reiter:

[T]he three most significant tactical tendencies characterizing protest policing in the 1990s appear to be (a) underenforcement of the law; (b) the search to negotiate; (c) large scale collection of information. [Beginning in the 1980s, police strategy was] dominated by the attempt to avoid coercive interaction as much as possible. Lawbreaking, which is implicit in several forms of protest, tends to be tolerated by the police. Law enforcement is usually considered as less important than peacekeeping. This implies a considerable departure from protest policing in the 1960s and 1970s, when attempts to stop unauthorized demonstrations and a law-and-order attitude in the face of the "limited rule-breaking” tactic used by the new movements maneuvered the police repeatedly into "no-win" situations.86

Under the new model, police focused on preventing a disturbance, rather than responding to one, seeking to control demonstrations through a system of permits and a series of negotiations with protest organizers.87 Elements such as the time

86 Della Porta and Reiter, “Policing of Protest in Western Democracies,” 6–7.
87 Permit requirements have been in place since the Progressive Era, but had not previously been used to this end. Instead, permits were routinely denied, though the requirement provided a pretext for declaring gatherings illegal. Donner, Protectors of Privilege, 50.
Revising the Theory

Following the disasters of the late sixties, some people started to question the wisdom of a police strategy designed to “escalate” violence. Several commissions were set up to study the disturbances of the period, their causes, and the police response to them. Most prominent among these were the Kerner, Eisenhowe r, and Scranton commissions. All three bodies concluded that police actions against crowds often intensified, and in some cases provoked, civil disorder. They also recognized that the dangers of the Escalated Force model were not only tactical, but political.

The Scranton Commission wrote, “[T]o respond to peaceful protest with repression and brutal tactics is dangerously unwise. It makes extremists of moderates, deepens the divisions in the nation and increases the chances that future protests will be violent.”

Consequently, these boards recommended a number of changes in police handling of demonstrations. The Kerner Commission, for instance, advocated a strategy emphasizing manpower over firepower, prevention over reaction, and increased management and regimentation of the police. A new strategy, “Negotiated Management,” was born.

Negotiated Management was designed to correct for the excesses of the Escalated Force model. Clark McPhail describes the approach:

Police do not try to prevent demonstrations, but attempt to limit the amount of disruption they cause.... Police attempt to steer demonstrations to times and places where disruption will be minimized.... Even civil disobedience, by definition illegal, is not usually problematic for police; they often cooperate with

---

220 Zeskind, Blood and Politics, 365.

221 Potter, “If Right-Wing Violence is Up.”
ing relatively powerless people, that will be repressed and the interests upheld will be those of the powerful.222

The broader pattern helps to explain one partial exception to the left/right gap in official scrutiny—namely, the domestic aspects of the "War on Terror." Al Qaeda is clearly a reactionary organization. Like much of the American far right, it is theocratic, anti-Semitic, and patriarchal. Like Timothy McVeigh, the 9/11 hijackers attacked symbols of institutional power, killing a great many innocent people to further their cause. But while the state’s bias favors the right over the left, the Islamists were the wrong kind of right-wing fanatic. These right-wing terrorists were foreigners, they were Muslim, and above all they were not white. And so, in retrospect and by comparison, the state’s response to the Oklahoma City bombing seems relatively restrained—short-lived, focused, selectively targeting unlawful behavior for prosecution. The government’s reaction to the September 11th attacks has been something else entirely—an open-ended war fought at home and abroad, using all variety of legal, illegal, and extra-legal military, police, and intelligence tactics, arbitrarily jailing large numbers of people and spying on entire communities of immigrants, Muslims, and Middle Eastern ethnic groups. At the same time, law enforcement was also obsessively pursuing—and sometimes fabricating—cases against environmentalists, animal rights activists, and anarchists while ignoring or obscuring racist violence against people of color. What that shows, I think, is that the left/right imbalance persists, but sometimes other biases matter more.

Rethinking Unrest

We’ve come a long way since Haymarket.

82 Ibid., 20.

83 Stark observes, “There was a strong negative correlation between the amount of force applied and the cessation of rioting in Detroit.” Ibid., 137.
They sliced us like baloney. The police wanted bodies. They grabed [sic] Guardsmen as soon as they reached the armories, before their units were made up, and sent them out—two on a firetruck, this one in a police car, that one to guard some installation.... The Guard simply became lost boys in the big town carrying guns.77

In the case of the 1968 Democratic Convention, other factors also came into play, in particular the attitudes of civil authorities. Walker mentions, “Chicago police [had been led] to expect that violence against demonstrators, as against rioters, would be condoned by city officials.”78 In fact, this expectation was validated; Mayor Daley continued to defend his officers long after his excuses could be considered in any way credible.79 One further fact complicates the picture: much of the convention-week violence was planned. Some reporters received warnings from cops with whom they were friendly; they were told the police intended to target members of the media.80 With these facts in mind, the police riot seems to take on a different air. The cops did not simply panic; they knew what they meant to do. While internal discipline broke down, the police action as a whole filled its intended role. Indeed, the cops had been encouraged, and then protected, by the mayor. Certain commanders may have been appalled by what they saw—or may simply have been afflicted by the managerial need to assert their authority in a crisis—but this did nothing to affect the behavior of the institution as a whole.

Finally, it should be noted that the Escalated Force strategy itself contributes to the likelihood of a police riot. The police riot, by Stark’s analysis, moves along exactly the same lines as Escalated Force. (In fact, Stark refers to his six-stage artic-

Today’s secret police operate a vast network of surveillance and monitor, not just individual suspects, but whole populations. They tap phones and intercept electronic communication, not based on specific suspicions, but simply because the information is there to be collected. They infiltrate, not only political organizations and radical movements, but places of worship, social scenes, and even entire neighborhoods. They are increasingly anticipatory in their orientation, preventive in their aims, preemptive in their methods.

Traditionally, cops have clung to a conspiracy model for understanding subversion, even when their targets included people quite removed from any radical tendency. That obsession with conspiracies and agitators reflected a conservative view of society: the political order was fundamentally stable, unrest was anomalous and irrational, dissent was not prompted by social conditions but by Communist plots. As Frank Donner notes:

To equate dissent with subversion, as intelligence officials do, is to deny that the demand for change is based on real social, economic, or political conditions. A familiar example of this is the almost paranoid obsession with the “agitator.” Intelligence proceeds on the assumption that most people are reasonably contented but are incited or misled by an “agitator,” a figure who typically comes from “outside” to stir up trouble. The task is to track down this sinister individual and bring him to account: all will then be well again.223

Working from these premises, the police were incapable of understanding social movements when they arose, and could do practically nothing to prevent them. Eventually, the shortcomings of this approach necessitated the shift to COINTELPRO tactics and the covert disruption of radical movements.

77 Quoted in Ibid., 127.
79 Stark, Police Riots, 186.
80 Walker, Rights in Conflict, xi.

But COINTELPRO, too, was essentially reactive: it sought to dis-organize existing movements and isolate them from their constituencies, but could not prevent them from arising in the first place.

Responding to these failures, in the 1970s the police strategy started to change, directly following developments in military theory. Reflecting on his experience fighting insurgencies in various British colonies, the aforementioned general Frank Kitson crafted a doctrine of counterinsurgency.

Kitson’s analysis of rebellions outlined three stages of a subversive campaign: preparation, nonviolence, and insurgency. The security forces need to be ready at every stage, beginning with the preparatory stage when everything seems calm. Despite its aims, the old model had remained essentially reactive; it only responded at the second stage, when political activity became visible. Kitson’s hope was to prevent the “enemy” from ever reaching the second stage.²²⁴ He wrote:

Looking in retrospect at any counter-subversion or counter-insurgency campaign, it is easy to see that the first step should have been to prevent the enemy from gaining an ascendancy over the civil population, and in particular to disrupt his efforts at establishing his political organization. In practice this is difficult to achieve because for a long time the government may be unaware that a significant threat exists, and in any case in a so-called free country it is regarded as the opposite of freedom to restrict the spread of a political idea.²²⁵

Kitson saw that previous efforts at preventing unrest had begun too late, after a threat had already developed. The task at hand was to prevent subversive ideas from finding a popular audience.

These difficulties were exacerbated by organizational weaknesses common to police departments, namely the lack of internal discipline. The tactics of riot control are generally derived from the military, but the police proved to be a very different type of organization than the Army. “To put it bluntly,” Stark writes, “the American police cannot perform at the minimum levels of teamwork, impersonality, and discipline which these military tactics take for granted.”²⁷⁵ For example, in the Detroit riot of 1967, the police and National Guard were responsible for establishing order on one side of town; U.S. Army paratroopers were assigned to the other side. Within a few hours, the Army had restored order in their area, having fired 201 rounds of ammunition and having killed one person. The police and Guard, in contrast, fired thousands of rounds and killed twenty-eight people, while the disorder continued. Stark explains:

These dramatic and critical differences seem to have stemmed from discipline. The paratroopers had it, the police and guardsmen did not. The Army ordered the lights back on and troopers to show themselves as conspicuously as possible; the police and the guardsmen continued shooting out all lights and crouched fearfully in the darkness. The troopers were ordered to hold their fire, and did so. The police and guardsmen shot wildly and often at one another. The troopers were ordered to unload their weapons, and did so. The guardsmen were so ordered, but did not comply.²⁷⁶

The Guard, whose training approximates that of the Army, may have lost discipline in part because of how they were deployed. The police effectively disorganized the National Guard by converting it into a police force. One National Guard commander complained:

²²⁴ Kitson, Low Intensity Operations, passim; and, Ken Lawrence, New State Repression, 2.
²²⁵ Kitson, Low Intensity Operations, 67.
Kitson abandoned the conservative view of society and, with it, many of the assumptions driving the old approach. His analysis suggests that society exists in a state of permanent conflict, which would require a strategy of permanent repression.\textsuperscript{226} Rather than focusing solely on activists, political repression must be understood in terms of controlling whole populations.

The shift from anti-Communism to anti-terrorism is minor compared to the move from conspiracy theories to counterinsurgency. The latter has broadened the scope of intelligence operations and, at the same time, informed the direction of other police work. In crowd control actions and community policing programs, as well as in the work of the red squads, the emphasis is increasingly placed on preemptive and proactive efforts. In each case, police seek to enlist the support of reliable portions of the population when conditions are stable, and to neutralize disruptive elements before they present a threat.

The broader implications of this strategy, and the practical efforts to implement it, will be considered in the chapters that follow.

\begin{footnotesize}
\begin{enumerate}
\item Ibid., 18–21.
\item A Berkeley police memo dated August 21, 1968, notes, “Both civilians and officers have reported observing a sort of ‘one-upmanship’ phenomenon in squads without leaders of a supervisory rank. Each officer seems not to want anyone to feel he is less zealous than anyone else in the squad, and in tense encounters, a spiraling force-level was observed.” Quoted in Ibid., 53.
\item Walker described the attitude of the Chicago police going into the 1968 Democratic National Convention (with echoes of Henry Bellows, half a century before): “They believed that even an orderly crowd of peaceful demonstrators could easily develop into a mob led by a few determined agitators into violent action.” Walker, Rights in Conflict, 59.
\item Stark, Police Riots, 138.
\item “Thus, it is not the use of violence that makes police riots unusual events, but simply the concentration of police violence in a limited time and space... This is what makes it a riot—that the police are doing collectively in a short period of time and in a small area what they would ordinarily be doing...”
\item Lawrence, New State Repression, 3.

8: Riot Police or Police Riots?

Despite the efforts of the intelligence agencies, opposition movements continue to emerge, occasionally developing to the point of unrest. Naturally, when uprisings occur, the authorities must put them down. Governments necessarily have a stake in controlling political protest, especially when it becomes forceful enough to disrupt the usual course of things—that is, when it becomes an effective threat to the status quo. No one with an interest in retaining power can allow protest to go so far as to actually jeopardize their ability to rule. But that presents a problem for the rulers of an alleged democracy, with its promises of civil rights, free speech, popular assembly, and the pretense that the people are actually in the driver’s seat. Open repression may exacerbate a crisis and undercut the state’s claim to legitimacy, while acquiescence may make the government seem weak and will surely carry with it unfavorable policy implications. There can be no question of whether to control political protest, but there is a clear question as to how it may best be accomplished.¹

Seattle, 1999: Dance Party, Street Fight, No-Protest Zone

The 1999 Seattle demonstrations against the World Trade Organization (WTO) precipitated a sharp controversy in the theory of political protest. The term “police riot” is not the hyperbole many assume it to be. During the June 19–21, 1968, disturbances in Berkeley, police not only beat, gassed, and threatened scores of peaceable citizens, they also threw rocks at crowds, broke windows, and engaged in other vandalism. “A policeman was seen knocking in a window at a bookstore.... Several persons reported damage to their residences after the police had forced their way inside. A number of others claimed that police beat their automobiles with riot batons, causing dents and breaking headlights.” Stark, Police Riots, 48.

Anatomy of a Police Riot

Televised footage of the 1968 Democratic National Convention shocked the nation. Mobs of police were filmed beating protestors, bystanders, and reporters—viciously and indiscriminately. Over 100 people were hospitalized as a result of police violence. Senator Abraham Ribicoff spoke on the floor of the convention against the “Gestapo tactics in the streets of Chicago.” George McGovern described the scene as a “blood bath,” also making comparison to “Nazi Germany.” Norman Mailer commented:

What staggered the delegates who witnessed the attack—more accurate to call it the massacre, since it was sudden, unprovoked, and total—on Michigan Avenue, was that it opened the specter of what it might mean for the police to take over society. They might comport themselves in such a case not as a force of law and order, not even as a force of repression upon civil disorder, but as a true criminal force; chaotic, improvisational, undisciplined, and finally—sufficiently aroused—uncontrollable.

Mailer’s characterization of police behavior closely matches that produced by more systematic studies. Daniel Walker, in his authoritative report on the DNC, notes, “Fundamental police training was ignored; and officers, when on the scene, were often unable to control their men.” Walker’s report offers this example:

63 Stark implies that television was the crucial factor in creating the DNC’s infamy: “Events in Chicago were unique only in the quality and quantity of media coverage.” Stark, Police Riots, 4.
64 Gilje, Rioting in America, 166.
66 Ibid., 175.

On the morning of November 30, 1999, tens of thousands of people filled downtown Seattle in protest against the World Trade Organization. Protesters surrounded the venue for the WTO’s ministerial conference, blocking the delegates’ access to the meeting and shutting down a large portion of the city. The protests were overwhelmingly peaceful; many took the form of dance parties in the street. On the demonstrators’ side, the much-decried “violence” and “rioting” amounted to only a few broken windows and some tear gas thrown back in the direction of the police.

For most of that day, the police were helpless to restore order. They stood in small groups, arbitrarily blocking streets, accomplishing nothing. Occasionally they would fire tear gas and advance a block, but that was all. For one day, the streets belonged to jubilant crowds. Shops were not open, cars could not pass, the WTO meeting was stalled at the outset. By nightfall, a curfew was in place and the National Guard was on patrol. It was announced that no more demonstrations would be allowed in the area of the conference. Police chased a crowd from downtown to the nearby Capitol Hill neighborhood, attacking everyone in the street along the way. The residents of Capitol Hill fought back, and a pitched battle ensued. The fighting continued late into the night.

On December 1, the streets belonged to the cops. Early that morning, the police arrested more than 600 people just outside the “No-Protest Zone.” Police were shown on national television indiscriminately firing tear gas, rubber bullets, and other “less-lethal” munitions. Beatings were common—not only protestors, but bystanders and reporters were attacked. Still the demonstrations continued. On December 2, several hundred people surrounded the jail, demanding their comrades be released; a compromise was reached when the
authorities allowed lawyers in to see the prisoners—the first legal access since the arrests began.

In the end, the protestors won. The WTO meeting started late and ended in failure; no new trade agreements were reached. Most of those arrested were released, with charges dropped. Norm Stamper, Seattle Chief of Police, resigned in disgrace. People—workers, students, environmentalists, human rights activists—stood together against the WTO, the city government, the police, the National Guard, and the corporate powers they all represent. And the people won. Before the smoke had even cleared, authorities around the country were asking what had gone wrong and, more importantly, how they could prevent it from happening again.²

Assessing the Police Response: “What Not to Do”

Everyone agrees that the police action at the WTO was an unmitigated disaster. A City Council committee charged with reviewing the events noted, “this city became the laboratory for how American cities will address mass protests. In many ways, it became a vivid demonstration of what not to do.”³

From a civil rights perspective, the 1999 WTO ministerial was marked by a virtual prohibition on free speech, a plague of arbitrary arrests, and widespread police brutality.⁴ The City Council’s description of the events bears the standard characteristics of a police riot:

² This account is based primarily on my own observations, with support from the sources cited later in the chapter.

That winter, when students at San Francisco State College went on strike to demand a Black Studies program, college president S. I. Hayakawa declared a state of emergency, ordered classes to resume, and called in police to make sure that they did.⁵⁸ (Hayakawa is perhaps best remembered for his assertion, “There are no innocent bystanders.”)⁵⁹ Skirmishes followed throughout December, during which individual officers broke from their units and charged into crowds of students. News photos showed police holding protestors while other cops maced them.⁶⁰ The strike was finally defeated in January when police started making mass arrests, resulting in several felony convictions.⁶¹

This chronology is undoubtedly incomplete, but it makes the point: police violence against crowds, sometimes perfectly innocuous gatherings, was utterly common.⁶² It was as frequent as it was extreme. Nevertheless, one event stands out as the paradigmatic police riot—the 1968 Democratic National Convention in Chicago.

⁵⁸ Ali and Watkins, 1968, 204.
⁵⁹ Quoted in Ibid., 201.
⁶⁰ Stark, Police Riots, 5–6.
⁶¹ Fraser, 1968, 302.
⁶² No exhaustive study of the year’s events is available; likely, none is possible. The National Student Association counted 221 demonstrations on 101 college campuses during the first half of the year. Likewise, a review of the New York Times and Washington Post covering September 16 to October 15, 1968, shows reports of 216 separate protest events, 35 percent of which involved violence. Skolnick, The Politics of Protest, 15, 3.
A week before he was assassinated, Martin Luther King, Jr., led 15,000 people on a march through Memphis, expressing solidarity with the city’s striking garbage collectors. The police and National Guard used clubs and tear gas to break up the march, killing one person in the process.\footnote{Ali and Watkins, 1968, 72.} In April, following King’s murder, 202 riots occurred in 175 cities across the country, with 3,500 people injured and forty-three killed, mostly at the hands of police.\footnote{Feagin and Hahn, Ghetto Revolts, 105.} Also in April, a peace march of 8,000 moved slowly through downtown Chicago. Having been refused a parade permit, marchers stayed on sidewalks and obeyed the traffic signals. Nevertheless, in an incident foreshadowing the Democratic National Convention later that year, a line of police pushed the crowd into the streets; almost at once, another line of cops pushed them back to the sidewalks. The situation quickly degenerated. Ignoring the orders of their superiors, police broke ranks, chasing and beating members of the crowd. A panel convened to study the incident lay the blame with Mayor Richard Daley and other city officials, who set the tone for the action by denying the required permits.\footnote{Stark, Police Riots, 4–5.}

In June, cops attacked a crowd of Berkeley students listening to speeches about the Paris uprising, setting off several days of fighting. In July, police responded forcefully to racial unrest in Paterson, New Jersey. A grand jury later condemned the police for engaging in “terrorism” and “goon squad” tactics. The jury reported that teams of cops intentionally vandalized Black-owned businesses and severely beat individual Black and Puerto Rican people as an example to others. In August, Los Angeles exploded after police attacked a crowd at the Watts Festival. Three people were killed and thirty-five injured.\footnote{Ibid., 6. Police vandalism was a common response to riots, especially those with a racial component. The “Soul Brother” signs that marked Black-owned businesses offered them a level of protection from the angry crowds.}

Our inquiry found troubling examples of seemingly gratuitous assaults on citizens, including use of less-lethal weapons like tear gas, pepper gas, rubber bullets, and “beanbag guns,” by officers who seemed motivated more by anger or fear than professional law enforcement.\footnote{Seattle City Council, Report of the WTO, 3. A more precise definition of “police riot” appears in the discussion that follows.}

Police commanders admit that they lost control, not only of the streets, but of their troops:

An essential element for the successful execution of any plan is the ability to control operations once officers are deployed. Unfortunately, in several respects the command and control arrangements for WTO broke down early in the operation.\footnote{Seattle Police Department, After Action Report, 5.}

Nevertheless, from the law-and-order side, the protests represented a vast sea of lawlessness, complete with attacks against police and property. The Seattle Police Department After Action Report describes the protests from the police perspective:

Numerous acts of property damage, looting, and assaults on police were committed. Officers were pelted with sticks, bottles, traffic cones, empty chemical irritant canisters, and other debris. Some protesters used their own chemical irritants against police, and a large fire was set in the intersection at 4th and Pike.\footnote{The accuracy of this description is dubious, but it does say something about the way the police view disorder and exaggerate its dangers. Seattle Police Department, After Action Report, 41.} Some of the dispute between City Council and police leaders was surely opportunistic posturing, a typical political game, with politicians scrambling to cover their asses, point accusing fingers, and associate themselves with the winners. But it also represents a sharp split between the perspective of the City Council (as presented in its Accountability Committee Report) and that of the police (argued mostly by proxy, in a report pre-
pared by an independent consulting firm—R. M. McCarthy and Associates). Not only are their analyses in conflict—in places, even the facts they cite are at odds—but their suggested remedies are in direct opposition.

Funded by the mayor’s office, the McCarthy and Associates report was written primarily by three retired law enforcement officers from New York and Los Angeles. They describe every step of the SPD’s WTO operation and urge a more forceful response when dealing with future civil disobedience. They recommend establishing the siege-like atmosphere of December 1 well before any demonstrations begin, arguing that had a restrictive safety zone been established, protest areas designated outside of the zone, and additional personnel from other agencies been planned for and deployed in a pre-emptive manner on November 26, the results would likely have been different.

The report also suggests that the police response didn’t go far enough in the suppression of civil rights: “The review team believes the decision to allow any previously scheduled marches or demonstrations to proceed after violence had erupted was unwise.” Furthermore, it recommends amending police policy by removing instructions that crowds be moved or dispersed “peacefully,” and adding explicit orders to make as many arrests as possible.

Describing the McCarthy report as a “crude and unsatisfying” document, the City Council’s Review Committee reached

10 Ibid., 129–30.

officers moved through the Mission district, clearing sidewalks and assaulting pedestrians.47 Three Black people were killed and almost fifty others injured when police and National Guard troops opened fire at a February demonstration against a White-only bowling alley in Orangeburg, South Carolina. Most of the wounded were shot in the back.48

In March, New York City police attacked a Yippie demonstration at Grand Central Station. Offering no opportunity for the crowd to disperse, they indiscriminately beat members of the crowd that had gathered. The same tactic was repeated at another Yippie march in April, this time in Washington Square.49 Later that same month, Students for a Democratic Society held a demonstration at Rockefeller Center. Jeff Jones, an SDS organizer, described the event as “very militant, it turned into a street fight. I think there were eight felony and fourteen misdemeanor [sic] arrests. There were beatings on both sides.”50 A week later, on April 29, 1968, New York City police used clubs to clear some of the same students from occupied buildings at Columbia University. Police emptied the occupied buildings and then moved through the campus, beating any students they could find, whether or not they had been involved in the occupation.51 One hundred thirty-two students and four faculty were injured.52 Also in New York, that fall, 150 off-duty cops filled a Brooklyn courthouse and beat several Black Panthers who were there to observe a trial.53

53 Stark, Police Riots, 6.
Predictably, urban Black people received even worse treatment. In the Detroit uprising of 1967, forty-three people were killed, thirty-six of whom were Black. Twenty-nine of these deaths were definitely attributable to police, National Guard troops, or the Army. The remaining thirteen died from any of a variety of causes: some were shot by store owners, some died in fires, two were electrocuted by fallen power lines. No deaths were directly attributable to the violence of the crowds. Despite the rhetoric surrounding them, historian Paul Gilje notes, Black uprisings in the sixties "were marked by a relative absence of violence committed by rioters against people. Careful examination of the casualty lists shows that police and military inflicted the vast majority of fatalities and injuries on blacks in the riot area."46

A Glimpse at 1968

These facts speak to the level of police violence, but they say very little about its prevalence in crowd control situations. For that, we should consider a sample of police actions during a specific time frame—for example, during the year 1968, a banner year remembered for producing rebellions around the world. While in this respect 1968 is exceptional, it may also (for the same reasons) be seen to typify the official response to unrest. It certainly provided numerous, widely varied examples for comparison.

In January 1968, San Francisco police broke ranks and charged into the crowd at an anti-war demonstration, beating protestors. San Francisco also saw numerous rampages by the police department’s Tactical Squad throughout the year, especially in the Haight-Ashbury neighborhood. During one such attack, a Black plainclothes officer was beaten by his White colleagues. During another, off-duty Tactical Squad

46 Gilje, Rioting In America, 160.

almost entirely opposing conclusions.11 Rather than pressing for a more forceful response, the City Council’s committee suggested that in many cases the police would have done better to have done nothing at all: "Members of the public, including demonstrators, were victims of ill-conceived and sometimes pointless police actions to ‘clear the streets.’"12 Aside from its brutality, such an approach is often self-defeating. For example, “The unintended consequence of police actions on Capitol Hill was to bring sleepy residents out of their homes and mobilize them as ‘resistors.’[sic]”13

Early Strategies

There is more at stake in this debate than the blame for the WTO debacle. Each of these reports represents one side in an ongoing dispute over the principles of crowd control. Spanning more than 100 years, this controversy has been shaped by a series of similar crises—instances in which the police orthodoxy proved disastrous.

Prior to the Great Railroad Strike of 1877, civil disturbances were essentially handled like any other military engagement, with the possible exception that crowds would be ordered to disperse before the police or militia charged with clubs or opened fire. During the Draft Riots of 1863, for example, New York Police Commissioner Thomas Acton ordered those under his command to “Take no prisoners.” George Walling, the commander of the twelfth precinct, was even more specific in

---

12 Ibid., 3.
13 Ibid., 10.
his instructions: “Kill every man who has a club.”14 I will term this the strategy of “Maximum Force.”

Such an approach may have had a certain efficacy against localized revolts, unplanned riots, or drunken mobs, but it met with greater difficulty in 1877 when more than 100,000 railroad workers, angered by cuts to their already meager wages, went on strike and prevented the companies from moving their freight.15 The turmoil was too vast for local police to control, and the militia proved unreliable.

Historian Eugene Leach writes, “In Pittsburgh, the city where strike-related violence climaxed, militia displayed opposite extremes of indiscipline: fraternization and panic.”16 The commander of the Pittsburgh militia later testified:

Meeting on the field of battle you go there to kill ... but here you had men with fathers and mothers and brothers and relatives mingled in the crowd of rioters. The sympathy was with the strikers. We all felt that these men were not receiving enough wages.17

Well-known demonstrations in which police used the escalated force approach include those in the Birmingham civil rights campaign (May 1963), the 1968 Chicago Democratic National Convention, and the confrontation between student protesters and National Guard soldiers at Kent State University (May 1970). During each of these demonstrations, police or soldiers used force in an attempt to disperse demonstrators, even demonstrators who were peacefully attempting to exercise their First Amendment rights—as the vast majority of them were.44

These events, while large in scope and attracting a great deal of media attention, were not uncharacteristic of Escalated Force operations. In many ways, they were sadly typical. While Kent State—where the victims were White—has come to symbolize the murder of student protesters, it was not the first or last time that students were shot in the name of keeping order. In May 1967—three years before Kent State—a Black student was killed at Jackson State College in Mississippi. In February 1968, three students were killed at South Carolina State College. One was killed in Berkeley in May 1969, and another at North Carolina Agricultural and Mechanical College that same month. One was killed in Santa Barbara in February 1970. In March 1970, twelve were shot, but no one killed, at State University of New York, Buffalo. Most famously, in May 1970, four were murdered at Kent State. That same month, twenty were shot just down the road at Ohio State (all survived), and fourteen were shot (again) at Jackson State, two of whom died. In July 1970, one was killed at the University of Kansas, Lawrence, and another at the University of Wisconsin, Milwaukee. Two years later, in November 1972, two more students were killed at the University of New Orleans.45

---

14 Both quoted in Richardson, The New York Police, 143. Richardson comments: “The police of the 1860’s did not have either the doctrine or the materials to deal with disorder in any way other than violence. In ordinary circumstances, policemen worked alone or in small groups; their only additional training or experience came in their military drill. The only anti-riot tools they possessed were their clubs and revolvers, and their only recourse in a disorder was to bash as many people on the head as possible. There is no indication that Acton and other police officials ever thought about any other method.” Ibid.

15 “That year there came a series of tumultuous strikes by railroad workers in a dozen cities; they shook the nation as no labor conflict in its history had done.... When the great railroad strikes of 1877 were over, a hundred people were dead; a thousand people had gone to jail, 100,000 workers had gone on strike, and the strikes had roused into action countless unemployed in the cities. More than half of the freight on the nation’s 75,000 miles of track had stopped running at the height of the strikes.” Zinn, People’s History, 240, 246.

17 Ibid., 24.

ality is often quite different. In fact, the actions of the crowd may not even be the most important consideration in determining the police response. Other factors include police preparedness and discipline, the presence of counter-demonstrators, the number of participants, media coverage, and the political calculus surrounding the event—that is, what people with power, and the police leaders in particular, stand to gain or lose by attacking the event or letting it alone. These factors can be classed into six groups:

1. the organizational features of the police;
2. the configuration of political power;
3. public opinion;
4. the occupational culture of the police;
5. the interaction between police and protesters; and,
6. police knowledge.\(^{42}\)

Even when the police do respond in proportion to the threat, their victims often include peaceable demonstrators and innocent bystanders, along with the ruffians. Widespread violence is by its nature imprecise. And questions of “guilt” or “innocence,” like those pertaining to constitutional rights, are a secondary concern, if indeed they are considered relevant at all. Dispersal operations are not designed to uphold the law or to protect public safety; often the police action itself will represent the most serious violation of the law and constitute the greatest threat to the safety of the community. Instead of the law or public safety, the police are concerned with establishing control, maintaining power.\(^{43}\) One study recounts:

The Philadelphia militia, which was also sent to Pittsburgh, displayed no such sympathy. The New York Times reported that they “fired indiscriminately into the crowd, among whom were many women and children.”\(^{18}\) Rather than fleeing, the crowd was enraged; the militia was forced to retreat. Likewise, in Reading, when troops killed eleven strikers, the general population only grew more furious. Strike supporters looted freight, tore up tracks, and armed themselves with rifles from the militia’s own armory. When reinforcements arrived, they sided with the crowds and threatened their colleagues, “If you fire at the mob, we’ll fire at you.”\(^{19}\)

These same problems arose in every city facing strikes. In Newark, Ohio, and Hornellsville, New York, militia men openly fraternized with strikers, much to the dismay of their commanders. In Martinsburg, West Virginia, the commander of the Beverly Light Guards telegraphed the governor, worried by his troops’ sympathy with the strikers. In Harrisburg, Morristown, and Altoona, Pennsylvania, the militias surrendered. Half of the soldiers in the Maryland Sixth Regiment broke into an undisciplined retreat during a Baltimore street fight. And in Lebanon, Pennsylvania, a company of militia mutinied.\(^{20}\)

In the end, a combination of attrition, fatigue, and military force won out over the striking workers.\(^{21}\) But still, the au-

\(^{43}\) “During the WTO protests, the City made decisions to clear downtown streets well away from the conference facility and streets in the Capital Hill neighborhood. The City did not do this to protect any person or thing from physical harm, but rather to pursue the ill-defined goal of gaining control of the streets.” ACLU Washington, “Out of Control,” 18.

---

18 Ibid.
21 “Chicago was typical: President Hayes authorized the use of Federal regulars; citizen’s patrols were organized ward by ward using Civil War veterans; 5,000 special police were sworn in, freeing the regular police for action; big employers organized their reliable employees into armed companies—many of which were sworn in as special police. At first the crowd successfully out-maneuvered the police in the street fighting that ensued, but after killing at least eighteen people the police finally gained control of the crowd and thus broke the back of the movement.” Brecher, *Strike!*, 20.
thorities were very disappointed. They immediately set about building the militias into well-disciplined machines, capable of quelling riots or, more to the point, breaking up strikes.22 During this period, the state militias were reconstituted into the modern National Guard.23 Military training was imposed and matters of discipline rigidly enforced, including inspections by regular Army officers. In addition, more emphasis was placed on recruitment, and armories were built throughout the North.24

These changes in the organization, training, discipline, and culture of the Guard were accompanied by new articulations of crowd control strategies. A number of manuals suddenly appeared spelling out the strategy for stifling unrest. These books were generally unconcerned with the social causes of disorder, content to blame them on agitators of various sorts. Most continued to advocate the principle of Maximum Force: they predicted increased militancy among workers, and offered increased state violence as the remedy. E. L. Molineux, the commander of the New York National Guard, wrote: “In its incipient stage a riot can be readily quelled ... if met bodily and resisted at once with energy and determination. Danger lurks in delay.”25

22 Strike duty accounted for fully one-half of all deployments between 1877 and 1892. Leach, “Literature of Riot Duty,” 25.
23 “The events of the [1870s] in particular led many persons to fear another insurrection, and as a result legislation was introduced to improve and provide better arms for the organized militia. In 1879, in support of this effort, the National Guard Association came into being in St. Louis, and between 1881 and 1892 every single state revised its military code to provide for an organized militia, which most states, following the lead of New York, called the National Guard.... Through the efforts of the National Guard Association, the Guard ... succeeded in seeing an act in 1887 that doubled the $200,000 annual federal grant for firearms that the militia had enjoyed since 1808.” Maurice Matloff, ed., American Military History (Washington, D.C.: United States Army, Office of the Chief of Military History, 1969), 287.
In terms of tactics, giving priority to prevention demanded what later military thinkers would call doctrines of “sequence of force” or “flexible response.” Simply put, the idea was to adapt levels of forces to levels of perceived menace, escalating to firepower only as a last resort. All of the writers of 1918–1920 endorsed the initial use of verbal warnings, bayonets, rifle butts, or hoses, as alternatives to firepower.38

By 1940, the Show of Force had been reinserted as the first step of this progression.39

In this way, the doctrine of Maximum Force was transformed into that of Escalated Force, which remained the standard approach to crowd control until the 1970s. As scholars describe it:

[The] escalated force style of protest policing was characterized by the use of force as a standard way of dealing with demonstrations. Police confronted demonstrators with a dramatic show of force and followed with a progressively escalated use of force if demonstrators failed to abide by police instructions to limit or stop their activities.40

Such force took different forms. Sometimes arrests immediately followed even minor violations of the law, or were used to target and remove “agitators” whether or not a law had been broken. Other times, police used force instead of making arrests, either to break up the crowd or to punish those who disobeyed them.41

According to the Escalated Force theory, violence is only used in proportion to the threat posed by the crowd. The re-

A milder version of the doctrine did emerge, and gained popularity among local commanders. According to this “Show of Force” (my term) theory:

Strikes and riots were outbursts that could be controlled—perhaps even prevented—by shows of authority which even rowdy workers were presumed to respect, or by shows of force which workers would fear. From these premises it followed that the function of the militia on riot duty was as much demonstrative, even theatrical, as it was coercive. The goal was to disperse rioters, not—as General Vodges would have it—to corner them and wipe them out.26

If the workers could be over-awed without firing a shot, so much the better. One manual stated, “[A] strong display of a well-disciplined and skillfully handled force will in most instances be sufficient in itself to suppress a riot.”27

This presumption was later shown to be false: a large police presence is not so much preventive as it is provocative. Such errors were at least partly a product of the theory’s underlying premise that rioters are psychologically deranged rather than politically or economically motivated. In any case, the practical consequence of the Show of Force theory was a new demand for dress uniforms, public drilling, and parades.28 It was not shown to reduce the likelihood of class conflict or to prevent strikes.

In the 1880s, a wave of immigration made the authorities less reluctant to use force against striking workers.29 And after the Haymarket incident of 1886, the Show of Force approach was almost entirely abandoned in favor of more direct responses: “[T]acticians [came] to favor the use of force over shows of force,” Leach writes.30 Tellingly, racist comparisons between

---

38 Bellows specifically favored the riot stick because, unlike rifles, crowds understood that the troops would really use them. Ibid., 41.
39 Ibid., 44.
41 Ibid.
workers and Native Americans became more common. In 1892 the *Army and Navy Register* opined, “The red savage is pretty well subdued ... but there are white savages growing more numerous and dangerous as our great cities become greater.”

This analogy was not merely rhetorical; many of the same units were used against strikers as against indigenous peoples.

The Maximum Force approach did have its disadvantages. “Fire tactics appropriate for conventional warfare,” Leach notes, “jeopardized innocent lives, invited public condemnation, and ... simply did not work in the urban terrain where most riots took place.” As the National Guard’s reputation for brutality grew, so did sympathy for those who opposed them—especially striking workers. At the same time, Maximum Force was out of step with the authorities’ overall strategy in handling strikes, as the government and businesses came to rely more and more on the pacifying effects of concessions. Nevertheless, and despite atrocities like the Ludlow Massacre—when National Guard troops used a machine gun against striking workers and set fire to their tent city, ultimately killing sixty-six people—Maximum Force remained the dominant approach well into the twentieth century.

### Rationalizing Force

It was not until World War I and its accompanying Red Scare that the Maximum Force doctrine was revised. State violence was then rationalized—broken into discrete, ordered stages. This change represented one component in an early effort to take some of the conflict out of class conflict. “In short,” Leach explains, “repealing bellicose post-Haymarket formulas for riot control was part of a multifaceted drive to wreck the Left, strip the working class of radical leaders, and put progressive managers in their place.”

Of the new crowd-control strategists, the most influential was Henry A. Bellows, an officer in the Minnesota Home Guard and the author of *A Manual for Local Defense* (1919) and *A Treatise on Riot Duty for the National Guard* (1920). In these works, he drew a distinction between crowds and mobs, and argued that the key was to keep a crowd from becoming a mob. Ideally this could be accomplished by preventing crowds from forming in the first place—or, failing that, by breaking up any crowd that did form and doing so before it had the chance to transform into a mob. The crowd should be dispersed with as little actual violence as possible, but without hesitating to use whatever force was necessary. “Practically every riot can be prevented without bloodshed...,” Bellows wrote, “if sufficient force can be brought to bear on it in time.”

Army Major Richard Stockton and New Jersey National Guard Captain Saskett Dickson expressed a similar view in their *Troops on Riot Duty: A Manual for the Use of the Armed Forces of the United States*. They wrote:

Troops on riot duty should keep in mind the fact that they are called upon to put down disorder, absolutely and promptly, *with as little force as possible*, but it should be remembered, also, that in the majority of cases the way to accomplish these ends is to use at once every particle of force necessary to stop all disorder.

The new theorists sought a doctrine by which force would be prescribed in proportion to the difficulty of dispersing the crowd. They thus advocated using tactics suited to the particular situation. As Leach summarizes:

Community Policing + Militarization = Counterinsurgency

The ability to concentrate power in the event of an emergency (e.g., a riot) has been shown to require a shift toward military operations. But the ability to penetrate communities is enhanced if the police have the consent (or acquiescence) of the population. That requires legitimacy, and a softer service-oriented, or “peace corps” approach. Complicating things further, military organization requires strict, almost automatic, discipline and tight command and control; community policing requires discretion, localized decision-making, and a great deal of organizational flexibility. But the two aspects achieve strategic coherence when viewed in the framework of counterinsurgency.

---

153 A report on counterinsurgency, published by the Joint Special Operations University, advocates “the adoption of the community-policing approach supported by offensive-policing actions such as paramilitary operations.” Joseph D. Celeski, Policing and Law Enforcement in COIN: The Thick Blue Line (Hulbert Field, Florida: The JSOU Press, 2009), 40.

154 “The control of civil disturbances … requires large numbers of disciplined personnel, comparable to soldiers in a military unit, organized and trained to work as a team under a highly unified command and control system. Thus when a civil disturbance occurs, a police department must suddenly shift into a new type of organization with different operational procedures. The individual officer must stop acting independently and begin to perform as a member of a closely supervised, disciplined team.” Kerner Commission, Report, 328.

155 The well-titled book The Iron Fist and the Velvet Glove was among the first to observe this relationship: “In addition to the rise of new, sophisticated
Contested Territory

In the autumn of 2011, a broad, dynamic, unanticipated social movement suddenly emerged. Occupy Wall Street began with a symbolic civil disobedience action near the New York Stock Exchange, protesting income inequality, corporate crime, political corruption, and a host of other ills associated with capitalism. The first occupation, on September 1, 2011, was quickly ended with a few arrests. A couple weeks later, however, on September 17, OWS established an encampment in New York’s Zuccotti Park and used it as a hub from which to launch daily protests timed to coincide with the Stock Exchange’s opening and closing bells. In short order, Occupy Wall Street had established a semi-permanent base camp, with a communal kitchen, a first aid station, a meditation space, and a library. Within weeks, similar “Occupy” camps were founded in at least 350 locations around the country—not only in major cities like Los Angeles, San Francisco, and Houston, but in places like Cedar Rapids, Iowa, Providence, Rhode Island, and Las Cruces, New Mexico.

The official response to the Occupy protests was fitful, fickle, and confusing. The media ignored it, then ridiculed and/or demonized it—abruptly shifting “its coverage dial from ‘blackout’ to ‘circus,’” as the Daily Show’s Jon Stewart quipped. Democratic mayors sought to ally themselves with the movement, or

123 Stewart finished the joke: “those are the only settings.” Quoted in Writers for the 99%, Occupying Wall Street, 170. For further details on the media response, see Writers for the 99%, Occupying Wall Street, 167–74.

---

This analysis goes some way toward resolving the apparent tensions between community policing and militarization, but a puzzle remains. Remember that theorist-advocates commonly claim that community policing requires, or at least promotes, “civilianization.”151 If anything undermines the coherence of militarized community policing, surely that does.

But what does “civilianization” mean? “Civilianization” refers to the use of civilians to perform police department functions that don’t require the authority of sworn officers. These tasks can range from clerical work and communications, to training and forensic analysis, to equipment maintenance, and in extreme cases taking reports and performing minor investigations. “An assumption behind all this...,” Jerome Skolnick and David Bayley note, “is that civilians do not supplant sworn officers. Civilianization in Houston, for example, was designed in part to put more uniforms on the street....”152 In other words, when a department is “civilianized,” the actual number of armed, uniformed officers available for duty increases. Thus, civilianization is not in any sense incompatible with militarization.

Community policing, as a strategy of social control, stresses proactive efforts to create order and focuses on problem-solving, broadly construed. This emphasis can come to justify zero-tolerance policing efforts, and specifically the use of paramilitary units for routine police work. The degree to which SWAT teams and community policing campaigns have come to share personnel and funding demonstrates the close linkage between the two. Furthermore, the type of organization, discipline, teamwork, officer discretion, and even civilianization suggested by community policing all tend toward a military model. All of which indicates that commu-

152 Skolnick and Bayley, New Blue Line, 218.
branch of the New York Police Department. Bratton describes the effect:

We created a system in which the police commissioner, with his executive core, first empowers and then interrogates the precinct commander, forcing him or her to come up with a plan to attack crime. But it should not stop there. At the next level down, it should be the precinct commander, empowering and interrogating the platoon commander. Then, at the third level, the platoon commander should be asking his sergeants, “What are we doing to deploy on this tour to address these conditions?” And finally, you have the sergeant at roll call—“Mitchell, tell me about the last five robberies on your post”; “Carlyle, you think that’s funny, it’s a joke? Tell me about the last five burglaries”; “Biber, tell me about those stolen cars on your post”—all the way down until everyone in the entire organization is empowered and motivated, active and assessed and successful.148

(Christian Parenti reads one further step into the process: “[C]aptains lean on lieutenants, who lean on sergeants, who lean on beat cops, who, it could be said, lean on civilians.”)149

The organizational structure demonstrates the possibility of combining tight command and control with individual discretion. Compstat allows the higher-level administrators to establish the organization’s values and goals; precinct-level commanders set strategy for their areas; and street-level officers have the discretion to adopt the particular tactics they think suitable. Information moves up and down the chain of command, decision making is consistently deferred to lower levels, and power is concentrated at the top. In this sense, Compstat has as much to do with militarization as does SWAT.150

During a September 24 march to Union Square, the NYPD used orange construction netting to encircle a group of protesters and arrested eighty of them. A widely-circulated video showed Deputy Inspector Anthony Bologna gratuitously pepper-spraying a group of young women, prompting outrage around the country. A week later, on October 1, the police trapped a march on the Brooklyn Bridge and arrested 700.126 Police also parked their cars outside the homes of prominent Occupy activists, used old warrants to arrest others, and interrogated people about their political beliefs and associations. They even produced “Wanted” posters featuring photos and home addresses of two activists and labeling them “Professional Agitators”—though notably failing to accuse parts of it; then condemned it; and ultimately moved to break up the camps.124 And individual cops offered sympathy and expressed support, even while working to surveil, contain, infiltrate, disrupt, and sometimes physically attack the protests.125

124 George Ciccariello-Maher outlines a “common script that would play out across the country,” taking the form of “a drama in three acts”: “A democratic mayor plays nice, claiming to represent ‘the 99%’ and to support the Occupation’s crusade against big business. But at some point, small hegemonic shifts signal coming offensives. In a crude and thinly-veiled information war, lies are tossed about ... [suggesting] that Occupy is unsanitary, now dangerously so, now downright violent. A murder, a suicide, a rape, or an overdose suddenly brim with political opportunity. With the stage set, all that remains is for the guardians of good order to step in to defend the common good.” George Ciccariello-Maher, “Counterinsurgency and the Occupy Movement,” in Life During Wartime, 223–24.

125 One cop told a group of protesters he had just helped to arrest, “I want you guys to know... I’m right there with you. I totally know where you’re coming from... I’m with you guys but I can’t be with you guys because of this badge. But you should know I feel the same way... So cut the shit, be compliant, and do what you need to do to get out of here as soon as you can and go home.” Quoted in Writers for the 99%, Occupying Wall Street, 40.

148 Ibid., 239.
149 Parenti, Lockdown America, 76.
150 Interestingly, David Harris sees Compstat as an accountability mechanism in keeping with the aims of community policing. Harris, Good Cops, 97–103.
them of any actual crime. One human rights report offered this assessment:

[T]here have been reports of repeated excessive or unnecessary police use of force, massive and continuous over-policing and poor communication, obstruction of press freedoms and independent legal monitoring, constant police surveillance, unjustified restrictions on the ability of individuals to peacefully assemble in public spaces, arbitrary rule enforcement, and transparency failures. There has also been near-complete impunity for alleged abuses.

Things looked much the same elsewhere, though on a smaller scale. On October 10, about 140 activists were arrested at Occupy Boston. On October 22, a dozen were arrested as Occupy Houston marched on the police precinct. On October 30, two dozen were arrested at Occupy Portland, and 38 at Occupy Austin. In Cincinnati, the police first cited demonstrators, issuing 253 tickets for $105 each; later they arrested 60 camp occupants.

Oakland hosted the most prominent Occupy site outside of New York, christened “Oscar Grant Plaza” in honor of the young man killed by police a couple years earlier.

Twice a week, all the commanders would meet and review the situation in one precinct. This arrangement left each commander with enormous freedom to determine the day-to-day operations of his area. But every few weeks the entire precinct’s performance would be brought under close scrutiny, and the commander would have to answer some hard questions:

I want to know why these shootings are still happening in that housing project! What have we done to stop it? Did we put Crime Stoppers tips in every rec room and every apartment? Did we run a warrant check on every address at every project, and did we relentlessly pursue those individuals? What is our uniform deployment there? What are the hours of the day, the days of the week that we are deployed? Are we deployed in a radio car, on foot, on bicycle? Are they doing interior searches? Are they checking the rooftops? How do we know we’re doing it? What level of supervision is there? When they’re working together in a team with a sergeant and four cops, do they all go to a meal together? When they make an arrest, does everyone go back to the precinct or does one person go back? Are we giving desk-appearance tickets to people who shouldn’t be getting them? What are we doing with parole violators? Do we have the parole photos there to show? Do we know everybody on parole? Parolees are not allowed to hang out with other parolees, they’re not allowed in bars. Of the 964 people on parole in the Seventy-fifth Precinct, do we know the different administrative restrictions on each one, so when we interview them we can hold it over their heads? And if not, why not?

The grilling could be intense, and it put pressure on the precinct commanders to get results. This pressure then moved down the chain of command, affecting every level and every

formulate orders to junior officers (and where possible, to the troops themselves) in terms of mission objectives.\textsuperscript{143}

Discipline is the internalized voice of authority. It is distinguished from rote obedience by the adoption of the values, aims, and methods of the institution.\textsuperscript{144} It requires obedience, at a bare minimum, and may be established and maintained in part through punishment. But a well-disciplined soldier, like a well-trained dog,\textsuperscript{145} will behave properly even when direct orders are unavailable and no punishment is threatened. Orders from superiors still supersede individual judgment, but fewer orders are necessary. By the same means, an organization can decentralize its command and maintain a rigid hierarchy with overall direction coming always from above.

The NYPD command structure shows how these various organizational elements—decentralization, discretion, teamwork, discipline—can be meaningfully combined, while at the same time demonstrating how a militarized organization can pursue community policing strategies. As commissioner, Bratton streamlined the departmental bureaucracy and introduced a new management style. This shift worked in two directions. It returned much of the day-to-day control to the precinct level, but it also established performance evaluations and required precinct commanders to track weekly crime statistics. At the crux of the new system was a computerized method of analyzing crime statistics, called “Compstat.”

ber 25, police cleared protestors from the camp and attacked them with less-lethal weapons—firing tear gas directly at protestors, hitting an Iraq war veteran named Scott Olsen in the face and fracturing his skull. Cops then threw concussion grenades at the medics who rushed to help him. Two days later, protestors tore down fences and took back the plaza; they called for a General Strike on November 2. The strike fell short of its “general” ambitions, but 25,000 workers and students took part and pickets closed the Port of Oakland.\textsuperscript{132}

Police responded according to their habit, with riot gear, less-lethal weapons, and over a hundred arrests.\textsuperscript{133}

On November 10, the Police Executive Research Forum hosted a conference call for police chiefs around the country to discuss what to do about Occupy. The next day a similar call included mayors from eighteen cities, among them New York, Oakland, Portland, and Philadelphia.\textsuperscript{134} Then, on November 14, police began decisive, coordinated attacks on the main Occupy encampments. Occupy Oakland was evicted again, leading to more than twenty arrests. Dan Siegel, the mayor’s legal advisor, resigned in protest.\textsuperscript{135}

That same evening, on the other side of the country, police distributed eviction notices at Occupy Wall Street. Hours later, at 1 a.m. on November 15, the NYPD raided Zuccotti Park. Flood lights lit the area brighter than day, and loud-speakers blasted a recorded message ordering people out of the area. Police maintained a perimeter a block or more away from the park, keeping supporters, onlookers, and journalists

away from the confrontation and using police vans to obscure their view. About a thousand cops descended upon the area, using clubs, shields, and pepper spray to force the occupants out. Altogether 142 people were arrested in the park and about 60 others in surrounding streets, among them a city councilor and several journalists. Human rights observers documented forty-eight instances of excessive force. Tents, computers, and approximately 5,000 books from the Occupy library were unceremoniously tossed into Department of Sanitation trucks; most were destroyed.136

The next day, police arrested protestors in Portland, Berkeley, San Francisco, Los Angeles, and Salt Lake City. Demonstrations opposing the crackdown continued around the country, with 30,000 in New York on November 17. In anticipation, the NYPD created a twelve-block hard zone around the Stock Exchange, and later made about 150 arrests.137 That same day, Portland police used pepper spray against activists staging a solidarity march; twenty-five were arrested. Thirty were arrested in Los Angeles. And Occupy Dallas was evicted from their encampment, with eighteen arrests. Just hours later, at 2 a.m. on November 18, police raided Occupy Cal, at UC-Berkeley. Then, on November 27, 1,400 cops raided the Occupy L.A. camp, tearing down tents and beating protestors; 300 were arrested.138 And finally, on November 30, police evicted the Occupy Philly encampment. The Occupiers, while initially willing to leave Dilworth Plaza peacefully, mounted an unpermitted march through the Center City area, continuing long after midnight. Police arrested fifty-two.139

Community policing is not a specific program, but a strategy; militarization is as much about organization as it is about high-tech weaponry. It is possible that community policing and militarization can exist independently, but the two have a definite affinity. Strategies create demands on the organizations responsible for implementing them.141 Community policing is no exception. It requires, as we have seen, a decentralized command, officers working in teams, and highly discretionary police action.

Decentralization and discretion may not sound like features of a military organization, but it is a mistake to contrast them with strict hierarchy and active discipline. Military discipline is not bureaucratic control; it is not meant to eliminate discretion, but to shape or guide it. Bureaucrats apply pre-scripted rules to a given situation, with a minimum of personal latitude. Soldiers are expected to follow orders, adhere to regulations, and act in accordance to military doctrine, but the application of these various codes must be determined to a very large extent “on the ground” by widely dispersed units acting with a minimum of direct supervision.142 Military discipline therefore builds in a degree of discretion. As Mark Osiel explains:

[S]ophisticated military managers increasingly prefer the initiative of the self-starter to the blind obedience of the automaton. Suspicious of excessive bureaucratic rigidity, they seek to cultivate in professional soldiers the disposition to act in conformity with the spirit of a command rather than formally with its letter. A felicitous way to do this is to

138 Rachel Herzing and Isaac Ontiveros, “Reflections from the Fight Against Policing,” in We Are Many, 217.
141 For instance, Sergeant John Dough of the Newark Police Department described the organizational demands presented by street sweeps: “One of the underlying features of this whole activity is operating as a unit, rather than as individual action. As a unit, you have to have a game plan and report your method of operations beforehand.” Quoted in Skolnick and Bayley, New Blue Line, 198.
While not exactly building community partnerships, these saturation patrols do represent an extreme form of the kind of proactive, preventative, geographically focused operations at the center of the community policing approach. Such uses of SWAT teams provide a clear instance of the intersection between community policing and militarized tactics, equipment, ideology, and organizational structures. The connection is empirically indisputable: many police departments esteemed for their community policing efforts use paramilitary units for patrols and other routine operations.\textsuperscript{137} Commanders have been known to move between community policing posts and paramilitary assignments, sometimes occupying both positions simultaneously.\textsuperscript{138} And funds designated for community policing programs are frequently used to pay for SWAT operations.\textsuperscript{139}

Kraska and Kappeler suggest that the demands of reformers help to link community policing and militarization:

Contemporary police reformers have asked the police to join together in problem-solving teams, to design ways to take control of the streets, to take ownership of neighborhoods, to actively and visibly create a climate of order, and to improve communities’ quality of life.\textsuperscript{140}

If we accept the idea of “quality of life” implicit in zero-tolerance police practices, then militarized policing does all of these things. What is more, efforts to do all of these may actually tend to promote militarization.

\textsuperscript{138} For example, Lieutenant Greg Cooper, the area commander of Area A in Santa Ana, was responsible for overseeing the greatest successes of the community policing program there while also serving as the head of the SWAT team. Skolnick and Bayley, \textit{New Blue Line}, 30.

\textsuperscript{140} Kraska and Kappeler, “Militarizing American Police,” 472.

The loss of the camps signaled the defeat of the movement. Never simply a place to meet and sleep, the Occupy encampments had become symbolic representations of disenfranchisement and utopian experiments in direct democracy. Without them, the movement lost focus and quickly faded, barely two months after it began.

Yet, whatever its shortcomings, the Occupy movement did reveal a weakness in the Strategic Incapacitation strategy.\textsuperscript{140} OWS expressed widespread public grievances, identified itself with the broadest segment of our society (expressed in the slogan, “We are the 99%”), and conducted itself—nearly always, but especially at the beginning—according to principles of strict nonviolence. However, it also quite deliberately violated laws, disobeyed police, and disrupted the usual business of capitalism. As Patrick Gillham put it, “OWS activists generally elected not to limit their actions to free-speech zones, choosing instead to engage in transgressive and sometimes illegal actions.”\textsuperscript{141} The police thus classified the Occupiers as transgressive “bad” protestors, leading (for example) to the use of force against young women trapped behind police barricades, against students peacefully sitting with arms linked, against retired school teachers, and people who were walking away, and many, many others besides.\textsuperscript{142} Much of this violence was caught on video, and when it circulated it generated public sympathy for the Occupy movement, correspondingly increased antipathy toward the cops, and legitimized the militancy of later protests. Police brutality pushed Occupy into the headlines, and made inequality a

\textsuperscript{140} I make this argument in more detail in Kristian Williams, “Cops and the 99%,” in \textit{Fire the Cops!}.

\textsuperscript{141} Gillham, “Strategic Incapacitation,” 15.

\textsuperscript{142} See, for example: Joshua Holland, “Caught on Camera: 10 Shockingly Violent Police Assaults on Occupy Protesters,” \textit{Alternet}, November 18, 2011, accessed 2012, alternet.org.
political issue in a way it hadn’t been before. In other words, Strategic Incapacitation led the police into the same political traps that Escalated Force had a generation earlier.

Yet clearly much has changed since, for example, the ’68 Democratic Convention. It is not just that there is less violence in protest policing, but the violence is more selective, more strategic. In addition to a greater reliance on intelligence and more concern with public perception and political legitimacy, the new strategy also demands greater restraint and improved command and control. In all of these respects, Strategic Incapacitation is exactly in keeping with the broader trends that have shaped policing over the past forty years.

One researcher used a database of four thousand news outlets to track reporting on Occupy Wall Street between September 17 and October 7, 2011. He found that “coverage was all but nonexistent” until the pepper spray incident of September 24. The next day it increased to “about six times its previous rate,” and then continued to escalate with subsequent confrontations. Nate Silver, “Police Clashes Spur Coverage of Wall Street Protests,” *Five Thirty Eight*, October 7, 2011, fivethirtyeight.blogs.nytimes.com.

According to an October 2011 poll, 67 percent of New Yorkers expressed agreement with Occupy Wall Street and 87 percent thought it was “okay that they are protesting.” In December, after the movement’s decline, 48 percent of Americans “agreed with the concerns raised by Occupy,” Knuckey, *Suppressing Protest*, 14. See also: Esmé E. Deprez and Catherine Dodge, “Occupy Wall Street Protests Inject Income Inequality into Political Debate,” *Bloomberg.com*, November 9, 2011, accessed 2012, bloomberg.com.

plans to target graffiti, begging, and gangs. In 2014, he then returned to New York, promising to both continue the Broken Windows approach and improve community relations with “a collaboration unlike any we have ever seen.”

**Militarization in the Community Policing Context**

Given the popularity of the Broken Windows theory and the world-wide rush to imitate the New York police, we can begin to understand the use of paramilitary teams to conduct routine patrols. As a zero-tolerance tool, SWAT teams have a lot going for them. One officer explains:

We conduct a lot of saturation patrol.... We focus on “quality of life” issues like illegal parking, loud music, bums, neighbor troubles. We have the freedom to stay in a hot area and clean it up—particularly gangs. Our tactical enforcement team works nicely with our department’s emphasis on community policing.

50,000 were marijuana violations; and 20,000 were for riding a bicycle on the city sidewalk.126

The shift in tactics also brought an increase in complaints against the police. In 1994, 37 percent more complaints were filed than in the year before; by 1996 the police were receiving 56 percent more complaints than in 1993.127 Nevertheless, once New York was making headlines with its aggressive police tactics, Bratton’s methods spread. Philadelphia cops started pursuing kids cutting class, hand-cuffing them like criminals. Boston police started cracking down on street merchants and beggars.128 A Washington, D.C., Metro Police officer explained his department’s zero-tolerance efforts: “[The administrators] want to see numbers, so we’re arresting people and locking them up for almost nothing.”129 Indianapolis instituted “quality of life enforcement” in 1997 with funds from the federal Community Oriented Policing program.130 The Miami police department’s focus on safe shopping led a half dozen cops to kick, pepper spray, and shackle Lewis Rivera, a homeless man eating at a shopping mall; an hour later Rivera was dead.131 Even Portland, Oregon, tried to become the new New York, with a law against sitting on the sidewalk and neighborhood campaigns targeting churches that fed the homeless.132 Bratton himself took his considerable skills to the Los Angeles Police Department, where he began his term as police chief with

9: Your Friendly Neighborhood Police State

The difficulties of crowd control have shown the need for police to balance their reliance on force against the possibility of containment, negotiation, and the co-optation of leadership. Over-reliance on either approach is likely to lead to disaster: naked repression can create or escalate resistance and discredit the authorities, while resting on the framework of institutionalized dissent can leave the state’s forces unprepared for tactical innovations or renewed militancy among protestors. The challenge for police is to chart a middle course between the WTO protests in Seattle and the massacre at Kent State. Though drawn from their experiences with protests and riots, these lessons have come to shape the development of police strategy overall. They have thus given rise to the seemingly incongruous—but, in fact, complementary—trends of militarization and community policing.

Bringing the War Home

“Militarization” is a buzzword, popular chiefly among critics of the police. The term is in some sense pejorative, as military incursions into the domestic sphere are taboo in liberal democracies. But militarization is rarely defined, and the use of the word is often superficial. This is true in two senses: first, the term is sometimes chosen more for its sinister connotations than for any literal meaning; second, it is used to describe the most obvious aspects of policing—the equipment, uniforms,
and weaponry. By implication, armored cars, riot gear, and assault rifles evidence militarization; the friendly cop on the beat does not.

This dichotomy is false, and dangerous. It misconstrues the nature of militarization and underestimates its impact. Militarization affects not only police paraphernalia, but the police mission, the roles of violence and intelligence, police ideology, rhetoric, training, and organization. A leading scholar of militarization, Peter Kraska, offers this definition:

Militarization ... can be defined in its broadest terms as the social process in which society organizes itself for the production of violence or the threat thereof.\(^1\)

He goes on to list the following "tangible indices of this sort of high-modern militarization":

1. A blurring of external and internal security functions leading to a targeting of civilian populations, internal "security" threats, and a focus on aggregate populations as potential internal "insurgents"
2. An avoidance of overt or lethal violence, with a greater emphasis placed on information gathering and processing, surveillance work, and less-than-lethal technologies
3. An ideology and theoretical framework of militarism that stresses that effective problem solving requires state force, technology, armament, intelligence gathering, aggressive suppression efforts, and other assorted activities commensurate with modern military thinking and operations
4. Criminal justice practices guided by the ideological framework of militarism, such as the use of special-operations paramilitary teams in policing and corrections, policing activities that emphasize military tactics such as drug, gun, and gang suppression, and punishment models based on the military boot camp

**The First Casualties of Bratton’s Obsession with Order**

The first casualties of Bratton’s obsession with order were, as elsewhere, the homeless. Squeegee workers in particular suddenly found their efforts to eke out a living by washing windshields at intersections treated as the first priority of New York’s finest. Police cleared “squeegee corners” every two hours, and started making arrests rather than issuing citations.\(^120\) Soon, the police were hard at work breaking up the homeless encampments under the city’s bridges.\(^122\) Then they moved on to other sections of the population: truants, and then students;\(^123\) prostitutes and their clients; then, the workers and customers in the legal branch of the sex industry; squatters; bus drivers and cabbies; and, eventually, jay-walkers.\(^124\) Misdemeanor arrests increased from 129,404 in 1993 to 197,320 in 1999; 91 percent of those arrested for quality-of-life offenses were Black or Latino.\(^125\) In 2005, the NYPD made 22,000 arrests for loitering, the vast majority of which were dismissed in court. By 2012 they were writing 600,000 tickets each year. Nearly a quarter of those (140,000) were for drinking in public; 80,000 were for disorderly conduct;
directed against—not only petty criminals, vagrants, and drunks—but peep shows, street vendors, and cabbies.\textsuperscript{115}

The mastermind behind Giuliani’s police state strategy was NYPD commissioner William Bratton. Bratton, inspired by Wilson and Kelling’s “Broken Windows” article, had previously dabbled with zero-tolerance and quality-of-life measures in the subway system, as the head of the Transit Police. The subway cops started using plainclothes officers to catch turnstile-jumpers, put uniformed cops on the trains, and used the loudspeaker to announce periodic sweeps. These sweeps, code-named “Operation Glazier,” were ostensibly to remove drunks, though the later use of police dogs indicates another purpose.\textsuperscript{116} Christian Parenti comments, “Such sweeps … are simple political semaphore from the state to the people: ‘We have the guns, we have the dogs, you will obey.’”\textsuperscript{117} Other symbolism reinforced the message: Bratton issued the subway cops 9mm semiautomatic handguns and uniforms chosen for their army aesthetic (“commando sweaters with epaulets, very military”).\textsuperscript{118} Meanwhile, an extensive ad campaign reassured the public: “We’re Taking the Subway Back—for You.”\textsuperscript{119}

As head of the NYPD, Bratton was able to experiment on a much broader scale. Seeing an intolerable array of disorder everywhere he looked, Bratton took his subway strategy to New York City’s streets:

Quality of Life. Boom boxes, squeegee people, street prostitutes, reckless bicyclists, illegal after-hours joints, graffiti—New York was being overrun. We called Police Strategy Num-

\textsuperscript{115} Parenti, Lockdown America, 107.

\textsuperscript{118} Bratton, Turnaround, 173–74.
\textsuperscript{119} Ibid., 177.
Radicals were calling on America to “Bring the war home,” and policy-makers very quietly decided to do just that.

**Funding, Arming, Planning**

The authorities responded to the disorder of the 1960s by increasing the cops’ funding, upgrading their equipment, and re-organizing departments along more military lines. To this end, the National Institute of Justice (NIJ) was founded in 1968, and it immediately set about transferring Defense Department technology to the police. Over the next ten years, the NIJ outfitted police with military wonders like night vision goggles, soft body armor, forensic and computer equipment, surveillance devices, and retired Army helicopters.

Two decades later, in 1987, the Pentagon created an office specifically to facilitate the transfer of military equipment to law enforcement agencies. In the three years following a 1994 memorandum of understanding between the Department of Justice and the Department of Defense allowing for the transfer of military equipment, police received 1.2 million pieces of military hardware, including 112 armored personnel carriers and seventy-three grenade launchers. The LAPD alone received 6,000 M-16s.

Kelling’s rosy description, the nineteenth century did witness a very real increase in the demand for order—a demand met with police action. Pleasantries and circumlocutions aside, the tradition Wilson and Kelling seek to revive is not that of the stationhouse soup kitchen, but that of the vagrancy law and the saloon raid. That is why Walker’s protestation misses the point: the reactionary idealization of the past is a rhetorical device, not an historical hypothesis. It does not seek the truth about the past in order to learn the truth about the present; it tells lies about history to support lies about today. Thus, it makes little difference whether nineteenth-century patrolmen were on better terms with the community or did a better job of maintaining order, so long as that faded Norman Rockwell image of the neighborhood cop can be used to justify repressive police tactics now. If the trick works, policing in the twenty-first century may resemble, very closely, that of the nineteenth.

**Inoculated City: The New New York**

Always proud to crystallize an emerging model, the New York Police Department provides the paradigm case of zero-tolerance policing. After Rudolph Giuliani’s police-backed rise to the mayor’s office, the former prosecutor immediately set about transforming the city according to his own view of public order. Within months, the crackdown had been surrounded the police, and idealize the nineteenth-century patrolman. Ibid., 117.

114 “The soldier boy for his soldier’s pay obeys/the sergeant at arms, whatever he says./The sergeant will for his sergeant’s pay obey/the captain till his dying day./The captain will for his captain’s pay obey/the general order of battle play./The generals bow to the government, obey/the charge, You must not relent.” The Clash, “Inoculated City,” *Combat Rock* (New York: Epic, 1982).
“find a rock and kick it.” That means combing the streets for minor violations by people who live persistently in the narrow space between respectability and criminality.... These people are hit for any infraction that can be found, from rowdism to the use of drugs, from propositioning to illegal parking, from procuring to causing a disturbance.\(^\text{109}\)

The zero-tolerance perspective came to inform not only the enforcement of the law, but the law itself: on July 1, 1983, the Denver city government passed a new ordinance making loitering illegal.\(^\text{110}\)

Much of this pattern is familiar from the nineteenth century, when the newly formed police were immediately set to the job of keeping the urban poor in line. The bulk of police attention was not directed toward serious crime, but to vice and public order—which is a nice way of saying that they tried to control the morality, habits, and social life of the urban working classes.\(^\text{111}\) A similar task is implied by Wilson and Kelling’s nostalgic reminiscences about the cop on the beat:

[T]he police in this earlier period assisted in that reassertion of authority by acting, sometimes violently, on behalf of the community. Young toughs were roughed up, people were arrested “on suspicion” or for vagrancy, and prostitutes and petty thieves were routed. “Rights” were something enjoyed by decent folk.\(^\text{112}\)

Historian Samuel Walker argues that “the tradition of policing cited by Wilson and Kelling ... never existed,” but that’s not quite true.\(^\text{113}\) While unrecognizably distorted by Wilson and...
out direction from above. Their only admonishment was to maintain departmental policy and rules.\footnote{14} Gates’s adaptation of military organization to law enforcement was remarkable, and it did not end with the squad and platoon structures. Military tactics were soon adopted as well, most famously with the creation of the SWAT team.

**SWAT: From Occasional Shoot-Outs to Routine Patrol**

The Los Angeles Police Department’s Special Weapons and Tactics team became the first of many similar units, generically termed “Police Paramilitary Units,” or PPUs.\footnote{15} SWAT was developed in secret during the late sixties, training with marines at Camp Pendleton.\footnote{16} Though ostensibly designed to handle snipers, the team’s first mission was a 1969 raid on the headquarters of the Black Panther Party. A shoot-out ensued, followed by a long stand-off. Growing impatient, the SWAT team requested—and received—a Marine Corps grenade launcher, but the Panthers surrendered before it could be put to use. Altogether, 5,000 rounds of ammunition were fired in the exchange. Four cops and four Panthers were injured, but no one was killed.\footnote{17}

Shortly thereafter, SWAT raided a house where members of the Symbionese Liberation Army (SLA) were hiding out. Again, a shoot-out ensued, followed by a long standoff. This time SWAT asked for fragmentation grenades, and Gates re-

**The Future (and Past) of Public Order**

One precursor of the Broken Windows doctrine was Oakland’s “Beat Health” program. Under the auspices of Beat Health, police were encouraged to take an interest in the social environment where they patrolled, arranging to have abandoned cars towed, litter picked up, graffiti scrubbed away. As in Santa Ana, the Oakland strategy had a close connection to the city’s downtown renewal efforts. Local businesses funded the Oakland Police Department’s “Fourth Platoon,” which used foot patrols, bike patrols, horse patrols, motorcycle patrols, canine units, helicopters, and two Special Duty Task Forces to enforce public order laws in the downtown corridor. Police made use of a wide range of tactics, from gentle admonishments to open harassment, warrant checks, arrests, and violence. The NAACP reported a rise in police brutality as a result.\footnote{107}

Denver provides another early example of this philosophy in action. In 1980 the Denver Police Department began deploying directed foot patrols, focusing on minor offenses in areas where young people gathered. The plan was quickly deemed a success, and expanded to deal with homeless campers and panhandlers, especially in commercial areas. The foot patrols were supplemented with motorcycle patrols and dubbed “ESCORT” (Eliminate Street Crime On Residential Thoroughfares).\footnote{108} Skolnick and Bayley enthusiastically report:

ESCORT officers are specialized in the enforcement of laws dealing with behavior in public places. One might call this skilled harassment. Working the streets’ busy hours, 10 A.M. to 2 A.M. divided into two shifts, ESCORT officers are told to

---

\footnote{107}{Skolnick and Bayley, New Blue Line, 160–63; 167–70, 175, 178. Noting the NAACP’s complaints, Skolnick and Bayley recommend that the police there engage in Santa Ana–style community organizing to reduce the friction.}

\footnote{108}{Ibid., 135–37.}
problems that can be addressed in other ways—or that we can stand to leave unresolved. There are political reasons for this position: in the interest of individual liberty, it is better not to expand police power or turn community problems into a source of police legitimacy. But there is also an underlying ethical principle, that violence should be always and only a last resort. When we mark something—a behavior, a person, a “hot spot” location—as an object for police control, we also authorize an unknown level of violence to be applied to ensure compliance. The police represent, in Carl Klockars’s phrase, the state’s “nonnegotiable coercive force.” 105 That is, ultimately, why they are there. A noisy drunk may be bothersome, to be sure. It is possible that (as so many business owners seem to believe) panhandlers keep patrons away. And a group of teenagers sulking on the street corner can make for an unnerving walk home. But few of us would feel justified using violence to address these difficulties. And neither should the police. But violence—or its threat—is implicit in every police interaction and manifests at times when it is undeniably inappropriate.

To authorize police action is to authorize violence; to direct the police to act against such minor offenses (or non-offenses) as loitering or public drunkenness is to authorize violence in circumstances where very few people would consider it justified. 106

106 This gets to the core of what is wrong with Wilson and Kelling’s view, ethically speaking. They don’t take rights or justice seriously. For instance: “Arresting a single drunk or single vagrant who has harmed no identifiable person seems unjust, and in a sense it is. But failing to do anything about a score of drunks or a hundred vagrants may destroy an entire neighborhood.” Wilson and Kelling, “Broken Windows,” 35.

fused. But no matter: when police fired tear gas into the house it caught fire and burned to the ground. Six SLA members died in the blaze. 18 Gates later expressed his reservations: “At the moment my main concern was whether [kidnapped heiress] Patty Hearst had been inside. I didn’t give a shit about the others.” 19 Apparently, his regard for the neighbors was no higher. No effort had been made to evacuate the neighborhood before the raid, or during the stand-off. Nearby homes were damaged in the fire, and several houses were riddled with bullets. 20

The LAPD SWAT team was deployed 200 times in its first two years. 21 Since then, paramilitary police units have become a nationwide phenomenon, and their rate of use has sharply increased. In 1970 there was exactly one SWAT team in the United States; by 1975 there were close to 500. 22 By 1995, 89 percent of cities with a population over 50,000 had a paramilitary unit, and 50.1 percent of cities with a population between 25,000 and 50,000 did. 23 In 1980, PPUs were deployed 2,884 times across the country. Fifteen years later, in 1995, that number had risen to 29,962. 24

In part, PPUs are deployed more often simply because there are more of them to deploy. Many small departments have formed their own paramilitary units, whereas they previously relied on those of larger cities or the state police in the (rare) event of an emergency. After all, how often do the campus police at the University of Central Florida face sniper fire, a
barricaded suspect, or a hostage situation? Yet they have their own SWAT team.\textsuperscript{25} So do the police departments of Butler, Missouri (population 4,201), Mt. Orab, Ohio (population 2,701), and Middleburg, Pennsylvania (population 1,363).\textsuperscript{26} Many factors promoted the spread of paramilitary units, including the existence of a ready-to-use model, the availability of equipment and training,\textsuperscript{27} and the professional prestige attached to the highly specialized teams. The nationwide craze for SWAT teams marks an advance in the militarization of the police, but as importantly, the factors sustaining this trend also indicate militarization.

Perhaps more troubling than the replication of the SWAT model is the expansion of the SWAT mission. In 1994, Fresno, California began using its PPU, the Violent Crime Suppression Unit (VCSU), to patrol its southwest ghettos. Wearing black fatigues, combat boots, and body armor, the officers routinely patrolled with MP-54 submachine guns, helicopters, and dogs. First deployed after a wave of gang violence (including attacks on police officers), the VCSU quickly went from raiding houses to stopping cars, interrogating “suspicious persons,” and clearing people off of street corners.

These street corner sweeps represented an impressive display of force, beginning with a pyrotechnic flash-bang grenade. Police then moved in with their guns drawn, sometimes supported by a canine unit. Everyone in the area was forced to the ground, and civilian dogs were shot on sight. The “suspects” in the area were then photographed, interrogated, checked for

\item \textsuperscript{25} Weber, “Warrior Cops,” 7.
\item \textsuperscript{26} Balko, \textit{Rise of the Warrior Cop}, 210.
\item \textsuperscript{27} About half (46 percent) of police paramilitary units receive training directly from the military. One SWAT officer brags, “We’ve had special forces folks who have come right out of the jungles of Central and South America. These guys get into the real shit.... We’ve had teams of Navy Seals and Army Rangers come here and teach us everything.” Quoted in Peter B. Kraska and Victor E. Kappeler, “Militarizing American Police: The Rise and Normalization of Paramilitary Units,” in \textit{The Police and Society}, 471.
\end{itemize}
\end{footnotesize}

conclusion does not necessarily follow from the Broken Windows premise. If panhandlers and dilapidated buildings serve as indicators of disorder, and thus promote crime, then public safety should be better advanced by the state’s welfare functions rather than its policing functions (and there is no reason to subordinate the one to the other). Rather than investing resources in law enforcement, government funds would be better used to reduce poverty, provide housing, and help lower-income families to keep up their homes—efforts that do not require any involvement on the part of the police.\textsuperscript{103}

Even if we accept the Broken Windows theory as Wilson and Kelling present it, there are still good reasons not to make the police responsible for the maintenance of order. For one thing, many aspects of “order” are not reflected in the law. Charging the police with maintaining order, without the pretense of law, comes uncomfortably close to outright bullying. Second, where “order” is distinct from “law,” it would seem to invest in the police the power to determine for themselves what counts as proper behavior. That is a dangerous enough precept to be avoided in its own right.\textsuperscript{104} Both of these worries can be somewhat alleviated if laws are changed to reflect the prevailing standards and to invest the police with order maintenance duties \textit{de jure} as well as \textit{de facto}.

But that also should be resisted. First, it may raise troubling questions about the separation of powers—especially where the police themselves lobby for such laws. And more importantly, we should always hesitate to rely on the police to solve

\begin{footnotesize}
\begin{itemize}
\item \textsuperscript{103} There is, in fact, empirical evidence to support the idea that improved welfare services help reduce crime. See: Elliott Currie, \textit{Crime and Punishment in America} (New York: Metropolitan Books, 1998).
\item \textsuperscript{104} Predictably, laws that depend upon an individual officer’s judgment of good order or proper conduct tend to be enforced in a discriminatory fashion. See, for examples: Joey Mogul et al., \textit{Queer (In)Justice}, 48–68.
\end{itemize}
\end{footnotesize}
by informal controls, drugs will change hands, prostitutes will solicit, and cars will be stripped.... muggings will occur.\textsuperscript{99}

By this reasoning, it is not just crime and the fear of crime that demand police attention but the entire range of factors affecting the "quality of life."\textsuperscript{100}

Aside from its implicit class-bias,\textsuperscript{101} the Broken Windows theory seems to assign inordinate importance to keeping one’s lawn tidy. It seems frankly implausible that litter and abandoned cars lead to rape and murder in the vague but direct way Wilson and Kelling suggest.\textsuperscript{102} Moreover, the zero-tolerance

\begin{footnotesize}

\textsuperscript{100} The Community Policing Consortium provides some specifics: "Ridding the streets of gangs, drunks, panhandlers, and prostitutes—perhaps with the help of public and private social agencies—will enhance the quality of life. Removing signs of neglect (e.g., abandoned cars, derelict buildings, and garbage and debris) will offer tangible evidence that community policing efforts are working to bring about increased order in the community." Community Policing Consortium, "Understanding Community Policing," 47.

\textsuperscript{101} And sometimes explicit: "A busy, bustling shopping center and a quiet, well-tended suburb may need almost no visible police presence. In both cases, the ratio of respectable to disreputable people is ordinarily so high as to make informal social control effective." Wilson and Kelling, "Broken Windows," 36.

\textsuperscript{102} Broken Windows theorists point to New York’s statistical drop in crime during the 1990s as the empirical evidence. See, for example: William Bratton (with Peter Knobler), \textit{Turnaround: How America’s Top Cop Reversed the Crime Epidemic} (New York: Random House, 1998), 259, 289–90, 294–95.

There are several related problems with this argument. First, it should be remembered that crime is a complex phenomenon; its prevalence or decline is likely the result of multiple (and often, poorly understood) factors. (For a brief overview, see: James Lardner, "Can You Believe the New York Miracle?" \textit{New York Review of Books}, August 14, 1997.) Second, crime is notoriously difficult to measure. Third, available statistics are subject to misinterpretation and manipulation. Fourth, a managerial system that rewards “good stats” (and punishes “bad”) builds in an incentive for intentionally distorting the figures. (Officials in both the NYPD and the New York Transit Police were forced to retire after they were caught skewing their numbers to fabricate drops in the crime rate.) And finally, the most reliable statistics available—those based on crime victim surveys—showed no change in

warrants, and entered into a computerized database.\textsuperscript{28} The VCSU produced impressive figures marking its activity. Misdemeanor arrests increased 48.3 percent, and the unit averaged one shooting every three months.\textsuperscript{29}

Fresno is not alone in its use of paramilitary police for routine patrol. By 1999, there were ninety-four departments across the country similarly deploying their SWAT teams.\textsuperscript{30} One commander described his department’s approach:

We’re into saturation patrols in hot spots. We do a lot of work With [sic] the SWAT unit because we have bigger guns. We send out two, two-to-four men cars, we look for minor violations and do jump-outs, either on people on the street or automobiles. After we jump-out the second car provides periphery cover with an ostentatious display of weaponry. We’re sending a clear message: if the shootings don’t stop, we’ll shoot someone.\textsuperscript{31}

The application of SWAT techniques in routine (i.e., non-emergency) law enforcement situations has been termed the “normalization” of paramilitary units.\textsuperscript{32} This process works in two complementary directions. First, the scope of activity considered appropriate for specialized units becomes ever wider. In military jargon, this is referred to as “mission creep”—a suitably unpleasant sounding term.\textsuperscript{33} Second, the increased use of

\begin{footnotesize}
\textsuperscript{28} Parenti, \textit{Lockdown America}, 111–15. One Fresno cop explained the intended scope of these files: "If you’re twenty-one, male, living in one of these neighborhoods, been in Fresno for ten years and you’re not in our computer—then there’s definitely a problem." Ibid., 111.

\textsuperscript{29} Ibid., 118.

\textsuperscript{30} Kraska and Kappeler, "Militarizing American Police," 469.

\textsuperscript{31} Quoted in Ibid., 469. The legacy of the slave patrols is often eerily evident in these operations. One PPU commander mused: “When the soldiers ride in you should see those blacks scatter.” Ibid., 475.

\textsuperscript{32} Kraska and Kappeler, "Militarizing American Police."

\end{footnotesize}
the specialized team promotes the view that their military organization, skills, and equipment are well suited to general police work; the regular police then come to resemble the paramilitary units. Both tendencies advance the militarization of the police, and both have been encouraged by the prohibition of certain drugs.

The Drug War and Other Dangerous Habits

From a managerial perspective the temptation to use specialized forces for a widening range of activities is understandable. Where such units exist, commanders are loath to “waste” their capabilities. To justify their continued existence, in particular their continued funding, they must be used. Inactivity is bureaucratic suicide. So the mission of these units expands. As it expands, their operations become normalized. Jerome Skolnick and David Bayley explain:

Because riots and hostage-takings are relatively rare, SSU [Denver’s Special Service Unit] has had a lot of time on its hands, notwithstanding its demanding training requirements. So in its spare time, which has amounted to 90 percent, it has been doing saturation patrolling.

Saturation patrolling offers one solution for the need to keep the paramilitary teams busy between emergencies. Likewise, mundane police duties can be reframed as “emergencies”—or alternately, the cops may actually create emergencies. That is precisely what the police do when they use paramilitary units to perform “warrant work.”

“Warrant work” is actually something of a misnomer, since many departments claim that they don’t need a warrant when

Fixating on Broken Windows

The theoretical justification for the sudden focus on minor offenses is what is known as the “Broken Windows” doctrine. Though actually quite old, the Broken Windows idea owes its name and current popularity to a 1982 article by James Q. Wilson and George Kelling. They argue that if minor disorder is allowed to persist, it leads to both public fear and to serious crime, because it establishes the sense that the area is uncared for.

We suggest that “untended” behavior also leads to the breakdown of community controls. A stable neighborhood of families who care for their homes, mind each other’s children, and confidently frown on unwanted intruders can change, in a few years or even a few months to an inhospitable and frightening jungle. A piece of property is abandoned, weeds grow up, a window is smashed. Adults stop scolding rowdy children; the children, emboldened, become more rowdy. Families move out, unattached adults move in. Teenagers gather in front of the corner store. The merchant asks them to move; they refuse. Fights occur. Litter accumulates. People start drinking in front of the grocery; in time, an inebriate slumps to the sidewalk and is allowed to sleep it off. Pedestrians are approached by panhandlers....

Such an area is vulnerable to criminal invasion. Though it is not inevitable, it is more likely that here, rather than in places where people are confident they can regulate public behavior

in select areas, and uses its own private security force to patrol the streets and move along the homeless. Kristian Williams, “Exclusion Zones: Policing Public Space—With Deadly Results,” in Fire the Cops!, 54–57.

Jeremy Bentham, wrote in 1787: “The most effectual way of preventing the greater crimes is punishing the smaller, and endeavoring to repress that general spirit of licentiousness which is the parent of every species of vice.” Quoted in Reynolds, Before the Bobbies, 71.

34 Parenti, Lockdown America, 131.

98 William Wilberforce, an eighteenth-century reformer and friend to Jeremy Bentham, wrote in 1787: “The most effectual way of preventing the greater crimes is punishing the smaller, and endeavoring to repress that general spirit of licentiousness which is the parent of every species of vice.”
Consider the response of two academic advocates of community policing, Jerome Skolnick and David Bayley, to Santa Ana Police Chief Raymond Davis’s efforts to make the destitute unwelcome in the downtown area. Davis formed an alliance with local business owners, who pressured judges to issue stiffer sentences for public order violations. Skolnick and Bayley don’t pause to worry about the separation of powers, or about private businesses interfering with the judiciary, or about the human rights implications of targeting one class of people for prosecution to benefit another class—always targeting the poor, for the benefit of the rich. Instead, our astute academicians consider removal of poor people as part and parcel of restoring order. And rather than addressing the social and economic sources of poverty, they go so far as to blame the poor for causing economic decline:

Drunks loiter and sleep in front of stores, urinate in alleys, panhandle, and otherwise annoy the sort of person who might be interested in purchasing a meal, a pair of shoes, or a floor lamp in downtown Santa Ana. The more the downtown area became a haven for habitual drunks and transient street criminals, the more precipitous its decline.

Despite all the happy talk about “community involvement” and “shared problem solving,” in practice certain populations generally get counted among the problems to be solved rather than the community to be involved. Priorities identified by the “community” may suspiciously coincide with the interests of business owners and real estate developers.

———

94 “Places abandoned by the government and the police for decades—inner cities, railroad yards, and river-front properties—are being reclaimed because they are now seen as valuable locations for capital investment.” Kappeler, “Reinventing the Police and Society,” 484.
95 Skolnick and Bayley, New Blue Line, 40.
96 Ibid., 39.
97 For instance, the Portland Business Alliance has lobbied for strict quality-of-life enforcement, helped to write a law making it illegal to sit or sleep on the public sidewalk, provided funding for additional police patrols they fear that evidence would be destroyed during the time it takes to contact a judge. The searches at issue are usually drug-related. One commander describes the procedure: “[O]ur unit storms the residence with a full display of weaponry so we can get the drugs before they’re flushed.”36 Paramilitary units usually specialize in "no-knock" or "dynamic" entries, meaning they avoid announcing their presence until they’ve knocked down the door and are charging into the house. The LAPD, in its characteristic style, gave its SWAT team an armored car with a battering ram attached; rather than breaking down the door, the cops drive the vehicle straight through the wall. At least half of all paramilitary raids result in property damage, usually broken doors and windows.

No-knock entries are dangerous for everyone involved—cops, suspects, bystanders. The raids usually occur before dawn; the residents are usually asleep, and then disoriented by the sudden intrusion. There is no warning, and sleepy residents may not always understand that the men breaking down their door are police. At the same time, police procedures allow terribly little room for error. Stan Goff, a retired Special Forces sergeant and SWAT trainer, says that he teaches cops to “Look at hands. If there’s a weapon in their hands during a dynamic entry, it does not matter what that weapon is doing. If there’s a weapon in their hands, that person dies. It’s automatic.”39

Predictably, these raids sometimes end in disaster. When the Visalia, California, SWAT team raided Alfonso Hernandez’s apartment in 1998, the teenager opened fire, injuring one officer. The police fired back without restraint, hitting Hernandez thirty-nine times and killing him on the spot. Some of their bullets traveled through walls into neighboring apartments. In ad-
dition to Hernandez, another man in the apartment, Emiliano Trevino, was killed. Trevino was seeking refuge in a corner when he was shot five times.\textsuperscript{40}

On September 13, 2000, the DEA, FBI, and local police conducted a series of raids throughout Modesto, California. By the end of the day, they had shot and killed an eleven-year-old boy, Alberto Sepulveda, as he was lying facedown on the floor with his arms outstretched, as ordered by police.\textsuperscript{41} In January 2011, police in Farmington, Massachusetts similarly shot Eurie Stamp, a sixty-eight-year-old grandfather, as he lay motionless on the floor according to police instructions.\textsuperscript{42} In the course of a May 2014 raid in Cornelia, Georgia, a flash-bang grenade landed in the crib of a nineteen-month-old infant. The explosion blew a hole in the face and chest of Bounkham Phonesavanh (“Baby Bou Bou”), covering his body with third degree burns, and exposing part of his ribcage. No guns or drugs were found in the house, and no arrests were made.\textsuperscript{43}

Sometimes these raids go wrong before they even begin. Walter and Rose Martin, a perfectly innocent couple, both in their eighties, had their home raided by New York Police more than fifty times between 2002 and 2010. It turned out that their address had been entered as the default in the police database.\textsuperscript{44} That’s the extreme case, but not an isolated problem. NYPD Chief Raymond Kelly—while defending the department’s tactics—estimated that in 2003 the police conducted 450 no-knock raids every month, and that approximately 10 percent were warrants served on the

\textsuperscript{42} Dansky, \textit{War Comes Home}, 9.

\textsuperscript{43} Ibid., 14.

\textsuperscript{44} Balko, \textit{Rise of the Warrior Cop}, 268.

\textsuperscript{42} Goldstein writes: “Officers are frequently expected not only to respond to the full range of problems that the public expects the police to handle . . . but also to take the initiative to identify whatever community problems—beyond those within the widest definition of the police functioning—that may affect the public’s sense of well-being” (Goldstein, “Toward Community-Oriented Policing,” 9). A more direct statement might read: Community policing encourages the police to overreach their established authority, to look for opportunities to insert themselves into community life, and to expand the police function.

\textsuperscript{43} Parenti, \textit{Lockdown America}, 102.
converted into an “armed camp.”\footnote{Christopher Commission, \textit{Report}, 102–3.} But despite its reservations, the commission saw value in the program—and saw its place within the overall framework of community policing.

This combination of militaristic tactics and community policing ideology is less mysterious than it might initially appear. The community policing focus on problem solving can easily tend towards a zero-tolerance approach with a strong emphasis on public order rather than on crime \textit{per se}.\footnote{“Zero-tolerance policing refers to the strict enforcement of all criminal and civil violations within certain geographical hot spots (a code word for lower-income, minority areas) using an array of aggressive tactics such as street sweeps, proactive enforcement of not just the law but ‘community order,’ and a proliferation of drug raids on private residences.” DeMichele and Kraska, “Community Policing in Battle Garb,” 86–87.} The effect is to criminalize an ever-wider range of public order offenses and minor nuisances—some of which might not even really be illegal. Hence, standard features of urban life that may pre-

Comparisons to military occupation are not wholly rhetorical. I witnessed an operation similar to Cul-de-Sac in the Logan Circle neighborhood of Washington, D.C. during the winter of 1998. National Guard troops blocked off my street with humvees. They stood in clusters at each end of the block, wearing helmets and bulletproof vests, turning away traffic. At night they used generators to power enormous flood lights, under which the street appeared brighter than it did during the day. A friend who lived a few blocks over reported a similar occurrence on his street some weeks earlier. He asked one of the soldiers what they were doing. The soldier replied, “Preventing crime.” And it was true. Rhode Island Avenue, between Logan Circle and 13th Street, was, and probably is, a popular spot for illicit exchanges of various kinds. During the occupation (as I thought of it), all apparent drug activity ceased. But so did practically everything else. On a typical day, even in the winter, the street would be the site of children playing, couples out for evening strolls, people walking their dogs, sitting on their front stoop, washing cars in the parking lot on the corner, and otherwise just hanging out. The National Guard put an end to all that. For a few days, the noise of cars, music, and simple human conversation was replaced with the sterile hum of an electric generator. But after a few nights, the soldiers left—moving on, surely, to someone else’s neighborhood—and life returned to normal, or what passes for normal in the colony that serves as the seat of our government.

In 1990 there were 30,000 SWAT raids in the United States. By 2005, that number had grown to 50,000.\footnote{Ibid., 308.} More than three-quarters of all SWAT deployments (75.9 percent) are drug raids.\footnote{Ibid., 175.} The targets are not always, only, or even \textit{usually} the most prominent, powerful, or violent drug traffickers, but are often low-level dealers or even individual users. In only a third (35 percent) do police find a weapon.\footnote{Dansky, \textit{War Comes Home}, 4.}

Once mission creep sets in, it can be difficult to reverse. The tendency is to expand the scope of action, finding new uses for paramilitary units, new excuses for no-knock raids. In the first years of the new century, the federal government began orchestrating paramilitary raids against medical marijuana clinics operating in compliance with state (but not federal) law—“using state-sanctioned violence,” as journalist Radley Balko notes, “to make a political point.”\footnote{Balko, \textit{Rise of the Warrior Cop}, 252–53.} A decade later, SWAT teams were arresting doctors accused of over-prescribing pain pills, undocumented immigrants, suspected prostitutes, and even unlicensed barbers; they launched raids against bars serving underage patrons and VFW halls hosting charity poker games.\footnote{Ibid., 253, 278–86.} Not only were these manifestly \textit{non-emergency} situations, many were \textit{non-criminal} as well, involving only minor violations of civil statutes or administrative rules. Yet, in its attempts at enforcement, the
government has mobilized heavily armed, heavily armored paramilitary teams in dramatic and sometimes deadly shows of force. The Albuquerque Police Department’s paramilitary unit shot and killed a homeless man whose only crime was illegal camping; in effect, the highly-trained elite strike force killed him simply for being homeless.\footnote{Dansky, War Comes Home, 39.}

It is hard to overstate the impact drug policy has had on policing, even outside the area of drug enforcement. The national obsession with controlling narcotics has provided a rationale for racial profiling, legitimized prison expansion and draconian sentencing laws, eroded constitutional protections against warrantless searches, promoted federal involvement in local law enforcement, and facilitated the militarization of city, county, and state police.\footnote{The militarization of law enforcement has two dimensions—the degree to which the military becomes entrenched in domestic policing and the degree to which the police come to resemble the military. Radley Balko describes these as “direct militarization” and “indirect militarization,” respectively. Congress has authorized the military to provide equipment, research facilities, training, and advice to aid local law enforcement in anti-drug efforts, to participate directly in efforts to keep drugs from crossing the border, and—in the case of the National Guard—to join local police in drug raids and patrols. Dunlap, “Thick Green Line,” 29; Weber, “Warrior Cops,” 2; Balko, Rise of the Warrior Cop, 35 (italics in original), 148, 178–79; and Parenti, Lockdown America, 47–48.}

It has also provided a convenient justification for widening the scope of police activity.

**Officer Friendly?**

If the aggressive, armored paramilitary unit represents one face of contemporary policing, the other is that of the smiling, chatty cop on the beat. One is the image of militarization; the other is that of community policing.

“Community policing,” like “militarization,” is a jargon term. “Community policing,” however, provides a feel-good label to

Or do they? Do they instead, perhaps, become ever less tolerant of resistance and disorder, ever more forceful in their own demands?

**The Hard Edge of Community Policing**

In the wake of the Rodney King beating, the Christopher Commission noted with alarm that distrust of the police was commonplace, especially among African Americans and Latinos. As a remedy, the commission issued a broad slate of recommendations, many centering on the full adoption of a community policing perspective as the guiding philosophy of the LAPD. Giving credit where it was due, the Commission’s report listed already-existing LAPD programs that made use of community policing strategies. The report specifically mentioned DARE, the short-lived Community Mobilization Project (in which police attended block meetings and arranged for Boy Scout troops to remove graffiti), and Operation Cul-de-Sac.

In “Operation Cul-de-Sac,” police erect barriers on streets in high crime areas so that motorists cannot drive through a neighborhood. The most ambitious use of this program occurred in a 30-block area of the Newton district of South-Central Los Angeles. The LAPD set up two cul-de-sacs in the section and erected small barriers on other streets. The zone was saturated with officers on foot, horse, and bicycle. “Open to Residents Only” and “Narcotics Enforcement Area” signs were posted. The aim was to discourage drug dealers and gang members from driving through the area. At the same time, debris was removed from alleys and graffiti scrubbed off walls.

The Christopher Commission report went on to voice concerns about the intensive deployment of officers, the specific targeting of high-crime areas, the “illusory” nature of the reduction in crime, and citizen complaints that the area had been
Hence, what may be presented in terms of democratic engagement and greater inclusion tends overall to favor the state’s interests and reinforce state power. Negotiation and co-optation provide the means for the state to extend its influence. Thus potential sources of resistance can be neutralized—or even turned to the state’s advantage—by their incorporation into a policy community, in this case one centered around and dominated by the police department.\textsuperscript{88} In some sense, the client groups become incorporated into the state itself. It makes little difference whether the client organization is a police union,\textsuperscript{89} a social service agency, a church, a school, another governmental body, or a neighborhood watch group. By organizing on a sufficient scale the police can greatly enhance their own power—not only over these agencies, but through them—while acquiring relatively few additional burdens for themselves. So long as the police maintain control over the network as a whole, no one component of it is likely to make demands that cannot be easily accommodated (or safely ignored).

Here is the secret to a friendly police state: as the police more fully penetrate civil society, and as they gain the cooperation of the citizenry and its various organizations, they become less reliant on their own access to violence.

\textsuperscript{88} In their discussion of Detroit’s community policing experiments, Skolnick and Bayley write, “Because the mini-stations organize people, they develop considerable political clout…. Not only do they help give voice to the security concerns of local residents, but they assist in representing communities before various public and private authorities, such as zoning boards, developers, and the sanitation and public works departments. As a result, mini-station officers develop the kind of grassroots connections politicians labor over.” Skolnick and Bayley, \textit{New Blue Line}, 71–72.

\textsuperscript{89} As we saw in chapter 6, this kind of relationship has allowed for a level of cohesion and cooperation between local governments, police departments, and police unions, even as they wage a three-way struggle for control.

Community policing largely grew out of innovations developed during the 1970s. The seventies and eighties were periods of extreme experimentation in law enforcement, as departments across the country struggled to recover from the defeats of the 1960s. As the years progressed, the new ideas were either refined or abandoned, and those remaining gradually coalesced under the rubric of community policing. This legacy, plus the community policing premise that law enforcement strategies should be adapted to local conditions and local needs, has resulted in a baffling variety of programs operating under the same label, and has made generalizing about them very difficult.

Community policing largely evolved from the earlier notion of “team policing,” under which a group of officers shared responsibility for a particular area.\textsuperscript{54} From this base, community policing slowly came to incorporate novelties like decentralized command, storefront mini-stations, directed (rather than random) patrol, neighborhood watch groups, permanent assignments, neighborhood liaisons, door-to-door surveys, public forums, crime prevention trainings, citizen advisory boards, meetings with religious and civic leaders, foot patrols, bike patrols, police-sponsored community activities and social functions, a focus on minor offenses, educational and recreational programs for young people, citizen volunteer opportunities, and community organizing projects.\textsuperscript{55}

\textsuperscript{53} Klockars suggests that “community policing” is only a rhetorical device, used to obscure and legitimate the central place of violence in police operations. Klockars, “The Rhetoric of Community Policing.”

\textsuperscript{54} Skolnick and Bayley, \textit{New Blue Line}, 21.

\textsuperscript{55} For case studies of community policing programs, see: Skolnick and Bayley, \textit{New Blue Line}; and David Harris, \textit{Good Cops: The Case for Preventive}
Common features seemed to connect many of the more successful programs, and these slowly formed the basis for the community policing perspective. Sociologist Gary Cordner groups its elements into philosophical, strategic, tactical, and organizational dimensions. Philosophically, community policing is characterized by the solicitation of citizen input, the broadening of the police function, and the attempt to find solutions based on the values of the local community. Organizationally, community policing requires that departments be restructured such as to decentralize command, flatten hierarchies, reduce specialization, civilianize staff positions, and encourage teamwork. Strategically, community policing efforts reorient operations away from random patrols and responding to 911 calls, towards more directed, proactive, and preventive activities. This reorientation requires a geographic focus, and encourages cops to pay attention to sources of disorder as well as to the crimes themselves. Tactics that sustain community policing efforts are those that encourage positive citizen interactions, partnerships, and problem solving.56

A 1994 report composed by the Community Policing Consortium (representing the International Association of Chiefs of Police, the National Sheriffs’ Association, the Police Executive Research Forum, and the Police Foundation), and published by the Department of Justice, identifies the two “core components” of community policing as “community partnership.”85 Santa Ana (California) police lieutenant Hugh Mooney tells of his role in the neighborhood:

“This is my area…. I am their spokesman…. I support them 100 percent. If I have to argue with them, I do it here, and we work things out. Then, when I do go before my peers and superiors I tell them exactly what my people feel…. I represent them.86

Of course, this is only half the equation. The other half is that Lieutenant Mooney also represents the Santa Ana Police Department to the residents of the neighborhood where he serves; he presents the organization’s perspective, promotes its agenda, and couches its demands in acceptable terms.

Where the police succeed in establishing such relationships, and in using them to increase their power, they create what Martin J. Smith calls a “policy community”: policy communities increase state autonomy by establishing the means through which state actors can intervene in society without using force. By integrating state and society actors, they increase the capabilities of the state to make and implement policy. They create state powers that would not otherwise exist and, more importantly, they increase the autonomy of actors in a policy area by excluding other actors from the policy process.... It is state actors who determine the rules of the games, the parameters of policy and the actors who will have access to the policy community.87

86 Quoted in Skolnick and Bayley, New Blue Line, 30.
87 Smith, Pressure, Power and Policy, 68. Smith also writes: “Policy is developed through negotiations and any groups involved in the process can assist in implementation. The state agency is able to achieve its goals through the incorporation of the pressure group. Policy networks are a means of extending the infrastructural power of society by establishing mechanisms for negotiation which allow greater intervention in civil society.” Ibid., 53–54.
sound like demilitarization, liberalization, or democratization, but it is instead just a smarter approach to repression. The goal of community policing is to reduce resistance before force is required.

What we’ve traced out here is the path from legitimacy to hegemony. The ultimate goal of community policing is to increase the power of police, and that represents the most stable limit on the community’s role as “co-producers” of crime control. The police and the community may form a “partnership,” but the police always remain the senior partner.

**Community Policing and Policy Communities**

The demands of community policing may sound contradictory: the police are to rely on community’s support, but remain in control; community input should shape police priorities, but without granting the community power. The corporatist model again becomes useful in understanding the police-community relationship and problem solving.”

Sociologists Jerome Skolnick and David Bayley concluded, based on a study of six police departments renowned as innovators and trend-setters, that the governing premise of community policing was “that the police and the public are co-producers of crime prevention.”

By the early 1990s “Community Policing” was the official religion of police nationwide, even if nobody knew exactly what it meant. Even Daryl Gates, the embattled and abrasive former chief of police in Los Angeles, explicitly advocated community policing in his 1992 memoir, which only underscores questions about the term’s use. If the notorious LAPD has, as Gates insists, been practicing it since the 1970s, then what doesn’t count as community policing? If the term covers everything, then does it mean anything?

Perhaps I’m being unfair. After all, the LAPD did invent some of the paradigmatic community policing programs, including DARE (Drug Abuse Resistance Education) and the neighborhood watch. But the clash between the LAPD’s uncivil image and that of the personable neighborhood beat cop gets to the heart of the confusion about what is and is not community policing. There is a difference between adopting stand-alone programs and taking on community policing as an overall organizational strategy. The Los Angeles Police Department may have recognized early on the need for community partnerships, but it—like most departments—has pursued these partnerships unevenly, haphazardly, and without changing the basic orientation of the police force.

On the other hand, community policing is not at all incompatible with the hardnosed, militarized tactics for which...
Gates’s department became famous, or infamous. Of the two major strands of community policing programs—“peace corps policing” and “order maintenance policing”—the latter seems to actually promote just the sort of excess that Gates favored. As Matthew T. DeMichele and Peter B. Kraska explain, peace corps policing “emphasized community empowerment, cultivating constructive relationships with disenfranchised minority groups, and establishing partnerships between the public and the police,” while the “order-maintenance” approach “seeks to ‘clean up’ a community proactively, thereby reducing the potential for crime and diminishing citizens’ fears.”

Linking the two is an emphasis on problem solving and a sense that police work extends beyond the most basic matters of law enforcement. Hence, both approaches are proactive, prevention-oriented, concerned with the fear of crime as well as with crime itself, and generally fit within the framework of community policing as it is laid out above. Where differences exist, they tend to be matters of emphasis rather than principle. In fact, peace corps and order maintenance approaches are sometimes employed in tandem, and—together or separately—they dovetail with militarization to form a coherent, strategic whole. To resolve this seeming paradox, we should consider what the police hope to accomplish with community policing, and what advantages they take from their community partnerships.

“Problem-oriented policing goes a step further than what is commonly conveyed in community policing by asserting up front that the police job is not simply law enforcement, but dealing with a wide range of community problems—only some of which constitute violations of the law. It further asserts that enforcement of the law is not an end in itself, but only one of several means by which the police can deal with the problems they are expected to handle.” Goldstein, “Toward Community-Oriented Policing,” 16.

For example, responding to a wave of gang violence in the mid-1990s, the Boston Police Department formed a broad-based working group including social workers, academics, and members of the Black clergy, some of whom had been vocal critics of the department. The clergy’s role in “Operation Ceasefire” was two-fold. First, they served an intelligence function. As David Harris explains, with enthusiasm, in his book *Good Cops*:

With their long history on the streets, the ministers … [were] well positioned to help distinguish between gang ‘wannabes,’ who might be reached with alternatives and offers of help, and the truly hard-core gang soldiers…. Thus, by becoming part of Operation Cease Fire, the members of the Ten-Point Coalition became important sources of intelligence for the police, enabling officers to target the right people.

Secondly, the involvement of Black ministers—especially those who had been critical of the police—served to legitimize the anti-gang effort and (as two academic advisors to the program later put it) “sheltered the police from broad public criticism.”

The overall result of such efforts is to increase the police role in the community, meaning that the coercive apparatus of the state will be more involved with daily life. The state, and the police in particular, will have more opportunities for surveillance, and can exercise control in a variety of ways besides arrests, citations, or physical force. This shift can be made to

Community resources and existing sources of power. The Community Policing Consortium report puts it politely:

Community policing does not imply that police are no longer in authority or that the primary duty of preserving law and order is subordinated. However, tapping into the expertise and resources that exist within communities will relieve police of some of their burdens. Local government officials, social agencies, schools, church groups, business people—all those who work and live in the community and have a stake in its development—will share responsibility for finding workable solutions to problems that detract from the safety and security of the community.

In other words, community policing is a strategy for making the community’s total “expertise and resources” available to the police. The ultimate goals of policing (“the primary duty of preserving law and order”) are unchanged, and police authority is not diminished. But community policing does allow

---

79 The dangers of allowing the state to co-opt community institutions, especially those of oppressed minorities, should be clear enough. But in case they’re not, history has provided a particularly chilling example: “Whenever the extermination process was put into effect, the Germans utilized the existing leadership and organizations of the Jewish community to assist them.... In the face of the German determination to murder all Jews, most Jews instinctively relied on their own communal organizations to defend their interests wherever possible. Unfortunately, these very organizations were transformed into subsidiaries of the German police and state bureaucracies.... Thus, the official agency of German Jews... undertook such tasks as selecting those who were to be deported, notifying the families and, finally, of sending the Jewish police to round up the victims.” Richard L. Rubenstein, The Cunning of History: The Holocaust and the American Future (New York: Harper Torchbooks, 1978), 72, 74. Emphasis in original. See also: Hannah Arendt, Eichmann in Jerusalem: A Report on the Banality of Evil (Middlesex, England: Penguin Books, 1964), 117–25.

80 Community Policing Consortium, “Understanding Community Policing,” 13. Elsewhere, the report reads, “A concrete indication of community policing’s success is the commitment of an increased level of community resources devoted to crime reduction efforts.” Ibid., 47.

---

Changing Course

The first thing to notice about community policing is the degree to which it seeks to undo the reforms of the Progressive and professional eras. Those earlier reformers sought to centralize command, introduce bureaucratic management practices, close neighborhood precincts, do away with foot patrols, narrowly focus on crime control, increase specialization within the departments, and generally sever the connections between the police and the public. These efforts were never fully successful, but that is hardly the point. The point is that they move in exactly the opposite direction from many of the recommendations made by community policing advocates.

To make sense of this reversal, we need to recognize that community policing seeks to address a different set of problems than those faced by the Progressives or the professionals. There is no longer any need for capitalists to wrest city governments away from Tammany-style political machines, and police unionization has done more to improve the typical patrol officer’s standard of living than the move toward professionalization ever did. More subtly, the police have largely established their institutional autonomy, and have developed extensive means to defend it. In fact, since the late sixties, they have moved beyond their quest for independence and have begun to pursue political power.

Here, perhaps, we can discern a pattern. Historically, the means of social control have adapted in response to crises, to challenges faced by the existing authorities. Slave patrols evolved gradually in response to slave revolts. The rise of capitalism produced new class tensions and higher demands for order; one result was the modern police. Is it a coincidence, then, that the three most pronounced trends

63 See chapter 6.
64 See chapters 2 and 3.
in contemporary policing—unionization, militarization, and community policing—gained their momentum during a period of profound social tension and overt political conflict?

The shortcomings of social control in the civil rights and anti-war periods are not difficult to discern. Misplaced intelligence efforts meant that the security forces were often caught unawares by rebellions, and heavy-handed crowd control tactics exacerbated disorder where it arose. Meanwhile, government lawlessness—both domestically and in the field of foreign policy—eroded citizens’ faith in the system. The continuation of such conditions threatened to render the country ungovernable. The authorities had to reassess their approach to social control.

The resulting police experiments, which eventually blended into the community policing approach, were born of the desire to correct for the shortcomings of the earlier bureaucratic-professional model. They sought to build a bond between the police and the public in hopes that it would increase police legitimacy, give them better access to information, intensify their penetration of community life, and expand the police mis-

65 See chapters 7 and 8.

66 A 1968 Pentagon report to President Johnson warned against increasing the number of troops in Vietnam, citing the war’s unpopularity: “This growing disaffection accompanied as it certainly will be, by increased defiance of the draft and growing unrest in the cities because of the belief that we are neglecting domestic problems, runs great risk of provoking a domestic crisis of unprecedented proportions.” Quoted in Howard Zinn, People’s History, 491.

67 “The fact that police actions triggered many of the riots and then could not control them revealed to everyone the price of having a police department backed only by the power of the law, but not by the consent, much less active support, of those being policed.” Hubert Williams and Patrick V. Murphy, “The Evolving Strategy of Police: A Minority View,” in The Police and Society, 30.
political action, and threatens to blur the separation of powers and invert the principles of civilian control.

Third-Party Policing and Co-optation

Through their coalition work, police extend their power further into the community, but the balance of power between the police and the community remains heavily weighted, always, in favor of the police. The aim is to turn an ever-widening range of institutions into tools for law enforcement. This goal is made explicit in the tactics of "third-party policing." Third-party policing occurs when the authorities convince or require an uninvolved individual or organization to take actions designed to minimize disorder or prevent crime. Popularized by the "problem-oriented" perspective, third-party policing often involves the use or threat of civil or administrative sanctions to force bar owners, landlords, social service agencies, and others in contact with criminal suspects or disorderly persons to apply pressure such as to control their behavior. A bar owner, under threat of losing his liquor license, may agree to hire bouncers or eschew certain types of entertainment (e.g., nude dancers or hip-hop music). Landlords may be urged to install better lighting, report suspicious activity, and evict tenants whom the police deem to be problems.

74 Tom Hayden writes of Boston’s Operation Ceasefire: “[The] ‘partnership,’ while highly progressive by law enforcement standards, remained a voluntary informal arrangement based on a fundamental imbalance. It was not a structural reform or institutional shift of power... The police retained ultimate control of policy, operations, and, of course, budget.” Tom Hayden, Street Wars: Gangs and the Future of Violence (New York: The New Press, 2004), 351.
76 In Los Angeles, prosecutors have used civil abatement laws to require landlords to remove graffiti every day and to erect fencing around their properties. All of this, in theory, should make the populace easier to police and heighten the level of police control.

Pursuing Legitimacy

The first task of any community policing strategist is to make police authority legitimate in the eyes of the community. Herman Goldstein, a community policing advocate, identifies “the ultimate potential in community policing” as: the development of a reservoir of respect and support that could greatly increase the capacity of police officers to deal with problems with less need to resort to the criminal process or to the coercive force that officers derive from their uniform, their weapon, their badge, or the knowledge that they can summon reinforcements.

The means by which this legitimacy is established are sometimes subtle. Even the mechanisms through which the community is supposed to voice its concerns often become forums for the police to promote their own agenda. The most common of these is the citizen survey. Under the guise of collecting information about neighborhood problems and community attitudes, the surveys carefully frame questions to reinforce the fear of crime and present the police as problem solvers. They also suggest a conservative view concerning the causes of crime (drugs, a tolerance for disorder), the people who commit crimes (young people, gang members, strangers), and the solutions to the crime problem (law enforcement). The surveys function twice in this regard—first, in the collection of

68 These advantages are specifically noted by the Community Policing Consortium, though in somewhat coded language: “Cooperative problem solving ... reinforces trust, facilitates the exchange of information, and leads to the identification of other areas that could benefit from the mutual attention of the police and the community.” Community Policing Consortium, “Understanding Community Policing,” 18.
the data, and then, in the presentation of the results. Community meetings work the same way, turning an atmosphere of inclusiveness and participation to propagandistic ends. As noted in *The Iron Fist and the Velvet Glove*:

Although the meetings are supposedly held to deal with the community’s concerns, these concerns are defined by police within the framework of how best to reduce crime. The “communication” is frequently a one-way lobby for the police and their concerns. Other features of community policing, like foot patrols and storefront offices, serve to increase friendly contact between police and the residents in the neighborhoods they patrol. All of these practices, it is hoped, can reduce friction, encourage communication, build trust, and humanize the individual officers in the eyes of the neighborhood residents.

When legitimacy is established, the police can rely more on the cooperation of the citizenry rather than resorting to coercive force. As Gary Cordner explains, citizen participation can run the gamut from watching neighbors’ homes, to reporting drug dealers, to patrolling the streets. It can involve participation in problem identification and problem solving efforts, in crime prevention programs, in neighborhood revitalization, and in youth-oriented educational and recreational programs. Citizens may act individually or in groups, they may collaborate with the police and they may even join the police department by donating their time as police department volunteers, reserves, or auxiliaries.

Moreover, the police are not just encouraged to mobilize individuals, but to draw existing civic groups into their efforts and, where necessary, to set up new organizations to provide the support they need. Thus, the new-found trust would give the police access to and influence over community resources that may have otherwise had their law enforcement potential overlooked—or that may have served as centers for resistance.

Goldstein, for one, specifically encourages police to act as organizers and advocates in the community. He writes:

After analyzing the problem, officers involved in these projects conduct an uninhibited search for alternative responses. They may settle on one of the responses identified above as commonly used in community policing, or they may go a step further, perhaps pressuring municipal agencies to carry out existing responsibilities or to invest new resources in an area. They may push for changes in the policies of other government agencies or advocate legislation that would enable police to deal more effectively with a problem that clearly warrants arrest and prosecution.

Hence, community policing advances the autonomy of the institution and encourages police interference with the functions of the rest of the government. It provides an incentive to

---

73 Goldstein, “Toward Community-Oriented Policing,” 7. Goldstein does recognize some of the inherent dangers of assigning the police such a role. “As an illustration, community organizing is almost always listed as one of the tools available to community police officers…. If a problem, such as residential burglaries, is identified, it is admirable when a police officer can mobilize a neighborhood in ways that deal effectively with the problem. But what if the same organizational structure is subsequently used to lobby against a half-way house for the mentally ill, or is used to prevent a minority businessman from moving into the neighborhood, or is used to endorse candidates for public office?” Ibid., 22.

Goldstein’s concerns are more than hypothetical. In 1986, the police union used Los Angeles’ neighborhood watch program to push for a recall election to remove liberal judges from the California Supreme Court. Mike Davis, *Ecology of Fear: Los Angeles and the Imagination of Disaster* (New York: Vintage Books, 1998), 390.
one IRA spokesman to quip, “the opposition of the RUC to the programme is the finest recommendation it could receive.”

Even as the IRA disarmed and Sinn Fein began (as one of their local officials put it) “enforcing British rule in Ireland,” policing remained a sticking point. It took most of a decade for the government to overcome Catholic antipathy and re-claim its exclusive authority in the area of criminal justice. It began by dissolving the universally despised RUC and replacing it with the Police Service of Northern Ireland (PSNI). Following a community policing philosophy, the PSNI actively recruits Catholic officers, emphasizes human rights in its training, and pursues community partnerships. Its mission statement promises “a proactive, community-driven approach that sees the police and local community working together to identify and solve problems.” In 2007, Sinn Fein endorsed the reconstituted constabulary. For the first time, CRJI began cooperating with the cops and the courts, and the state started regulating its operations—beginning with inspections of all previous case files.

Counterinsurgency stresses the need to prevent disorder, rather than simply repressing it where it occurs. This aim requires that the authorities make nice with the local populace, creating in the community a sense that their rule is stable and legitimate. But it also requires heavy intelligence about the condition of the community, the sources of conflict, grievances, prevalent attitudes, and the efforts of trouble-makers. To both these ends, counterinsurgency theorists encourage the authorities to actively penetrate the local community. Community penetration allows for ready access to intelligence, lets the state present itself as a benevolent problem-solver, and more subtly gives it the means to co-opt community institutions that might otherwise provide a base for resistance. All of these elements can be recognized in the community policing agenda.

The neighborhood watch structure specifically mirrors counterinsurgency efforts. As British military theorist Frank Kitson writes:

Following the procedure used by the French Army in Algiers, the policeman or soldier in charge would appoint[s] one local inhabitant to be responsible for each street who would be instructed to appoint an individual to be responsible for each block and so on down to one individual responsible for each family. The

148 “History,” Community Restorative Justice, accessed October 8, 2014, www.crji.ie. As one CRJI official noted, “Complaints that were made to us in confidence were open to scrutiny including the personal details of the victim mobilising themselves to refuse to allow the individual concerned to live normally within the community. This would mean, in effect, an organized denial of access to goods and services in the local community, such as pubs, off licenses [liquor stores], shops, etc. It is a practical closing of ranks against the person who has offended against the community in a serious way and refused to make any sort of reparation to the victim or the community as a whole.” Auld, “Our Practice,” 8.3.
156 See, for example: Kitson, Low Intensity Operations, 67. Kitson’s work is discussed in greater detail in chapter 7.
avowed reason for doing this would be to facilitate requests by the people themselves for help.  

A December 2002 article in the Portland Tribune demonstrates the utility of such a system. A front-page photograph shows ten cops in helmets, bulletproof vests, combat boots and blue fatigues aiming pistols and assault rifles at a suspect’s house. The cops in the picture were members of the Northeast Precinct senior neighborhood officer unit, a team that focuses on quality-of-life issues. The raid was authorized by a warrant based on six months of intensive surveillance—surveillance conducted, not by police, but by neighbors who kept logs recording the traffic in and out of the house, disputes among the tenants, and any suspicious behavior. Police Chief Mark Kroeker identified the effort as a central aspect of Portland’s community policing strategy: “We have a police bureau that is understaffed, underfunded and overwhelmed. But we have a community that is willing to work, willing to help.”

Community policing turns the citizenry into the eyes and ears of the state and by the same means creates a demand for more aggressive tactics. This is where street sweeps, roadblocks, saturation patrols, zero-tolerance campaigns, and paramilitary units come into the picture. SWAT, in particular, was created as part of a counterinsurgency plan—a fact of which Daryl Gates was quite proud:

[We] began reading everything we could get our hands on concerning guerrilla warfare. We watched with interest what was happening in Vietnam. We looked at military training, and

By the end of 2001, 1,200 cases had been processed through the program, including complaints about drugs, noise, family conflicts, parking disputes, burglaries, property damage, violent crime, and chronic offenders. Between 15 and 20 percent of these cases would previously have been handled with violence. By 2004, CRJI’s 310 volunteers were managing more than 2,000 cases every year, and closing about 85 percent of them. The CRJI programs were soon reproduced throughout the north. And a similar program, Northern Ireland Alternatives (NIA), was initiated in Loyalist areas.

As recommended by the Blue Book, the Community Restorative Justice programs used mediation and family group counseling, monitored the agreements they negotiated, and employed charters outlining the rights and responsibilities of community members. Also recommended in the Blue Book, but not implemented by the pilot programs, were the use of professional investigators, community hearings, and boycotts of persistent offenders. Tellingly, the police denounced the effort, leading...
tecting the community from crime undercut the community’s support for the paramilitaries.

To resolve the dilemma, Republican activists sought a means to “disengage responsibly,” ideally by empowering the community to address anti-social behavior directly, without relying on either the IRA or the police. Republican activists approached a group of academics—criminologists and conflict resolution experts—and asked them to design a system that did not rely so much on breaking people’s legs. The scholars obliged, publishing their recommendations in the Blue Book. The authors of the Blue Book, in extensive consultation with the local communities, set out to design a restorative justice system that met the following criteria: community involvement and support; nonviolence and operating within the law; proportionality of the sanctions to the offense; due process and a guarantee of human rights; consistency; engagement in the community; contact with community programs; and, adequate resources.

With the endorsement of Sinn Fein, Community Restorative Justice Ireland (CRJI) programs based on the Blue Book were implemented on a trial basis, beginning in 1999, with four pilot projects in Republican areas of Belfast and Derry. The IRA pledged its support for the process, ending punishment beatings and referring cases to CRJI. In the first year, the new programs handled 200 cases, clearing 90 percent of them.

__133__ Quoted in McEvoy and Mika, “Republican Hegemony or Community Ownership?” 64.
__135__ Gerry Adams expressed the party’s enthusiasm: “Sinn Fein is in total agreement with the use of non-violent mechanisms for making offenders more accountable for their crimes, giving victims an input and involving communities in the ownership of the justice process.” Quoted in McEvoy and Mika, “Republican Hegemony or Community Ownership?” 73.
__136__ Ibid., 66.
__137__ The IRA’s statement of support announced: “We want people to support the Restorative Justice approach by bringing their problems to the ded-
When the community cooperates and tells you who has been doing things, why they have been doing them, and how long they have been doing them, you jump at the chance to get the sons-of-bitches. The community don’t help that much, so you got to take what you can get while you can get it! Because the community may change its mind, so you got to act quickly and decisively, or else you’ll lose the opportunity. That’s why when we know the community is behind us, we’re going to be aggressive, break their asses and put their butts in jail.164

Or—beginning at the other pole, an initial crackdown can repress active opposition, opening the political space for peace corps–type efforts and outreach to “responsible” community leaders.165 In military terms, the sweeps work to secure territory, and community organizing efforts constitute a battle for the hearts and minds of the populace.166

But the IRA did not have an easy time of it, either. It had few resources to devote to investigations or corrections, little time (or patience) for due process considerations and human rights concerns. Hence, their response to crime usually took the form of threats, beatings, property destruction, knee-cappings, expulsions, shootings, and executions.128 It was typically unpleasant for all concerned. The accused had practically no chance of presenting a defense and faced punishment out of proportion to the crime. Innocent people were punished, sometimes killed. IRA volunteers, meanwhile, were burdened with the job of beating up petty crooks when they wanted to be driving out the British.129 And worst of all, from a revolutionary standpoint, the friction created by this situation threatened to isolate the revolutionaries from their constituency.130

One Republican activist explained the dilemma:

[T]he conflict has created a cycle of dependency, where the community expects the [Republican] movement to deal with anti-social crime, the IRA feels responsible and must act but lacks the resources to deal with it other than through violence and the result is damaging the kids who are after all part of the community.131

This dependency worked two ways: the IRA depended on the Catholic community for protection, discretion, and support; the community relied on the IRA to protect it from crime, the state, and the Loyalists.132 The difficulty arose when pro-

---

165 Kitson advises: “In practical terms the most promising line of approach lies in separating the mass of those engaged in the [revolutionary] campaign from the leadership by the judicious promise of concessions, at the same time imposing a period of calm by the use of government forces.... Having once succeeded in providing a breathing space by these means, it is most important to do three further things quickly. The first is to implement the promised concessions so as to avoid allegations of bad faith which may enable the subversive leadership to regain control over certain sections of the people. The second is to discover and neutralize the genuine subversive element. The third is to associate as many prominent members of the population, especially those who have been engaged in non-violent action, with the government. ‘This last technique is known in America as co-optation.” Kitson, Low Intensity Operations, 87.

128 Ibid., 43. It is estimated that between 1973 and 2002, 2,300 people in Northern Ireland suffered punishment shootings—usually in the knees, thighs, elbows, or ankles. Additionally, between 1983 and 2002, 1,700 were beaten with bats, nail-studded boards, iron bars, or other kinds of clubs. McEvoy and Mika, “Republican Hegemony or Community Ownership?” 61.

130 McEvoy and Mika, “Republican Hegemony or Community Ownership?” 65.

131 Quoted in Ibid., 63.

and created “People’s Courts” to hear minor cases. Petty criminal matters and neighborhood disputes were usually resolved through restitution or community service, but serious offenses were referred to the Irish Republican Army (the IRA).

When the People’s Courts broke down after a couple of years, the IRA had little choice but to take over their crime control efforts. This role fell to the paramilitaries for several reasons. First, it was widely felt that the IRA had already established its responsibility for protecting the community, and many residents were demanding that something be done about crime. Second, crime posed a security risk, since the police were liable to use petty criminals as informers. And third, crime had a destabilizing and corrosive effect on the very communities the movement depended on for support.

Unwilling to cede ground to Republican forces, the RUC sought to reassert its authority, but its efforts were not terribly successful. Security concerns made it difficult to police Catholic neighborhoods. The police were slow in their response to calls, and they often brought soldiers with them when they arrived. Worse, the cops tried to recruit crime victims as informants; those unwilling to serve as snitches publicly exposed and vocally denounced these clumsy efforts. All of which occurred in a context of continual human rights abuses, and only amplified the Catholic distrust of the authorities. In many areas, residents became entirely unwilling to cooperate with the police, refusing even to report crimes.

If this description sounds exaggerated, we should consider New York Police Department Deputy Commissioner Jack Maple’s plans for “Operation Juggernaut”:

We’ll take the city back borough by borough.... You go into Queens.... You stay there for six months with eight hundred officers. There are some bad areas: the 103, the 110, the 113, the 114 precincts. You do everything that works: buy-and-bust operations, quality-of-life enforcement, warrants, guns, the whole thing. It works, we know it works. We do our job and take out the drug organizations and clean up Queens. Now we have it under control.

After six months, you downgrade by about twenty percent, you leave six hundred officers in Queens as a standing army and slide two hundred over to Brooklyn North, plus another seven hundred. We give Brooklyn North the same treatment for four months, leave several hundred there and slide the rest to Brooklyn South and then Staten Island. When we’ve cleaned up there, we leave some and move to the Bronx. We finish with Manhattan. Within a year we kill crime in New York.

Likewise, the chief of police in one unidentified city described the role of paramilitary units in his community policing strategy:

It’s going to come to the point that the only people that are going to be able to deal with these problems are highly trained tactical teams with proper equipment to go into a neighborhood and clear the neighborhood and hold it; allowing community policing officers to come in and start turning the neighborhood around.

This is a direct adaptation of military thinking, a strategy called “Clear-Hold-Build.” The US Army’s *Counterinsurgency Field Manual*, FM 3-24, outlines the following steps: “Create a secure physical and psychological environment. Establish

---

firm government control of the populace and area. Gain the populace’s support.”169

Operation Juggernaut was only implemented on a trial basis in one small area,170 but the same strategy is apparent in the federal Weed and Seed Program. The Department of Justice describes its "two-pronged approach":

(1) Law Enforcement and criminal justice officials cooperate with local residents to "weed out" criminal activity in the designated area.

(2) Social Service providers and economic revitalization efforts are introduced to "seed" the area, ensuring long-term positive change and a higher quality of life for residents.171

The program was designed in 1991, and was spotlighted a year later as a major component of the federal response to the Rodney King riots. In the decades since, it has been implemented in over 300 neighborhoods nationwide.172

In 1994, Indianapolis Deputy Chief Jerry Barker turned to Weed and Seed when he grew concerned about the possibility of unrest on the city’s West Side. In addition to enforcement-intensive efforts to "weed" out drugs, gangs, and prostitution while "seeding" the neighborhood with educational programs, public health projects, and economic development plans, Barker also made a point of appealing to and forming partnerships with community leaders—the clergy, the directors of nonprofit corporations, and local activists who had sometimes been critical of police. From Barker’s perspective, it was a good investment. In September 1998, when crowds began

546

The contradictions here are numerous: vigilante action and Constitutional legality, popular conceptions of justice and demands for human rights, resistance to inequality and the defense of private property—all coexist and, to some degree, seem to feed each other.123 Some of that, surely, is the result of the ANC’s transition from popular insurgency to ruling party, and the country’s transition from apartheid to neoliberalism. The persistence of the Street Committees indicates something of the tensions between the aims of the anti-apartheid movement and the means it employed. The ANC sought to avail itself of popular direct action and to establish a new state. It achieved both, and is left trying to reconcile the two.

Popular Justice in Northern Ireland: The Other Peace Process

In Northern Ireland, the search for popular justice followed a similar path as in South Africa. There, too, the insurgents sought out popular support while subjecting the authorities to unrelenting harassment; and the authorities again responded with a mix of repression and neglect.

In 1969, after Loyalist attacks on Catholic neighborhoods, Republican residents formed Citizen Defense Committees for their own protection. These committees built and supervised barricades and maintained continuous foot patrols.124 As a consequence, the Royal Ulster Constabulary (RUC) simply gave up policing militant areas of West Belfast and Derry. With extraordinary levels of unemployment and poverty—and without state intervention—these "no-go" areas became extremely vulnerable to crime. So Catholics elected Community Councils responsible for welfare and justice in their neighborhoods

[T]hey are founded and run in and by the community, meetings take place near the complainant’s residence, and there are no monetary costs associated with travel and the services rendered. They operate at all hours, and can attend to cases as they are reported. There are no language barriers and proceedings are familiar in procedure and resolution, which means they are recognized as legitimate.

Their approach seems aligned with the complainant’s wishes: it creates an opportunity to be heard, and to share the problem whether or not resolution is achieved, or indeed sought. In this sense, informal mechanisms have a greater potential to alleviate violence than a [court] protection order.119

More recently, as apartheid and the struggle against it fade into history, with crime and incarceration (as well as economic inequality) remaining at very high levels, the government has been increasingly successful at incorporating the Street Committees into the punitive state system.120 The ANC has both promoted the formation of Street Committees—using them to gain public support at election time (and, critics say, to suppress political opposition)—and has greatly reduced the scope of their authority and activity, turning them into simple adjuncts to the police. “Just catch the criminals and hand them over to the police,” Jacob Zuma told supporters in 2008.121 Nevertheless, vigilante violence, such as expelling suspected criminals from slums by beating them and destroying their shacks, continues with tacit support of the police and active support of sizeable portions of the population.122

on it, a gift from Bill Bratton. In June 2008, she was asked to share what she knew with the Department of Defense as well. Army officers visited the gang academy, and Rice began briefing military officials, diplomats, and Army War College instructors.\textsuperscript{174}

In the twenty-first century, the U.S. occupations of Iraq and Afghanistan renewed the military’s interest in counterinsurgency, and the connection to domestic policing became increasingly explicit as a result. In fact, one Rand Corporation report explains counterinsurgency (or “pacification”) as a massively enhanced version of the ‘community policing’ technique that emerged in the 1970s.” It goes on:

Community Policing is centered on a broad concept of problem solving by law enforcement officers working in an area that is well-defined and limited in scale, with sensitivity to geographic, ethnic, and other boundaries. Patrol officers form a bond of trust with local residents, who get to know them as more than a uniform. The police work with local groups, businesses, churches, and the like to address the concerns and problems of the neighborhood. Pacification is simply an expansion of this concept to include greater development and security assistance.\textsuperscript{175}

It may not be surprising, then, to see America’s military planners drawing from domestic policing practices—Marines embedding with the LAPD’s gang unit before deploying

\textsuperscript{174} This story is recounted in uncritical, self-celebrating detail in Rice’s memoir: Connie Rice, \textit{Power Concedes Nothing: One Woman’s Quest for Social Justice in America, from the Courtroom to the Kill Zones} (New York: Scribner, 2012). Quotes are from 187 (“inside strategy”), 244 (“help officers”), 260 (“community mistrust”), 279 (“hot zones”), and 306 (“clear the danger”).

For my analysis of Rice’s co-optation and its roots in her liberal ideology, see: Kristian Williams, “Power Concedes Nothing,” \textit{Z Magazine}, October 2012.

\textsuperscript{175} Austin Long, \textit{On “Other War”: Lessons from Five Decades of RAND Counterinsurgency Research} (Santa Monica: Rand, 2006), 53.

Under apartheid, the police estimated there were 400 Street Committees operating throughout the country.\textsuperscript{115} In many places, the organizations have survived into the post-apartheid era. According to a 1998 survey of Guguletu, Cape Town, 95 percent of respondents reported that there was a Street Committee on their street, 58 percent said they attended the Street Committee’s meetings, and 69 percent thought that the committee did a good job. When asked, “Where do you go for help if a young man in your family does not obey his parents?” 41 percent said that they would go to the Street Committee. When asked where they would go if the neighbors played their music too loud, 69 percent said they would take the complaint to the Street Committee. About two-thirds (66 percent) said they would go to the Street Committee if “a boy in the street” stole a radio from your house.\textsuperscript{116} In addition to minor criminal cases, neighborhood disputes, and family troubles, Street Committees also handle grievances against employers, merchants, and creditors.\textsuperscript{117}

In the post-apartheid period, Street Committees have survived mostly in poor neighborhoods, where the cost of hiring a lawyer puts the state’s legal system out of reach for most people. Because of their greater accessibility, one study found that—despite conservative and patriarchal biases among their members—Street Committees were nevertheless more responsive than the courts in handling cases of domestic violence.\textsuperscript{118} Helène Combrinck and Lilian Chenwiwrote of the Street Committee’s advantages for poor women:

\textsuperscript{115} Lee and Seekings, “Vigilantism and Popular Justice,” 100; and Minnaar, “New’ Vigilantism,” 119.

\textsuperscript{116} Quoted in Lee and Seekings, “Vigilantism and Popular Justice,” 103–5.

\textsuperscript{117} Schärf, “Policy Options,” 49.

\textsuperscript{118} Combrinck and Chenwi, \textit{The Role of Informal Community Structures}, 9–10, 23.
These new committees were elected in public meetings and made responsible for preserving order and resolving disputes in their areas.\textsuperscript{111} Though sometimes relying on physical punishment, often at a brutal extreme,\textsuperscript{112} the Street Committees tended to emphasize restorative justice rather than retributive justice. Hence they focused less on punishment than on healing, on putting things right and preserving the community.\textsuperscript{113} Short of violence, Street Committees could rely on other community institutions to enforce their decisions, limiting access to savings clubs, welfare services, and childcare.\textsuperscript{114}

\begin{footnotesize}
\textsuperscript{81–85, 89–90; Lee and Seekings, "Vigilantism and Popular Justice," 100, 105–7; Schärf, "Policy Options," 47, 52; and Daniel Nina and Wilfried Schärf, “Introduction: The Other Law?” in The Other Law, 7.}\textsuperscript{111} Ibibd., 103.\textsuperscript{112} One of the harshest practices associated with Street Committees was that of “necklacing.” Usually reserved for apartheid-era informers, collaborators, and political opponents, necklacing involved placing a gas-soaked tire around a suspect’s neck and setting it on fire. “Second Submission of the ANC to the Truth and Reconciliation Commission, May 1997,” in Eades, The End of Apartheid in South Africa, 184; and Anthony Minnaar, “The ‘New’ Vigilantism in Post-April 1994 South Africa,” in Informal Criminal Justice, 118, 132.\textsuperscript{113} Lee and Seekings, "Vigilantism and Popular Justice," 102; and Schärf, “Policy Options,” 46.\textsuperscript{114} Here is a general definition: “Restorative Justice is an approach to dealing with the harms created by crime which views such problems as a breakdown in relationships and seeks to repair those relationships…. It seeks to replace the traditional focus of retributive justice on the punishment of the offender … with an approach which seeks to heal the injuries caused by crime to all the parties involved.” Jim Auld et al., “Our Practice: The Blue Book [Designing a System of Restorative Community Justice in Northern Ireland],” accessed November 20, 2002, http://www.restorativejusticeireland.org/our-practice.html, 1.2.\textsuperscript{176} Julie Watson, “Cops Show Marines How to Take on the Taliban,” NBC Los Angeles, July 12, 2010, 178
\end{footnotesize}
Understood in terms of counterinsurgency, community policing represents an approach enhanced by the insights of military experiences in restless colonies. Organizationally, militarization provides the model by which the police can work in teams, enhance officer discretion, and maintain tight command and control; community policing efforts, meanwhile, create the infrastructure for intelligence gathering and co-optation. Strategically, community policing strives toward directed, proactive action, with a geographic focus and attention to the causes of disorder; military planning gives a central role to intelligence work and takes an aggressive approach to confronting the enemy. Hence, military tactics are used to clear and hold contested areas, while community policing programs seek to build partnerships that bring the police legitimacy, information, and access to community resources. Ideologically, community policing serves to legitimize military-type efforts, while the rhetoric of a “war on crime” can be used to mobilize the community to aid the police. And of course, the threats of a militarized “Bad Cop” encourage cooperation with the “Good Cop’s” community policing projects.

Meet the New Cop, Same as the Old Cop

Modern policing has a dual nature—going back to its origins. The twin developments of community policing and militarization are an extension of the initial advantages of policing identified by Allan Silver: 1) widespread surveillance and discretion including services related to banking, childcare, insurance, healthcare, and assistance to the elderly and unemployed. Meanwhile, the African National Congress (ANC) engaged in a campaign to, in the words of Nelson Mandela, “make government impossible.” That strategy had clear implications for crime control. The South African police were famously indifferent to crime in the Black townships, and the Black population was none too eager to cooperate with the cops. This situation created a vacuum in the area of conflict management and public safety, and local communities painstakingly evolved institutions to fill it.

In the 1970s, townships established community courts modeled on traditional chieftain structures. These makgotla were patriarchal and conservative—dominated by older men, upholding traditional hierarchies of gender and age, and participating in the local government. Slowly, over the course of two decades, the makgotla were replaced by “People’s Courts”—and later, “Street Committees”—connected to the growing resistance movement. As these forms spread, younger people gained a more prominent place, as did—eventually—women.

110 Andries Mphoto Mangokwana, “Makgotla in Rural and Urban Contexts,” in The Other Law, 148–66; Seekings, “Social Ordering and Control,”
relevant practices” such as rituals of atonement and forgiveness; and the principle of “engagement before opposition.”

The experiences of American activists are instructive, perhaps as much for their limitations as for the positive example they offer. More developed models arise, predictably, where revolutionary movements are more advanced, more successful, and stronger. For examples, we must look beyond our own borders, and turn our attention to the struggles of colonized people in South Africa and Northern Ireland.

South Africa: Popular Justice and State Power

When a revolutionary movement gains the support of the population, it acquires, intentionally or not, responsibilities that it must meet to maintain that support. Increasingly the population will turn to the revolutionary movement—and not the government—to meet its needs. And to the degree that the military campaign is successful, the authorities will be likely to abdicate their responsibilities, adding to the legitimacy of the revolutionaries, but also obliging them to meet additional demands. If the movement can do so, while withstanding whatever repressive measures are directed against it, it may be able to transfer power to itself and away from the state.

That is essentially what happened in South Africa. The apartheid government was never particularly concerned with meeting the needs of the Black population, so the anti-apartheid civic organizations took on many welfare functions,

105 Ibid., 274–76.

106 These are not, by any means, the only examples available. Ultimately all popular movements, once they develop beyond a certain point, experience conflict with the police. I have chosen here to focus on South Africa and Northern Ireland for two reasons: first, these cases are reasonably well-documented; and second, I expect that an American audience will be somewhat familiar with the politics involved.

Allan Silver, “The Demand for Order in Civil Society,” 8.

Afterword: Making Police Obsolete
omy; the second by the institution’s service to elites at the expense of the masses. I have suggested that the increased autonomy has been purchased with the institution’s service to the elites, and is consistently used to further their interests.

The current era of policing began in response to the social conflict of the 1960s. As a result of that period’s turmoil, policing underwent a change that drew together the two historical currents—the police became, fully, a political power unto themselves. They could not govern independently—no single body in our society can—but they suddenly came into their own as a center of power. This ascendency was the logical result of the long progression toward institutional autonomy, but it emerged as an unexpected consequence of the internal conflict between rank-and-file officers and their commanders. When the rank and file rebelled and began exerting influence of their own, this naturally shifted the balance of power within the institution. As it happened, the change was beneficial to both parties: by re-distributing power downward the institution was able to seize for itself an additional measure of autonomy and the police achieved a sense of having political (as well as occupational) interests in common.

The emergence of the police as a political force changed the institution’s relationship to social and political elites. No longer simply the instruments of the ruling class, the cops became an interest group for whose loyalty the elites had to bargain. Rather than merely acting as agents of the most powerful faction, police leaders (both administrators and union representatives) became power brokers themselves, capable of entering into or withdrawing from alliances with other powerful social actors.

In a related way, the relationship with the masses also changed. Rather than simply appealing to the “silent majority” or relying on the John Birch Society to organize “Support Your Local Police” campaigns, police began organizing their own political efforts and developing their own constituency.

frustration, however, is with our “failure to learn”—from history, from our mistakes, and from each other.\textsuperscript{102}

The Northwest Network’s Shannon Perez-Darby cautions:

Where I think our community accountability models have missed the mark is in our desire to rush into action. In our visioning, we have confused our desire to have communities with the skills and knowledge to respond to violence with the reality that most of us are walking around with a dearth of accountability skills. In other words, I think we’ve gotten ahead of ourselves.\textsuperscript{103}

Reflecting similar concerns, and looking critically at her own experience with the Northwest Network, Connie Burk concludes, “our activist communities do not presently have the skills, shared values, and cultural touchstones in place to sustain Community Accountability efforts.” She recommends, as preliminary step, a shift in focus, “from a collective process for holding individuals accountable for their behavior to individual and collective responsibility for building a community where robust accountability is possible, expected and likely.” She calls this the “Accountable Communities” approach. The emphasis here is on creating a collective, cultural shift as a predecessor to personal transformation, rather than emphasizing personal work as the means for social change.\textsuperscript{104}

Burk lists several characteristics of this approach, including: skills-building; a consideration of “context, intent, and effect” as well as “behaviors”; “the expectation of loving-kindness” and a refusal to ostracize others; supporting and encouraging healthy relationships; “recovering and advancing culturally rel-

\textsuperscript{102} Interview with Genevieve Goffman, October 1, 2014.

Most of the projects cited here were short-lived; it is unusual for a group involved in accountability and support efforts to last even as long as a couple of years. Part of that is the very nature of the work. It is stressful, time-consuming, emotionally taxing, and generally thankless. It is also usually a volunteer effort, which avoids the problems of co-optation and professionalization, but limits the resources available and often overburdens the few people trying to keep it going. As Praxiss's Tabatha Millican observes, taking foundation or government money changes the work, "but not taking the money also changes the work."\(^\text{101}\)

The Pink Tape Collective’s Genevieve Goffman outlines numerous difficulties in accountability processes. Some are practical, such as a scarcity of resources, the absence of meaningful sanctions, and both a lack of clarity about what can be expected from the process and a tendency to promise unrealistic results. Others are structural: relying on the immediate friend group when a dispassionate outsider might see things more clearly, or adopting models intended for close-knit communities and applying them to loose social scenes. There are, of course, strategic mistakes—the failure to intervene before a crisis occurs, the erroneous assumption that consequences for the perpetrator will necessarily facilitate the survivor’s healing, and processes that keep the survivor engaging with the perpetrator when what they really need is distance. And there are the political problems of reproducing punitive logic, falling into unrecognized power dynamics, and the like. Her greatest

For details of the ways funding shifts priorities and limits organizing, see: Alisa Bierria and Communities Against Rape and Abuse, "Pursuing a Radical Anti-Violence Agenda Inside/Outside a Non-Profit Structure," in The Revolution Will Not Be Funded: Beyond the Non-Profit Industrial Complex, ed. INCITE! Women of Color Against Violence (Cambridge, MA: South End Press, 2007).
Afterword: Making Police Obsolete

It is traditional, in a book such as this, to end with recommendations as to how the police can be made more efficient, more effective, less corrupt, less brutal, and so on. Those recommendations are almost always addressed to policy-makers and police administrators. Usually the recommendations are more technical than political, meaning that they offer detached advice on what, in the broadest sense, may be considered the means of policing—strategies of patrol, crowd control, interrogation techniques, use-of-force policies, organizational schemes, accountability mechanisms, morale boosters, affirmative action—while taking for granted (but rarely identifying) the ends of policing. They do not, usually, raise substantive questions about the police role in society, the need for police, or alternatives to policing.

I am going at things from quite the opposite angle. My recommendations are not addressed to those with power, but to the public. They are decidedly political, and avoid the technical. I have, throughout this book, scrutinized the police role, examined its implications for democracy and social justice, and questioned the ends the cops serve. I turn now to briefly consider whether we can do without police.

Challenging the Conventional Wisdom

In his essay “The Manufacture of Consent,” Noam Chomsky advises, “If you want to learn something about the propaganda
For example, when a male leader in a police accountability organization was making inappropriate advances toward young, female volunteers, CARA met with the perpetrator, had conversations with the women in the group, supported one of the young women in writing a letter and reading it aloud during the organization’s meeting, and facilitated a program on understanding sexism. In the end the man resigned from the group. In another case, to address sexual assault in the punk scene, CARA released a public statement from survivors, distributed fliers denouncing a perpetrator, and organized a boycott of the bar where he worked. In a third, following a sexual assault at a conference, they helped the survivor contact other young women from the host organization, and learned that it was a pattern. The survivors met and demanded that the perpetrator remove himself from leadership and pursue counseling, and that the organization incorporate rape prevention education in its programming. All three demands were met.

In a fourth case, after several women were assaulted by the same man, they all wrote down their stories and presented the document to some male community leaders. CARA facilitated a meeting about rape culture, and the men asked the perpetrator to step down from his position. After a suitable amount of time, he was allowed to resume his responsibilities.

Similar projects were initiated around the country, coordinated by groups like Support New York, the Challenging Male Supremacy Project (also in New York), Praxiss and the Pink Tape Collective (both in Portland), the Burning Haul. Communities Against Rape and Abuse (CARA) et al., “Taking Risks: Implementing Grassroots Community Accountability Strategies,” in Color of Violence, 250–55.

Rodney Stark writes, “It is vulgar nonsense to be anti-police. Our society could not exist without them.”

Carl Klockars echoes the point: “[N]o one whom it would be safe to have home to dinner argues that modern society could be without police....”

Dozens of similar quotations are available for anyone who wishes to find them. Yet in one sense these particular remarks are unusual. I present them here because they come from authors whose critical insights have been invaluable to my work on this book, and because they clearly state what others quietly take as given. Most authors do not even bother to assert that the police are necessary, much less argue the point. They feel no requirement to identify social needs that the police meet, because the role of the police, as they see it, is simply beyond the scope of their work.

---

2 It is worth remembering that other sources—hip-hop albums and anarchist newspapers, for instance—do not share this assumption.
3 Stark, Police Riots, 1.
dispute. It is outside the boundaries of debate. It is unquestionable; the alternative, unthinkable. In this context, the defensive comments of Stark and Klockars read less like arguments in favor of police and more like evasive maneuvers against the accusation that the authors might somehow oppose the cops. Their statements serve as a kind of loyalty oath, a promise to remain within the borders of acceptable opinion.

But the assumption that the police represent a social inevitability ignores the rules of logic: if we accept that police forces arose at a particular point in history, to address specific social conditions, then it follows that social change could also eliminate the institution. The first half of this syllogism is readily admitted, the second half is heresy.

It is a bad habit of mind, a form of power-worship, to assume that things must be as they are, that they will continue to be as they have been. It soothes the conscience of the privileged, dulls the will of the oppressed. The first step toward change is the understanding that things can be different. This is my principal recommendation, then: we must recognize the possibility of a world without police.

Crime as a Source of State Power

There is a question that haunts every critic of police—namely, the question of crime, and what to do about it.

By “crime” I do not mean mere illegality, but instead a category of socially proscribed acts that: (1) threaten or harm other people and (2) violate norms related to justice, personal safety, or human rights, (3) in such a manner or to such a degree as to warrant community intervention (and sometimes coercive intervention).\(^5\) That category would surely include a

\(^5\) Prison abolitionists often substitute “harm” for “crime,” which is fine as a kind of shorthand—but only if it is understood that we do not mean all harm. There are a great many harms—perhaps most—that are too trivial

\(^91\) Colman, “Philly’s Pissed,” 10.

\(^92\) Arwen Bird, “Communities Against Rape and Abuse [Interview with Theryn Kigvamasud’vashti],” Justice Matters (Fall 2004): 12–13.

CARA follows ten guidelines: “1. Recognize the humanity of everyone involved.… 2. Prioritize the self-determination of the survivor.… 3. Identify a simultaneous plan for safety and support for the survivor as well as others in the community.… 4. Carefully consider the potential consequences of your strategy.… 5. Organize Collectively.… 6. Make sure everyone in the accountability-seeking group is on the same page with their political analysis of sexual violence.… 7. Be clear and specific about what your group wants from the aggressor in terms of accountability. 8. Let the Aggressor know your analysis and your demands.… 9. Consider help from the aggressor’s community.… 10. Prepare to be engaged in the process for the long
Up work[ed] with perpetrators to recognize, understand, and change behavior, not to simply punish them or run them out of town. Dealing with an assaulter includes the long term goal of ensuring that they are not a threat to others, recognize what they have done, and work to permanently change their behavior.88

As one member clarifies, the behavior in question may be “a specific incident or [repeated] behavior pattern of emotional, physical and/or sexual assault with an intimate partner or random stranger (or any person on the interpersonal spectrum in between),” and the process may also lead them to address “substance and alcohol abuse, mental health, and any number of other influencing factors.”89

PSU’s work was guided by three fundamental principles:
—A steadfast commitment to supporting survivors through centralizing their needs to assert control and power in their lives and surroundings....
—The belief in the particularity of each sexual assault situation, and with it, a unique effect and opportunity for the perpetrator to better understand physical, sexual, and emotional boundaries and communication
—The intrinsic importance of humanizing perpetrators....90

Sometimes a survivor would make specific demands of a perpetrator, or those around them. When they did, Philly’s Pissed “encourage[d] them to envision what would make them feel safe and more in control of their lives again, and what would make them feel like the person who assaulted them is being held accountable for their actions.” Sometimes the survivor would want the aggressor to write a letter taking responsibility, or do some reading on issues of consent and sexual vio-

large number of things that are presently illegal (rape, murder, dropping bricks off an overpass), would certainly not include other things that are presently illegal (smoking pot, sleeping in public parks, nude sunbathing), and would likely also include some things that are not presently illegal (mass evictions, the invasion of Iraq). The point here is that the standards I want to appeal to in invoking the idea of crime are not the state’s standards, but the community’s—and, specifically, the community’s standards as they relate to justice, rights, personal safety, and perhaps especially the question of violence.

The criminologist Tony Platt, one of the organizers of the 1972 “Tear Down the Walls” conference, later reflected, “The prison movement of the early seventies paid almost no attention to crime. Crime was romanticized as a sort of pre-political form of rebellion.... The issue of violence within communities was not given a priority.”6 That was a mistake for several reasons, not least because people do value their personal safety and that concern should be taken seriously. The left’s “romantic[sm]” allowed the right wing to monopolize the issue, using “crime” as a code word for poor and black. It was easy, then, for conservative politicians to conflate real fears of violence with their own agenda in defense of economic and racial inequality.7

89 Em Squire, “Grounding Our Work,” in A Stand-Up Start Up, 5.

6 Quoted in Kristian Williams, “Critical Resistance at 10: Addressing Abolition, Violence, Race, and Gender” in Hurt, 52.
7 H.R. Haldeman explained Nixon’s strategy: “He emphasized that you have to face the fact that the whole problem is really the blacks. The key is to devise a system that recognizes this while not appearing to.” Quoted in Alexander, The New Jim Crow, 43. For more on the conservative strategy, see:
The right made crime a political issue and identified it with poor people and people of color; because the left largely refused to make crime an issue, they also failed to challenge this characterization. Successive waves of politicians—of both parties, at every level of government—have learned to stoke the public’s fears of rape, murder, drive-by’s, carjackings, school shootings, and child abduction, as well as rioting and terrorism, and present themselves as heroes, as saviors, as tough-talking, hard-hitting, no-nonsense, real-life Dirty Harrys who will do whatever it takes to keep you and your family safe. The solutions they offer always have the appeal of simplicity: more cops, more prisons, longer sentences. The unspoken costs come in the form of fewer rights, limited privacy, greater inequality, and a society ever less tolerant of minor disorder. These political tactics are nothing new, of course, but the scale of effect—2.2 million prisoners in 2010—is unprecedented. And unless the left can do better, we have to expect that these same solutions will be the ones on offer.

The fact is, the police do provide an important community service—offering protection against crime. They do not do this job well, or fairly, and it is not their chief function, but they do it, and it brings them legitimacy. Even people who dislike and fear them often feel that they need the cops. Maybe we can do without omnipresent surveillance, racial profiling, and institutionalized violence, but most people have been willing to accept these features of policing, if somewhat grudgingly, because they have been packaged together with things we cannot do without—crime control, security, and public safety. It

Among the most well-known and well-documented efforts were those of Philly Stands Up and Philly’s Pissed, two groups formed in 2004 after three women were raped in the course of a weekend-long punk rock festival. They took a two-track approach, working independently, but in relation to each other: Philly’s Pissed supported survivors, while the Philly Stands

Philosophical Perspective,” in Philosophy and Sex, third edition eds. Robert B. Baker et al. (Amherst, New York: Prometheus Books, 1998), 580.) Secondly, if the conditions that produced the specific injustice were themselves unjust or oppressive, justice would seem to require that we not “restore” those conditions. Thus, while restorative justice was more focused on the individuals involved, transformative justice tries to look at the whole context and encourages us all to take responsibility for the culture and the interactions it fosters.

Of course, not everyone accepts either orientation. Some choose direct retaliation instead. For instance, when the Vagina Liberation Front confronted a rapist, they doused him with menstrual blood and beat him (CrimethInc, Accounting for Ourselves: Breaking the Impasse Around Sexual Assault and Abuse in Anarchist Scenes [2013], 10). More notoriously, in 2010 a group of women calling themselves “Crazy Bitches” attacked a rapist with a bat. They later wrote: “we rolled in with a baseball bat. we pulled his books off his shelves: he admitted it, not a single one mentioned consent. we made him say it: ‘i am a rapist.’ we left him crying in the dark on his bed: he will never feel safe there again.” Anonymous, “We’ll Show You Crazy Bitches (Part II),” anarcha library, October 20, 2010, accessed October 8, 2014, anarchalibrary.blogspot.com.

86 CrimethInc, Accounting for Ourselves, 10.

87 “Survivor support can look like a lot of different things: talking someone through a crisis, validating their emotional response to an assault, helping them find a safe place to crash, going with them to the doctor or an abortion clinic, aiding them in dealing with dissociation or panic attacks, or organizing friends to cook meals or provide childcare for them. We provide direct emotional support, but we also encourage survivors to tap into the support networks they already have. This can range from helping someone strategize about how to ask their friends or family for support, to actually providing a training in crisis support, survivor-sensitivity and the aftermath of trauma for a political organization or a community.” Timothy Colman, “Philly’s Pissed: Shifting the Balance of Power in Our Communities,” in A Stand-Up Start Up: Confronting Sexual Assault with Transformative Justice, ed. Philly Stands Up [Philadelphia, no date], 9–10.
—Provide safety & support to community members who are violently targeted that respects their self-determination. Most of these accountability processes were oriented, at least in principle, toward a conception of "transformative justice"—in which the individual perpetrator, the abusive relationship, and the culture and power dynamics of the community are transformed—as opposed to enacting revenge, retribution, or punishment. 

84 INCITE! Women of Color Against Violence, "INCITE! Community Accountability Fact Sheet: How Do We Address Violence Within Our Communities?" in The Revolution Starts at Home, 291. Emphasis in original. Elsewhere, they elaborate on the idea: "Community accountability can be about directly addressing violence as well as creating on-going practices within our relationships and broader networks that are opposed to oppression and violence. Networks of people can develop a community accountability politic by engaging in anti-violence/anti-oppression education, building relationships based on values of safety, respect, and self-determination, and nurturing a culture of collective responsibility, connection, and liberation. Community accountability is not just a reaction—something that we do when someone behaves violently—it is also proactive—something that is ongoing and negotiated among everyone in the community. This better prepares us to address violence if and when it happens." INCITE! Women of Color Against Violence, Law Enforcement Violence Against Women of Color & Trans People of Color, 70.

85 "Rather than removing and punishing people who are abusive, their accountability for past behavior and transformation of future behavior is supported and enforced by those with whom they have invested relationships." Mich Levy et al., Toward Transformative Justice: A Liberatory Approach to Child Sexual Abuse and Other Forms of Intimate and Community Violence: Summary (Oakland: Generation Five: 2007), 11. Transformative justice is a further development from the idea of restorative justice, with the emphasis on changing conditions and relationships rather than returning them to the previous state. The difference is subtle, but important. For one thing, once something is done it cannot be undone and not everything can be repaired. Making amends is not always as simple as returning a stolen watch. The victim of a crime may sometimes have lost things that cannot be "restored." (Susan Brison writes that she is "not the same person" as she was before she was assaulted. "I left [that person]—and her trust, her innocence, her joie de vivre—in a rocky creek bed at the bottom of a ravine." Susan J. Brison, "Surviving Sexual Violence: A Summary

The Threat of Community

In the earlier discussion of community policing, I argued that it constitutes, in part, an effort to co-opt community resources and put them in the service of police objectives. I did not, at that point, dwell on the reasons underlying this, but the attempt at co-optation points to a fact that ought not be overlooked: community is a source of power. As Nikolas Rose explains:

Community is not simply the territory within which crime is to be controlled, it is itself a means of government: its detailed knowledge about itself and the activities of its inhabitants are to be utilized, its ties, bonds, forces and affiliations are to be celebrated, its centres of authority and methods of dispute resolution are to be encouraged, nurtured, shaped and instrumentalized to enhance the security of each and all. 

10 My criticisms of community policing appear in chapter 9.

Where possible, the state seeks to draw on this power and direct it to its own ends. Community policing is one such attempt. In exchange for protection, the police negotiate for access to this power network, insinuate themselves deeply within it, and try to shape its activities to suit their interests.

One major difficulty facing the state in its efforts to harness community power is the fact that this power is generally underdeveloped. According to Amatai Etzioni,

Community is defined by two characteristics: first, a web of affect-laden relationships among a group of individuals, relationships that often crisscross and reinforce one another ... , and second, a measure of commitment to a set of shared values, norms, and meanings, and a shared history and identity—in short, to a particular culture.12

Such webs of affinity are often painfully lacking from modern urban life13—and where they exist, they do not generally come in easily manageable bureaucratic packages awaiting official “partnerships” with police. In fact, as Carl Klockars observes, there is inherent tension between the idea of police and the ideals of community:

The modern police are, in a sense, a sign that community norms and controls are unable to manage relations within or

———

The Accountability Crisis

In short order, within a certain subset of the left, the “accountability process” became the default approach to addressing domestic violence, sexual assault, and other types of abuse.83 As INCITE defines it:

Community accountability is a process in which a community—a group of friends, a family, a church, a workplace, an apartment complex, a neighborhood, etc.—work together to do the following:

—Create and affirm values & practices that resist abuse and oppression and encourage safety, support, and accountability
—Develop sustainable strategies to address community members’ abusive behavior, creating a process for them to account for their actions and transform their behavior
—Commit to ongoing development of all members of the community, and the community itself, to transform the political conditions that reinforce oppression and violence

———

13 Carl Klockars puts the point more forcefully: “Sociologically, the concept of community implies a group of people with a common history, common beliefs and understandings, a sense of themselves as ‘us’ and outsiders as ‘them,’ and often, but not always, a shared territory. Relationships of community are different from relationships of society. Community relationships are based upon status not contract, manners not morals, norms not laws, understandings not regulations. Nothing, in fact, is more different from community than those relationships that characterize most of modern urban life.” Klockars, “Rhetoric,” 435.
community-based alternatives; ... and listening and listening
and being ready to support.” They also, in partnership
with the Ella Baker Project, were working with residents in
public housing to create a community mediation council and
declare a “Harm Free Zone.” Across the country, in Portland,
Oregon, the Hysteria collective was supporting survivors in
whatever way they needed—going grocery shopping with
them, taking them to see the doctor, staying with them at
night—while also organizing support groups and consent
workshops, helping other groups design “safer space” policies,
and occasionally confronting perpetrators directly.

Since 2002, the Seattle-based Northwest Network of Bisex-
ual, Trans, Lesbian, and Gay Survivors of Abuse has offered
a six-week course on relationship skills. Covering all kinds
of relationships (including family, friends, and romantic
partners), the curriculum emphasizes “personal agency” and
“making choices and being responsible for our choices.”
The Northwest Network also organizes support groups for
queer survivors of domestic violence and, with its Friends Are
Reaching Out (FAR Out) program, trains friends and family to
support each other in order to prevent and respond to abuse.

Meanwhile, in the Bay Area, Creative Interventions spent
three years studying existing models, designing their own
program, and assembling an Interventions Team. Their pilot

between communities, or that communities themselves have
become offensive to society. The bottom line of these obser-
vations is that genuine communities are probably very rare in
modern cities, and, where they do exist, have little interest in
cultivating relationships of any kind with police.

Where genuine communities exist, they are sometimes even
hostile to the police. In such cases, the authorities view com-

munity power not as an additional source of legitimacy, informa-
tion, and infrastructural development, but as a rival that
must be suppressed. The state has no choice but to interfere
with the means of community action when the community
falls into “enemy” hands—that is, when it resists state control
or makes demands beyond those the state is willing to accept.
This rule holds whether the enemy is described in political
or criminal terms. The rationale is the same whether the au-
thorities are interfering with grassroots political organizing, or
whether they’re disrupting neighborhood life in the name of
“gang suppression.” The danger in these cases is not the lack
of community, but the existence of a community that the state
does not control. The police response is the domestic equiva-

lent of destroying a village in order to save it.

In brief, the state seeks to mobilize community power in sup-
port of government goals, or else to suppress the sources of
power opposed to its goals. Either way, the state recognizes
the potential for community power, its promise and its threat.

This carrot-and-stick attitude may be unsettling, but the un-
derlying analysis suggests some hopeful possibilities: if the

community is a source of power, then it could exercise this power for its own ends, rather than those of the state. If, as community policing advocates argue, community involvement is the key to controlling crime, then this suggests that communities could develop public safety systems that do not rely on the state. The state’s efforts to maintain legitimacy thus, ironically, point the way to its destruction. Raymond Michalowski notes:

Both state-sponsored and citizen-initiated attempts at community crime prevention are based on the recognition, however unsystematized, that formal, bureaucratic responses to crime which are both temporally and spatially removed from the commission of crime can never approach the efficacy of more informal, more immediate forms of community social control. Equally recognized by the state officials is that citizen-initiated and citizen-controlled forms of justice threaten the legal basis of the state itself. The essence of formal state law—the foundation of state society—is that removal from individuals and communities of their rights to directly define what constitutes correct behavior within that community and to take direct action against incorrect behavior. The substitution of state justice for popular justice is generally argued as the only viable alternative to mob rule and vigilantism. Counterposing state justice to vigilant justice, however, is a false dichotomy which obscures a third alternative. The alternative is organized, community forms of popular justice operated and controlled by private citizens, not by employees of the state.¹⁶

The thought that such community-based measures could ultimately replace the police is intriguing. But if it is to be any-

In terms of direct intervention, “SLG is also organizing Sista Circles, collectives of support and intervention for cases of gender violence with groups of sistas that are friends, neighbors, and coworkers.”⁷³ For example, Paula Ximena Rojas-Urrutia explains, “When somebody is getting stalked, the whole group would go to the [stalker’s] workplace and embarrass him in front of the boss … and make some direct demands of what he needed to do. And it would work actually—more than calling the cops.”⁷⁴

Nearby, in Central Brooklyn, Safe Outside the System was creating a network of Safe Spaces—“visibly identified public spaces that are willing to open their doors to our community members who are fleeing from violence”—and training the employees of participating institutions to counter homophobia and transphobia and to interrupt violence without calling the police.⁷⁵ Further south, in Durham, North Carolina, a collective called UBUNTU (meaning, “I am because we are”) was finding ways to support community members facing violence at the hands of their partners. As one member, Alexis Pauline Gumbs, explains, their tactics include “offering our homes as safer places to stay; staying at the community member’s home; providing childcare; researching legal options and

¹⁶ Raymond J. Michalowski, “Crime Control in the 1980s: A Progressive Agenda,” *Crime and Social Justice* 19 (Summer 1983): 18. Michalowski seems to overlook the most radical possibilities suggested by his analysis. He recommends that popular justice organizations operate parallel to, and with the assistance of, the existing police. Ibid., 19.

⁷³ Ibid.

organizing of our allies” before initiating their own projects. In the summer of 2000, after police killed two teenage women of color in the Bushwick neighborhood, SIIS conducted a survey of 400 young women in the immediate area to learn what problems they were facing. A few months later, they began street theater performances about sexual harassment and conducted a community forum (along with INCITE) about solutions to violence. The following year, they produced a documentary about police harassment, held a demonstration at the 83rd Precinct, and conducted “Know Your Rights” trainings and self-defense classes—all supplemented with regular fliering and door-knocking.71

As their projects developed, they realized that “we need to do more than strongly critique” the criminal legal system; “we must also begin to envision and create what we want to replace it with!” Again, they began by hosting a community forum with INCITE, this time following up with a series of local meetings. After three years of planning and organizing, on June 28, 2004, they held a block party to declare Sista’s Liberated Ground, a space where violence against sistas is not tolerated, and where women turn to each other instead of the police to address the violence in their lives. SLG includes extensive outreach with flyers, posters, T-shirts, stickers, and murals to mark the territory. There is also an action line, a phone number that women can call to get involved in SLG. The squad members are also developing a series of workshops for young women from the community on sexism, conflict resolution, collective self-defense, and other topics to raise consciousness, and build relationship with other women in the neighborhood.72

At the block party, the young women led the crowd in a pledge: “I believe that in the struggle for justice, women’s personal safety is an impor-

Seattle, 1919: Labor Guards

The role of the police in breaking strikes did not escape the attention of the workers on the picketline.¹⁸ In the early twentieth century, labor unions worked strenuously to oppose the creation of the state police and to dissolve them where they existed. These efforts led, for a time, to restrictions on the use of state cops against strikers—but this victory has been practically forgotten today.¹⁹ More significant, for the purposes of this discussion, are the unions’ efforts to keep order when class warfare displaced the usual authorities.

The classic example is the Seattle General Strike of 1919. Coming to the aid of a shipbuilders’ strike, 110 union locals declared a citywide sympathy strike and 100,000 workers participated. Almost at once the city’s economy halted, and the strike committee found itself holding more power than the local government. The strike faced three major challenges: starvation, state repression, and the squeamishness of union leaders. Against the first, the strikers themselves set about insuring that the basic needs of the population were met, issuing passes for trucks carrying food and other necessities, setting up public cafeterias, and licensing the operation of hospitals, garbage collectors, and other essential services.²⁰ Recognizing that conditions could quickly degenerate into panic, and not wanting to rely on the police, they also organized to ensure the public safety. The “Labor War Veteran’s Guard” was created to keep the peace and discourage disorder. Its instructions were written on a blackboard at its headquarters:

The purpose of this organization is to preserve law and order without the use of force. No volunteer will have any police

4) Develop an analysis and strategies to end violence that do not isolate individual acts of violence ... from their larger contexts....
5) Put poor/working class women of color in the center of their analysis, organizing practices, and leadership development....
6) Center stories of state violence committed against women of color....
7) Oppose ... prison expansion, criminalization of poor communities and communities of color....
8) Promote holistic political education ... [explaining] how sexual violence helps reproduce the colonial, racist, capitalist, heterosexist, and patriarchal society we live in as well as how state violence produces interpersonal violence within communities.
9) Develop strategies for mobilizing against sexism and homophobia WITHIN our communities....
10) Challenge men ... to take particular responsibility to address and organize around gender violence....
11) Link struggles for personal transformation and healing with struggles for social justice.⁷⁰

This challenge has yet to be met, but the first years of the twenty-first century saw the emergence of a variety of attempts to address patriarchal violence in its various forms. Most of these were short-term projects, extremely localized, and many were situated in the overlap between the anarchist, queer, and counter-cultural social scenes. A few, however, became stable collectives with articulated principles and deep roots in the community.

Sista II Sista, a non-hierarchical collective of African-American, Afro-Caribbean, and Latina young women in Brooklyn invested three years "building our base, developing collective leadership and consciousness, and supporting the

began advocating more police, mandatory arrest laws in domestic violence cases, and stiffer penalties for crimes against women.  

In 2001, INCITE! Women of Color Against Violence and the prison abolitionist group Critical Resistance issued a challenge to both the anti-prison and the feminist movements. Their joint statement opens, “We call on social justice movements to develop strategies and analyses that address both state and interpersonal violence, particularly violence against women.” The two groups argue that the reliance on the criminal legal system has not reduced violence against women, but has further endangered communities of color, alienated the women’s movement from its historical roots and isolated it from the left, and invested power in the state rather than in collective action. Conversely, they also argue that advocates for reforming (or abolishing) police and prisons have marginalized women of color, and failed to address the safety needs of women and LGBTQ people. Therefore, both Critical Resistance and INCITE urge our movements to:

1) Develop community-based responses to violence that do not rely on the criminal justice system AND which have mechanisms that ensure safety and accountability for survivors of sexual and domestic violence.

2) Critically assess the impact of state funding on social justice organizations and develop alternative fundraising strategies.

3) Make connections between interpersonal violence, the violence inflicted by domestic state institutions..., and international violence....

---

69 Ibid., 223–25.

In the end, the Seattle General Strike was defeated, caught between the threat of military intervention and the fading support of the AFL’s international officers. While the strike did not end in victory, it did demonstrate the possibility of working-class power—the power to shut down the city, and also the power to run it for the benefit of the people rather than for company profit.

The strike was broken, but it did not collapse into chaos. Mayor Ole Hanson noted, while denouncing the strike as “an attempted revolution,” that “there was no violence ... there were no flashing guns, no bombs, no killings.” Indeed, there was not a single arrest related to the strike (though later, there were raids), and other arrests decreased by half. Major General John Morrison, in charge of the federal troops, marveled at the orderliness of the city.

**Fight the Power, Serve the People: Deacons and Panthers**

Almost fifty years later, more sustained efforts at community defense grew out of the civil rights movement. As early as 1957, Robert Williams armed the NAACP chapter in Monroe, North Carolina, and successfully repelled attacks from the Ku Klux Klan and the police. Soon other self-defense groups...
appeared in Black communities throughout the South. The largest of these was the Deacons for Defense and Justice, which claimed more than fifty chapters in the Southern states and four in the North. The Deacons made it their mission to protect civil rights workers and the Black community more generally. Armed with shotguns and rifles, they escorted activists through dangerous back country areas, and organized round-the-clock patrols when racists were attacking Black neighborhoods. As one Deacon explained, “you wasn’t going to receive much protection from the police,” so Black people “had to protect ourselves.” In fact, the Deacons sometimes had to protect Blacks from the police. They eavesdropped on police radio calls and responded to the scene of arrests to discourage the cops from overstepping their bounds. The Deacons also served as F. Williams & the Roots of Black Power (Chapel Hill: University of North Carolina Press, 1999), 88–89.

26 Quoted in Hill, Deacons for Defense, 169. For a description of a similar organization, see: Harold A. Nelson, “The Defenders: A Case Study of an Informal Police Organization,” Social Problems (Fall 1967): 127–47. In addition to protecting civil rights workers and guarding against police brutality, the Defenders also reprimanded members of the Black community who became a nuisance to their neighbors.

Another defense group, in Ferriday, Louisiana, called the Snipers, consisted entirely of teenage boys who trained in martial arts. Besides providing security for local activists, the Snipers also served as bodyguards to two black high school students integrating the prom. Hill, Deacons for Defense, 178.

The Deacons’ relations with police were complex, and varied. Many of the first Deacons had previously volunteered as auxiliary police officers and they enjoyed cordial relations with police in Homer, Louisiana, and Natchez, Mississippi, while in Chicago they organized “freedom patrols” against police brutality. Hill, Deacons for Defense, 31–39, 172–73, 198–99, 225.

The first rape crisis centers and battered women’s shelters, back in 1972 and 1974, respectively, were volunteer-run grassroots political projects. They offered support, advice, counseling, safe places to stay, and, if survivors so chose, assistance engaging with police, hospitals, or other institutions. Some offered self-defense classes and ran campaigns to educate the public about the realities of rape and other violence against women. Within a few years there were hundreds of similar centers, all around the country.

As the feminist movement grew and gained legitimacy, it became increasingly institutionalized and professionalized, the grassroots political action model giving way to a nonprofit social service model. Rape crisis centers and women’s shelters started receiving government funding and partnering with police departments, and in a textbook case of co-optation, the agenda shifted as well. Anti-capitalism and the critique of the state were soon gone, and the mainstream feminist movement

64 Ibid., 164–65.

66 Morris, Instead of Prisons, 146.

Around the same time, a group of inmates at the Shelton Corrections Center in Washington State—some of them former rapists—formed a group called Men Against Sexism to offer safe cells to new prisoners and those fleeing rapists and pimps, thus interrupting the prison’s system of institutionalized rape and sexual slavery. Anonymous, The Anti-Exploits of Men Against Sexism (Revolutionary Rumors Press, no date), 6–9.
prefer one over the other. Whatever their limitations and contradictions, in the period of rebellion, gangs represented an armed challenge to state control.\textsuperscript{62} As with so much of police activity, here, too, crime is less an issue than power.

**Feminist Interventions**

In the early seventies, while the Panthers were making kids breakfast and training with guns, the women’s movement began organizing its own kind of survival programs. Recognizing the limits of the criminal legal system in response to domestic violence, sexual assault, and rape—the indifference of police, the indignity of cross-examination, near-impossible burdens of proof, meager penalties for assault, a general atmosphere of victim-blaming, and the wholly \textit{reactive} nature of the entire system—women started organizing to defend themselves and keep each other safe.

In Detroit, Women Against Rape (WAR) organized street patrols, escorting women to their destinations and intervening in violence when they saw it. They also organized street theater performances exposing misconceptions about sexual assault. In Santa Cruz, WAR published a monthly newsletter listing men who had recently been reported as rapists; similar lists appeared in \textit{Majority Report} in New York and \textit{Sister} in Los Angeles. Also in New York, the Campaign Against Street Harassment organized boycotts of businesses where the employees “call after women, whistle, make obscene signs and sounds, or verbally annoy, abuse and patronize women passersby.”\textsuperscript{63}

Starting in 1972, a mixed-race working- and middle-class neighborhood in West Philadelphia mobilized against street a disciplining mechanism within the movement. On the one hand, they worked to calm “trigger happy” youths seeking revenge against whitey.\textsuperscript{28} On the other hand, they confronted “Uncle Toms,”\textsuperscript{29} seizing and destroying goods purchased from businesses under boycott. They also helped identify informers, who were then publicly upbraided by a group of women from the NAACP.\textsuperscript{30}

Williams and the Deacons influenced what became the most developed community defense program of the period—the Black Panther Party for Self Defense. The Panthers, most famously, “patrolled pigs.”\textsuperscript{31} Visibly carrying guns, they followed police through the Black ghetto with the explicit aim of preventing police brutality and informing citizens of their rights.\textsuperscript{32} When police misbehaved, their names and photographs appeared in the \textit{Black Panther} newspaper.\textsuperscript{33} The Philadelphia chapter pushed the tactic further, with “wanted” posters featuring killer cops.\textsuperscript{34}

The Panthers also sought to meet the community’s needs in other ways—providing medical care, giving away shoes and clothing, feeding school children breakfast, setting up housing cooperatives, transporting the families of prisoners for visitation days, and offering classes during the summer.

\textsuperscript{28} Ibid., 146.

\textsuperscript{29} The majority of the discussion at the first meeting of the Natchez chapter concerned the issue of collaborators. Ibid., 193–94.

\textsuperscript{30} Ibid., 193–94, 202–3, 208.

at "Liberation Schools." In Baltimore, they offered direct financial assistance to families facing eviction, and during the summer provided a free lunch to school-age children (in addition to the free breakfast). In Winston-Salem, the Party ran an ambulance service and offered free pest control. The Indianapolis branch provided poor families coal in the winter, held toy drives at Christmastime, founded community gardens, maintained a food bank, and cleaned the streets in Black neighborhoods. In Philadelphia, the Panther clinic offered childbirth classes for expectant parents; in Cleveland and New York, drug rehab. These "survival programs" sought to meet needs that the state and the capitalist economy were neglecting, at the same time aligning the community with the Party and drawing both into opposition with the existing power structure.

The truce held for most of a decade, and even longer in Watts—no thanks to the cops. The police did everything they could to disrupt the ceasefires, using many tactics familiar from the COINTELPRO days. They conspicuously surveilled negotiating meetings, and cops raided parties celebrating the ceasefire or promoting neighborhood peace. Truce leaders were arrested on old, minor, or dubious charges, and sometimes targeted for deportation. Groups like “Homies Unidos,” which promoted inter-gang dialogue, found themselves subject to continuous harassment. Police even tried intimidating witnesses waiting to testify about the truce before the California state senate. They also infiltrated the negotiating teams, spread rumors intended to create distrust, and snitch-jacketed gang members in a bid to provoke retaliation. Cops in uniform were photographed spray-painting one gang’s colors over another’s, a likely trigger for a turf war.

It seems that, however much the cops may dislike gang violence, they like gang peace even less. "Banging" kept the gangs divided, thus weaker, and produced fear and hostility in the broader community (which could then be leveraged into a measure of support for the police). “Trucing” may not have united the rival sets, but it did mean they weren’t shooting at each other quite so much, and the effort brought them a level of community support. It’s not hard to see why the cops would like gang peace even less. "Banging" kept the gangs divided, thus weaker, and produced fear and hostility in the broader community (which could then be leveraged into a measure of support for the police). “Trucing” may not have united the rival sets, but it did mean they weren’t shooting at each other quite so much, and the effort brought them a level of community support. found the Community in Support of the Gang Truce. In addition to supporting gang negotiations, CSGT offered young people video, computer, and job training, and agitated for reform of the criminal legal system.\(^{52}\)

On March 27, 1992, representatives of Bloods and Crips sets from four housing projects in Watts—Nickerson Gardens, Jordan Downs, Imperial Courts, and Hacienda Village—signed an agreement modeled on the 1948 Arab-Israeli ceasefire.\(^{53}\) Gang violence immediately dropped. That summer, truce areas averaged two gang-related homicides each month, down from sixteen the previous year.\(^{54}\) What’s more, peace proved contagious. In 1993, at a meeting of more than a thousand gang members in L.A.’s Elysian Park, the Mexican Mafia declared an end to drive-by shootings and threatened that those continuing the tactic would be “dealt with” in prison. They specifically forbade the killing of women and children, and suggested that disputes be settled by single combat.\(^{55}\) Drive-bys immediately declined by 25 percent.\(^{56}\) By 1998, gang-related homicides were down 36.7 percent.\(^{57}\)

\(^{52}\) Ibid., 119, 187–90. The distinction between CAPA and CSGT was not always clear. The two groups had offices in the same building, shared many of same volunteers, worked together on projects, and the leadership collaborated closely. Ibid., 188–89.

\(^{53}\) Ibid., 187; Hayden, Street Wars, 188–90.

\(^{54}\) Articles I, II, and IV of the “Multi-Peace Treaty—General Armistice Agreement” called for an end to violence, established principles of non-aggression, and detailed the terms of the peace. Article III looked to the larger society to establish conditions under which peace would be sustainable, specifically “the return of black business, economic development and advancement of educational programs.” Quoted in Vargas, Catching Hell, 187.

\(^{55}\) Ibid., 188.

\(^{56}\) Hayden, Street Wars, 62–65.

\(^{57}\) Ibid., 212.

The trend reached beyond L.A. In 1992, Chicago’s Gangster Disciples formed “United for Peace” to end shootings in the Cabrini-Green hou-

The strategy was applied in the area of public safety as well. The Panthers’ opposition to the legal system is well known: they patrolled and sometimes fought the police, they taught people about their legal rights, and they provided bail money and arranged for legal defense when they could.\(^{42}\) At the same time, they pushed reforms to democratize and decentralize the existing police. In Berkeley, they proposed a 1971 ballot initiative to divide the city into three police districts—one for the predominantly Black area, one for the campus area, and one for the affluent Berkeley Hills. Each district would elect a board to oversee policing in their area, and the officers themselves would be required to live in the neighborhoods they patrolled.\(^{43}\)

The Berkeley referendum was just one of several plans the Panthers put forward to democratize the police force. At the Revolutionary People’s Constitutional Convention of 1970, the Panthers—along with delegates from the American Indian Movement, the Brown Berets, the Young Lords, Students for a Democratic Society, the Gay Liberation Front, and others—adopted proposals to completely replace the existing criminal legal system. The police would be “a volunteer non-professional body” overseen by an elected “Police Control Board”; courts would be “people’s courts where one would be tried by a jury of one’s peers”; “Jails would be replaced by community rehabilitation programs.”\(^{44}\) Four years later, writing in the journal Crime and Social Justice, Huey Newton advocated

\(^{42}\) Ibid., 35.

\(^{44}\) Quoted in George Katsiaficas, “Organization and Movement: The Case of the Black Panther Party and the Revolutionary People’s Constitu-
a community-controlled “Peace Force,” whose members would be conscripted from the community and selected according to their orientation to public service, knowledge of the local area, and social awareness, with an eye toward diversity of in terms of age and gender.  

As much as they were concerned about the police, the Panthers also took seriously the threat of crime and sought to address the fears of the community they served. With this in mind, they organized Seniors Against a Fearful Environment (SAFE), an escort and bussing service in which young Black people accompanied the elderly on their business around the city. 

In Los Angeles, when the Party opened an office on Central Avenue, they immediately set about running the drug dealers out of the area. And in Philadelphia, neighbors reported a decrease in violent crime after the Party opened their office, and an increase after the office closed. 

There, the BPP paid particular attention to gang violence, organizing truces and recruiting gang members to help with the survival programs. 

It may be that the Panthers reduced crime by virtue of their very existence. Crime, and gang violence especially, dropped during the period of their activity, in part (in the estimate of sociologist Lewis Yablonsky) because the BPP and similar groups “channeled young black and Chicano youth who might have participated in gangbanging violence into relatively positive efforts for social change through political activities.”

Gang Peace

When the Black Panther Party collapsed, gangs—especially the Crips—filled the vacuum they left. Yet the influence of the Panther’s gang abatement work could still be felt decades later. In 1992, shortly before the city exploded in rioting after the Rodney King verdict, several of Los Angeles’ gangs entered into a ceasefire. The process of negotiation began more than a year earlier and continued for years after. It was initiated by older gang members and supported by the Coalition Against Police Abuse (CAPA), an organization founded by former Panthers deliberately trying to keep the Party’s legacy alive while also learning from its mistakes. CAPA served as intermediaries between gangs early in the process, and the Nation of Islam provided security during direct talks. Later, CAPA helped

49 Quoted in Tom Hayden, Street Wars, 308.
50 Ibid., 166–67.
51 Anthropologist João H. Costa Vargas argues that by “embracing, supporting, politicizing, and eventually fusing with the gang truce … CAPA served as a bridge between the social movement of the later 1960s and the pressing contemporary social problems.” João H. Costa Vargas, Catching Hell in the City of Angels: Life and Meanings of Blackness in South Central Los Angeles (Minneapolis: University of Minnesota Press, 2006), 110.

In terms of CAPA’s debt to the Black Panther Party, Vargas notes that several members were former Panthers, the group’s organizing manual was modeled on BPP principles, its office was decorated with “Free Geronimo” posters, and its logo was a Panther encircled by the slogan “All Power to the People.” Ibid., 111, 118, 130–31.

At the same time, Vargas notes, CAPA was critical of the BPP’s ideological rigidity, vanguardism, gender dynamics, and leadership style. Ibid., 130–33.
In 2013, CRJI handled 1,806 cases and closed 79% of them, but serious crimes are no longer a focus. Instead, the staff are doing more work with schools, advising the housing authority and probation office, and training the police. Much of their present work seems to be helping the Police Service manage its public image. As the agency’s Operational Plan for 2013–14 makes clear: “CRJI will contribute to improving relationships between police and communities with historically low levels of engagement based on programmatic, honest dialogue (including when appropriate constructive criticism).” The agency’s annual report for 2011 is full of photos of CRJI staff alongside police officials.

The transition seems to have been discouraging for the staff. In his report of 2008, immediately following the change in policy, CRJI chair Jim McGivern complained of “unparalleled political interference” during the previous year, and notes that after “the decision by Sinn Fein to call on Nationalists to support the PSNI” most of the organization’s energy was taken up

149 The most common issue was “advice/support/suicide intervention,” (14 percent), followed by “neighborhood disputes” (12 percent), reintegregation of offenders (11 percent), and youth offenses (10 percent). In contrast, drug and alcohol problems represent only 4 percent of CRJI cases, crimes involving children and vulnerable adults are 4 percent, and assault is only 1 percent. Community Restorative Justice Ireland, Community Restorative Justice Ireland Annual Report 2013 (Belfast: [2014]), 29.

153 Community Restorative Justice Ireland, Community Restorative Justice Ireland Annual Report 2011 (Belfast: [2012]).
consulting our staff and volunteers on the issues.” Likewise, a local leader reported:

The biggest challenge for us was dealing with the new policing dispensation.... This has been very difficult for the practitioners as the whole ethos of CRJ up to now has been that the victim had the right, except in certain circumstances, had the right to choose CRJ as the vehicle to deal with their issue. The practitioners understand the protocol and understand that we can’t deal with crime but it doesn’t lessen the feeling that we are, in some way, letting the victim down and it doesn’t get any easier the number of times that we do it.

CRJI had presented itself as an alternative to the criminal legal system, and members of the community continue to look to the staff for that service, either because they prefer the restorative justice framework or because they want to avoid contact with the police. Having suffered a crime and sought out assistance, to then be told for reasons related to national policy and party politics that the police were the only remaining option, would not just come as a disappointment, but must feel like a betrayal.

The Search for Legitimacy

Whatever the shortcomings of these historical examples, they do at least suggest the possibility of crime control without police, and perhaps even without the state. What’s clear is

---

155 Nevertheless, he seems resigned to his role: “It would be fair to say that we have been to the forefront in encouraging our communities to work with the police and to convince them that crime should be reported to the PSNI and not to us.” CRJI, Annual Report 2008, 5.
156 The differences between community-based systems and the modern police institution are striking. Compare, for instance, the characteristics distinguishing modern police (listed in chapter 2 of this volume) to those
that in none of these cases were the people dependent upon the government to protect them—in fact, quite the opposite!

Based on his observations in Natal, South Africa, David Nina concludes “that there could be peace when the formal sovereign is not in control ... [but] only if the structures of popular participation are running democratically and are accountable to the immediate community in which they operate.” Toward these ends, Harry Mika and Kieran McEvoy identify seven elements necessary for legitimacy:

1. **Mandate** is the broadly-based license for program development which is secured through basic research (audit) in areas to ascertain needs and resources.

2. **Moral authority** is the basis upon which the community acquiesces power and authority to representative members.

3. **Partnership** is the sense of restorative initiatives emanating from the community, empowering and building capacity in the community, parlaying local resources to the ends of antisocial crime control and prevention in the community, address-

157 Daniel Nina, “Popular Justice and the ‘Appropriation’ of the State Monopoly on the Definition of Justice and Order: The Case of the Anti-Crime Committees in Port Elizabeth,” in *The Other Law: Non-State Ordering in South Africa*, ed. Wilfried Schärf and Daniel Nina (Lundsdowne: JUTA Law, 2001), 115. Nina also notes that, in places where the civic associations refused to cooperate with the government, “Peace and order existed without the state. In fact, the state was perceived as an agent of chaos and disorder.” Ibid., 106.
ing needs of community members who are victims and offenders, and working constructively with other community groups, associations, and organizations....

(4) Competence involves the purposive and long term development of appropriate skill sets among individuals and organizations in conflict resolution including training materials and courses.... Generally, competence involves program performance at a level sufficient to satisfy key program objectives (addressing needs of victims and offenders, community safety, crime prevention, and the like), thereby both demonstrating and affirming community capacity to respond to antisocial behavior and find justice for its members.

(5) Practice includes establishment of standards for justice processes, protection of participants, and responsiveness to the community....

(6) Transparency involves mechanisms for public scrutiny, local management and control, and opportunities for public input....

(7) Finally, accountability refers to ongoing program monitoring and evaluation, to ascertain compliance with published standards, as well as program impact and effectiveness.\(^{158}\)

If we look back at the frustrations expressed, not merely by critics but by practitioners of the type of accountability processes currently employed in queer/feminist/anarchist circles in the United States, I believe we’ll find that many of them correspond to a shortcoming in one or more of these areas. At present, there are no shared norms, no common standards, understandings, or expectations—even within the respective subcultures or political milieus—on which we might base a mandate, a claim of authority, a partnership, measures of competence, ethical practice, or accountable evaluation; there is, in

short, no agreement as to what justice is, what it entails, or how it is achieved. There is no institution that could hold a community mandate, exercise authority, engage in such partnerships, develop the necessary competence, enact just practices, and make itself transparent and accountable. Worse, for the most part, there is no community available to take on the corresponding roles.

That’s not to suggest that there couldn’t be. And a community doesn’t necessarily have to achieve any sort of unanimity for the required sense of legitimacy to take hold. In fact, the most successful of the alternative justice programs have been those that arose precisely in contexts where legitimacy was most sharply contested. It was, in other words, because the state’s authority was being systematically challenged that the alternatives arose, gained acceptance, and (for a time, and to some degree) served their purpose. It was the social movements to which they were attached that brought them into being, gave them their oppositional character, linked them to the community, and loaned them a sense of legitimacy. (That is even true, though in a different way and to a lesser extent, of the gang truces.) But then, when those movements crested, as they were defeated or co-opted, the alternative justice programs shared their fate. If they didn’t wither away, they at least lost their oppositional character. Detached from social movements, they could then be drawn into the state apparatus, sometimes as an adjunct to police, prison, and probation, and sometimes as a generally harmless social service agency. In any case, the revolutionary potential was lost, and what started as a vehicle for liberation became, instead, another tool for state power.
I have argued that both the legitimacy and the success of an alternative justice system will likely depend on its connection to a broad and oppositional social movement. And I have suggested that to permanently abolish the police that movement needs to seek to transform society without also trying to seize state power. Of course, if we take that possibility seriously we still face the hard work of finding an alternative system suitable to a diverse and disjointed society like that of the United States. We are left, I feel, with more questions than answers.

Reflecting on the work of Community United Against Violence, Morgan Bassichis asks:

---

159 Elvis Costello and the Attractions, *Armed Forces* (Santa Monica, Hip-O Records, 2007). Of course, Nick Lowe deserves (and rarely receives) credit for writing the song.

160 Counter-institutions should only be one part of a broader anti-crime strategy. Commonsense measures should also be taken to add to the public safety. Some public safety tasks could simply be taken on by fire departments, health departments, and other agencies. Victimless crimes should be decriminalized, with social resources invested in drug and alcohol treatment programs and counseling services rather than law enforcement and prisons. Other elements require substantial social changes, like reducing poverty and unemployment, and combating domestic violence by improving the real opportunities available to women and thereby eliminating their dependency on men. For other ideas, see: Center for Research on Criminal Justice, *Iron Fist and the Velvet Glove*, 162; and Currie, *Crime and Punishment in America*, especially chapters 3 and 4.

161 Or, as Critical Resistance’s Training and Infrastructure Director Kai Lumumba Barrow put it: “We don’t have answers.... We have analysis, but not answers.” Quoted in Liz Samuels David Stern, eds., “Perspectives on Critical Resistance [Roundtable],” in *Abolition Now! Ten Years of Strategy and Struggle Against the Prison Industrial Complex*, eds. CR10 Publications Collective (Oakland: AK Press, 2008), 4.
How can organizations such as CUAV help advance a liberatory approach to ending violence? How can we simultaneously address the urgent need for healing in our communities and the need for confronting the systemic conditions that create violence? How can we effectively push back on the state systems of punishment and violence given their scale and speed? How will we negotiate backlash and painful mistakes that will challenge our credibility and capacity? How can we practice deeply the values of sustainability and accountability organizationally that we are working toward in our communities? 

How can we ensure that our notions of community safety, accountability, and justice are not misused as justifications for shame, exile, or punishment (as they are by the current system)? How can we practice challenging violence without replicating state power, the PIC [prison-industrial complex], or the many forms of oppression and abuse we are working hard to eliminate? What internal accountability do we need to cultivate for community accountability to be authentically transformative rather than retributive? 

The Burning River Collective similarly admits: “There are many difficult questions that we are still grappling with…. What if a survivor wishes to go to the police about an assault? … The government has used many despicable tactics against activists, should not we acknowledge that false rape accusations/planting a false accuser of sexual assault is a real possibility? How do we handle this possibility when we know we should believe the survivor? … What are the rights of the accused? We know that 98% of the time, accusations are true, but what about the times that they may not be true? How do we handle that? … What if homophobia and racism are reasons for accusation? … How do we truly go about healing our community? What are some concrete things that we can do to positively transform this terrible experience into a place of growth for all in our community? Apart from putting them in prison or chasing them from our community, how do we handle perpetrators? What if they are willing to change and work on themselves, how do we gauge their progress? What are steps that can truly show positive change in a perpetrator?” Angela, “Burning River Collective’s Sexual Assault Work,” 58–59.

Clearly, none of our models are perfect. No model is. No model can be. But also, luckily, no model needs to be. The work of a social movement, as Orwell pointed out, “is not to make the world perfect but to make it better.” An insistence on perfection does not, in general, lead us to utopia but instead discourages us from making the attempt. Any movement that challenges power has to take risks, which means that sometimes we will make mistakes; the crucial thing is that we avoid repeating them.

The efforts I’ve described here—and others, documented elsewhere—were bold, inventive, and radical. They sought new means of achieving justice, ones that did not rely on the state and actively avoided replicating state systems on a smaller scale. Many of them also sought new types of justice, understood not as vengeance or retribution, but as personal and social transformation, addressing both the immediate causes and the deeper roots of crime. Understood as initial attempts rather than final outcomes, such efforts are heartening, even inspiring. Despite their decisive, and sometimes tragic, limitations, their ultimate significance may lie in the potential they embodied and the possibilities they embraced. Viewed as experiments, at least part of their success or failure will depend on our willingness to learn from their examples and improve on them.

From that point of view, it is actually good to have the sort of questions Bassichis proposes. They suggest a curiosity, a cautiousness, and also a courage. They show a willingness to engage with the world, to face its complexity, to be proved wrong.

164 For other examples, see: Richard L. Abel, ed., The Politics of Informal Justice, Volume 2; Rachel Herzing and Isaac Ontiveros, “Reflections from the Fight Against Policing”; and Rose City Copwatch, Alternatives to Police (Portland: 2008).
again and again until finally we get it right—or, at any rate, *more* right. It is in this vein that INCITE’s Andrea Smith advocates “revolution by trial and error”\(^\text{165}\)—which is, of course, the only kind there is.

But as we question, as we try and err, it is still important to identify the values and outline some standards by which we might judge our failures and our success.\(^\text{166}\) For I believe that how we achieve justice matters. Indeed, it is largely by the means that justice will be defined.\(^\text{167}\)

It is no accident that many of Mika and McEvoy’s criteria for legitimacy represent practical limitations on the alternative justice system’s power, and especially, on the possibility for abuses of that power. There are dangers to popular justice that cannot be ignored. The Blue Book identifies the major weaknesses of the earlier Republican arrangement: inconsistency, a lack of training, few resources, a paramilitary character, the absence of accountability, the removal of the community from the process, and the reliance on the IRA.\(^\text{168}\) There is also the danger that informal systems could be used to settle personal grudges, attack political rivals, or give expression to the community’s prejudices.\(^\text{169}\) The chief hazard, as one Irish feminist organization worried, is the “danger of groups being mirror-...
images of the forces they are combating in terms of tactics and attitudes, even if their objectives remain revolutionary.170 These dangers provide clear guidance for those who wish to fight oppression. Underlying the search for justice is a simple principle: our counter-institutions cannot be immune to the demands we place on the existing institutions—demands for democracy, accountability, transparency, and most of all, real community control.

It seems to me that there are four standards against which every justice project should be measured. The first is its own immediate goals: Did we accomplish what we set out to do? The second is a comparison with the state: Were our process and outcomes—taken as a whole—better or worse than what we could expect from calling the police? Third, inaction: How do our efforts, in their practical results, compare to simply doing nothing? The fourth is our ideal of justice: How did it inform our actions? How was it present in the outcome? Where did we fall short?

It is important, in the course of evaluation, to consider everyone’s experiences, everyone’s interests—victims, perpetrators, witnesses, mediators, and the community at large. With those various, oftentimes conflicting perspectives in mind, one should nevertheless be able to reach some broad conclusions as to what went well and what went badly, and why. If we fail to meet our immediate goals, it may be that our process needs to change, or it may be that the goals were unrealistic. If we fail to do even as well as the state, our process definitely needs to change.171 Likewise, even if the outcome is somewhat bet-

170 Quoted in Munck, “Repression, Insurgency, and Popular Justice,” 87. These concerns are real, and they should be carefully weighed. But we should also remember that the practical alternative is the justice of the state—that is, the justice of the police, the courts, overcrowded prisons, and lethal injections.

171 Drawing from the experience of the Northwest Network of Bisexual, Trans, Lesbian, and Gay Survivors of Abuse, Connie Burk observes that “it’s
Serving as a short introduction to Philly Stands Up and its model for accountability, this pamphlet includes their Points of Unity, discussions of their approach and analysis, and an essay introducing their survivor-support counterpart, Philly’s Pissed.

South Africa

Providing both broad historical overviews and case studies, this collection examines the practices and the implications of exercising justice independent of the state in South Africa.

Northern Ireland
Jim Auld et al. *Our Practice: The Blue Book [Designing a System of Restorative Community Justice in Northern Ireland]*. Available at crji.ie.

On the other hand, if our attempts at justice actually match our ideals—probably we are aiming too low. For as we approach our ideals of justice, freedom, and equality, as our sense of the possible expands, our vision grows clearer and we learn to see power where it was invisible to us before. Therefore, in proportion to our achievements we also discover new obstacles to overcome. While our exercise of justice must be grounded in reality, in the here and now, in the world we have and with the people who are in it, our practices should also point us toward something better, toward the world we want to create and the people we want to become.

Generation Five, an organization attempting to end child abuse without recourse to the prison system, rightly notes, “We must create the solutions to the problems we face, and we must create the world in which we want to live.” They continue:

The only way to liberate ourselves from violence and oppression is to envision that possibility, to take one step at a time, and do it together. The more steps we take toward this end, the more possible it becomes. Transformative Justice is both a personal process and a vision for a more just world; it is a lesson plan for what we can learn together and a strategic plan proven nearly impossible to achieve the idealized outcomes of the legal system (justice, restitution, rehabilitation) but “it is fairly easy to replicate its ‘revictimization’ of survivors”; and, “without important protections of due process” (e.g., “the right to face your accuser, the burden of evidence, the right to a timely trial,” and the like), “it’s easy to cause harm to the accused as well.” Burk, “Think. Re-Think. Accountable Communities,” 270.

Burk again: “We rarely designed, implemented, or participated in processes that worked in the ways they were intended to or with outcomes on par with the huge input of time and energy and human endurance that they seemed to require. A satisfying, useful resolution was much rarer than generating a new hot mess that needed its own accountability process!” Ibid., 272.

for what we can do together. The only way to acquire a world without violence is to built it.¹⁷⁴

Modest demands can be the seeds of major upheaval. The demands for human rights, for community control, for an end to harassment and brutality—the basic requirements of justice—ultimately pit us against the ideology, structure, interests, and ambitions of the police. The modern police institution is at its core racist, elitist, undemocratic, authoritarian, and violent. These are the institution’s major features, and it did not acquire them by mistake. The order that the police preserve is the order of the state, the order of capitalism, the order of White supremacy. These are the forces that require police protection. These are the forces that created the police, that support them, sustain them, and guide them. These are the ends the police serve. They are among the most powerful influences in American society, and some of the most deeply rooted. In this sense, our society cannot exist without police. But this needn’t be the end of the story. A different society is possible.

¹⁷⁴ Ibid., 20.
Acknowledgments

Books do not write themselves; and I doubt that many authors manage without an enormous amount of help.

I know I have benefited from the advice, encouragement, and direct practical assistance of a great many people—nearly all of my friends, a large number of acquaintances, and not a few actual strangers. Thank you all, very much.

Thanks, again, to Daniel Buck, Carl Caputo, Jamie Dawson, Laura Grant, Candace Larson, Geoff McNamara, Tabatha Millican, Missy Rohs, Clayton Szczech, Robert Williams, and Shira Zucker—all of whom read and corrected earlier drafts. I am particularly grateful to Andrea Ritchie for her comments on the near-final draft, and of course, for her gracious introduction to this edition.

And as always, I owe special thanks to Emily-Jane Dawson. I was fortunate to receive her advice in the course of my research, her help in locating obscure sources, her criticism concerning early drafts of the manuscript, and her technical assistance in the design of the graphics in this volume. But above all else, I am grateful for her friendship.

Chapter 3: The Genesis of a Policed Society

Chapter 4: Cops and Klan, Hand in Hand

Chapter 5: The Natural Enemy of the Working Class

This combination of class bias and Puritanical moralism was characteristic of the period, and translated into rigid standards of conduct for women especially. Its effect was evident, for example, in New York’s campaign against prostitution. “In a city so concerned with defining both women’s proper place and the place of the working class, the alarm over prostitution
stemmed in part from general hostilities to the milieu of laboring women from which prostitutes came.” Stansell, *City of Women*, 175.

Especially in the South, enforcement was highly discriminatory, part of the new model for subjugating the Black population after slavery. Davis, *Are Prisons Obsolete?*, 29; and Alexander, *The New Jim Crow*, 31.

The brunt of repression was felt in Allegheny County and western Pennsylvania. There, the authorities responded by deputizing 5,000 scabs and banning all public assemblies—including, in some places, indoor meetings. Mass arrests and physical attacks became common, with strikers facing violence from police, deputy sheriffs, scabs, company guards, vigilantes, and sometimes state troops. Many were injured, twenty were killed. Under such pressure, the strike collapsed in January 1920. The workers returned to work, having won nothing. Samuel Yellen, *American Labor Struggles, 1877–1934* (New York: Pathfinder, 1936), 261–63, 271; Brecher, *Strike!*, 123; and Zinn, *People’s History*, 371–72.

In 2003 several janitors walked off the job to protest the removal of a sympathetic supervisor. One of them later recalled, “One manager threatened to call immigration if we didn’t go back right away.” Quoted in Human Rights Watch, *Blood, Sweat, and Fear*, 97.

FOPs were also organized geographically, rather than by department. And they sometimes formed auxiliaries including people from outside of law enforcement. William J. Bopp, “The Police Rebellion,” in *The Police Rebellion*, ed. William J. Bopp (Springfield, IL: Charles C. Thomas, Publisher, 1971), 13.

Afterword: Making Police Obsolete

Alternatives to Policing

The second volume of this collection is the single best source on alternative justice internationally, providing a survey of historical examples from around the world. It includes descriptions of informal justice from Weimar Germany, Argentina, Chile, Portugal after 1974, and Mozambique both before and after independence, as well as general discussions of the principles underlying such systems.

This collection examines informal justice systems in a variety of contemporary contexts. It includes sources I cite below in the discussions of South Africa and Northern Ireland.

Longmire presents straightforward alternatives to the police, the courts, and the prisons—in short, to the entire criminal justice system as it now exists.

Broken Windows

Counterinsurgency

This classic text of radical criminology anticipated many developments that have since reached fruition. While clearly a product of its time, much of its analysis remains relevant today.

The police faced similar reprisals when they acted in solidarity with other workers during the Baltimore AFSCME strike of 1974. The strike began among garbage collectors demanding higher pay. Soon, the strikers were joined by other public employees, including jailers, park workers, zoo keepers, highway workers, and sewer engineers. After several days, on July 11, the police joined the strike, in violation of Maryland law. Looting ensued, and one rioter was killed by an on-duty officer. The next day, Governor Marvin Mandel sent in the state police, with an armored car and police dogs. The National Guard was placed on alert. By July 15, most of the city workers were back on the job, and the strike was defeated. The police union was fined $25,000, and the union president was personally fined another $10,000. Russell, City in Terror, 242–44. See also: Pamela Irving Jackson, Minority Group Threat, Crime, and Policing: Social Context and Social Control (New York: Praeger, 1989), 81.

James Richardson notes the political advantages of this arrangement for mayors: “A hands-off policy means that the mayors can disclaim any responsibility for police operations.... Thus ‘no political interference’ may not always be self-sacrificing. A mayor may give up police patronage or influence, but by so doing he also gives up any political responsibility for the police.” Richardson, Urban Police, 131.

Ironically, the Progressives failed to recognize the biases inherent in this perspective. Reformers identified the interests and objectives of their own class as those of the public at large. The ability to sustain such a view, of course, relies on one’s own position in the dominant group; it may be that we can ascertain when a class begins to achieve hegemony by the emergence of just such a perspective.

They could also have pointed to, more notoriously, the economic system of Fascist Italy. Michael T. Florinsky, Fascism and National Socialism: A Study of the Economic and Social Policies of the Totalitarian State (New York: Macmillan, 1936). For

Black people were not the only group subject to discrimination like this. New York’s Police Benevolent Association excluded women until 1968. Levi, Bureaucratic Insurgency, 27.

This analysis has clear implications for our understanding of other concepts, including “state autonomy,” “state interests,” and “reasons of state.” Clayton Szczech points out that “the state cannot effectively pursue its self-interested agenda because no such unified agenda exists.... For example, what the Department of Defense wants and needs may not always coincide with what the Department of Commerce wants and needs, and both of them must utilize networks with social groups, elected officials and other bureaucracies to realize any goals at all.” Szczech, “Beyond Autonomy or Dominance,” 17.

The absence of clearly demarcated boundaries (defining the limits of the state) seems to me a theoretical advantage. It allows us to replace a binary opposition, in which an agency is always either identified with the state or not, with a continuum in which it should be considered a part of the state to the degree that it is incorporated into the relevant power networks. Privatized services, subsidized research and development, and police unions are thus more a part of the state than are church-run charities, family farms, and the IWW, but less a part of the state than Congress, the Army, or the courts.

Chapter 7: Secret Police, Red Squads, and the Strategy of Permanent Repression

As Winston Grady-Willis point out, there were also internal reasons for the Panthers’ decline, which the FBI sought to exploit. These included “(1) inter-party conflict, (2) strategic organizational mistakes, and (3) a new authoritarianism.” Winston A. Grady-Willis, “The Black Panther Party: State Repression and Political Prisoners,” in The Black Panther Party [Reconsidered], ed. Charles E. Jones (Baltimore: Black Classic Press, 2005). 398.

Despite the limits of its conservative libertarian ideology, the Cato Institute has produced a solid overview of police militarization.

Community Policing

The Panthers themselves bear some of the blame for Pratt’s conviction. As the result of a division between Huey Newton and Eldridge Cleaver over the direction of the Party, no one from Newton’s faction (which was based in Oakland) would testify in Pratt’s defense. Newton had expelled Pratt, his wife, Sandra Lane (Ngondi ji Jaga), and Cleaver, and labeled them as enemies of the people. In the Black Panther newspaper, he declared that “Any Party member or community worker who attempts to aid them or communicate with them in any form or manner shall be considered part of their conspiracy to undermine and destroy the Black Panther Party.” Quoted in Akinyele Omowale Umojo, “Set Our Warriors Free: The Legacy of the Black Panther Party and Political Prisoners,” in The Black Panther Party [Reconsidered], 422–23.

The order undermined Pratt’s defense. Worse, soon thereafter, Sandra Lane was found dead by the Los Angeles freeway, her body stuffed into a sleeping bag and dumped by the side of the road. Of course, this dispute itself had FBI assistance. The Bureau exacerbated tensions through the use of forged letters and spread rumors that Pratt was planning to assassinate Newton. Ward Churchill, “‘To Disrupt, Discredit, and Destroy’: The FBI’s Secret War Against the Black Panther Party,” in Liberation, Imagination, and the Black Panther Party: A New Look at the Panthers and their Legacy, eds. Kathleen Cleaver and George Katsiaficas (New York: Routledge, 2001), 109–11; Umojo, “Set Our Warriors Free,” 422.

Nicholas Wilson provides an extensive review of the Bari case, highlighting the evidence of FBI involvement in the bombing. In addition to the FBI-run bomb school, Wilson points to an earlier effort (involving some of the same agents) to discredit Earth First! by ensnaring leading members in a bomb plot, the COINTELPRO background of Special Agent in Charge Richard Held, and—perhaps most troubling—the car bomb explosion of March 9, 1970, which killed SNCC leader Ralph Featherstone. The FBI declared that Featherstone...

Wilson could have also looked back to the 1966 bombing of the W.E.B. Du Bois Club in San Francisco. The FBI refused to investigate, but planted stories in the media blaming the club’s members for the explosion. Seth Rosenfeld, Subversives: The FBI’s War on Student Radicals, and Reagan’s Rise to Power (New York: Farrar, Strauss and Giroux, 2012), 318–19.

Concerning “radicalization incubators,” two NYPD intelligence analysts explain: “These incubators serve as radicalizing agents for those who have chosen to pursue radicalization. They become their pit stops, hangouts, and meeting places. Generally these locations, which together comprise the radical subculture of a community, are rife with extremist rhetoric. Though the locations can be mosques, more likely incubators include cafes, cab driver hangouts, flophouses, prisons, student associations, nongovernmental organizations, hookah (water pipe) bars, butcher shops and book stores. While it is difficult to predict who will radicalize, these nodes are likely places where likeminded individuals will congregate as they move through the radicalization process.” Mitchell D. Silber and Arvin Bhatt, Radicalization in the West: The Homegrown Threat (New York City Police Department, 2007), 22.

It seems likely that this group of friends came under scrutiny in 2010, when the city was host to numerous militant anti-

A short overview of the suppression of the environmental and animal rights movements during the first years of the twenty-first century. For ongoing coverage of the repression of those and related movements, visit Potter’s blog: greenisthenewred.com.

**Resisting Repression**

This brief, inexpensive book touches on the history of political repression and describes some of the tactics police still use. Its real virtue, though, lies in its practical advice about fighting repression. There is no telling how many people this book has helped keep out of jail.

Chapter 8: Riot Police or Police Riots?

**Crowd Control Models**

As Zeskind notes: “The attempt to squelch these violent vanguardists began just months after government officials realized the full import of the accomplishments of Robert Mathews’s Order gang.... [The] Reagan administration’s Justice Department was unprepared for the task. It had previously demonstrated little interest in federal prosecutions of attacks by white separatists on black people and other ordinary civilians.... However, once white supremacists started killing law enforcement officials and robbing banks in 1983 and 1984, Attorney General Meese and the FBI took a more aggressive federal posture. The FBI planted more confidential informants inside white supremacist groups, started tapping phones, and made arrests in a number of the incipient criminal cases.” Ibid., 145–46.

Chapter 8: Riot Police or Police Riots?
The Oakland police took the opportunity to have a shoot-out with the Black Panthers, who were actively (and successfully) discouraging rioting. The cops fired over 2,000 rounds into a house where Eldridge Cleaver and Bobby Hutton were hiding in the basement. They then filled the house with tear gas, starting a fire in the process. Cleaver and Hutton surrendered. Cleaver, who stripped naked before leaving the house, was beaten by police. Hutton was shot and killed after he surrendered. He was seventeen years old. Ali and Watkins, 1968, 76–77; and Henry Hampton et al., *Voices of Freedom*, 514–17.

One of the provocateurs was “Anna,” who went on to entrap Eric McDavid in a case discussed in chapter 7. According to one protest organizer, Anna convinced a group of high school students to block an intersection immediately in front of deputies in riot gear, leading them to make arrests and clear the street. Cosmo Garvin, “Conspiracy of Dunces,” *Sacramento News and Review*.

Alex Vitale characterizes the two approaches as “Command and Control” and “The Miami Model,” respectively. This labeling forgets, however, that in Miami even compliant protestors were subject to the use of force. Vitale, “The Command and Control and Miami Models,” 406–7.

In his observations of anti-globalization demonstrations in the first years of the twenty-first century, Luis Fernandez documents the recurrence of many of these elements. Luis Fernandez, *Policing Dissent*, 84–85 (negotiations as control), 102–16 (intelligence operations), 124 (hard zones), 132–33 (protest “pens”), 147–51 (media relations), 151–56 (public relations).

For instance, OWS had initially intended to take Chase Manhattan Plaza, but police had created a hard zone, surrounding it with barricades. The police had also established a designated protest area near to the stock exchange, but Occupy activists refused to use the authorized area and moved to Zuccotti Park instead. Gillham, “Strategic Incapacitation,” 4.

Chapter 9: Your Friendly Neighborhood Police State

Donner’s book is without question the defining text on the history of the red squads, recounting their exploits from the 1880s to the 1980s.

COINTELPRO

Authoritative documentation of government crimes.

War on Terror

Aaronson systematically examines the FBI’s use of infiltrators and provocateurs in concocting terror cases.

A 10 p.m. curfew provides a useful tool for getting young people into the computer system. Enforcement is strict, but selective. Latino youth are five times more likely than White youth to be arrested for curfew violations; and Black people are three times more likely than White people. Ibid., 123.

Compare with this description, dating from the 1850s: “It was a stirring scene, when the drums beat at the Guard house in the public square ... to witness the negroes scouring the streets in all directions.” Quoted in Rousey, Policing the Southern City, 21.

Perhaps oddly, some of the strongest voices against military involvement in domestic policing come from within the armed forces. In practical terms, military commanders worry that police operations reduce combat effectiveness, are bad for morale and discipline, and damage the citizenry’s trust in the military. More idealistic officers express concerns about the separation of powers, the centralization of police command, mission creep, and civil liberties. See, for example: Dunlap, “Thick Green Line.”

In the early 1970s, the LAPD began organizing neighborhood meetings as part of its team-policing program (called the “Basic Car Plan”). The police used these meetings to recruit informants and to circulate petitions calling for the reintroduction of the death penalty. Huey P. Newton, “A Citizen’s Peace

Repression: Theoretical Perspectives

Kitson’s book should be required reading for every radical. Not only does he offer a clear view of repression and state strategy, he also has a good grasp on how and why insurrections succeed or fail. He thus has a much better understanding of the revolutionary process than do most would-be revolutionaries.

This pamphlet serves as a kind of cheater’s guide on political repression, translating the technical literature into clear and digestible prose without dumbing it down.

Red Squads

One would think that community policing advocates would be careful about using the words “collaborate,” “collaboration,” and “collaborators,” given their Nazi-era connotations. Strangely, the critical analyses of community policing rhetoric (e.g., Klockars, “Rhetoric of Community Policing” and Kappeler and Kraska, “Textual Critique”) seem to have missed this point.

Attorney Paul Richmond likewise notes a transfer of personnel from community policing assignments to paramilitary units, usually accompanied by promotions. Paul Richmond, untitled lecture (Portland, Oregon: Liberty Hall, August 26, 2002); Balko, Rise of the Warrior Cop, 219–20.

In the community policing context, “Each officer had to be imbued with the department’s values so that they could translate them into the reality of life in the unpredictable situations that would be encountered. Management’s job was not to make choices for officers; it was to instruct officers about what was expected of them in all situations.” Skolnick and Bayley, New Blue Line, 85.

The French military theorist David Galula had previously suggested this sequence, to be applied “In a Selected Area”: “1- Concentrate enough armed forces to destroy or to expel the main body of armed insurgents. 2- Detach for the area sufficient troops to oppose an insurgent’s comeback in strength, install these troops in the hamlets, villages, and towns where the population lives. 3- Establish contact with the population, control its movements in order to cut off its links with the gueril-

This unwieldy collection of notes includes a detailed analysis concerning the nature of bureaucracy.

Police Unions and Blue Power

Black served as the chair of the short-lived New York Civilian Complaint Review Board.

Braverman barely mentions the police, but his work informs my discussion of class status.

Reiner concentrates on the English police, but much of his analysis of their position and function in capitalist society is applicable in the U.S. context as well.

Lee and Seekings report that by the 1990s Street Committees were generally composed of equal numbers men and women, but twenty-eight out of twenty-nine groups surveyed had a male leader. Lee and Seekings, “Vigilantism and Popular Justice,” 106–7.

State Police
A reply to *The American Cossack*, in defense of the state police.
This volume collects evidence against the Pennsylvania State Constabulary, including affidavits, newspaper articles, and legislative debate. Unfortunately, the documents are more piled together than organized, making for a clumsy presentation.
Chapter 6: Police Autonomy and Blue Power
The Progressive Era and Bureaucratization
A politically sophisticated sociological study, this volume provides an important antidote to the myopia of government commissions.

The companion volume to the documentary series Eyes on the Prize, this book consists primarily of interviews with people who participated in or witnessed the major events of the civil rights movement.

The *Black Paper* collects affidavits concerning the treatment of African Americans in Mississippi and the suppression of the civil rights movement there. It is thus a worthy historical document, but slow reading.

Hurricane Katrina

Solnit examines how people behave in disasters, and finds that most act in ways that are rational, humane, and solidaristic. Her chapter on Katrina ranks among the best things written about the storm, and the most hopeful.

Chapter 5: The Natural Enemy of the Working Class

I have tried to thoroughly document my sources in the endnotes, and I see no need to reproduce those efforts in this bibliography. Instead, I list the works I found most useful in my research, and briefly comment on them where necessary.

I begin with sources on general topics, then list those remaining, roughly following the structure of the text. There is a certain amount of unavoidable overlap between categories, but in the interest of space I have kept repetition to a minimum. The principle of organization is this: a source is assigned to the chapter for which it has the greatest significance, and then placed in the narrowest applicable topic section. For example, though I quote from it throughout the text, Rodney Stark’s book *Police Riots* is listed only once, under the heading for chapter 8 (“Riot Police or Police Riots?”) in the subsection titled “Crowd Control Models.” By this reasoning, it follows that a reader looking for information on the Haymarket Affair should start by looking in the “Haymarket” section among the sources for chapter 7, but she would also do well to consider the sources listed under “Red Squads” (also in chapter 7) and “Labor History” (from chapter 5).

I have focused here on print sources, rather than trust internet material to remain stable from one day to the next. Moreover, I have given special priority to books, as these tend to be of more general use than the numerous magazine, newspaper, and journal articles appearing in the notes. The best articles are usually anthologized anyway; where practical, I have grouped short works together under the entries for the relevant anthologies. Unfortunately, many of the best books are out of print.
and hard to come by. (That said, I managed to lay my hands on all the material I cite, so it is possible. My advice is that you ask a public librarian about inter-library loan; our public institutions are sometimes much better than we realize.) It will be observed that the majority of authors I cite are men, usually academics or police administrators. This is emphatically not the result of intentional selection on my part, but reflects the overall composition of the field. It is often useful to see what insiders have to say, especially about such an insular and, at times, secretive institution as the police—however, I have tried in the text to include the voices of those who are excluded from and marginalized by the institutions of social power. I have continued that effort in this bibliography.

It will also be noted that I have relied almost exclusively on secondary sources. Partly this was a practical expedient, suited to the scope of the argument. But it brings with it an additional advantage: none of my conclusions rely on the discovery of some new fact, only on a re-interpretation of what is already known. If the facts are agreed upon, those who would fault my conclusions will be forced, it is hoped, to engage my arguments.

General Topics

American History

Clearly written and engaging, this book presents American history “from below,” emphasizing the experiences of Native Americans, African Americans, women, workers, and other oppressed peoples.

Critical Criminology

The two works listed here are each short, readable volumes demolishing the conventional wisdom about crime, its causes, the law, its enforcement, the effectiveness of prisons, and related topics.

Immigration

The Civil Rights and Black Power Movements

Chapter 4: Cops and Klan, Hand in Hand

The Ku Klux Klan and Racist Terror

Centering on the fear of the supernatural and its use as a means of intimidation, this study recounts the experiences of Black people as recorded in their folk tales and preserved through the oral tradition. Particular attention is given to comparisons between the slave patrols and the Ku Klux Klan.

Melinda Meek Hennessey. To Live and Die in Dixie: Reconstruction Race Riots in the South. PhD diss., Kent State University, 1978. [University Microfilms International.]

Racial Profiling

Police Histories

The typical police history focuses on one city and covers a century or less. If it pays attention to the early period, it traces in minute detail the gradual replacement of the night watch with the modern institution. If it discusses the latter part of the nineteenth or the first half of the twentieth century, it focuses on the interplay between official corruption and reform efforts. There are variations of scope and emphasis, but that is the standard formula.

While very dry, Bacon’s dissertation presents an exhaustive account of early police systems leading up to the modern form. One is tempted to say that the account is too exhaustive, but it offers a goldmine of details for anyone willing to dig.

This is the most readable of the histories listed in this section. It traces the course of reform efforts to the early 1970s.

Harring emphasizes the class-control aspect of the early police institution, overshadowing consideration of other features.

Monkkonen provides excellent coverage of the public-welfare functions of the police at the turn of the twentieth century.

Steinberg’s analysis centers on the end of private prosecution, rather than the modernization of policing. Nevertheless, the book paints a fascinating picture of nineteenth-century city politics.

Introduction: Broken Windows, Broken System, by Andrea Ritchie

Chapter 3: The Genesis of a Policed Society

Political Machines

Tilly doesn’t directly discuss urban political machines, but he does articulate a theoretical perspective on government racketeering.

The Demand for Order

The moral panic accompanying urbanization arose from multiple factors and produced complex results. Thus, many of the sources below pay little immediate attention to policing but describe nineteenth-century standards of public order in detail.

Chapter 2: The Origins of American Policing

English Police

Slave Patrols

Until quite recently, the slave patrols have occupied one of those almost-forgotten corners of our nation’s story. As a result, relatively few historians have appreciated their role in the development of policing.

Sally E. Hadden. Slave Patrols: Law and Violence in Virginia and the Carolinas.

Though his dissertation provides solid information on the subject, Henry’s racist commentary tarnishes an otherwise excellent source.

Racialized Policing of Gender and Sexuality

Chapter 1: Police Brutality in Theory and Practice

Riots

Melvin Oliver et al. “Anatomy of a Rebellion: A Political-Economic Analysis,” in Reading Rodney King: Reading Urban

The Prevalence of Police Violence

Reliable information on police violence is altogether rare. For reasons I discuss in chapter 1, reporting is incomplete and the presentation of data often downplays both the level of violence and its prevalence. Nevertheless, the most comprehensive studies available are supplied by the Bureau of Justice Statistics, www.ojp.usdoj.gov/bjs/ and the National Institute of Justice, www.ojp.usdoj.gov/ncjrs. Another resource for similar information is the National Criminal Justice Reference Service, www.ncjrs.org.

Institutionalized Brutality and Police Culture
