We are following with concern the escalating criminal behavior of the international regimes between Israel, the United States, and Iran. In reality, this conflict is deeper than its media presentation; it is an attempt to drag the entire region into a senseless war in which the peoples will become victims of authoritarian regimes and of global imperialism's attempts to dominate in new ways.

It is the right of peoples to change their political systems themselves, not for another state to do so in order to strengthen its allies. What the United States seeks in this region is a new ally that will facilitate the exploitation of resources, the control of peoples, and the suppression of resistance movements.

Resistance to imperialism through dictatorship is nothing but a new form of authoritarianism. While we condemn the fascist Iranian regime and stand in solidarity with the peoples striving for freedom, we affirm that Israeli intervention in the region and its

consequences amount to nothing more than replacing Iranian dictatorship with American dictatorship.

From our complex position, at a time when a senseless imperialist war—supported by the same Iranian and American alliances—looms, we in the group firmly reject the control of peoples under the pretext of bringing them freedom. Peoples seize their freedom themselves; no one does it for them.

We call on comrades around the world to unite and stand in solidarity with comrades in Iran and Lebanon. We tell our comrades in Iran and Lebanon that despite our difficult situation, we are following the developments on your side, our hearts are with you, and our homes are open to you if needed. We will do everything we can to cooperate with you.

Long live the struggle of the liberation movement across the world.

No to imperialist war.
